Death Traps Belton Y. Cooper 2007-12-18 "An important contribution to the history of World War II . . . I have never before been able to learn so much about maintenance methods of an armored division, with precise details that underline the importance of the work, along with descriptions of how the job was done."—Russell F. Weigley, author of Eisenhower's Lieutenants "Cooper saw more of the war than most junior officers, and he writes about it better than almost anyone. . . . His stories are vivid, enlightening, full of life—and of pain, sorrow, horror, and triumph."—Stephen E. Ambrose, from his Foreword "In a down-to-earth style, Death Traps tells the compelling story of one man's assignment to the famous 3rd Armored Division that spearheaded the American advance from Normandy into Germany. Cooper served as an ordnance officer with the forward elements and was responsible for coordinating the recovery and repair of damaged American tanks. This was a dangerous job that often required him to travel alone through enemy territory, and the author recalls his service with pride, downplaying his role in the vast effort that kept the American forces well equipped and supplied. . . . [Readers] will be left with an indelible impression of the importance of the support troops and how dependent combat forces were on them."—Library Journal "As an alumnus of the 3rd, I eagerly awaited this book's coming out since I heard of its release . . . and the wait and the book have both been worth it. . . . Cooper is a very polished writer, and the book is very readable. But there is a certain quality of 'you are there' many other memoirs do not seem to have. . . . Nothing in recent times—ridgerunning in Korea, firebases in Vietnam, or even the one hundred hours of Desert Storm—pressed the ingenuity and resolve of American troops . . . like WWII. This book lays it out better than any other recent effort, and should be part of the library of any contemporary warrior."—Stephen Sewell, *Armor Magazine* "Cooper's writing and recall of harrowing events is superb and engrossing. Highly recommended."—Robert A. Lynn, *The Stars and Stripes* "This detailed story will become a classic of WWII history and required reading for anyone interested in armored warfare."—Publishers Weekly (starred review) "[Death Traps] fills a critical gap in WWII literature. . . . It's a truly unique and valuable work."—G.I. Journal *Billboard* 1998-12-12 In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Naval Aviation in the Korean War Warren Thompson 2012-10-24 A history of the conflict in Korea with an emphasis on the crucial role of aviation. This in-depth history covers the role of US aircraft carriers and aircraft in stopping the North Korean initial push to the south; their role in the famous Inchon Landing and Pusan Perimeter break out; naval operations during the Marines' Chosin Reservoir march to the sea in December 1950; and the stabilization of the front lines after the Chinese entered the war during 1951. At this time, the emphasis for naval air operations was centered on interdiction behind the lines. The focus was on trying to stop road and rail traffic from resupplying the communist troops and allowing them to build up to a major offensive. Also described is the entry of the F2H Banshee into carrier operations, which gave the US four major types of aircraft with which to wage the war. During 1952, most carrier air groups spent their time off the coast of North Korea while hitting targets up along the Yalu River, putting them well within the range of MiG-15s. Navy F9F Panthers were used as top cover, while the Corsairs and Skyraiders went after major targets such as the dam complexes upriver and marshaling yards north of Pyongyang. During 1953, naval air operations were stepped up in an effort to get the communists back to the truce talks. The number of MiG-15s had grown to a figure many times that of the UN for overhead protection; the deep missions were more dangerous than ever; and the Chinese brought in state-of-the-art antiaircraft automatic weapons. This comprehensive book brings you into the action as the stakes get higher and higher before the conflict eventually draws to a close.

Selecting the Mercury Seven Colin Burgess 2011-08-17 The names of the seven Mercury astronauts were announced in April 1959 amid a flurry of publicity and patriotism. This work provides biographical details of all thirty-two finalists for the seven coveted places as America's pioneering astronauts. All of the candidates were among the nation's elite pilots involved in testing new supersonic aircraft capabilities. Most had served as wartime fighter and bomber pilots; some were test pilots on top secret and sophisticated aviation projects, while others were fleet admirals, prisoners of war, and proposed pilots for spaceflight programs such as the Dyna-Soar (X-20). The names of all 32 finalists have been kept secret until very recently. "Selecting the Mercury Seven" also relates the history and difficulties behind the initial choice of candidates. The lives, motivations, military careers, and achievements of the unsuccessful twenty-five finalists are explored first in fully authorized biographies. Test pilots for the U.S. Navy, Air Force, and Marine Corps, each man has a fascinating and very different story to tell. All thirty-two men had to endure meticulous, demeaning, and brutal week-long medical examinations at the Lovelace Clinic in New Mexico. This was followed by another torturous week at the Wright Aeromedical Laboratory in Ohio, where they were subjected to extreme fitness and physiological testing, the sole purpose of which was to sort out the Supermen from the near-supermen. The final part of the book examines the accomplishments and spaceflights of the seven successful candidates, bringing their amazing stories right up to date.

Moon Bound Colin Burgess 2013-03-12 Often lost in the shadow of the first group of astronauts for the Mercury missions, the second and third groups included the leading figures for NASA's activities for the following two decades. "Moon Bound" complements the author's recently published work, "Selecting the Mercury Seven" (2011), extending the story of the men who helped to launch human spaceflight and broaden the American space program. Although the initial 1959 group became known as the legendary pioneering Mercury astronauts, the astronauts of Groups 2 and 3 gave us many household names. Sixteen astronauts from both groups traveled to the Moon in Project Apollo, with several actually walking on the Moon, one of them being Neil Armstrong. This book draws on interviews to tell the astronauts' personal stories and recreate the drama of that time. It describes the process by which they were selected as astronauts and explains how the criteria had changed since the first group. "Moon Bound" is divided into two parts, recounting the biographies relating to the nine astronauts from NASA's Group 2 in the first part, and the fourteen finalists in Group 3 in the second part. The stories of both selection groups are narrated through the experiences of four finalists with interesting backgrounds. One of these men is Al Rupp of the USAF who, as a West Point cadet, cheekily helped to steal the Navy mascot goat prior to the annual Army versus Navy game in 1953, thus achieving legendary status in the game's history. Rupp was killed in a plane crash just two years after being named as a finalist for Group 3. The service career of naval aviator John Yammicky was also very much the equal of other finalists, but he was killed on September 11, 2001, as he was a passenger on hijacked Flight 77, which was flown into the Pentagon. At the end of the work there are several chapters on how these candidates were prepped for their missions.
