Transformation of a Goddess

David T. Sugimoto 2014 This book deals with the changing nature of the goddess Ishtar/Astarte/Aphrodite, who was widely revered in the ancient West Asia and the

Mediterranean world and was known by different names.

Although the three names are often closely related, their mutual relation has not yet been sufficiently clarified. They appear with different characters and attributes in various areas

and periods. ... In this volume, specialists on different areas and periods discuss the theme from various perspectives, allowing a new and broader understanding of the goddess(es) concerned. The areas covered range from Mesopotamia to the Levant, Egypt and the Mediterranean world, the periods embraced from the third millennium BCE to the Hellenistic age. The volume is the fruit of an international conference held in Tokyo in 2011. Drawing on discussions at the conference, each article was completely rewritten.

philosophical way of understanding cinema. The book coalesces 20th century ideas of film as thought into a practical theory of 'film-thinking', arguing that film style conveys poetic ideas through a constant dramatic 'intent' about the characters, spaces, and events of film.

Mullarney 2019 This catalogue raisonné of the work of Irish artist Janet Mullarney showcases the diverse, innovative, personal and original nature of her work over the last 40 years.00Mullarney, like James Joyce, realised the need to be an outsider. Since 1970 she based her art studio in Italy and then travelled further afield to include Mexico and India, learning about art and life in equal measure, filling notebooks with drawings that held meaning for her, and which influenced her work.00Provocatively, she embraces a marginal position between two countries and between art forms and

While the external targets of oppression are present and obvious, Mullarney?s work is focused on more self-imposed restraints.

The Hollywood Studio System

Douglas Gomery 2019-07-25

Despite being one of the biggest industries in the United States, indeed the World, the internal workings of the 'dream factory' that is Hollywood is little

understood outside the business. The Hollywood Studio System: A History is the first book to describe and analyse the complete development, classic operation, and reinvention of the global corporate entitles which produce and distribute most of the films we watch. Starting in 1920, Adolph Zukor, Head of Paramount Pictures, over the decade of the 1920s helped to fashion Hollywood into a vertically integrated system, a set of economic innovations which was firmly in place by 1930. For the next three decades, the movie industry in the United States and the rest of the world operated by

according to these principles. Cultural, social and economic changes ensured the demise of this system after the Second World War. A new way to run Hollywood was required. Beginning in 1962, Lew Wasserman of Universal Studios emerged as the key innovator in creating a second studio system. He realized that creating a global media conglomerate was more important than simply being vertically integrated. Gomery's history tells the story of a 'tale of two systems' using primary materials from a score of archives across the United States as well as a close reading of both the business

and trade press of the time.

Together with a range of photographs never before published the book also features over 150 box features illuminating aspect of the business.

"A Strange Sort of Being"

Bambi L. Lobdell 2011-12-08

Born in 1829 to a working-class family in upstate New York, Lucy Ann Lobdell was not your average girl. Donning her brother's clothes, she worked on the farm and in her father's saw mill, and demonstrated marksmanship skills that earned her the nickname "The Female Hunter of Delaware County." After leaving home, she moved to the frontier, married a

woman, and lived for sixty years as a man named "Joe."

Because of nineteenth century social restrictions and gender expectations, Lobdell endured forced marriage, arrest, and incarceration in an insane asylum. Although twentieth-century scholars have labeled her a lesbian, this study incorporates queer theory, analysis of stories about Lucy and Joe, and Lobdell's own writings to reveal that he was actually a transgendered man.

Embodied Philosophy in Dance

Einav Katan-Schmid

2016-09-18 Representing the first comprehensive analysis of Gaga and Ohad Naharin's aesthetic approach, this book follows the sensual and mental emphases of the movement research practiced by dancers of the Batsheva Dance Company. Considering the body

as a means of expression, Embodied Philosophy in Dance deciphers forms of meaning in dance as a medium for perception and realization within the body. In doing so, the book addresses embodied philosophies of mind, hermeneutics, pragmatism, and social theories in order to illuminate the perceptual experience of dancing. It also reveals the interconnections between physical and mental processes of reasoning and explores the nature of physical intelligence.

great cinemas of the world. Historically, however, its fortunes have varied. Following a brief moment of glory in the early silent era, Italian cinema appeared to descend almost into irrelevance in the early 1920s. A strong revival of the industry which gathered pace during the 1930s was abruptly truncated by the advent of World War II. The end of the war, however, initiated a renewal as films such as *Roma città aperta* (Rome Open City), *Sciuscià* (Shoeshine, 1946), and *Ladri di biciclette* (Bicycle Thieves, 1948), flagbearers of what soon came to be known as Neorealism, attracted unprecedented international

acclaim and a reputation that only continued to grow in the following years as Italian films were feted worldwide. Ironically, they were celebrated nowhere more than in the United States, where Italian films consistently garnered the lion's share of the Oscars, with Lina Wertmüller becoming the first woman to ever be nominated for the Best Director award. This second edition of *Historical Dictionary of Italian Cinema* contains a chronology, an introduction, and an extensive bibliography. The dictionary section has over 400 cross-referenced entries on major movements, directors, actors, actresses, film genres, producers, industry

organizations and key films.

This book is an excellent resource for students, researchers, and anyone wanting to know more about Italian Cinema.

African Literacies Ashraf

Abdelhay 2014-10-02 Africa is often depicted as the continent with the lowest literacy rates in the world. Moving beyond this essentialising representation, this volume explores African literacies within their complex and diverse multilingual and multiscrptal histories and contexts of use. The chapters examine contexts from the Maghreb to Mozambique and from Senegambia to the Horn of Africa and critically analyse

multiple literacy genres and

practices – from ancient manuscripts to instant messaging – in relation to questions of language-in-education and policy, livelihoods, Islamic scholarship, colonialism, translocal migration, and writing systems.

As a whole, the book serves as an advanced introduction to language and society in Africa seen through the lens of literacy, and marks a unique contribution to scholarship in literacy studies offering a convenient collection of perspectives on and from Africa.

ten, when Martin Amis spent a year in Princeton, New Jersey, he was excited and frightened by America. As an adult he has approached that confusing country from many arresting angles, and interviewed its literati, filmmakers, thinkers, opinion makers, leaders and crackpots with characteristic discernment and wit. Included in a gallery of Great American Novelists are Norman Mailer, Gore Vidal, Truman Capote, Joseph Heller, William Burroughs, Kurt Vonnegut, John Updike, Paul Theroux, Philip Roth and Saul Bellow. Amis also takes us to Dallas, where presidential candidate Ronald Reagan is attempting to liaise

with born-again Christians. We glimpse the beau monde of Palm Beach, where each couple tries to out-Gatsby the other, and examine the case of Claus von Bulow. Steven Spielberg gets a visit, as does Brian de Palma, whom Amis asks why his films make no sense, and Hugh Hefner's sybaritic fortress and sanitised image are penetrated. There can be little that escapes the eye of Martin Amis when his curiosity leads him to a subject, and America has found in him a superlative chronicler.

cognitive bases for dreaming. He discusses how dreams express conceptions and concerns, and how they are consistent over years and decades. He also shows that there may be limits to understanding the meaning of dreams as there are many aspects of dream content that cannot be related to waking cognition or personal concerns. In addition, the book includes a detailed explanation of the methods needed to test the new model as well as a case study of a comprehensive dream journal. Particularly valuable is a discussion of a new system of content analysis that can be used for highly sophisticated

studies of dream content. In this provocative book, Domhoff sets forth a convincing argument that will encourage a resurgence in dream research among both new and established cognitive psychologists and neuropsychologists.

Translation, Adaptation and Transformation Laurence Raw

2012-01-12 In recent years adaptation studies has established itself as a discipline in its own right, separate from translation studies. interdisciplinary, and is not simply a case of transferring content from one medium to another. This collection furthers the research into exactly what the act of adaptation involves and whether it differs from other acts of textual rewriting. In addition, the 'cultural turn' in translation studies has prompted many scholars to consider adaptation as a form of inter-semiotic translation. But what does this mean, and how can we best theorize it? What are the semiotic systems that underlie translation and adaptation? Containing theoretical chapters and personal accounts of actual adaptations and translations, this

is an original contribution to translation and adaptation studies which will appeal to researchers and graduate students.

Commandant's Planning Guidance General David H. Berger 2020-10-08 The Commandant's Planning Guidance (CPG) provides the 38th Commandant's strategic direction for the Marine Corps and mirrors the function of the Secretary of Defense's Defense Planning Guidance (DPG). It serves as the authoritative document for Service-level planning and provides a common direction to the Marine Corps Total Force. It also serves as a road map describing where the Marine Corps is going and why; what the Marine Corps force development priorities are and are not; and, in some instances,

*Downloaded from
vla.ramtech.uri.edu on

Suny n Hayda*

how and when prescribed actions will be implemented. This CPG serves as my Commandant's Intent for the next four years. As Commandant Neller observed, "The Marine Corps is not organized, trained, equipped, or postured to meet the demands of the rapidly evolving future operating environment." I concur with his diagnosis. Significant change is required to ensure we are aligned with the 2018 National Defense Strategy (NDS) and DPG, and further, prepared to meet the demands of the Naval Fleet in executing current and emerging operational naval concepts. Effecting that change will be my

top priority as your 38th Commandant. This CPG outlines my five priority focus areas: force design, warfighting, education and training, core values, and command and leadership. I will use these focal areas as logical lines of effort to frame my thinking, planning, and decision-making at Headquarters Marine Corps (HQMC), as well as to communicate to our civilian leadership. This document explains how we will translate those focus areas into action with measurable outcomes. The institutional changes that follow this CPG will be based on a long-term view and singular focus on where we want the

Marine Corps to be in the next 5-15 years, well beyond the tenure of any one Commandant, Presidential administration, or Congress. We cannot afford to retain outdated policies, doctrine, organizations, or force development strategies. The coming decade will be characterized by conflict, crisis, and rapid change - just as every decade preceding it. And despite our best efforts, history demonstrates that we will fail to accurately predict every conflict; will be surprised by an unforeseen crisis; and may be late to fully grasp the implications of rapid change around us. The Arab Spring, West African Ebola Outbreak,

Scarborough Shoal standoff, Russian invasion of eastern Ukraine, and weaponization of social media are but a few recent examples illustrating the point. While we must accept an environment characterized by uncertainty, we cannot ignore strong signals of change nor be complacent when it comes to designing and preparing the force for the future. What is abundantly clear is that the future operating environment will place heavy demands on our Nation's Naval Services. Context and direction is clearly articulated in the NDS and DPG as well as testimony from our uniformed and civilian leadership. No further guidance

is required; we are moving forward. The Marine Corps will be trained and equipped as a naval expeditionary force-in-readiness and prepared to operate inside actively contested maritime spaces in support of fleet operations. In crisis prevention and crisis response, the Fleet Marine Force - acting as an extension of the Fleet - will be first on the scene, first to help, first to contain a brewing crisis, and first to fight if required to do so. The Marine Corps will be the "force of choice" for the President, Secretary, and Combatant Commander - "a certain force for an uncertain world" as noted by

Commandant Krulak. No matter what the crisis, our civilian leaders should always have one shared thought - Send in the Marines.

Twelve Angry Men Reginald

Rose 2006-08-29 A landmark

American drama that inspired a classic film and a Broadway revival—featuring an introduction by David Mamet A blistering character study and an examination of the American melting pot and the judicial system that keeps it in check, Twelve Angry Men holds at its core a deeply patriotic faith in the U.S. legal system. The play centers on Juror Eight, who is at first the sole holdout in an

11-1 guilty vote. Eight sets his sights not on proving the other jurors wrong but rather on getting them to look at the situation in a clear-eyed way not affected by their personal prejudices or biases. Reginald Rose deliberately and carefully peels away the layers of artifice from the men and allows a fuller picture to form of them—and of America, at its best and worst. After the critically acclaimed teleplay aired in 1954, this landmark American drama went on to become a cinematic masterpiece in 1957 starring Henry Fonda, for which Rose wrote the adaptation. More recently, *Twelve Angry Men* had a successful, and award-

winning, run on Broadway. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Ohls 2017-12-15 *Roots of Tradition: Amphibious Warfare in Early America* will fill

the gap in the historiography of naval and military warfare. As the title implies, this book describes and analyzes early landing operations (from the Revolution through the Civil War) of American history, showing how they contributed to its rich amphibious tradition. No such study currently exists. This study does not attempt to describe every amphibious operation in early America, but focuses on seven major battles or campaigns providing a strong appreciation for the roots of American amphibious traditions. It will address in abbreviated form other amphibious operations and various land and naval battles as necessary to

place these major actions in proper historical context. It is important to remember that amphibious operations include both offensive and defensive actions; and both when viewed from the water's edge can be instructive. Of the seven major amphibious campaigns examined in this book, five are offensive and two are defensive from the American perspective. (The New York and Baltimore campaigns are defensive and the Yorktown, Derna (Tripoli), California, Veracruz, and Fort Fisher are offensive.) For many Americans, the concept of amphibious warfare derives from the World War II model where landing forces assaulted

foreign shores against determined resistance. These actions resulted in very high casualties, yet proved uniformly success for American operations. The circumstances of geography coupled with the weapons and equipment available at that time dictated this type of warfare. During the eighteenth and nineteenth centuries, no such equipment or weapons existed for assaulting defended beaches.

Commanders attempted to land their forces in areas where the resistance would be light or nonexistent. The initiative and maneuverability inherent in naval forces permitted the establishment of combat power

ashore before having to engage the enemy. The naval echelon could deliver forces to the point of attack faster than the land-based defenders could react.

The focus of this book is to analyze and explain how amphibious traditions began in this earlier era and, in the epilogue, show how they compare and contrast with modern amphibious forces, particularly the modern U.S. Marine Corps. One of the interesting conclusions is that weapons and equipment (modern amphibious ships, landing craft air cushioned, VSTOL fixed wing aircraft, helicopters, and the V-22 Osprey tiltrotor aircraft), coupled with

new doctrine (operational maneuver from the sea, ship to shore maneuver) actually allow modern forces to return to the amphibious tactics and operations of the earlier period. In short, the U.S. Marine corps of the twenty-first century is a true inheritor of these Roots of Tradition established in early America.

The Black Dancing Body B.

Gottschild 2016-04-30 What is the essence of black dance in America? To answer that

question, Brenda Dixon Gottschild maps an unorthodox 'geography', the geography of the black dancing body, to show the central place black dance has in American culture. From the feet to the butt, to hair to skin/face, and beyond to the soul/spirit, Brenda Dixon Gottschild talks to some of the greatest choreographers of our day including Garth Fagan, Francesca Harper, Meredith Monk, Brenda Buffalino, Doug Elkins, Ralph Lemon, Fernando Bujones, Bill T. Jones, Trisha Brown, Jawole Zollar, Bebe Miller, Sean Curran and Shelly Washington to look at the evolution of black dance and it's importance to American culture.

This is a groundbreaking piece of work by one of the foremost African-American dance critics of our day.

Sex and Film B. Forshaw

2015-02-27 Sex and Film is a frank, comprehensive analysis of the cinema's love affair with the erotic. Forshaw's lively study moves from the sexual abandon of the 1930s to filmmakers' circumvention of censorship, the demolition of taboos by arthouse directors and pornographic films, and an examination of how explicit imagery invaded modern mainstream cinema.
