The Tragedy of Great Power Politics (Updated Edition)

John J. Mearsheimer 2003-01-17 "A superb book...Mearsheimer has made a significant contribution to our understanding of the behavior of great

powers."—Barry R. Posen, *The National Interest* The updated edition of this classic treatise on the behavior of great powers takes a penetrating look at the question likely to dominate international relations in the twenty-first century: Can China rise peacefully? In clear, eloquent prose, John Mearsheimer explains why the answer is no: a rising China will seek to dominate Asia, while the United States, determined to remain the world's sole regional hegemon, will go to great lengths to prevent that from happening. The tragedy of great

power politics is inescapable.

Women, Race, & Class Angela Y. Davis 2011-06-29 From one of our most important scholars and civil rights activist icon, a powerful study of the women's liberation movement and the tangled knot of oppression facing Black women. "Angela Davis is herself a woman of undeniable courage. She should be heard."—The New York Times Angela Davis provides a powerful history of the social and political influence of whiteness and elitism in feminism, from abolitionist days to the present, and demonstrates how the racist and classist biases of its leaders inevitably hampered any collective ambitions. While Black women were aided by some activists like Sarah and Angelina Grimke and the suffrage cause found unwavering support in Frederick Douglass, many women played on the fears of white supremacists for political gain rather than take an intersectional approach to liberation. Here, Davis not only contextualizes the legacy and pitfalls of civil and women's rights activists, but also discusses Communist women, the murder of Emmitt Till, and Margaret Sanger's racism. Davis shows readers how the inequalities between Black and white women influence the contemporary issues of rape, reproductive freedom, housework and child care in this bold and indispensable work.

The Bottom Billion Paul Collier 2007-05-25 In the universally acclaimed and award-winning *The Bottom Billion*, Paul Collier reveals that fifty failed states--home to the poorest one billion people on Earth--pose the central challenge of the developing world in the twenty-first century. The book shines much-needed light on this group of small nations, largely unnoticed by the industrialized West, that are dropping further and further behind the majority of the world's people, often falling into an absolute decline in living standards. A struggle rages within each of these nations between reformers and corrupt leaders--and the corrupt are winning. Collier analyzes the causes of failure, pointing to a set of traps that ensnare these countries, including civil war, a dependence on the extraction and

export of natural resources, and bad governance.

Standard solutions do not work, he writes; aid is often ineffective, and globalization can actually make matters worse, driving development to more stable nations. What the bottom billion need, Collier argues, is a bold new plan supported by the Group of Eight industrialized nations. If failed states are ever to be helped, the G8 will have to adopt preferential trade policies, new laws against corruption, new international charters, and even conduct carefully calibrated military interventions. Collier has spent a lifetime working to end global poverty. In *The Bottom Billion*, he offers real hope for solving one of the great humanitarian crises facing the world today. "Set to become a classic. Crammed with statistical nuggets and common sense, his book should be compulsory reading." --The Economist "If Sachs seems too saintly and Easterly too cynical, then Collier is the authentic old Africa hand: he knows the terrain and has a keen ear.... If you've ever found yourself on one side or the other of those arguments--and who hasn't?--then you simply must read this book." --Niall Ferguson, The New York Times Book Review "Rich in both analysis and recommendations.... Read this book. You will learn much you do not know. It will also change the way you look at the tragedy of persistent poverty in a world of plenty." --Financial Times

The Peacekeeper B. L. Blanchard 2022-06 Against the backdrop of a never-colonized North America, a broken Ojibwe detective embarks on an emotional and twisting journey toward solving two murders, rediscovering family, and finding himself. North America was never colonized. The United States and Canada don't exist. The Great Lakes are surrounded by an independent Ojibwe nation. And in the village of Baawitigong, a Peacekeeper confronts his devastating past. Twenty years ago to the day, Chibenashi's mother was murdered and his father confessed. Ever since, caring for his still-traumatized younger sister has been Chibenashi's privilege and penance. Now, on the same night of the Manoomin harvest, another woman is slain. His mother's best friend. The

The major city of Shikaakwa is home to the victim's cruelly estranged family--and to two people Chibenashi never wanted to see again: his imprisoned father and the lover who broke his heart. As the questions mount, the answers will change his and his sister's lives forever. Because Chibenashi is about to discover that everything about those lives has been a lie.

Pathways for Peace United Nations;World Bank 2018-04-13 Violent conflicts today are complex and increasingly protracted, involving more nonstate groups and regional and international actors. It is estimated that by 2030--the horizon set by the international community for achieving the Sustainable Development Goals--more than half of the world's poor will be living in countries affected by high levels of violence. Information and communication technology, population movements, and climate change are also creating shared risks that must be managed at both national and international levels. Pathways for Peace is a joint United Nations+World Bank Group study that originates from the conviction that the international community's attention must urgently be refocused on prevention. A scaled-up system for preventive action would save between US\$5 billion and US\$70 billion per year, which could be reinvested in reducing poverty and improving the well-being of populations. The study aims to improve the way in which domestic development processes interact with security, diplomacy, mediation, and other efforts to prevent conflicts from becoming violent. It stresses the importance of grievances related to exclusion--from access to power, natural resources, security and justice, for example--that are at the root of many violent conflicts today. Based on a review of cases in which prevention has been successful, the study makes recommendations for countries facing emerging risks of violent conflict as well as for the international community. Development policies and programs must be a core part of preventive efforts; when risks are high or

building up, inclusive solutions through dialogue, adapted macroeconomic policies, institutional reform, and redistributive policies are required. Inclusion is key, and preventive action needs to adopt a more people-centered approach that includes mainstreaming citizen engagement. Enhancing the participation of women and youth in decision making is fundamental to sustaining peace, as well as long-term policies to address the aspirations of women and young people.

Are Prisons Obsolete? Angela Y. Davis 2011-01-04 With her characteristic brilliance, grace and radical audacity, Angela Y. Davis has put the case for the latest abolition movement in American life: the abolition of the prison. As she quite correctly notes, American life is replete with abolition movements, and when they were engaged in these struggles, their chances of success seemed almost unthinkable. For generations of Americans, the abolition of slavery was sheerest illusion. Similarly, the entrenched system of racial segregation seemed to last forever, and generations lived in the midst of the practice, with few predicting its passage from custom. The brutal, exploitative (dare one say lucrative?) convict-lease system that succeeded formal slavery reaped millions to southern jurisdictions (and untold miseries for tens of thousands of men, and women). Few predicted its passing from the American penal landscape. Davis expertly argues how social movements transformed these social, political and cultural institutions, and made such practices untenable. In *Are Prisons Obsolete?*, Professor Davis seeks to illustrate that the time for the prison is approaching an end. She argues forthrightly for "decarceration", and argues for the transformation of the society as a whole.

actors are playing an increasingly vital role in safeguarding peace and stability across the continent. But while the African Union has demonstrated its ability to deploy forces on short notice and in difficult circumstances, the challenges posed by increasingly complex conflict zones have revealed a widening divide between the theory and practice of peacekeeping. With the AU's African Standby Force becoming fully operational in 2016, this timely and much-needed work argues that responding to these challenges will require a new and distinctively African model of peacekeeping, as well as a radical revision of the current African security framework. The first book to provide a comprehensive overview and analysis of African peace operations, *The Future of African Peace Operations* gives a long overdue assessment of the ways in which peacekeeping on the continent has evolved over the past decade. It will be a vital resource for policy makers, researchers and all those seeking solutions and insights into the immense security challenges which Africa is facing today.

Taking Sides in Peacekeeping Emily Paddon Rhoads 2016
United Nations peacekeeping has undergone radical transformation in the new millennium. Where it once was limited in scope and based firmly on consent of all parties, contemporary operations are now charged with penalizing spoilers of peace and protecting civilians from peril. Despite its more aggressive posture, practitioners and academics continue to affirm the vital importance of impartiality whilst stating that it no longer means what it once did. *Taking Sides in Peacekeeping* explores this transformation and its implications, in what is the first conceptual and empirical study of impartiality in UN peacekeeping. The book challenges dominant scholarly approaches that conceive of norms as linear and static, conceptualizing impartiality as a 'composite' norm, one that is not free-standing but an aggregate of other principles—each of which can change and is open to contestation. Drawing on a large body of primary evidence, it uses the

composite norm to trace the evolution of impartiality, and to illuminate the macro-level politics surrounding its institutionalization at the UN, as well as the micro-level politics surrounding its implementation in the Democratic Republic of the Congo, site of the largest and costliest peacekeeping mission in UN history. *Taking Sides in Peacekeeping* reveals that, despite a veneer of consensus, impartiality is in fact highly contested. As the collection of principles it refers to has expanded to include human rights and civilian protection, deep disagreements have arisen over what keeping peace impartially actually means. Beyond the semantics, the book shows how this contestation, together with the varying expectations and incentives created by the norm, has resulted in perverse and unintended consequences that have politicized peacekeeping and, in some cases, effectively converted UN forces into one warring party among many. *Taking Sides in Peacekeeping* assesses the implications of this radical transformation for the future of peacekeeping and for the UN's role as guarantor of international peace and security.

Male Roles, Masculinities and Violence Ingeborg Breines 2000
This book is based on an expert group meeting entitled 'Male Roles and Masculinities in the Perspective of a Culture of Peace', which was organised by UNESCO in Oslo, Norway in 1997, the first international discussion of the connections between men and masculinity and peace and war. The group consisted of researchers, activists, policy makers and administrators and the aim of the meeting was to formulate practical suggestions for change. Chapters in the book consist of both regional case studies and social science research on the connections of traditional masculinity and patriarchy to violence and peace building. The Culture of Peace initiatives in this book show how violence is ineffective, and the book contests the views in the socialisation of boy-children that aggressiveness, violence and force are an acceptable means of expression.

Thinking in Systems Donella Meadows 2008-12-03 In the years following her role as the lead author of the international bestseller, *Limits to Growth*—the first book to show the consequences of unchecked growth on a finite planet—Donella Meadows remained a pioneer of environmental and social analysis until her untimely death in 2001. *Thinking in Systems*, is a concise and crucial book offering insight for problem solving on scales ranging from the personal to the global. Edited by the Sustainability Institute's Diana Wright, this essential primer brings systems thinking out of the realm of computers and equations and into the tangible world, showing readers how to develop the systems-thinking skills that thought leaders across the globe consider critical for 21st-century life. Some of the biggest problems facing the world—war, hunger, poverty, and environmental degradation—are essentially system failures. They cannot be solved by fixing one piece in isolation from the others, because even seemingly minor details have enormous power to undermine the best efforts of too-narrow thinking. While readers will learn the conceptual tools and methods of systems thinking, the heart of the book is grander than methodology. Donella Meadows was known as much for nurturing positive outcomes as she was for delving into the science behind global dilemmas. She reminds readers to pay attention to what is important, not just what is quantifiable, to stay humble, and to stay a learner. In a world growing ever more complicated, crowded, and interdependent, *Thinking in Systems* helps readers avoid confusion and helplessness, the first step toward finding proactive and effective solutions.

Unintended Consequences of Peacekeeping Operations

Chiyuki Aoi 2007 The deployment of a large number of soldiers, police officers and civilian personnel inevitably has various effects on the host society and economy, not all of which are in keeping with the peacekeeping mandate and intent or are easily discernible prior to the intervention. This book is one of the first attempts to improve our understanding of unintended consequences of peacekeeping operations, by bringing together field experiences and academic analysis. The aim of the book is not to discredit peace operations but rather to improve the way in which such operations are planned and managed.

Mission Command in the 21st Century Nathan K. Finney 2016-03

Lessons from Kosovo Larry K. Wentz 2002 Civil-military unity of effort has been an essential yet frustrating elusive requirement for success in post-cold-war peace operations. The need to coordinate, collaborate, and share information between civilian and military entities is on the rise and is deemed an essential requirement for success. Today's information and communications technologies serve to facilitate the exchange of information among the disparate players of peace operations, but the ability to actually realize open information sharing in real-world coalition operations remains problematic. The integration of relevant information and the timely dissemination of the processed information to interested parties in the field is well within the realities of today's technology. For the Balkans operations, CCRP led a study of the U.S. participation in the Bosnia operation, the NATO-led Implementation Force (IFOR). Kosovo offered another unique opportunity for CCRP to conduct additional coalition C4ISR-focused research in the areas of coalition command and control, civil-military cooperation, information assurance, C4ISR interoperability, and information operations. The Kosovo research effort was launched in the fall of 1999 and completed in the summer of 2001. Insights from the Kosovo experience documented in this book are part of

the continuing effort of CCRP to educate the C4ISR community on the realities of military support to multinational peace operations. The 30 chapters in this book address the following topics: Kosovo versus Bosnia, Kosovo's political evolution, Kosovo's elections, the air war over Serbia, Operation Allied Force, NATO Headquarters intelligence, Kosovo and the media, civilian-military operations, the humanitarian dimension, law and order during Operation Joint Guardian, information operations, Task Force Falcon, coalition command arrangements, intelligence and situational awareness, public affairs, communications systems, and coordination and information sharing.

Basic Documents on International Migration Law, 2ed

Richard Plender 1997-01-01 The second revised edition of "Basic Documents on International" "Migration Law" brings together in a single volume the principal international conventions, declarations and instruments governing international migration in the form in which they stood as of early 1997. It contains the texts of these materials (or, where appropriate, extracts from the texts) together with information on the current state of ratification of each instrument and indications of any reservations, interpretative declarations or other statements made by the States parties. The book begins with excerpts from general multilateral texts, ranging from the Universal Declaration of Human Rights to the Vienna Declaration of 1993. This is followed by instruments governing nationality and statelessness; materials relating to refugees; and texts emanating from the Council of Europe, the Conference on Security and Cooperation in Europe, the European Community and Union and the International Labour Organization. The selection ends with a miscellany of texts of general significance, from the Inter-American Convention on Territorial Asylum of 1954 to the Convention of Human Rights concluded by the Commonwealth of Independent States in 1995. This publication is not intended for scholars alone, but also for practitioners in migration law. The texts are of practical significance for those concerned with the

administration of the laws affecting migration and for representatives of those affected by these laws. It also serves as a companion to Richard Plender's monograph, "International Migration Law."

The Use of Force in UN Peacekeeping Peter Nadin

2018-02-06 This edited volume provides a detailed and nuanced analysis of UN peacekeeping and the use of force, to inform a better understanding of the complex and interconnected issues at stake for the UN community. Peacekeeping is traditionally viewed as a largely passive military activity, governed by the principles of impartiality, consent, and the minimum use of force. Today, most large UN Peacekeeping Operations are only authorized to use force in defence of their mandates and to protect civilians under imminent threat of physical violence. Recently, with the deployment of the Force Intervention Brigade in the DRC, the UN has gone beyond peacekeeping and into the realm of peace-enforcement. These developments have brought to the fore questions regarding the use of force in the context of peacekeeping. The key questions addressed in this book examine not only the utility of force, but also the dilemmas and constraints inherent to the purposive use of force at a strategic, operational and tactical level. Should UN peacekeepers exercise military initiative? Is UN peacekeeping capable of undertaking offensive military operations? If so, then under what circumstances should peacekeepers use force? How should force be wielded? And against whom? With chapters written by experts in the field, this comprehensive volume will be of great use and interest to postgraduate students, academics and experts in international security, the UN, peacekeeping and diplomacy.

The UN at War John Karlsrud 2017-11-26 This book is a critical political and institutional reflection on UN peace operations. It provides constructive suggestions as to how the UN and the international system can evolve to remain relevant and tackle the peace and security challenges of the 21st century, without abandoning the principles that the UN was founded upon and on which the

legitimacy of UN peace operations rests. The author analyses the evolving politics on UN peace operations of the five veto powers of the UN Security Council, as well as major troop-contributing countries and western powers. He investigates the move towards peace enforcement and counter-terrorism, and what consequences this development may have for the UN. Karlsrud issues a challenge to practitioners and politicians to make sure that the calls for reform are anchored in a desire to improve the lives of people suffering in conflicts on the ground—and not spurred by intra-organizational turf battles or solely the narrow self-interests of member states. Finally, he asks how the UN can adapt its practices to become more field- and people-centered, in line with its core, primary commitments of protecting and serving people in need.

The Transformation of Peace O. Richmond 2016-01-08 This book examines the transformation of the discourse and praxis of peace, from its early beginnings in the literature on war and power, to the development of intellectual and theoretical discourses of peace, contrasting this with the development of practical approaches to peace, and examining the intellectual and policy evolution regarding peace.

Accountability of Peace Support Operations M.C. Zwanenburg 2005-05-01 Quis custodiet ipsos custodiet? In other words, who guards the guardians? At a time when the mandate of many peace support operations includes halting violations of international humanitarian law by third parties, there is still a lack of clarity concerning accountability of peace support operations themselves. This book addresses that accountability, focusing on peace support operations under the command and control of the United Nations and the North Atlantic Treaty Organization.

The Political Economy of Civil War and UN Peace Operations Mats Berdal 2023-03-31 This book examines the operational and political challenges facing UN peace operations deployed in countries where civil war and protracted violence have given rise to the complex and

distinctive political economies of conflict. The volume explores the nature and impact of such political economies – informal systems of power and influence formed by the interaction of local, national, and region-wide war economies with the political agendas of conflict actors – on the course of UN peace operations. It focuses in detail on the UN's long-running peace operations in the Democratic Republic of Congo, South Sudan, Afghanistan, Sierra Leone, Mali, and Somalia. The book is centrally concerned with the interaction of UN missions with the power structures and local conflict dynamics that shape individual mission settings, and the challenges these pose for mediation, protection of civilians, and other tasks. It also offers a critical assessment of the various ways in which the UN 'system', from its headquarters in New York to the field, has confronted the policy challenges posed by political economies of conflict-affected states, societies, and regions. It advances a pragmatic set of policy recommendations aimed at improving the UN's ability to confront predatory and exploitative war economies. At the same time, the volume makes it clear that political and institutional obstacles to more effective UN action are certain to remain profound and are unlikely ever to be fully overcome let alone eradicated. Despite making some progress since the 1990s to better understand the political economy of civil wars, the UN has struggled with how to tackle informal networks of power and their consequences for efforts to end wars. The book will be of special interest to students of war and conflict studies, statebuilding, political economy of conflict, UN interventionism and peacebuilding, and IR/Security in general.

2020-11-02 This open access book on the state of peacebuilding in Africa brings together the work of distinguished scholars, practitioners, and decision makers to reflect on key experiences and lessons learned in peacebuilding in Africa over the past half century. The core themes addressed by the contributors include conflict prevention, mediation, and management; post-conflict reconstruction, justice and Disarmament Demobilization and Reintegration; the role of women, religion, humanitarianism, grassroots organizations, and early warning systems; and the impact of global, regional, and continental bodies. The book's thematic chapters are complemented by six country/region case studies: The Democratic Republic of Congo, Rwanda, Sierra Leone, Sudan/South Sudan, Mozambique and the Sahel/Mali. Each chapter concludes with a set of key lessons learned that could be used to inform the building of a more sustainable peace in Africa. The State of Peacebuilding in Africa was born out of the activities of the Southern Voices Network for Peacebuilding (SVNP), a Carnegie-funded, continent-wide network of African organizations that works with the Wilson Center to bring African knowledge and perspectives to U.S., African, and international policy on peacebuilding in Africa. The research for this book was made possible by a grant from Carnegie Corporation of New York.

The Insurgent Archipelago John Mackinlay 2012 As a young British officer in the Gurkha regiment, John Mackinlay served in the rainforests of North Borneo and experienced firsthand the Maoist-style insurgencies of the 1960s. Years later, as a United Nations researcher, he witnessed the chaotic deployment of international forces to Africa, the Balkans, and South Asia, and the transformation of territorial, labor-intensive uprisings into the international insurgent networks we know today. After 9/11, Mackinlay turned his eye toward the Muslim communities of Europe and institutional efforts to prevent terrorism. In particular, he investigates military expeditions to Iraq and Afghanistan and their

effect on the social cohesion of European populations that include Muslims from these regions. In a world divided between rich and poor, the surest way for the "bottom billion" to gain recognition, express outrage, or improve their circumstances is through insurgency. In this book, Mackinlay explains why leaders from the wealthiest and most powerful nations have failed to understand this phenomenon. Our current bin Laden era, Mckinlay argues, must be viewed as one stage in a series of developments swept up in the momentum of a global insurgency. The campaigns of the 1960s are directly linked to the global movements of tomorrow, yet in the past two decades, insurgent activity has given rise to a new practice that incorporates and exploits the "propaganda of the deed." This shift challenges our vertically-structured response to terror and places a greater emphasis on mastering the virtual, cyber-based dimensions of these campaigns. Mckinlay revisits the roots of global insurgencies, describes their nature and character, reveals the power of mass communications and grievance, and recommends how individual nations can counter these threats by focusing on domestic terrorism.

Boundary Boss Terri Cole, MSW, LCSW 2021-04-20 Break Free From Over-Functioning, Over-Delivering, People-Pleasing, and Ignoring Your Own Needs So You Can Finally Live the Life You Deserve! Most of us were never taught how to effectively express our preferences, desires or deal-breakers. Instead, we hide our feelings behind passive-aggressive behavior, deny our own truths, or push our emotions down until we get depressed or so frustrated that we explode, potentially destroying hard-won trust and relationships. The most successful and satisfied people on the planet have one thing in common: the ability to create and communicate clear, healthy boundaries. This ability is, hands down, the biggest game changer when it comes to creating a healthy, happy, self-determined life. In *Boundary Boss*, psychotherapist Terri Cole reveals a specific set of skills that can help you stop abandoning yourself for the sake of others (without guilt or drama) and get empowered to

consciously take control of every aspect of your emotional, spiritual, physical, personal, and professional life. Since becoming a Boundary Boss is a process, Cole also offers actionable strategies, scripts, and techniques that can be used in the moment, whenever you need them. You will learn:

- How to recognize when your boundaries have been violated and what to do next
- How your unique "Boundary Blueprint" is unconsciously driving your boundary behaviors, and strategies to redesign it
- Powerful boundary scripts so in the moment you will know what to say
- How to manage "Boundary Destroyers"—including emotional manipulators, narcissists, and other toxic personalities
- Where you fall on the spectrum of codependency and how to create healthy, balanced relationships

This book is for women who are exhausted from over-giving, overdoing, and even over-feeling. If you're getting it all done but at the expense of yourself, give yourself the gift of Boundary Boss.

Peacekeeping Intelligence David Carment 2007-01-24 This is a new evaluation of the role, dynamics and challenges of intelligence in peacekeeping activities and its place in a much wider social, economic and political context. It assesses the role of coalition forces, law enforcement agencies, development institutions, and non-governmental organisations who have become partners in peace support activities. Peacekeeping Intelligence (PKI) is a new form of intelligence stressing predominantly open sources of information used to create Open Source Intelligence (OSINT), and that demands multi-lateral sharing of intelligence at all levels. Unlike national intelligence, which emphasizes spies, satellites, and secrecy, PKI brings together many aspects of intelligence gathering including the media and NGOs. It seeks to establish standards in open source collection, analysis, security, counterintelligence and training and produces unclassified intelligence useful to the public. The challenges facing peacekeeping intelligence are increasingly entwined with questions of arms control, commercial interests, international crime,

and ethnic conflict. This book will be of great interest to all students and scholars of military and security studies, intelligence and peacekeeping.

The 2030 Spike Colin Mason 2013-06-17 The clock is relentlessly ticking! Our world teeters on a knife-edge between a peaceful and prosperous future for all, and a dark winter of death and destruction that threatens to smother the light of civilization. Within 30 years, in the 2030 decade, six powerful 'drivers' will converge with unprecedented force in a statistical spike that could tear humanity apart and plunge the world into a new Dark Age. Depleted fuel supplies, massive population growth, poverty, global climate change, famine, growing water shortages and international lawlessness are on a crash course with potentially catastrophic consequences. In the face of both doomsaying and denial over the state of our world, Colin Mason cuts through the rhetoric and reams of conflicting data to muster the evidence to illustrate a broad picture of the world as it is, and our possible futures. Ultimately his message is clear; we must act decisively, collectively and immediately to alter the trajectory of humanity away from catastrophe. Offering over 100 priorities for immediate action, *The 2030 Spike* serves as a guidebook for humanity through the treacherous minefields and wastelands ahead to a bright, peaceful and prosperous future in which all humans have the opportunity to thrive and build a better civilization. This book is powerful and essential reading for all people concerned with the future of humanity and planet earth.

Thinking about Deterrence - Enduring Questions in a Time of Rising Powers, Rogue Regimes, and Terrorism Air University Press 2019-07-11 With many scholars and analysts questioning the relevance of deterrence as a valid strategic concept, this volume moves beyond Cold War nuclear deterrence to show the many ways in which deterrence is applicable to contemporary security. It examines the possibility of applying deterrence theory and practice to space, to cyberspace, and against non-state actors. It also examines the role of nuclear

The United Nations, Peace and Security Ramesh Thakur 2006-06-08 Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter-state war. In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics, law and international relations departments, as well as policymakers in the UN and other NGOs.

David and Goliath Malcolm Gladwell 2013-10-01 Explore the power of the underdog in Malcolm Gladwell's dazzling examination of success, motivation, and the role of adversity in shaping our lives, from the bestselling author of *The Bomber Mafia*. Three thousand years ago on a battlefield in ancient Palestine, a shepherd boy felled a mighty warrior with nothing more than a stone and a sling, and ever since then the names of David and Goliath have stood for battles between underdogs and giants. David's victory was improbable and miraculous. He shouldn't have won. Or should he have? In *David and Goliath*, Malcolm Gladwell challenges how we think about obstacles and disadvantages, offering a new interpretation of what it means to be discriminated against, or cope with a disability, or lose a parent, or attend a mediocre school, or suffer from any number of other apparent setbacks. Gladwell begins with the real story of what happened between the giant and the shepherd boy those many years ago. From there, David and

Goliath examines Northern Ireland's Troubles, the minds of cancer researchers and civil rights leaders, murder and the high costs of revenge, and the dynamics of successful and unsuccessful classrooms—all to demonstrate how much of what is beautiful and important in the world arises from what looks like suffering and adversity. In the tradition of Gladwell's previous bestsellers—*The Tipping Point*, *Blink*, *Outliers* and *What the Dog Saw*—*David and Goliath* draws upon history, psychology, and powerful storytelling to reshape the way we think of the world around us.

International Law and Peace Settlements Marc Weller 2021-01-31 International Law and Peace Settlements provides a systematic and comprehensive assessment of the relationship between international law and peace settlement practice across core settlement issues, e.g. transitional justice, human rights, refugees, self-determination, power-sharing, and wealth-sharing. The contributions address key cross-cutting questions on the legal status of peace agreements, the potential for developing international law, and the role of key actors - such as non-state armed groups, third-state witnesses and guarantors, and the UN Security Council - in the legalisation and internationalisation of settlement commitments. In recent years, significant scholarly work has examined facets of the relationship between international law and peace settlements, through concepts such as jus post bellum and lex pacificatoria. International Law and Peace Settlements drives forward the debate on the legalisation and internationalisation of peace agreements with diverse contributions from leading academics and practitioners in international law and conflict resolution.

Making Gender, Making War Annica Kronsell 2011-09-23 Making Gender, Making War is a unique interdisciplinary edited collection which explores the social construction of gender, war-making and peacekeeping. It highlights the institutions and processes involved in the making of gender in terms of both men and women, masculinity and femininity. The "war question for feminism" marks a

thematic red thread throughout; it is a call to students and scholars of feminism to take seriously and engage with the task of analyzing war. Contributors analyze how war-making is intertwined with the making of gender in a diversity of empirical case studies, organized around four themes: gender, violence and militarism; how the making of gender is connected to a (re)making of the nation through military practices; UN SCR 1325 and gender mainstreaming in institutional practices; and gender subjectivities in the organization of violence, exploring the notion of violent women and non-violent men.

Securing Development Bernard Harborne 2017-03-01 Securing Development: Public Finance and the Security Sector highlights the role of public finance in the delivery of security and criminal justice services. This book offers a framework for analyzing public financial management, financial transparency, and oversight, as well as expenditure policy issues that determine how to most appropriately manage security and justice services. The interplay among security, justice, and public finance is still a relatively unexplored area of development. Such a perspective can help security actors provide more professional, effective, and efficient security and justice services for citizens, while also strengthening systems for accountability. The book is the result of a project undertaken jointly by staff from the World Bank and the United Nations, integrating the disciplines where each institution holds a comparative advantage and a core mandate. The primary audience includes government officials bearing both security and financial responsibilities, staff of international organizations working on public expenditure management and security sector issues, academics, and development practitioners working in an advisory capacity. *Awaken the Giant Within* Anthony Robbins 2013 Shows readers how to clarify their personal values, resolve internal conflicts, master emotions, and overcome debilitating habits.
