The first goal is to explore the difference between fairness and justice in language assessment. The authors distinguish internal and external dimensions of the equitable and just treatment of individuals taking language tests which are used as gatekeeping devices to determine access to education and employment, immigrant status, citizenship, and other rights. The second goal is to show how the extent of test fairness can be demonstrated and improved using the tools of psychometrics, in particular the models collectively known as Rasch measurement. "This book will have an enormous impact on the field of language assessment. Using Rasch analysis models to explore and identify sources of unfairness, the authors make a compelling case for fairness in the design and implementation of language assessment instruments and for justice in the interpretation and use of test results. A real strength of the book is that it guides readers through analytical techniques in an accessible way." Dan Douglas, Professor Emeritus, Applied Linguistics Program, Iowa State University.

Public-Private Partnership Monitor: Papua New Guinea Asian Development Bank 2020-12-01 The public-private partnership (PPP) market in Papua New Guinea is at a nascent stage having witnessed only six financially closed PPPs with an investment of \$433 million, predominantly in the energy sector. The very few PPPs in the country stem from the lack of a robust PPP enabling framework, limited public sector capacities to design and manage PPPs, and constrained ability of the government to fund infrastructure development. Realizing the critical role of PPPs in helping achieve the country's infrastructure investment target, the government is now implementing the PPP Act of 2014 and setting up PPP-enabling institutions.

Firearm Safety Certificate - Manual for California Firearms Dealers and DOJ Certified Instructors California Department of Justice 2016-12 The growing concern over the number of accidental firearm shootings, especially those involving children, prompted passage of the initial handgun safety law which went into effect in 1994. The stated intent of the California Legislature in enacting the current FSC law is for persons who obtain firearms to have a basic familiarity with those firearms, including, but not limited to, the safe handling and storage of those firearms. The statutory authority for this program is contained in Penal Code sections 26840 and 31610 through 31700. These statutes mandate DOJ to develop, implement and maintain the FSC Program. Pursuant to Penal Code section 26840, a firearms dealer cannot deliver a firearm unless the person receiving the firearm presents a valid FSC, which is obtained by passing a written test on firearm safety. Prior to taking delivery of a firearm from a licensed firearms dealer, the purchaser/recipient must also successfully perform a safe handling demonstration with that firearm..

A Smarter, Greener Grid Kevin B. Jones 2014-05-12 The pressing need for a smarter and greener grid is obvious, but how this goal should be achieved is much less clear. This book clearly defines the environmental promise of the smart grid and describes the policies necessary for fully achieving the environmental benefits of the digital energy revolution. The United States' electrical grid is an antique. It was built to serve a 20th-century economy and designed in an era when the negative environmental impacts of electricity production were poorly understood. It must be upgraded and modernized. The proposed solution is a "smart grid"—a network of new digital technologies, equipment, and controls that can respond quickly to the public's changing energy needs by facilitating two-way communication between the utility and consumers. This book explains the environmental benefit of a smart grid, examines case studies of existing smart grids, and identifies the legal and regulatory policy hurdles that must be overcome to fully realize the smart grid's benefits. Based on six diverse organizations' experience as "early adopters" in the digital energy revolution, the authors explore how a smart electric grid offers real promise for supercharging energy efficiency, democratizing demand response, electrifying transportation,

preparing for ubiquitous distributed clean energy technologies, and automating the distribution system. Against the backdrop of climate change and continuing economic uncertainty, setting a path for environmental improvement and upgrading our electric grid with new digital technologies and associated smart policies is more critical than ever before.

Treaty Shopping in International Investment Law Jorun Baumgartner 2016-12-01 Treaty shopping, also known under the terms of nationality planning, corporate (re-)structuring or corporate maneuvering, implies a strategic change of nationality or strategic invocation of another nationality with the aim of accessing another (usually more favourable) investment treaty for purposes of investment arbitration. When deciding on whether an investment claim based on treaty shopping should be upheld or dismissed, investment arbitral tribunals have been increasingly faced with significant questions, such as: What is treaty shopping and how may legitimate nationality planning be distinguished from treaty abuse in international investment law? Should a claimant that is controlled by a host-State national be considered a protected investor, or should tribunals pierce its corporate veil? Does an investor have to make the investment in good faith, and does it have to make a contribution of its own to the investment it is claiming protection for? When does a corporate restructuring constitute an abuse of process, and which is the role of the notion of dispute in this respect? How efficient are denial of benefits clauses to counter treaty shopping? Treaty Shopping in International Investment Law examines in a systematic manner the practice of treaty shopping in international investment law and arbitral decisions that have undertaken to draw this line. While some legal approaches taken by arbitral tribunals have started to consolidate, others remain unsettled, painting a picture of an overall inconsistent jurisprudence. This is hardly surprising, given the thousands of international investment agreements that provide for the investor's right to sue the host State on grounds of alleged breaches of investment obligations. This book analyses and discusses the different ways by which arbitral tribunals have dealt with the value judgment at the core of the distinction between objectionable and unobjectionable treaty shopping, and makes proposals de lege ferenda on how States could reform their international investment agreements (in particular with respect to treaty drafting) in order to make them less susceptible to the practice of treaty shopping.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and

advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.
