Citizen Empowerment through Digital Transformation in Government Neeta Verma 2021-12-31

Technological innovations across the globe are bringing profound change to our society. Governments around the world are experiencing and embracing this technology-led shift. New platforms, emerging technologies, customizable products, and changing citizen demand and outlook towards government services are reshaping the whole journey. When it comes to the application of Information and Communication Technologies (ICT) in any sector, the Government of India has emerged as an early adopter of these technologies and has also focused on last-mile delivery of citizen-centric services. Citizen Empowerment through Digital Transformation in Government takes us through the four-decade long transformational journey of various key sectors in India where ICT has played a major role in reimagining government services to citizens across the country. It touches upon the emergence of the National Informatics Centre as a premier technology institution of the Government of India and its collaborative efforts with the Central, State Governments, as well as the District level administration, to deliver best-in-class solutions. Inspiring and informative, the book is filled with real-life transformation stories that have helped to lead the people and the Government of India to realize their vision of a digitally empowered nation.

Introduction to the Smart Court System-of-Systems Engineering Project of China Jianfeng Xu 2022-06-30

This book discusses the overall development and use of smart courts from the perspective of system-of-systems engineering (SoSE) and its methodology, analyzes the relationships between the components, structures, environments, and functions of various systems, and illustrates the basic approaches to system design, specification, integration, operation and management. As the general introductory book of the China Smart Court Development Series, this book provides an overview of the development of Chinese people's courts in the application of information technology over the past two decades and outlines the key areas of exploration in the Smart Court SoSe project centered on the development practices during the 13th Five-Year Plan period. It also forecasts the future development and evolution of the smart court information system. The key topics introduced in the book, including the overall design of complex information systems, integrated interconnection networks-based system integration, judicial big data quality control and analytics services, various types of AI-enabled judicial services, quality and efficiency-oriented operation and maintenance services for large-scale information systems, etc., all came from the

basic research of information science and theories, as well as the systems engineering practices of the Smart Court SoSe project. They not only reflect the latest findings on systems engineering and architecture methods in China and overseas, but also reveal many innovative approaches to SoSE methods and paradigms, which can be used for the design and continued development of smart courts at a new and higher starting point. It is believed that they can also serve as good examples and reference points for the development in IT application and complex information systems engineering in other sectors.

Mali International Monetary Fund. African Dept. 2017-07-12 This paper discusses Mali's Seventh Review Under the Extended Credit Facility Arrangement, and Request for Extension of Augmentation of Access. Program implementation is broadly satisfactory but the external position remains difficult and fiscal challenges are mounting. All December 2016 quantitative targets were met. Delays were recorded in the implementation of structural reforms but the authorities have since taken corrective measures. For 2017, expenditures will exceed previously programmed levels to address new security needs as well as costs associated with the decentralization. The IMF staff supports the authorities' request for an augmentation of access equivalent to 13.6 percent of quota in 2017 and extension of the program through 2018.

External Debt Management Thomas Martin Klein 1994-01-01 World Bank Technical Paper 245. This document was designed primarily for staff of newly established debt management institutions within governments that are launching borrowing programs, and discusses the entire range of external debt management. Topics include the organizational procedures for negotiating foreign loans and credits, the control and coordination of borrowing decisions, risk management, the administration of new loans, and external debt accounting and statistics. Basic accounting principles are reviewed and the use of computers explored. The authors stress that the government unit with responsibility for meeting future debt service obligations should also play a major role in decisions regarding foreign borrowing. Reporting statistics on external debt is a crucial part of a country's relationship with the World Bank and other donors. The Bank has formal requirements for debt reporting by member nations and accurate accounting is a prerequisite to having loans considered by the Bank's Executive Board. This book is an essential reference for training and technical assistance programs in asset and liability management.

Public Sector Debt Statistics International Monetary Fund 2011-12-08 The global financial crisis of recent years and the associated large fiscal deficits and debt levels that have impacted many countries underscores the importance of reliable and timely government statistics and, more broadly, public sector debt as a critical element in countries fiscal and external sustainability. Public Sector Debt Statistics is the first international guide of its kind, and its primary objectives are to improve the quality and timeliness of key debt statistics and promote a convergence of recording practices to foster international comparability and as a reference for national compilers and users for compiling and disseminating these data. Like other statistical guides published by the IMF, this one was prepared in consultation with countries and international agencies, including the nine organizations of the Inter-Agency Task Force on Finance Statistics (TFFS). The guide's preparation was based on the broad range of experience of our institutions and benefitted from consultation with national compilers of government finance and public sector debt statistics. The guide's concepts are harmonized with those of the System of National Accounts (2008) and the Balance of Payments and International Investment Position Manual, Sixth Edition.

Rwanda International Monetary Fund. Fiscal Affairs Dept. 2023-08 This Technical Report discusses the results of the Public Investment Management Assessment (PIMA), including the Climate module, for Rwanda, undertaken in 2022. The Rwandan government has placed significant emphasis on public investment to support the country's economic transformation, and investment has accelerated in recent years. The country performs well in the design and effectiveness of its public investment management

institutions, in planning and coordination, but has mixed results in allocation and implementation, as evidenced by the stalling and abandonment of some projects. Infrastructure development is also a crucial component of the country's climate change adaptation strategy. Rwanda's Nationally Determined Contribution outlines measures to address climate change, with an estimated cost of over USD 5.3 billion (55 percent of GDP) by 2030. Rwanda already performs strongly in climate change-aware planning, with a well-designed and effective system for integrating climate change considerations in national and sectoral planning processes. However, there is room to enhance project appraisal and selection processes by incorporating climate change mitigation and adaptation criteria. Many important documents and data remain unpublished, such as the Fiscal Risk Review, project costs, and selection criteria, reducing accountability and scrutiny.

Transforming Microfinance Institutions Joanna Ledgerwood 2006-08-30 In response to a clear need by low-income people to gain access to the full range of financial services including savings, a growing number of microfinance NGOs are seeking guidelines to transform from credit-focused microfinance organizations to regulated deposit-taking financial intermediaries. In response to this trend, this book presents a practical 'how-to' manual for MFIs to develop the capacity to become licensed and regulated to mobilize deposits from the public. 'Transforming Microfinance Institutions' provides guidelines for regulators to license and regulate microfinance providers, and for transforming MFIs to meet the demands of two major new stakeholders regulators and shareholders. As such, it focuses on developing the capacity of NGO MFIs to mobilize and intermediate voluntary savings. Drawing from worldwide experience, it outlines how to manage the transformation process and address major strategic and operational issues inherent in transformation including competitive positioning, business planning, accessing capital and shareholders, and how to 'transform' the MFI's human resources, financial management, MIS, internal controls, and branch operations. Case studies then provide examples of developing a new regulatory tier for microfinance, and how a Ugandan NGO transformed to become a licensed financial intermediary. This book will be invaluable to regulators and microfinance NGOs contemplating institutional transformation and will be of tremendous use to donors and technical support agencies supporting MFIs in their transformation.
