Alfa Romeo DOHC Engine High-Performance Manual Jim Kartalamakis

2006-05-15 Ten years have passed since the original edition of this book was published, but Alfa Romeo enthusiasts everywhere are more active today than ever in preserving, modifying and racing these excellent cars. Throughout this time, the author in true Alfista fashion, never stopped looking for and trying new techniques to increase the power, overall performance and reliability of Alfas and their engines. This book is the result of much research, and also first-hand experience gained through many Alfa rear wheel drive model projects, from the 105 series to the last of the 75 models. There is a lot of completely new information regarding TwinSpark Cylinder head mods, big-brake mods, LSD adjustment procedure, electrical systems, engine mods, and many flow-

All About Jaguar Mascots Ian Cooling 2010 The book uses articles published over the years on the subject by internationally recognised collectors and experts Ian Cooling and Tony Bailey, together with sections on the Swallow mascot another authority, Gilbert Mond, Historian of the Swallow Register. This book will be the definitive guide to this famous mascot and will be essential reading for anyone wishing to learn more about them, or needing to identify examples they are contemplating buying. It draws on key articles by leading authorities Ian Cooling, Tony Bailey and Gil Mond published since 1992 in Jaguar World and Jaguar Automobilia Collector, including the much sought-after major series of

Mascot articles that appeared in 2002 and which, like many of these magazines, is no longer available. It also includes especially written additional new material updating the legal position for mounting mascots on cars in the UK, plus articles on finding and building a collection. It also describes the origins of the original F Gordon Crosby designed mascot in 1938 together with many photos of this iconic bronze casting. *British Lorries of the 1950s* Malcolm Bobbitt 2009-07-15 A picture packed revisiting of British trucks and trucking in the 1950s.

Diecast Toy Cars of the 1950s & 1960s

Andrew Ralston 2009-07 A guide for collectors discusses the history of die-cast toy cars of the 1950s and 1960s and surveys the companies that manufactured the toys around the world, including such major names as Dinky Toys, Corgi Toys, Solido, Tekno, and Tootsietoy.

Plastic Toy Cars of the 1950s and 1960s Andrew Ralston 2007 The history of Dinky Toys, Corgi Toys and other makers of diecast metal cars has been covered in great detail in many books and magazine articles; by contrast, information on plastic toy cars is much harder to come by. Yet collectors are taking an increasing

interest in plastic cars, particularly as the rise in the value of early diecast and tinsplate models has put many of these out of reach of the average enthusiast. For the first time, this book aims to provide a systematic introduction to the vast number of plastic cars made during the 1950s and 1960s. Years of research have enabled the author to uncover many fascinating facts about the companies who made these toys. Some were major players in the toy industry, like Tri-ang and Brimtoy in the UK, Norev and Minialuxe in France, Gama and Siku in Germany and Ingap in Italy. Many others, though, were more obscure, and some only modeled one car before disappearing without trace. More than 250 photographs of these toys are

the most colorful and realistic examples, all of them based on real vehicles of the period. In many cases, the toy is pictured alongside its original box, the presence of which can often double the value of the item to a collector. Readers will also find a handy glossary listing the names of many of the companies who were active in this field in the 1950s and 1960s, together with some evocative period advertisements and catalogue illustrations. If you thought that a model car had to be made of diecast metal to be worth collecting, this book might change your mind . . . With 250 color photos, extensive appendices and identification aids this is a must have for any collector or dealer.

car-derived vans covers the 60 years from 1945 to 2005. It describes and illustrates all of the great classic Rovers up to and including the SD1, and goes on to look at the models inherited from British Leyland that attracted Rover badges. It finishes with the models designed in conjunction with Honda; the later British-designed cars – and even the final City Rover. There is also consideration of some Rover models that were designed but, for various reasons, did not enter production, and can now only be seen as prototypes in museums. A title in Veloce's popular Pictorial History series, this book describes all of the postwar models with illustrations and technical data for each.

How To Build & Power Tune

Distributor-Type Ignition Systems Des

Hammill 2004-01-10 Expert practical advice from an experienced race engine builder on how to build an ignition system that delivers maximum power reliably. With the enormous amount of inaccurate information about ignition systems and the confusing choice of expensive aftermarket parts out there, which all claim to deliver more power, there's a need to get the real scoop. Des Hammill cuts through the myth and hyperbole and tells readers what really works, so that they can build an excellent system without wasting

money on parts and systems that simply don't deliver. Ignition timing and advance curves for modified engines is another minefield for the inexperienced, but Des uses his expert knowledge to tell readers how to optimize the ignition timing of any high-performance engine. The book applies to all four-stroke gasoline/petrol engines with distributor-type ignition systems, including those using electronic ignition modules: it does not cover engines controlled by ECUs (electronic control units).

How to Illustrate and Design Concept Cars Adrian Dewey 2011-11-15 The automobile seems to be as popular now as it ever was. Posters of cars still adorn many a child's bedroom wall, and school exercise books are full of doodles of cars. This book takes those notebook sketches and teaches you how to develop them into the car designs you see in magazines. Using simple to follow step-by-step

drawings it guides you from pencil sketch to marker rendering, from doodle to highly visual computer generated artwork. Adrian Dewey has worked on designs as diverse as small sports cars to double decker buses, modified motors to concept Formula 1 cars, using various techniques and styles. In this book, he uses his knowledge of the different styles to guide the reader in creating great artwork and designs of their own. The book shows in detail how to use different materials and how to get the most out of each one, whether it be a great pencil sketch or a photo realistic vector illustration. The book also features an easy to follow index for quick reference on different types of drawing.

André Lefebvre, and the Cars He Created at Voisin and Citroën

Gijsbert-Paul Berk 2011-11-01

Together with his colleagues at Citroën, Andre Lefebvre created the Traction Avant (1934), the TUB (1939) – Citroën's first front wheel drive utility van that was succeeded by the H and HY vans (1947) – the Deux Chevaux (1948), and, last but not least, the DS (1955). From 1923 to 1931 Lefebvre also designed several highly original and outstanding competition cars and record-breaking automobiles for Voisin. He even drove some these cars in races and record attempts. It is obvious that during his 16 years with Gabriel Voisin he

of this illustrious aviation pioneer and car manufacturer. The experience gained during that period gave him the self-confidence to persuade his successive bosses at Citroën that his unorthodox approach to automobile design was what the company needed; first he convinced André Citroën, later Pierre Michelin, then Pierre-Jules Boulanger, and finally Robert Puiseux and Pierre Bercot. His oeuvre for Citroën alone earns him a place of honour among the great automobile designers of the past century. The fact that most present-day cars still carry the DNA of his design philosophy makes him stand out above other automotive pioneers and innovators. That is why it is amazing that so little is known about this fascinating and brilliant engineer. This book was written in order to

remedy that, and to pay tribute to André Lefebvre: the passionate pioneer who left car enthusiasts around the world such an important heritage.

was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s. Covering all of these models, up to the last one produced in 2003, and featuring full specifications translated from the relevant primary sources in Russian and Chinese literature, this is a meticulous and unique account of a previously neglected subject.

British Lorries of the 1960s Malcolm Bobbitt 2009-10 British commercial manufacturers played a prime role in boosting Britain's economy during the 1960s, especially as many vehicles were exported worldwide. British lorries were, therefore, considered as being the workhorses of the world, performing a wide range of duties from heavy haulage to general goods delivery. This highly visual study of British lorries of the 1960s captures in 120 illustrations this often understated but very necessary work, which was undertaken day and night, 365 days a year.
