Make Your Bed Admiral William H. McRaven 2017-04-04 Based on a Navy SEAL’s inspiring graduation speech, this #1 New York Times bestseller of powerful life lessons “should be read by every leader in America” (Wall Street Journal). If you want to change the world, start off by making your bed. On May 17, 2014, Admiral William H. McRaven addressed the graduating class of the University of Texas at Austin on their Commencement day. Taking inspiration from the university’s slogan, “What starts here changes the world,” he shared the ten principles he learned during Navy Seal training that helped him overcome challenges not only in his training and long naval career, but also throughout his life; and he explained how anyone can use these basic lessons to change themselves and the world for the better. Admiral McRaven’s original speech went viral with over 10 million views. Building on the core tenets laid out in his speech, McRaven now recounts tales from his own life and from those of people he encountered during his military service who dealt with hardship and made tough decisions with determination, compassion, honor, and courage. Told with great humility and optimism, this timeless book provides simple wisdom, practical advice, and words of encouragement that will inspire readers to achieve more, even in life’s darkest moments. “Powerful.” --USA Today “Full of captivating personal anecdotes from inside the national security vault.” --Washington Post “Superb, smart, and succinct.” --Forbes **The Centrist Manifesto** Charles Wheelan 2013-04-19 A vision—and detailed road map to power—for a new party that will champion America’s rational center. From debt ceiling standoffs to single-digit Congress approval ratings, America’s political system has never been more polarized—or paralyzed—than it is today. As best-selling author and public policy expert Charles Wheelan writes, now is the time for a pragmatic centrist party that will identify and embrace the best Democratic and Republican ideals, moving us forward on the most urgent issues for our nation. Wheelan—who not only lectures on public policy but practices it as well (he ran unsuccessfully for Congress in 2009)—brings even more than his usual wit and clarity of vision to The Centrist Manifesto. He outlines a realistic ground game that could net at least five centrist senators from New England, the Midwest, and elsewhere. With the power to deny a red or blue Senate majority, committed centrists could take the first step toward giving voice and power to America’s largest, and most rational, voting bloc: the center.

You Can Do Anything George Anders 2017-08-08 In a tech-dominated world, the most needed degrees are the most surprising: the liberal arts Did you take the right classes in college? Will your major help you get the right job offers? For more than a decade, the national spotlight has focused on science and engineering as the only reliable choice for finding a successful post-grad career. Our destinies have been reduced to a caricature: learn to write computer code or end up behind a counter, pouring coffee. Quietly, though, a different path to success has been taking shape. In You Can Do Anything, George Anders explains the remarkable power of a liberal arts education - and the ways it can open the door to thousands of cutting-edge jobs every week. The key insight: curiosity, creativity, and empathy aren’t unly traits that must be reined in. You can be yourself, as an English major, and thrive in sales. You can segue from anthropology into the booming new field of user research; from classics into management consulting, and from philosophy into high-stakes investing. At any stage of your career, you can bring a humanist’s grace to our rapidly evolving high-tech future. And if you know how to attack the job market, your opportunities will be vast. In this book, you will learn why resume-writing is fading in importance and why “telling your story” is taking its place. You will learn how to create jobs that don’t exist yet, and to translate your campus achievements into a new style of expression that will make employers’ eyes light up. You will discover why people who start in eccentric first jobs - and then make their own luck - so often race ahead of peers whose post-college hunt focuses only on security and starting pay. You will be ready for anything.

Naked Statistics: Stripping the Dread from the Data Charles Wheelan 2013-01-07 “Brilliant, funny . . . the best math teacher you never had.”—San Francisco Chronicle Once considered tedious, the field of statistics is rapidly evolving into a discipline Hal Varian, chief economist at Google, has actually called “sexy.” From batting averages and political polls to game shows and medical research, the real-world application of statistics continues to grow by leaps and bounds. How can we catch schools that cheat on standardized tests? How does Netflix know which movies you’ll like? What is causing the rising incidence of autism? As best-selling author Charles Wheelan shows us in Naked Statistics, the right data and a few well-chosen statistical tools can help us answer these questions and more. For those who slept through Stats 101, this book is a lifesaver. Wheelan strips away the arcane and technical details and focuses on the underlying intuition that drives statistical analysis. He clarifies key concepts such as inference, correlation, and regression analysis, reveals how biased or careless parties can manipulate or misrepresent data, and shows us how brilliant and creative researchers are exploiting the valuable data from natural experiments to tackle thorny questions. And in Wheelan’s trademark style, there’s not a dull page in sight. You’ll encounter clever Schlitz Beer marketers leveraging basic probability, an international sausage festival illuminating the tenets of the central limit theorem, and a head-scratching choice from the famous game show Let’s Make a Deal—and you’ll come away with insights each time. With the wit, accessibility, and sheer fun that turned Naked Economics into a bestseller, Wheelan defies the odds yet again by bringing another essential, formerly unglamorous discipline to life.

Grit Angela Duckworth 2016-05-03 In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls “grit.” “Inspiration for non-genius everywhere” (People). The daughter of a scientist who frequently noted her lack of “genius,” Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In Grit, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she’s learned from interviewing dozens of high achievers—from JP Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks coach Pete Carroll. “Duckworth’s ideas about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among Grit’s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).

You Are Not Special David McCullough, Jr. 2014-04-22 A profound expansion of David McCullough, Jr.’s popular commencement speech—a call to arms against a prevailing, narrow, conception of success viewed by millions on YouTube—You Are (Not) Special is a love letter to students and parents as well as a guide to a truly fulfilling, happy life “Every once in a long while, a voice seems to come out of nowhere, and you wonder how you ever managed without [it]. David McCullough, Jr. has that startling, insightful, wry, reassuring, helpful voice and You Are Not Special may be the wisest parenting book I’ve read in decades.”—Madeline Levine, author of author of The Price of Privilege and Teach Your Children Well Children today, says David McCullough—high school English teacher, father of four, and son and namesake of the famous historian—are being encouraged to sacrifice passionate engagement with life for specious notions of success. The intense pressure to excel discourages kids from taking chances, failing, and learning empathy and self-confidence from those failures. In You Are (Not) Special, McCullough elaborates on his now-famous speech exploring how, for what purpose, and for whose sake, we’re raising our kids. With wry, affectionate humor, McCullough takes on hovering parents, ineffectual schools, professional college prep, electronic distractions, club sports, and generally the manifestations, and the applications and consequences of privilege. By acknowledging that the world is indifferent to them, McCullough takes pressure off of students to be extraordinary achievers and instead exhorts them to roll up their sleeves and do something useful with their advantages.

Carpe Every Day Robie Rogge 2021-03-23 A thoughtfully curated, cleverly designed keepsake that distills the wisdom of all those powerful graduation speakers—from Barack Obama and Gloria Steinem to Kermit the Frog—into the best advice for grads of all ages. Carpe Every Day is a thought-provoking collection of quotes from famous graduation speakers meant to motivate and inspire the next generation of leaders. Paired by theme, many of the quotes complement one another. George Saunders, for example, riffs on the “failures of kindness” of his youth, encouraging grads to be kinder. Jimmy Buffett offers a simpler nugget of kind-spiration: “Be Santa Claus when you can.” Other quotes, however, are paired with conflicting advice, giving graduates the opportunity to choose what to believe in. Some may respond to Neil Gaiman’s “make good art” speech, while others may prefer John Waters’s call to arms to horrify and outrage others with their art. Which of these affirmations will you choose? Each quote is accompanied by a short bio of the speaker and stamped with the year and institution where the commencement speech was delivered. With advice from the likes of Abby Wambach, Angela Davis, David Foster Wallace, Oprah Winfrey, Spike Lee, Kanye West, and more, readers will be swept away by the wit and wisdom contained in this book—perfect for graduates, creative thinkers, or anyone seeking inspiration.

The Rationing: A Novel Charles Wheelan 2019-05-21 Political backstabbing, rank hypocrisy, and dastardly deception reign in this delightfully entertaining political satire, sure to lift one’s spirits far above the national stage. America is in trouble—at the mercy of a puzzling pathogen. That ordinarily wouldn’t lead to catastrophe, thanks to modern medicine, but there’s just one problem: the government supply of Dormigen, the silver bullet of pharmaceuticals, has been depleted just as demand begins to spike. Set in the near future, The Rationing centers around a White House struggling to quell the crisis—and control the narrative. Working together, just barely, are a savvy but preoccupied president; a speaker more interested in jockeying for position—and a potential presidential bid—than attending to the minutiae of disease control; a patriotic majority leader unable to differentiate a virus from a bacterium; a strategist with brilliant analytical abilities but abominable people skills; and, improbably, our narrator, a low-level scientist with the National Institutes of Health who happens to be the world’s leading expert in lurking viruses. Little goes according to plan during the three weeks necessary to replenish the stocks of Dormigen. Some Americans will get the life-saving drug and others will not, and nations with their own supply soon offer aid—but for a price. China senses blood and a geopolitical victory, presenting a laundry list of demands that ranges from complete domination of the South China Sea to additional parking spaces at the UN, while India claims it can save the day for the U.S.
