An Anthropologist on Mars Oliver Sacks 2012-11-14 To these seven narratives of neurological disorder Dr. Sacks brings the same humanity, poetic observation, and infectious sense of wonder that are apparent in his bestsellers *Awakenings* and *The Man Who Mistook His Wife for a Hat*. These men, women, and one extraordinary child emerge as brilliantly adaptive personalities, whose conditions have not so much debilitated them as ushered them into another reality.

The Uncommercial Traveller Illustrated Charles Dickens 2019-12-08 The Uncommercial Traveller is a collection of literary sketches and reminiscences written by Charles Dickens, published in 1860-1861.

Oracle E-Business Suite Inventory R12 Vivek Jain 2012-06-29 Oracle e-Business Suite Inventory R12 is written for new and intermediate users, key-users and administrators. It focuses on your role in an Oracle eBS-environment and explains the Concepts, describes the main Screens with navigation paths, gives Step-by-Step instructions and has a Glossary. All chapters have Questions and Answers. The book has seven chapters, 148 pages and 166 screenshots and illustrations. The Topics include: Unit of Measure, Unit of measure classes, Primary UOM, Base Unit, UOM Conversions, Intra-class and Inter-class Conversions, Lot specific UOM Conversions, Item Category Flexfield Structures, Category Sets, Locaters, Item Assignments, Item Master Organization, Item Templates, Category Assignment, Subinventory Transfer, FIFO (first-in-first-out) and LIFO costing method, Define Sub-Inventory Transfer, Current On-Hand Quantity, Physical Inventory, Forecast, Reservation, Material Workbench Screen, Run Multi-Organization Quantity Report, Multi-Organization Quantity, Min-Max Planning, Reorder Point Planning, Kanban Replenishment, Statistical Forecasting, Generate Physical Inventory Tags, Approve Adjustments and much more. What do eBS users think about these books? "Very well structured and easy to follow, even for beginners." John M. McNamara - Wokingham Borough Council "Highly informative and exemplary, hats off." Sunil Sunder Rao - Apps DBA "A single place containing all core eBS Topics!" Hans Schoonen - Director ICT-OKE

Mountain Warfare and Other Lofty Problems Charles K. Bartles 2016 The United States has been in a mountain war in Afghanistan for almost a decade. Other nations have different, extensive experience in training and conduction mountain combat. Les Grau and Chuck Bartles gathered this experience in a detailed study aimed at being of use both to military professionals and others with an interest in military operations in mountainous terrain. Chapters include small and large unit actions, reconnaissance, artillery, small arms fire, logistics, communications, medicine and aviation. Much experience is drawn from Soviet efforts in Afghanistan during the 1980s, and modern Russian army training. The text is complemented by numerous maps and diagrams.

In the Heart of the Antarctic Sir Ernest Shackleton 2000 Frustrated by his experiences on an expedition led by Captain Robert Scott, explorer Ernest Shackleton, in 1907, launched his own attempt to reach the South Pole. At the mercy of a hostile continent it was to become the most extreme test of endurance imaginable. This is his thrilling account of that expedition.

Infantryman's Guide To Combat In Built-Up Areas U.S. Army 1994-11-01 This combat manual covers ground operations in urban settings. It clearly outlines skills unique to city fighting, including analyzing terrain, seizing blocks and buildings, setting up firing positions, scaling walls, employing snipers, evaluating civilian impact and effects of small arms and support weapons, and much more.

The Impact Challenge Alessia Falsarone 2022-04-24 This book explores the role of businesses in delivering positive societal and financial outcomes as they seek to bridge the gap between short-term organizational behaviors and long-range sustainability commitments. By addressing the inevitable data challenges

associated with the strategic integration of a sustainability mindset, it enables faster adoption of social, environmental and governance metrics that generate lasting enterprise value. Inspired by the experience of practitioners that have successfully influenced the learning behaviors of complex organizations, this book helps readers drive systemic innovations as they leverage sustainability initiatives in a programmatic and intentional manner. Features: Defines a toolkit to generate sustainable business value by focusing on the organizational design underpinning sustainability-oriented initiatives. Provides a multidisciplinary lens on shaping the impact dialogue through applied frameworks. Discusses the need to analytically identify an organizational learning curve before developing impact targets and framing sustainability commitments around them. Combines theory and practice in a practical style by presenting a variety of real-life applications at a global level. The Open Access version of this book, available at www.taylorfrancis.com, has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 4.0 license.

Aviation Safety and Pilot Control National Research Council 1997-03-28 Adverse aircraft-pilot coupling (APC) events include a broad set of undesirable and sometimes hazardous phenomena that originate in anomalous interactions between pilots and aircraft. As civil and military aircraft technologies advance, interactions between pilots and aircraft are becoming more complex. Recent accidents and other incidents have been attributed to adverse APC in military aircraft. In addition, APC has been implicated in some civilian incidents. This book evaluates the current state of knowledge about adverse APC and processes that may be used to eliminate it from military and commercial aircraft. It was written for technical, government, and administrative decisionmakers and their technical and administrative support staffs; key technical managers in the aircraft manufacturing and operational industries; stability and control engineers; aircraft flight control system designers; research specialists in flight control, flying qualities, human factors; and technically knowledgeable lay readers.

Commercial Aviation Safety, Sixth Edition Stephen K. Cusick 2017-05-12 Up-To-Date Coverage of Every Aspect of Commercial Aviation Safety Completely revised edition to fully align with current U.S. and international regulations, this hands-on resource clearly explains the principles and practices of commercial aviation safety—from accident investigations to Safety Management Systems. Commercial Aviation Safety, Sixth Edition, delivers authoritative information on today's risk management on the ground and in the air. The book offers the latest procedures, flight technologies, and accident statistics. You will learn about new and evolving challenges, such as lasers, drones (unmanned aerial vehicles), cyberattacks, aircraft icing, and software bugs. Chapter outlines, review questions, and real-world incident examples are featured throughout. Coverage includes: • ICAO, FAA, EPA, TSA, and OSHA regulations • NTSB and ICAO accident investigation processes • Recording and reporting of safety data • U.S. and international aviation accident statistics • Accident causation models • The Human Factors Analysis and Classification System (HFACS) • Crew Resource Management (CRM) and Threat and Error Management (TEM) • Aviation Safety Reporting System (ASRS) and Flight Data Monitoring (FDM) • Aircraft and air traffic control technologies and safety systems • Airport safety, including runway incursions • Aviation security, including the threats of intentional harm and terrorism • International and U.S. Aviation Safety Management Systems

Cognition in the Wild Edwin Hutchins 1996-08-26 Edwin Hutchins combines his background as an anthropologist and an open ocean racing sailor and navigator in this account of how anthropological methods can be combined with cognitive theory to produce a new reading of cognitive science. His theoretical insights are grounded in an extended analysis of ship navigation—its computational basis, its historical roots, its social organization, and the details of its implementation

in actual practice aboard large ships. The result is an unusual interdisciplinary approach to cognition in culturally constituted activities outside the laboratory—"in the wild." Hutchins examines a set of phenomena that have fallen in the cracks between the established disciplines of psychology and anthropology, bringing to light a new set of relationships between culture and cognition. The standard view is that culture affects the cognition of individuals. Hutchins argues instead that cultural activity systems have cognitive properties of their own that are different from the cognitive properties of the individuals who participate in them. Each action for bringing a large naval vessel into port, for example, is informed by culture: the navigation team can be seen as a cognitive and computational system. Introducing Navy life and work on the bridge, Hutchins makes a clear distinction between the cognitive properties of an individual and the cognitive properties of a system. In striking contrast to the usual laboratory tasks of research in cognitive science, he applies the principal metaphor of cognitive science—cognition as computation (adopting David Marr's paradigm)—to the navigation task. After comparing modern Western navigation with the method practiced in Micronesia, Hutchins explores the computational and cognitive properties of systems that are larger than an individual. He then turns to an analysis of learning or change in the organization of cognitive systems at several scales. Hutchins's conclusion illustrates the costs of ignoring the cultural nature of cognition, pointing to the ways in which contemporary cognitive science can be transformed by new meanings and interpretations. In the Wet Nevil Shute 2010-04-27 It is the rainy season. Drunk and delirious, an old man lies dying in the Queensland bush. In his opium-hazed last hours, a priest finds his deserted shack and listens to his last words. Half-awake and half-dreaming the old man tells the story of an adventure set decades in the future, in a very different world...

The Representation of Business in English Literature Arthur Pollard 2009 In *The Representation of Business in English Literature*, five scholars of different periods of English literature produce original essays on how business and businesspeople have been portrayed by novelists, starting in the eighteenth century and continuing to the end of the twentieth century. The contributors to *Representation* help readers understand the partiality of the various writers and, in so doing, explore the issue of what determines public opinion about business. Arthur Pollard (1922-2001) was Professor Emeritus of English at the University of Hull in Hull, East Yorkshire, England. John Blundell is General Director of the Institute of Economic Affairs, London. Please note: This title is available as an ebook for purchase on Amazon, Barnes and Noble, and iTunes.

Aviation Psychology and Human Factors Monica Martinussen 2017-07-12 This book covers the application of psychological principles and techniques to situations and problems of aviation. It offers an overview of the role psychology plays in aviation, system design, selection and training of pilots, characteristics of pilots, safety, and passenger behavior. It covers concepts of psychological research and data analysis and shows how these tools are used in the development of new psychological knowledge. The new edition offers material on physiological effects on pilot performance, a new chapter on aviation physiology, more material on fatigue, safety culture, mental health and safety, as well as practical examples and exercises after each chapter.

We, the Navigators David Lewis 1994-05-01 This new edition includes a discussion of theories about traditional methods of navigation developed during recent decades, the story of the renaissance of star navigation throughout the Pacific, and material about navigation systems in Indonesia, Siberia, and the Indian Ocean.

The Human in Command Carol McCann 2012-12-06 This book brings together experienced military leaders and researchers in the human sciences to offer current operational experience and scientific thought on the issue of military command, with the intention of raising awareness of the uniquely human aspects of military

command. It includes chapters on the personal experiences of senior commanders, new concepts and treatises on command theory, and empirical findings from experimental studies in the field.

Marine Accident Report United States. National Transportation Safety Board 1990 This report explains the grounding of the United States oil tanker Exxon Valdez on March 24, 1989. Safety issues discussed include the navigation watch, role of human factors, manning standards, the company's drug/alcohol testing and rehabilitation program, vessel traffic service, and oil spill response. Includes safety recommendations, maps.

Practical Ship Hydrodynamics Volker Bertram 2011-08-11 *Practical Ship Hydrodynamics* provides a comprehensive overview of hydrodynamic experimental and numerical methods for ship resistance and propulsion, maneuvering, seakeeping and vibration. Beginning with an overview of problems and approaches, including the basics of modeling and full scale testing, expert author Volker Bertram introduces the marine applications of computational fluid dynamics and boundary element methods. Expanded and updated, this new edition includes: Otherwise disparate information on the factors affecting ship hydrodynamics, combined to provide one practical, go-to resource. Full coverage of new developments in computational methods and model testing techniques relating to marine design and development. New chapters on hydrodynamic aspects of ship vibrations and hydrodynamic options for fuel efficiency, and increased coverage of simple design estimates of hydrodynamic quantities such as resistance and wake fraction. With a strong focus on essential background for real-life modeling, this book is an ideal reference for practicing naval architects and graduate students.

Stability of Structures Chai H Yoo 2011-05-12 The current trend of building more streamlined structures has made stability analysis a subject of extreme importance. It is mostly a safety issue because stability loss could result in an unimaginable catastrophe. Written by two authors with a combined 80 years of professional and academic experience, the objective of *Stability of Structures: Principles and Applications* is to provide engineers and architects with a firm grasp of the fundamentals and principles that are essential to performing effective stability analysis. Concise and readable, this guide presents stability analysis within the context of elementary nonlinear flexural analysis, providing a strong foundation for incorporating theory into everyday practice. The first chapter introduces the buckling of columns. It begins with the linear elastic theory and proceeds to include the effects of large deformations and inelastic behavior. In Chapter 2 various approximate methods are illustrated along with the fundamentals of energy methods. The chapter concludes by introducing several special topics, some advanced, that are useful in understanding the physical resistance mechanisms and consistent and rigorous mathematical analysis. Chapters 3 and 4 cover buckling of beam-columns. Chapter 5 presents torsion in structures in some detail, which is one of the least well understood subjects in the entire spectrum of structural mechanics. Strictly speaking, torsion itself does not belong to a topic in structural stability, but needs to be covered to some extent

for a better understanding of buckling accompanied with torsional behavior. Chapters 6 and 7 consider stability of framed structures in conjunction with torsional behavior of structures. Chapters 8 to 10 consider buckling of plate elements, cylindrical shells, and general shells. Although the book is primarily devoted to analysis, rudimentary design aspects are discussed. Balanced presentation for both theory and practice Well-blended contents covering elementary to advanced topics Detailed presentation of the development

Public Procurement and Human Rights Olga Martin-Ortega 2019 This timely work reflects on the role and obligations of the state as a buyer of goods and services, from the dual disciplinary perspectives of public procurement and human rights. Through theoretical and doctrinal analyses, and practice-focused case studies, it interrogates the evolving character of public procurement as an interface for multiple normative regimes and competing policies. Challenging the prevailing paradigm which subordinates human rights to narrowly-defined economic goals, insightful contributions advance a compelling case for greater inter-disciplinarity and policy coherence as crucial to realising international policies such as those embodied in the UN Guiding Principles on Business and Human Rights and 2030 Sustainable Development Goals.

Private Empire Steve Coll 2013-05-28 "ExxonMobil has met its match in Coll, an elegant writer and dogged reporter . . . extraordinary . . . monumental." -The Washington Post "Fascinating . . . Private Empire is a book meticulously prepared as if for trial . . . a compelling and elucidatory work." -Bloomberg From the award-winning and bestselling author of Ghost Wars and Directorate S, an extraordinary exposé of Big Oil. Includes a profile of current Secretary of State and former chairman and chief executive of ExxonMobil, Rex Tillerson In this, the first hard-hitting examination of ExxonMobil—the largest and most powerful private corporation in the United States—Steve Coll reveals the true extent of its power. Private Empire pulls back the curtain, tracking the corporation's recent history and its central role on the world stage, beginning with the Exxon Valdez accident in 1989 and leading to the Deepwater Horizon oil spill in the Gulf of Mexico in 2010. The action spans the globe—featuring kidnapping cases, civil wars, and high-stakes struggles at the Kremlin—and the narrative is driven by larger-than-life characters, including corporate legend Lee "Iron Ass" Raymond, ExxonMobil's chief

executive until 2005, and current chairman and chief executive Rex Tillerson, President-elect Donald Trump's nomination for Secretary of State. A penetrating, news-breaking study, Private Empire is a defining portrait of Big Oil in American politics and foreign policy.

Investigating Iwo Breanne Robertson 2019 "Investigating Iwo encourages us to explore the connection between American visual culture and World War II, particularly how the image inspired Marines, servicemembers, and civilians to carry on with the war and to remember those who made the ultimate sacrifice to ensure victory over the Axis Powers. Chapters shed light on the processes through which history becomes memory and gains meaning over time. The contributors ask only that we be willing to take a closer look, to remain open to new perspectives that can deepen our understanding of familiar topics related to the flag raising, including Rosenthal's famous picture, that continue to mean so much to us today"--
