Self-Hypnosis For Dummies Mike Bryant 2010-09-14 Self-Hypnosis For Dummies is a hands-on guide to achieving your goals using hypnosis. Whether you want to lose weight, overcome anxiety or phobias, cure insomnia, stop smoking, or simply stop biting your nails, this guide has it covered! The reassuring and straight-talking information will help you harness the power of your mind and re-train your subconscious to think in more healthy and constructive ways, and to overcome specific issues, such as anxiety and paranoia, and break bad habits, such as smoking. The easy-to-follow style will guide you through every step of the process, empowering you to take control and start making changes right away.

CXC Biology Louis Chinnery 2001-03-28 This edition includes questions throughout to test understanding and reinforces new knowledge and concepts through structured revision questions at the end of each chapter It includes all essential practical work with structured questions and a full apparatus list, taking account of the new guidelines on safety and explains important words in a detailed glossary.

Education for the Twenty-first Century International Commission on Education for the Twenty-first Century 1998 Containing a selection of texts on education prepared during the work of the International Commission on Education for the Twenty-first Century, this volume bears witness to some paradoxes faced by education: to reconcile divergent aims and trends, to embody both continuity and renewal, to encourage conformity and innovation. These papers are intended to complement existing literature to respond to questions that arose in the course of the Commission's work, and to illuminate specific issues that cross disciplines.

Suitable for lower secondary students in all parts of the Caribbean, this course has been specially written to help students develop the skills they need for success in social studies.

Brain Rules for Aging Well John Medina 2017-10-03 How come I can never find my keys? Why don't I sleep as well as I used to? Why do my friends keep repeating the same stories? What can I do to keep my brain sharp? Scientists know. Brain Rules for Aging Well, by developmental molecular biologist Dr. John Medina, gives you the facts, and the prescription to age well, in his signature engaging style. With so many discoveries over the years, science is literally changing our minds about the optimal care and feeding of the brain. All of it is captivating. A great deal of it is unexpected. In his New York Times best seller Brain Rules, Medina showed us how our brains really work, and why we ought to redesign our workplaces and schools to match. In Brain Rules for Baby, he gave parents the brain science they need to know to raise happy, smart, moral kids. Now, in Brain Rules for Aging Well, Medina shares how you can make the most of the years you have left. In a book destined to be a classic on aging, Medina's fascinating stories and infectious sense of humor breathe life into the science. Brain Rules for Aging Well is organized into four sections, each laying out familiar problems with surprising solutions. First up, the social brain, in which topics ranging from relationships to happiness and gullibility illustrate how our emotions change with age. The second section focuses on the thinking brain, explaining how working memory and executive function change with time. The third section is all about your body: how certain kinds of exercise, diets, and sleep can slow the decline of aging. Each section is sprinkled with practical advice, for example, the fascinating benefits of dancing, and the brain science behind each intervention. The final section is about the future. Your future. Medina connects all the chapters into a plan for maintaining your brain health. You may already be experiencing the sometimes-unpleasant effects of the aging process. Or you may be deeply concerned about your loved ones who are. Either way, Brain Rules for Aging Well is for you.

Biology for CSEC® Karen Morrison 2014-11-13 Newly revised in line with the latest syllabus and with a modernised, student-friendly design, which provides additional practice for students and brings lab work to life with exciting activities and simulations.

Come Back Old Iron Blue Elkanah Rhule 2000

Connecting Histories Christopher E. Goscha 2009 Connecting Histories: Decolonization and the Cold War in Southeast Asia draws on newly available archival documentation from both Western and Asian countries to explore decolonization, the Cold War, and the establishment of a new international order in post-World War II Southeast Asia. Major historical forces intersected here--of power, politics, economics, and culture--on trajectories East to West, North to South, across the South itself, and along less defined tracks. Especially important, democratic-communist competitions sought the loyalties of Southeast Asian nationalists, even as some colonial powers sought to resume their prewar dominance. These intersections are the focus of the contributions to this book, which use new sources and approaches to examine some of the most important historical trajectories of the twentieth century in Burma, Vietnam, Malaysia, and a number of other countries.

Management Norma Maynard 2005-01-20 This course is aimed specifically at grade 10 and 11 secondary school students in the Caribbean who are preparing for their C-SEC examination. The course is divided into three books: Management; Food and Nutrition; and Clothing and Textiles.

The Next Step 2017-03 The Next Step: Exponential Life presents essays on the potential of what are known as "exponential technologies"--those whose development is accelerating rapidly, such as robotics, artificial intelligence or industrial biology--considering their economic, social, environmental, ethical and even ontological implications. This book's premise is that humanity is at the beginning of a technological revolution that is evolving at a much faster pace than earlier ones--a revolution is so far-reaching it is destined to generate transformations we can only begin to imagine. Contributors include Aubrey D.N.J. de Grey, Jonathan Rossiter, Joseph A. Paradiso, Kevin Warwick, Huma Shah, Ramón López de Mántaras, Helen Papagiannis, Jay David Bolter, Maria Engberg, Robin Hanson, Stuart Russell, Darrell M. West, Francisco González, Chris Skinner, Steven Monroe Lipkin, S. Matthew Liao, James Giordano, Luciano Floridi, Seán Ó Héigeartaigh and Martin Rees.

The Voynich Manuscript M. E. D'Imperio 1978 In spite of all the papers that others have written about the manuscript, there is no complete survey of all the approaches, ideas, background information and analytic studies that have accumulated over the nearly fifty-five years since the manuscript was discovered by Wilfrid M. Voynich in 1912. This report pulls together all the information the author could obtain from all the sources she has examined, and to present it in an orderly fashion. The resulting survey will provide a firm basis upon which other students may build their work, whether they seek to decipher the text or simply to learn more about the problem.

Cape Economics Dave Ramsingh 2017-02-09 This CAPE Economics Multiple Choice Practice book is an invaluable exam preparation aid for CAPE Economics students. This book provides excellent practice for the multiple choice questions from Paper 1 of the CAPE examination, and has been specially written to help CAPE Economics students improve their Paper 1 exam score.

Human and Social Biology for CSEC Peter Givens 2014-11-01 This completely new title is an up-to date resource that meets the requirements of the latest CXC syllabus examinable from 2011.
