Shale Gas, the Environment and Energy Security Ruven Fleming 2017-09-29 This pioneering and in-depth study into the regulation of shale gas extraction examines how changes in the constitutional set-ups of EU Member States over the last 25 years have substantially altered the legal leverage of environmental protection and energy security as state objectives. As well as offering the first formal assessment of the legality of fracking bans and moratoria, Ruven Fleming further proposes a new methodology for the development of legally sound regulation of new energy technologies in the context of the energy transition.

The Political Economy and Media Coverage of the European Economic Crisis Julien Mercille 2014-08-27 The European economic crisis has been ongoing since 2008 and while austerity has spread over the continent, it has failed to revive economies. The media have played an important ideological role in presenting the policies of economic and political elites in a favourable light, even if the latter's aim has been to shift the burden of adjustment onto citizens. This book explains how and why, using a critical political economic perspective and focusing on the case of Ireland. Throughout, Ireland is compared with contemporary and historical examples to contextualise the arguments made. The book covers the housing bubble that led to the crash, the rescue of financial institutions by the state, the role of the European institutions and the International Monetary Fund, austerity, and the possibility of leaving the eurozone for Europe's peripheral countries. Through a systematic analysis of Ireland's main newspapers, it is argued that the media reflect elite views and interests and downplay alternative policies that could lead to more progressive responses to the crisis.

Transatlantic Financial Regulation Peter O'Shea 2021-08-13 This book examines cooperation between the US and the EU on financial regulatory reform, notably at the outset and the first three years of the global financial crisis. It discusses the development of US-EU cooperation on financial regulation over the last few decades at several levels, including at heads of state level, markets regulator level and at international level, and progresses with a detailed examination of cooperation at the outset of the financial crisis. It looks at the nature of and motivation for intense US-EU cooperation on coordinating a response to the crisis and presents a compelling argument that a defacto alliance was formed, which served to benefit respective US and EU interests domestically and in the international financial system. Providing a new perspective on financial regulatory reform after the last financial crisis and the relationship of regulatory outcomes to international financial governance, this volume will be of use to researchers interested in transatlantic relations, financial regulation, international relations, global governance, and the European Union, as well as professionals and policymakers working in foreign relations, financial markets, or banking policy.

Participatory archives in a world of ubiquitous media Natalie Pang 2017-10-02 The media environment of today is characterised by two critical factors: the development and adoption of ubiquitous mobile devices, and the strengthening of connectivity enabled by advances in ICT infrastructure and social media platforms. These developments have changed interactions and relationships between citizens and cultural custodians, as well as the ways archives are developed, kept, and used. Archives are now characterised by greater socialisations and networks that actively contribute to the signification of cultural heritage value. A range of new stakeholders, many of whom include the public, have sought to define what needs to be collectively remembered and forgotten. The world in which one or a few professional archivists worked on the sole mission of shaping how a society remembers is being displaced by a more democratised culture and the new generation of digitally networked archivists that are its natives. Using a range of case studies and perspectives, this book provides insights to the many ways that ubiquitous media have influenced archival practices and research, as well as the social and civic consequences of present-day archives. This book was published as a special issue of *Archives and Manuscripts*.

The Trans Pacific Partnership, China and India Amitendu Palit 2014-06-05 The United States and 11 other countries from both sides of the Pacific are currently negotiating the Trans-Pacific Partnership (TPP). The agreement is expected to set new benchmark for international trade through its comprehensive coverage of issues and binding regulations. It is expected to eventually mature into a regional trade agreement covering the entire Asia-Pacific. As of now, it does not include China and India, the two largest emerging markets and regional economies. The TPP has generated controversy for its excessive emphasis on trade issues, which have remained unresolved or unaddressed at the WTO due to differences between developed and emerging markets. It has also been criticized for adopting a negotiating style reflecting the US regulatory approach to international trade and also as a geo-political strategy of the US for supporting its strategic rebalancing towards Asia. From both economic and geo-political perspectives, the TPP has various significant implications for China and India that are examined in the book. This book sheds light on how China and India's entries in the TPP are mutually beneficial and how both countries can gain from the TPP by gaining preferential access to large markets and using it as an opportunity for introducing more outward-oriented reforms. The book also cautions that US must reconcile to the rebalancing of economic power within the grouping that will occur following the entries of China and India. Otherwise, the TPP and China and India might walk divergent paths and trade and regional integration in Asia-Pacific may not ever converge. This book will interest anyone who wishes to learn more about the TPP and its future implications and challenges and China and India's roles in global and regional trade.

Corporate Strategy in the Age of Responsibility Peter McManners 2016-05-13 As the era of ever expanding markets and ample resources ends, governments and business will have to behave differently. The world is facing weak economic growth, limits to affordable resources and increasing concerns about environmental consequences. During the boom times, governments championed de-regulation and business responded by adopting an anything-goes attitude. In these straitened times, strategic analysis has to engage with the challenges that society faces to create resilient corporations fit for the 21st century. In *Corporate Strategy in the Age of Responsibility*, Peter McManners, who has for nine years run strategy workshops on the Henley MBA focusing on the global business environment, sets about providing a strategic framework for navigating the new economic environment. Chief Sustainability Officers (CSOs) now exist, but they struggle to find the strategic rationale for the improvements they champion. The author argues that their good intentions often lack traction, partly because others in management don't get it, but also because they are not ambitious enough. The book is not about preaching semi-charitable behaviour or how to enhance the reputation of the corporation instead it is about surviving and thriving in a challenging and changing environment. A corporate audience familiar with strategy books will relate to this book, but will find it steers them towards radically new strategic thinking suitable for a turbulent period of transition.

Dangerous Allies Malcolm Fraser 2014-05-01 Australia has always been reliant on 'great and powerful friends' for its sense of national security and for direction on its foreign policy—first on the British Empire and now on the United States. Australia has actively pursued a policy of strategic dependence, believing that making a grand bargain with a powerful ally was the best policy to ensure its security and prosperity. *Dangerous Allies* examines Australia's history of strategic dependence and questions the continuation of this position. It argues that international circumstances, in the world and in the Western Pacific especially, now make such a policy highly questionable. Since the fall of the Soviet Union, the United States has also changed dramatically, making it less relevant to Australia and a less appropriate ally on which Australia should rely. Malcolm Fraser argues that Australia should adopt a much greater degree of independence in foreign policy, and that we should no longer merely follow other nations into wars of no direct interest to Australia or Australia's security. He argues for an end to strategic dependence and for the timely establishment of a truly independent Australia.

Institutional Supports for the International Rule of Law Charles Sampford 2014-08-27 The rule of law is widely seen as the cornerstone of any effective polity and increasingly a vital component of the international political system. If the international rule of law were to be strengthened, it would greatly contribute to trade, security, human rights and global cooperation in a range of fields. Yet, in many areas the rule of law seems almost absent in international affairs. This book explores the institutions that support the effectiveness of the rule of law domestically. It focuses on the extent to which similar institutions already exist at international level and analyses the possibility of their further development. The authors speculate on how the international rule of law might be advanced in the future, thereby suggesting potential strategies for strengthening the international rule of law. Adopting an interdisciplinary approach and combining the fields of international relations, politics and law, this book covers a range of institutions including: UN Security Council International Court of Justice Human rights machinery Regional human rights International Criminal Court World Trade Organization International Tribunal for the Law of the Sea UN Department of Peacekeeping Operations. It will be of strong interest to students and scholars of international relations, international organisations, global governance, international law, migration law, international peace and security law, applied ethics, political economy, political science and sociology.

The Neighbours of the European Union's Neighbours Sieglinde Gstöhl 2016-02-24 Should the European Neighbourhood Policy stop at the borders of the European Union's immediate neighbouring countries? This book is the first full length study of the 'neighbours of the EU's neighbours', a concept originally introduced by the European Commission with reference to Saharan Africa, the Middle East and Central Asia. These regions in the EU's broader neighbourhood are often perceived as an 'arc of crisis' from which manifold challenges emanate for Europe. This timely book takes stock of the state of the EU's cooperation with the neighbours of its neighbours and explores how the concept might help promote security, stability and prosperity beyond the countries which are formally part of the European Neighbourhood Policy. How can the EU create bridges between these regions? What instruments does the EU have at its disposal and how can it link them in order to respond to the challenges and overcome the current fragmentation? One of the conclusions is the suggestion to consider a pragmatic 'EU Strategy for the Neighbours of its Neighbours' which addresses the needs of the broader EU neighbourhood in a more systematic and consistent manner and helps transform in the long run the 'arc of crisis' into another 'ring of friends'.

Counter-Radicalisation Christopher Baker-Beall 2014-09-15 This book offers a wide-ranging and critical examination of recent counter-radicalisation policies, using case studies from several countries. Counter-radicalisation policies, such as the UK 'Prevent' strategy, have been highly controversial and increasingly criticised since their introduction. In this edited volume, voices from disciplines including sociology, political science, criminology and International Relations are brought together to address issues across the global roll-out of counter-radicalisation agendas. In so doing, the book critically interrogates: (i) the connections between counter-radicalisation and other governmental programmes and priorities relating to integration and community cohesion; (ii) the questionable dependence of counter-radicalisation initiatives on discourses and assumptions about race, risk and vulnerability to extremism; and, (iii) the limitations of existing counter-radicalisation machineries for addressing relatively new types of extremism including amongst 'right-wing' activists. Through examining these questions, the book draws on a range of contemporary case studies spanning from counter-radicalisation in the UK, Germany and Denmark, through to detailed analyses of specific preventative initiatives in Australia and the United States. Conceptually, the chapters engage with a range of critical approaches, including discourse theory, autoethnography and governmentality. This book will be of much interest to students of radicalisation, critical terrorism studies, counter-terrorism, sociology, security studies and IR in general.

Resurgent Resource Nationalism Mapungubwe Institute for Strategic Reflection (MISTRA) 2016-02-15 The period between 2001 and 2008 saw the longest commodities boom in recent history. Resource-rich countries across the world developed more interest in the profits, control and ownership of their natural resources. South Africa, which did not benefit much from the boom in commodity prices, was nonetheless affected by the emergent resource nationalism trend, and it became the focus of the governing party's 2010 National General Council, which ultimately resulted in the constitution of a committee to review the country's policy and legislative framework regarding 'natural wealth beneath the soil'. Although the resurgence of resource nationalism is a recent phenomenon, the idea of state intervention in the economy, and the extractive sector in particular, is not new. *Resurgent Resource Nationalism* is a qualitative study, undertaken by MISTRA for SASOL Ltd, that looks at the resurgence of resource nationalism over the past ten years. It discusses the concept of resource nationalism and its manifestation in public policy. It identifies the concerns, drivers and instruments through which resource nationalism is pursued by various mining jurisdictions across regions. It deliberately focuses more on the hydrocarbons sector in order to suit the target audience. The aim is to observe macro-trends emerging in various regions of the world and explore how best private actors can respond to the various forms of resource nationalism.

Secrets and Lies in Vietnam Panagiotis Dimitrakis 2016-05-20 The Vietnam War lasted twenty years, and was the USA's greatest military failure. An attempt to stem the spread of Soviet and Chinese influence, the conflict in practice created a chaotic state torn apart by espionage, terrorism and guerilla warfare. American troops quickly became embroiled in jungle warfare and knowledge of the other side's troop movements, communication lines, fighting techniques and strategy became crucial. Panagiotis Dimitrakis uncovers this battle for intelligence and tells the story of the Vietnam War through the newly available British, American and French sources - including declassified material. In doing so he dissects the limitations of the CIA, the NSA, the MI6 and the French intelligence- the SDECE- in gathering actionable intelligence. Dimitrakis also shows how the Vietminh under Ho Chi Minh established their own secret services; how their high grade moles infiltrated the US and French military echelons and the government of South Vietnam, and how Hanoi's intelligence apparatus eventually suffered seriously from 'spies amongst us' paranoia. In doing so he enhances our understanding of the war that came to define its era.

Advanced Issues in International and European Tax Law Christiana HJI Panayi 2015-12-03 This book examines recent developments and high-profile debates that have arisen in the field of international tax law and European tax law. Topics such as international tax avoidance, corporate social responsibility, good governance in tax matters, harmful tax competition, state aid, tax treaty abuse and the financial transaction tax are considered. The OECD/G20 project on Base Erosion and Profit Shifting (BEPS) features prominently in the book. The interaction with the European Union's Action Plan to strengthen the fight against tax fraud and tax evasion is also considered. Particular attention is paid to specific BEPS deliverables, exploring them through the prism of European Union law. Can the two approaches be aligned or are there inherent conflicts between them? The book also explores whether, when it comes to aggressive tax planning, there are internal conflicts between the established case law of the Court of Justice and the emerging policy of the European institutions. By so doing it offers a review of issues which are of constitutional importance to the European Union. Finally, the book reflects on the future of international and European tax law in the post-BEPS world.

Indian National Security and Counter-Insurgency Namrata Goswami 2014-11-27 This book, based on extensive field research, examines the Indian state's response to the multiple insurgencies that have occurred since independence in 1947. In reacting to these various insurgencies, the Indian state has employed a combined approach of force, dialogue, accommodation of ethnic and minority aspirations and, overtime, the state has established a tradition of negotiation with armed ethnic groups in order to bolster its legitimacy based on an accommodative posture. While these efforts have succeeded in resolving the Mizo insurgency, it has only incited levels of violence with regard to others. Within this backdrop of ongoing Indian counter-insurgency, this study provides a set of conditions responsible for the groundswell of insurgencies in India, and some recommendations to better formulate India's national security policy with regard to its counter-insurgency responses. The study focuses on the national institutions responsible for formulating India's national security policy dealing with counter-insurgency - such as the Prime Minister's Office, the Cabinet Committee on Security, the National Security Council, the Ministry of Home Affairs and the Indian military apparatus. Furthermore, it studies how national interests and values influence the formulation of this policy; and the overall success and/or failure of the policy to deal with armed insurgent movements. Notably, the study traces the ideational influence of Kautilya and Gandhi in India's overall response to insurgencies. Multiple cases of armed ethnic insurgencies in Assam, Manipur, Mizoram, and Nagaland in the Northeast of India and the ideologically oriented Maoist or Naxalite insurgency affecting the heartland of India are analysed in-depth to evaluate the Indian counter-insurgency experience. This book will be of much interest to students of counter-insurgency, Asian politics, ethnic conflict, and security studies in general.

Women and Politics in Contemporary Japan Emma Dalton 2015-02-11 This book looks at the gendering of the political system in Japan and the effects of that system on gender equality in national-level politics specifically and wider society more generally. It examines the approach taken by the long-ruling Liberal Democratic Party (LDP) to issues of gender equality in Japan, and the repercussions of that approach on women's political experiences and representation. This book covers a range of themes including the role of the LDP and other major political parties in constructing the modern Japanese political system, the under-representation of women in Japanese politics, women's experiences in party politics and the gendering of government policies. Using in-depth interviews with women members of the national Diet, the book sheds light on how political women negotiate the male-dominated world of Japanese politics.

Bangladesh Ali Riaz 2016-06-08 Bangladesh is a country of paradoxes. The eighth most populous country of the world, it has attracted considerable attention from the international media and western policy-makers in recent years, often for the wrong reasons: corruption, natural disasters caused by its precarious geographical location, and volatile political situations with several military coups, following its independence from Pakistan in 1971. Institutional corruption, growing religious intolerance and Islamist militancy have reflected the weakness of the state and undermined its capacity. Yet the country has demonstrated significant economic potential and has achieved successes in areas such as female education, population control and reductions in child mortality. Ali Riaz here examines the political processes which engendered these paradoxical tendencies, taking into account the problems of democratization and the effects this has had, and will continue to have, in the wider South Asian region. This comprehensive and unique overview of political and historical developments in Bangladesh since 1971 will provide essential reading for observers of Bangladesh and South Asia.

Transitional Justice and the 'Disappeared' of Northern Ireland Lauren Dempster 2019-06-11 This book employs a transitional justice lens to address the 'disappearances' that occurred during the Northern Ireland conflict - or 'Troubles' - and the post-conflict response to these 'disappearances.' Despite an extensive literature around 'dealing with the past' in Northern Ireland, as well as a substantial body of scholarship on 'disappearances' in other national contexts, there has been little scholarly scrutiny of 'disappearances' in post-conflict Northern Ireland. Although the Good Friday Agreement brought relative peace to Northern Ireland, no provision was made for the establishment of some form of overarching truth and reconciliation commission aimed at comprehensively addressing the legacy of violence. Nevertheless, a mechanism to recover the remains of the 'disappeared' - the Independent Commission for the Location of Victims' Remains (ICLVR) - was established, and has in fact proven to be quite effective. As a result, the reactions of key constituencies to the 'disappearances' can be used as a prism through which to comprehensively explore issues of relevance to transitional justice scholars and practitioners. Pursuing an interdisciplinary approach, and based on extensive empirical research, this book provides a multifaceted exploration of the responses of these constituencies to the practice of 'disappearing.' It engages with transitional justice themes including silence, memory, truth, acknowledgement, and apology. Key issues examined include the mobilisation efforts of families of the 'disappeared,' efforts by a (former) non-state armed group to address its legacy of violence, the utility of a limited immunity mechanism to incentivise information provision, and the interplay between silence and memory in the shaping of a collective, societal understanding of the 'disappeared.'

Rethinking Corporatization and Public Services in the Global South David A. McDonald 2014-04-10 After three decades of privatization and anti-state rhetoric, government ownership and public management are back in vogue. This book explores this rapidly growing trend towards 'corporatization' - public enterprises owned and operated by the state, with varying degrees of autonomy. If sometimes driven by neoliberal agendas, there exist examples of corporatization that could herald a brighter future for equity-oriented public services. Drawing on original case studies from Asia, Africa and Latin America, this book critically examines the histories, structures, ideologies and social impacts of corporatization in the water and electricity sectors, interrogating the extent to which it can move beyond commercial goals to deliver progressive public services. The first collection of its kind, *Rethinking Corporatization and Public Services in the Global South* offers rich empirical insight and theoretical depth into what has become one of the most important public policy shifts for essential services in the global South.

Online Gambling and Crime James Banks 2016-05-13 Offering the first empirically driven assessment of the development, marketisation, regulation and use of online gambling organisations and their products, this book explores the relationship between online gambling and crime. It draws upon quantitative and qualitative data, including textual and visual analyses of e-gambling advertising and the records of player-protection and standards organisations, together with a virtual ethnography of online gambling subcultures, to examine the ways in which gambling and crime have been approached in practice by gamers, regulatory agencies and online gambling organisations. Building upon contemporary criminological theory, it develops an understanding of online gambling as an arena in which risks and rewards are carefully constructed and through which players navigate, employing their own agency to engage with the very real possibility of victimisation. With attention to the manner in which online gambling can be a source of criminal activity, not only on the part of players, but also criminal entrepreneurs and legitimate gambling businesses, *Online Gambling and Crime* discusses developments in criminal law and regulatory frameworks, evaluating past and present policy on online gambling. A rich examination of the prevalence, incidence and experience of a range of criminal activities linked to gambling on the Internet, this book will appeal to scholars and policy makers in the fields of sociology and criminology, law, the study of culture and subculture, risk, health studies and social policy.

The Politics of Welfare State Transformation in Germany Christof Schiller 2016-04-20 How can we best analyse contemporary welfare state change? And how can we explain and understand the politics of it? This book contributes to these questions both empirically and theoretically by concentrating on one of the least likely cases for welfare state transformation in Europe. It analyzes in detail how and why institutional change has taken Germany's welfare state from a conservative towards a new work-first regime. Christof Schiller introduces a novel analytical framework to make sense of the politics of welfare state transformation by providing the missing link: the capacity of the core executive over time. Examining the policy making process in labour market policy in the period between 1980 and 2010, he identifies three different policy making episodes and analyses their interaction with developments and changes in such policy areas as pension policy, family policy, labour law, tax policy and social assistance. The book advances existing efforts aimed at conceptualizing and measuring welfare state change by proposing a clear-cut conceptualization of social policy regime change and introduces a comprehensive analysis of the transformation of the welfare-work nexus between 1980 and 2010 in Germany. This book will be of interest to students and scholars of social policy, comparative welfare state reform, welfare politics, government,

governance, public policy, German politics, European politics, political economy, sociology and history. **Japan Viewed from Interdisciplinary Perspectives** Yoneyuki Sugita 2015-10-29 Situating itself within contemporary Japan, this edited collection raises questions about globalization, Japan's relationships with other Asian countries, and the continued importance of U.S.-Japan relations. Strong to Save: Maritime Mission in Hong Kong from Whampoa Reach to the Mariners' Club Stephen Davies 2017-07-19 Tracing its origins back to 1822 in Whampoa, the Mariners' Club in Hong Kong was established to meet a specific need for an Anglo-Chinese society defined by that most dubious of activities, seafaring. Its creation was anything but straightforward, and in this can be seen the mutable and often tortuous relations between the various religious bodies, the local population, the transient sailors, the emerging captains of industry, and the growing regulatory reach of the colonial government. The club evolved through many embodiments and witnessed the growth of Hong Kong from a collection of mat-sheds on the foreshore, through colony to its current status. Throughout its turbulent past it has been occasionally marginalized but has always served as an important base for the key actors in the main commercial activity in Hong Kong: seafarers. This is a history of one of the most enduring institutions of Hong Kong, and the first of its kind. Using the Club's own records as well as a wide range of sources both from within Hong Kong and from the seafaring world at large, this is a comprehensive account of the life of the Missions, the tenancy of the different chaplains, managers, and stewards, the changes in seafaring practices and shipping, and the transformation of Hong Kong itself.

International Trials and Reconciliation Janine Natalya Clark 2014-06-20 Transitional justice is a burgeoning field of scholarly inquiry. Yet while the transitional justice literature is replete with claims about the benefits of criminal trials, too often these claims lack an empirical basis and hence remain unproven. While there has been much discussion about whether criminal trials can aid reconciliation, the extent to which they actually do so in practice remains under-explored. This book investigates the relationship between criminal trials and reconciliation, through a particular focus on the International Criminal Tribunal for the former Yugoslavia (ICTY). Using detailed empirical data - in the form of qualitative interviews and observations from five years of fieldwork - to assess and analyze the ICTY's impact on reconciliation in Bosnia-Herzegovina, Croatia and Kosovo, *International Trials and Reconciliation: Assessing the Impact of the International Criminal Tribunal for the former Yugoslavia* argues that reconciliation is not a realistic aim for a criminal court. They are, Janine Clark argues, only one part of a rich tapestry of justice, which must also include non-retributive transitional justice processes and mechanisms. Challenging many of the common yet untested assumptions about the benefits of criminal trials, this innovative and extremely timely monograph will be invaluable for those with interests in the theory and practice of transitional justice.
