Intangible Values in Financial Accounting and Reporting
Stephan Grüber 2014-07-18 Academics and practitioners argue that intangible values have become significant value drivers of today's economy. Major production inputs no longer comprise of property, plant and equipment, but rather of brands, knowledge and other technological innovation. Based on this notion, information on such phenomena is supposedly crucial for existing and potential capital providers in making decisions whether to allocate resources to a company.

This thesis examines the information use and needs of financial analysts with respect to intangible values. The purpose is to shed light on the usefulness of such information from the perspective of one of the primary user groups of IFRSs.

Accounting for Biological Assets Rute Gonçalves

2017-10-16 This book explores accounting for biological assets under IAS 41 – Agriculture, and explains the recent adjustments introduced by the IASB which allow firms to choose between cost or revaluation models concerning mature bearer plants. Identifying the firm and country-level drivers that inform the disclosure and measurement practices of biological assets, this concise guide examines the value relevance of measuring those assets at fair value. It also analyses how firm and country-level drivers explain the differences in the disclosure level and practices used to measure biological assets under IAS 41. Finally, it evaluates whether there is a difference in the relevance of biological assets among the listed firms with high and low disclosure levels on biological assets. Based on a major international study of a wide selection of firms and country-level drivers, this book is vital for standard setters, stakeholders, students, accountants and auditors who need to understand disclosure and measurement practices of biological assets under IAS 41.

The Sustainability of Asia's Debt Ferrarini, Benno 2022-02-22 This is an open access title available under the terms of a [CC BY 3.0 IGO] License. It is free to read, download and share on Elgaronline.com. Asia has shown the world what success in economic development looks like. From the amazing transformations of Japan, the Republic of Korea, and the other 'tigers' in the early 70s, to the more recent takeoffs of the People's Republic of China (PRC), India, and the leading economies in Southeast Asia, the region has prospered at a startling pace. Technologies were adopted, productivity raised, and export markets conquered. Billions were lifted out of poverty. What was once a backwater is now a global engine of growth.

World Scientific Reference On Entrepreneurship, The (In 4 Volumes) 2016-12-28 This book examines an important economic development in East Asia during the first decade of the 21st century. Whereas regional arrangements were, with the sole significant exception of ASEAN, conspicuously absent before 2000, they have proliferated since 2000 in both the monetary and trade areas. The book places this political development in the changing nature of the national economies, especially their increasing integration into regional and global value chains with the fragmentation of production processes. This is a freshly written, coherent analysis of the topic, drawing upon (updated) material from a series of articles that the author has published on the subject over the years. Although the book is based on theoretical and, especially, empirical analysis of regionalism, it is written in a non-technical style

accessible to a wide range of readers. The book is likely to be adopted as supplementary reading for university courses on Asian economies, whether be it in area studies or economics/political economy disciplines.

The Regulation of Financial Planning in Australia

Angelique Nadia Sweetman McInnes 2019-08-20 This book investigates the legitimacy of the current Australian Financial Services Licensee-Authorised Representative (AFSL-AR) licensing model, as specified in the Commonwealth Corporations Act 2001. The book rectifies the deficiency in scholarly attention to this matter by developing a new conceptualised framework for the financial planning discipline. It takes into account theories in agency, legislation, legitimacy and the independent individual regulatory regimes in other professions; thereafter integrating this framework with the financial planning theory to examine the legitimacy, or what was found to be the illegitimacy of licensing advisers via multiple third party conflicted commercially oriented licensees. This book makes a very useful reference to understanding financial planning licencing model in Australia.

Management Accounting and Control Michel Charifzadeh

2017-10-30 Management accounting has been the basic toolbox in business administration for decades. Today it is an integral part of all curricula in business education and no student can afford not to be familiar with its basic concepts and instruments. At the same time, business in general, and management accounting in particular, is becoming more and more international. English clearly has evolved as the "lingua franca" of international business. Academics, students as well as practitioners exchange their views and ideas, discuss concepts and communicate with each other in English. This is certainly also true for management accounting and control. Management Accounting is becoming more and more international. ?Management Accounting and Control? is a new textbook in English covering concepts and instruments of management accounting at an introductory level (primarily at the Bachelor level, but also suited for general management and MBA courses due to a strong focus on practical relevance). This textbook covers all topics that are relevant in management accounting in business organizations that are typically covered in German and Central European Bachelor courses on management accounting and control. After a general introduction to the field of management accounting and control the book discusses cost management as an extension of cost accounting. Typical cost management instruments such as target costing, life cycle costing and process-based costing approaches are explained in detail. Differences between Anglo-American activity-based costing (ABC) and German process-based costing are highlighted. The book then turns to an extensive discussion of planning and budgeting tasks in management accounting with a strong focus on the practical application of the topic such as developing a budget in practice. Another chapter is dedicated to a comparison of traditional budgeting with modern /alternative budgeting approaches. A major part of the book is dedicated to the broad area of performance management. The relevance of financial statement information for performance management purposes is discussed in detail. In addition, the most widely spread financial performance indicators are illustrated using real-world examples. The book also includes detailed content on value-based management control concepts. In a consecutive chapter, performance measurement is linked with strategy while extensively discussing the Balanced Scorecard as a key tool in strategic performance

management. The remaining parts of the book deal with management reporting as one of the main operative tasks in management accounting practice. The book closes with insight into new fields and developments that currently influence management accounting practices and research and promise to play an increasingly important role in the future.

Did Basel III miss the point? The role of IFRS's Other Comprehensive Income during the financial crisis Kenneth Born 2017-01-09 The broad consensus before the recent financial crisis was that the so called fair value accounting (FVA) improves transparency contrary to the historical cost model. Since 2008, the discussion has been on the root cause of the crisis, which lessons can be gleaned from it and how making the same mistakes again can be avoided. Basel III was implemented in order to improve the regulatory environment and was the response of regulators and politicians to public pressure and suspicions raised by the bail out programmes for banks. Consequently, an until then inconceivable number of new regulations and regulatory bodies were introduced. FVA was also blamed as part of the cause of the recent financial crisis. Available-for-Sales (AfS) securities represent a major component of bank balance sheet asset. Gains and losses of AfS-positions are recorded within the Other Comprehensive Income (OCI). The OCI includes items which are not recognized (IAS 1.7) in income statements but increase or decrease a bank's equity. The items also include income and expenses from Available-for-Sale positions (AfS) in accordance with IAS 39. On October 13th, 2008, an amendment to IAS 39 was published by IASB. This amendment did authorize the reclassification of assets. This amendment clearly demonstrates the influence of FVA on the value of assets of banks that apply IFRS. The main objective of this book is to verify the influence of OCI and whether the new regulations sufficiently capture this critical factor. Regulators should ensure that unrealized profits do not result in a capital drain. One way to assure this is to make OCI subject to a prudential filter and to deduct it from regulatory capital, which was the case until CRR became effective on January 1st, 2014 (CEBS guideline 2004). Basel III is even less strict than Basel II in that regard. Article 26(1) CRR clearly states that CET1 items must be recognized only in case they are really available to the financial institution for "unrestricted and immediate use to cover risks or losses as soon as these occur". Nevertheless, with the introduction of the CRR, the prudential filter for positions that caused the financial crisis and led to poor capitalization of banks was not strengthened but actually removed. At present, CRR does not envisage any filter for unrealized gains parked in OCI.

Ecology, Sustainable Development and Accounting Seleshi Sisaye 2015-08-11 Accounting literature has viewed sustainability in terms of social, economic and environmental performances. There have been concerns that the relationship between sustainability, accounting and organizational performance cannot be explained unless we can deduce patterns of administrative behaviour that chronicle management practices. Ecology, Sustainable Development and Accounting argues that, despite the broader social and economic development dimensions of sustainability and the limitations of its extension to corporate and organizational behaviour; an ecological framework is capable of providing the overall societal and community chronologies that describe corporate sustainable operations. Drawing examples from international development and federal government organizations, this book documents the link between ecology, corporate sustainable development, and sustainability accounting and reporting. It draws together the literature from several disciplines to elaborate the contribution of the ecological approach to

sustainable development in the accounting literature. This book will be of particular interest to students, academics and practitioners in the areas of environmental studies, ecological economics, sustainable development studies, and social and environmental accounting. The sociological and anthropological perspectives make this book the first of its kind to apply the population ecology of sociology to both the sustainability and accounting literature.

Fraud in Financial Statements Julie E. Margret 2014-11-27 As the monetary cost of fraud escalates globally, and the ensuing confidence in financial markets deteriorates, the international demand for quality in financial statements intensifies. But what constitutes quality in financial statements? This book examines financial statement fraud, a topical and increasingly challenging area for financial accounting, business, and the law. Evidence shows that accounting anomalies in an organization's financial statements diminish the quality and serviceability of financial information. However, an anomaly does not necessarily signal fraud. Financial statement fraud is intended to mislead shareholders and other stakeholders. In this book, elements that underpin diversity of accounting anomalies likely found in fraudulent financial accounting statements are revealed. Multiple research methods are used in the analysis of selected international fraud cases, each illustrating examples of financial statement fraud, including: revenue recognition, overstatement and/or misappropriation of assets, understatement of expenses and liabilities, disclosure fraud, bribery and corruption. Additionally, the phoenix phenomenon with regard to fraud in financial accounting is investigated. Drawing on documented observations of commercial and legal cases globally this study highlights the necessity for continued development of financial audit practices and other audit services.

The State of Nonprofit America Lester M. Salamon 2004-05-13 The thousands of organizations that comprise America's private nonprofit sector represent a national treasure. Yet serious pressures are altering the playing field on which nonprofits operate, and many are responding in ways that may undermine their popular

support. Despite the significance of these developments, little has been done to analyze and interpret them in a clear and understandable way. Lester M. Salamon, a leading authority on the nonprofit sector, has joined forces with more than a dozen other experts and the Aspen Institute to produce this volume, an integrated, authoritative assessment of the state of nonprofit America and the key trends affecting its evolution. The book is organized into three sections. The first summarizes critical trends and issues; the second examines each of the sector's major subsectors (e.g., health, education, social services, arts and culture, international assistance, advocacy); the third focuses on major cross-cutting trends and issues (commercialization, changing government policy, accountability, and demographic and technological imperatives). The Resilient Sector will be updated every two years. It provides a basic sourcebook for sector leaders, the press, public officials, and citizens concerned about the future of America's nonprofit sector and eager to understand the forces affecting it.

Public Sector Accounting, Accountability and Governance

Robyn Pilcher 2018-07-17
Funded by taxation, public spending cannot be separated from politics and ensuring efficiency and effectiveness is always high on the political and policy agenda. Accounting, accountability, governance and auditing are essential ingredients in evaluating public sector performance. Australia and New Zealand are world leaders when it comes to public sector accounting—such as being the first to introduce transaction-neutral accounting standards. This edited collection considers current issues impacting the public sector by primarily drawing upon experiences of Australia and New Zealand. Then, by combining history (from the time of the Domesday book, early sovereignty and Shakespeare) with current practice (differential reporting, international financial reporting standards, government performance, voter turnout, joined-up government and auditing practices), we use these experiences to illuminate the global issues of public sector accounting, accountability and governance. Based on rigorous research by top public sector researchers, this edited collection offers a multitude of future research ideas to enable those interested in following this pathway—whether they are in Australia, New Zealand, the United Kingdom, Europe, the United States of America, Africa or anywhere else in the world—an avenue to traverse.

taxonomy. Dirk Beerbaum 2016-05-25 Corporate Governance failures of large corporations such as Lehman Brothers have evoked a plethora of calls for changes in Corporate Governance Principles. Despite the fact that after the financial crisis, a number of transnational institutions have called for wide-scale changes related to Corporate Governance Principles by further protecting shareholders' rights, it has been proven that theoretical extension and reform of Corporate Governance Principles is not enough, because it does not ensure successful implementation. According to a report from Isaksson (2009), corporate disclosures were not in line with OECD principles on good Corporate Governance. Moreover, according to Isaksson (2009), the financial crisis can also be traced back to incomplete Corporate Governance disclosures. One major implementation topic involves Corporate Governance Reporting, which is very complex for multinational companies, as it involves statutory compliance with multiple rules and laws, coping with heterogeneous "Systems of Corporate Governance" (Weimer and Pape, 1999; Leuz et al., 2003; Tylecote and Visintin, 2007) and additionally the compilation of codes (Cadbury, 1993) and industry-specific standards (Mach et al., 2006; Bebchuk and Spamann, 2010). Extensible Business Reporting Language (XBRL) is assumed as a benchmark related to interactive business disclosures (Chen and Sun, 2009; Debreceny et al., 2010; Alles and Piechocki, 2012). Does XBRL have the potential to help to reduce the complexity of companies' Corporate Governance Reporting (Alles and Piechocki, 2012)? In the academic literature, there are many articles which conclude that it is possible for XBRL to enhance transparency and improve Corporate Governance for financial reporting (Abdullah et al., 2009; Roohani et al., 2010; Alles and Piechocki, 2012; Müller-Wickop et al., 2013): therefore, an additional question is whether the application of XBRL to the non-financial reporting of Corporate Governance can also contribute to enhanced transparency. Within the peer group of listed Foreign Private Issuers on the New York Stock Exchange there is no adequate Taxonomy available.

Management and Leadership for a Sustainable Africa, Volume 2 Kemi Ogunyemi 2022-11-16 To effectively deliver sustainable management in practice for Africa, we need responsible leadership. We need to deepen our understanding of sustainability in the unique socio-political and economic context of the continent. The roles of various actors across public, private and non-profit sectors as enablers of sustainable development need to be explored to understand the social, economic and environmental (SEE) trends in Africa and its emerging and developing economies, as well as to chart the way forward for the continent. This second volume explores the roles and responsibilities of the players—leaders and followers—in the core, public purpose and business spheres in delivering sustainable development outcomes for Africa. Drawing on interviews, cases and extensive literature, this volume contributes to reflection on the leadership values and practices required for a sustainable Africa and the crafting of new policy approaches to address the development challenges such as environmental degradation, economic inequities and social exclusion in Africa. The African scope of the book is hinged on collaboration from authors across Africa and the inclusion of case stories from emerging economies in the five African subregions (East, West, North, Central and Southern Africa) within the chapters. The core message is that, to achieve effective and sustainable management and development for Africa, the practice of responsible leadership is critical.

Teaching IFRS Richard M.S. Wilson 2013-09-13 The increasing pace of global conformance towards the adoption of International Financial Reporting Standards (IFRS) highlights the need for accounting students as

well as accounting practitioners to be conversant with IFRS. Teaching IFRS offers expert descriptions of, and insights into, the IFRS convergence process from a teaching and learning perspective. Hence this book is both timely and likely to have considerable impact in providing guidance for those who teach financial reporting around the world. The contents of the book come from authoritative sources and offer something distinctive to complement the existing textbooks which typically focus on the technical aspects of IFRS and their adoption. Drawing upon the experiences of those who have sought to introduce IFRS-related classroom innovations and the associated student outcomes achieved therefrom, the book offers suggestions about how to design and deliver courses dealing with IFRS and catalogues extensive listings of IFRS-related teaching resources to support those courses. This book was originally published as a special issue of Accounting Education: An international journal.

Agritourism, Wine Tourism, and Craft Beer Tourism Maria Giulia Pezzi 2020-07-23 This book delves into the development opportunities for peripheral areas explored through the emerging practices of agritourism, wine tourism, and craft beer tourism. It celebrates the entrepreneurial spirit of people living in peri-urban regions. Peripheral areas tend to be far from urban hubs, providing essential services but also typically

suffering from marginalisation and remoteness, despite the access to environmental, cultural, and social resources. In this sense, this book investigates the linkages between local agency and tourism in peripheral areas, the role of existing policies, and the evolving bottom-up practices in fostering local development. The basic aim is to disestablish the dichotomies that often emerge when dealing with issues of rural–urban and/or centre–periphery relationships; innovation vs tradition; authenticity vs mise en scène; agency vs inertia; and social, cultural, economic mobility vs immobility; etc. With focused attention on the possible compliance or

conflicting strategies of local actors with the existing policies, the book considers how local actors and communities respond to the implications of peripherality in areas often impacted by marginalising processes. Drawing upon case studies from North America and Europe, this book presents this connection as a global phenomenon which will be of interest to community and economic development planners and entrepreneurs. **ECMLG 2019 15th European Conference on Management, Leadership and Governance** Professor Anabela Mesquita
