A National Strategy to Reduce Food Waste at the Consumer Level National Academies of Sciences, Engineering, and Medicine 2020-10-14
Approximately 30 percent of the edible food produced in the United States is wasted and a significant portion of this waste occurs at the consumer level. Despite food's essential role as a source of nutrients and energy and its emotional

and cultural importance, U.S. consumers waste an estimated average of 1 pound of food per person per day at home and in places where they buy and consume food away from home. Many factors contribute to this waste—consumers behaviors are shaped not only by individual and interpersonal factors but also by influences within the food system, such as policies, food marketing and the media. Some food waste is unavoidable, and there is substantial variation in how food waste and its impacts are defined and measured. But there is no doubt that the consequences of food waste are severe: the wasting of food is costly to consumers, depletes natural resources, and degrades the environment. In addition, at a time when the COVID-19 pandemic has severely strained the U.S. economy and sharply increased food insecurity, it is predicted that food waste will worsen in the short term because of both supply chain disruptions and the closures of food businesses that affect the way people eat and

the types of food they can afford. A National Strategy to Reduce Food Waste at the Consumer Level identifies strategies for changing consumer behavior, considering interactions and feedbacks within the food system. It explores the reasons food is wasted in the United States, including the characteristics of the complex systems through which food is produced, marketed, and sold, as well as the many other interconnected influences on consumers' conscious and unconscious choices about purchasing, preparing, consuming, storing, and discarding food. This report presents a strategy for addressing the challenge of reducing food waste at the consumer level from a holistic, systems perspective.

Expanding Archaeology James M. Skibo
1995-07 Attempts to define behavioral archaeology more comprehensively than is common in order to illustrate its role in the theoretical landscape of contemporary archaeology. To flesh out points of agreement or

dissent, the perspectives of the chapters range from those of behavioral archaeology, old and new, to those of historical, selectionist, and postprocessual archaeology. Many of the 15 papers were first presented at a symposium titled "From Airline Trash to Potsherds," held at the 56th annual meeting of the Society for American Archaeology in 1992.

Funds of Knowledge Norma Gonzalez

2006-04-21 The concept of "funds of knowledge" is based on a simple premise: people are competent and have knowledge, and their life experiences have given them that knowledge. The claim in this book is that first-hand research experiences with families allow one to document this competence and knowledge, and that such engagement provides many possibilities for positive pedagogical actions. Drawing from both

Vygotskian and neo-sociocultural perspectives in designing a methodology that views the everyday practices of language and action as constructing knowledge, the funds of knowledge approach facilitates a systematic and powerful way to represent communities in terms of the resources they possess and how to harness them for classroom teaching. This book accomplishes three objectives: It gives readers the basic methodology and techniques followed in the contributors' funds of knowledge research; it extends the boundaries of what these researchers have done; and it explores the applications to classroom practice that can result from teachers knowing the communities in which they work. In a time when national educational discourses focus on system reform and wholesale replicability across school sites, this book offers a counter-perspective stating that instruction must be linked to students' lives, and that details of effective pedagogy should be linked to local histories and community contexts.

This approach should not be confused with parent participation programs, although that is often a fortuitous consequence of the work described. It is also not an attempt to teach parents "how to do school" although that could certainly be an outcome if the parents so desired. Instead, the funds of knowledge approach attempts to accomplish something that may be even more challenging: to alter the perceptions of working-class or poor communities by viewing their households primarily in terms of their strengths and resources, their defining pedagogical characteristics. Funds of Knowledge: Theorizing Practices in Households, Communities, and Classrooms is a critically important volume for all teachers and teachers-to-be, and for researchers and graduate students of language, culture, and education.

not just products and business models—they must transform the organization itself. Based on two decades of research and advising companies around the world, Rogers identifies the five biggest barriers to digital transformation: vision, priorities, experimentation, governance, and capabilities. He then shows how any business can evolve by heeding the lessons of companies such as Disney, Walmart, Mastercard, Air Liquide, and the New York Times Company. The Digital Transformation Roadmap provides a practical blueprint for organizational change, illustrated with real-world case studies and step-by-step planning tools. Rogers shows every leader how to think beyond the churn of new technologies and rebuild their organization for a world of constant change.

Nutrition among Vulnerable Populations

Heather Eicher-Miller 2020-11-27 Food insecurity and low resources continue to be a burden influencing the health, well-being, growth, and development of millions of U.S. children and adults. Groups and individuals experiencing restrained access to food are our neighbors, individuals we may see each day, and individuals who we may not interact with or see because of their isolated situations. They include the elderly, those experiencing mental illness, veterans, certain race/ethnic groups, adolescents, young women with children, those living in rural areas, and those using food pantries, among others. Many of these groups, both hidden and visible, have rates of food insecurity above the national average that are resistant to national improvements in food security. Yet, attention to these subsets of the population is imperative to improve U.S. health and nutrition and to reduce rates of chronic disease. Many groups face specific barriers to

maintaining sufficient food, for example, rural populations may find it difficult to access federal food assistance or other resources such as food pantries and nutrition education because of distance or lack of consistent internet access separating them from these resources. Further, their remote locations may make it difficult to obtain the types of foods that they prefer. Other specific barriers may include limited facilities and equipment for food preparation, access to culturally appropriate foods and preparation supplies, and foods that complement the foods that they already have. Tailored approaches to quantify access to food, the nutrition environment, dietary intake, and other barriers are necessary to build successful interventions and to quantify the needs of these populations.

Haarlem Heather Neff 2010-03-10 “The only thing that’ll last forever is my Thirst” So says Abel Crofton as he explores the streets and canals of Amsterdam. A New York tunnel worker who’s struggling to stay sober after years of

alcoholism, Abel is searching for the mother he's never known. Despite having few clues as to her whereabouts, he soon finds a bureaucratic trail that takes him to Haarlem, the Dutch town from which the famed African-American neighborhood takes its name. As Abel ventures into more new territory, he also takes on his identity as a Black man, his rough childhood in Harlem, New York,

his relationship to his bitter father, and his battle with addiction. The questions around his life only get more complicated after he meets a coldly direct waitress and a ragged jazz musician, both also bearing major scars from their pasts. The road leads to Haarlem for them as well. Welcome to Abel's search for salvation in another tight page turner from Heather Neff.
