Connections Maths Lorraine Mottershead 2004 Connections Stage 4

Blackline Masters is designed for students studying the Stage 4 (Years 7 and 8) course. The blackline masters in this book are generally quite challenging. They provide interesting enrichment activities that will expand students' skills in working mathematically and will help in developing positive attitudes towards mathematics. Technology can be used, where appropriate, to develop further understanding of mathematical concepts. These blackline masters are also useful in assessing learning outcomes; they provide opportunities to work with others and also gives students an interesting way of showing their mathematical skills. Features include: a variety of problem-solving activities associated with the mathematics students are studying practise sheets to revise

basic mathematical facts practical work that involves constructions of and investigations of the properties of basic shapes and solids language exercises to revise words used in the topics a number of grids that are useful for drawing shapes and investigating the properties of shapes answers to most of the blackline master sheets

Foundation Maths Anthony Croft 2010 "Foundation Maths has been written for students taking higher and further education courses who have not specialised in mathematics on post-16 qualifications and need to use mathematical tools in their courses. It is ideally suited to those studying marketing, business studies, management, science,

engineering, social science, geography, combined studies and design. It will be useful for those who lack confidence and who need careful, steady guidance in mathematical methods. For those whose mathematical expertise is already established, the book will be a helpful revision and reference guide. The style of the book also makes it suitable for self-study and distance learning." -- Page 4 of cover.

Pearson Mathematics Charlotte Wilkinson 2010-07 This book is the first of two books for students working at Level 4 of the MATHEMATICS AND STATISTICS CURRICULUM. Students at this level already have good additive strategies. They should know their multiplication facts in order to develop efficient multiplicative strategies and begin to develop proportional reasoning. Number is extended into algebraic formulae and also used across the other strands of Geometry & Measurement, and Statistics. Students also develop their statistical thinking. Mathematics is all about solving problems and not about doing pages of sums, so this book provides plenty of opportunity for students to put their mathematical knowledge to work in real contexts across all the strands.
