The essays in this volume bring out the institutional challenges of crafting a relevant academic programme that converses with both national specificities and global realities. Coming from diverse academic specializations, the contributors traverse the interface of their respective disciplines with management education. In doing so, they engage with the ongoing global debate on management education. This volume fills a noticeable gap of serious, scholarly reflection on the state of management education. While there have been sporadic reflections and occasional critiques, a critical stocktaking of the institutional and disciplinary aspects of management education has been long wanting. This volume is of interest to scholars and practitioners of management education across the globe, and is likely to generate debate on its contemporary relevance and future trajectory.

The Realities of Reality - Part IV: The Reality Behind Achieving World Peace Fritz Dufour, MBA, DÉSS 2020-04-05 This book is organized in seven chapters. Chapter one looks at the origins and the causes of war. The chapter argues that war is a consequence of how we, as a species, have evolved. War has both endogenous and exogenous causes. While the former depends on our biology and psychology, the latter has to do primarily with international relations. Chapter two makes the case for the paradoxical nature of war. While war takes lives, it is legitimate under certain circumstances.

For example, armed humanitarian interventions are allowed to save lives among local populations at the expense of the oppressors by employing all necessary means – ethical or not. Chapter three asks if peace among nations is achievable, which is the main theme of this book. However, it does not elaborate on the question entirely. Instead, it gives sort of a prelude of what will be discussed in the remaining of the book by talking about the concepts of world order and American hegemony, arms race, and peacebuilding. Chapter four builds on three by looking at realism, idealism, and pacifism in international relations. As to pacifism, the chapter attempts to answer the question, what was the most peaceful time in history? Chapter five presents the elements of hope for world peace by considering the role played by the following: (1) the United Nations; (2) the North Atlantic Treaty Organization (NATO); (3) the Organization for Security and Cooperation in Europe (OSCE); (4) the non-governmental organizations (NGOs); (5) the role of nuclear deterrence; (6) globalization; (7) transnationalism; (8) diplomacy; (9) sports; (10) international cooperation in space exploration; (11) the Nobel Prize; and (12) the declining of war and violence in modern times. On the other hand, chapter six presents the opposite argument or the barriers to world peace, using the following points: (1) the proliferation of nuclear weapons; (2) geoeconomics; (3) terrorism; (4) the global refugee crisis; (5) the profitability of arms sales; and (6) the profitability of wars. It makes an interesting argument especially as to the profitability of wars by showing how the United States, first, emerged as an imperial and a world power in the 1890s; then as the only world's superpower after World War II. Finally, chapter seven takes a proactive approach by peering into the future of armed conflict, which is likely to take place in new environments: Cyberspace, the littoral, choke points, near space, and increasingly in expanding cities or slums War. The chapter concludes with a discussion on the Doomsday Clock, a concept stemmed from the uncertainty as to the future of mankind because of armed conflicts and which is a symbol that represents the likelihood of a man-made global catastrophe.

The United Nations, Peace and Security Ramesh Thakur 2006-06-08 Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter-state war. In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics, law and international relations departments, as well as policymakers in the UN and other NGOs.

Public Financial Management and Its Emerging Architecture Mr. M. Cangiano 2013-04-05 The first two decades of the twenty-first century have witnessed an influx of innovations and reforms in public financial management. The current wave of reforms is markedly different from those in the past, owing to the sheer number of innovations, their widespread adoption, and the sense that they add up to a fundamental change in the way governments manage public money. This book takes stock of the most important innovations that have emerged over the past two decades, including fiscal responsibility legislation, fiscal rules, medium-term budget frameworks, fiscal councils, fiscal risk management techniques, performance budgeting, and accrual reporting and accounting. Not merely a handbook or manual describing practices in the field, the volume instead poses critical questions about innovations; the issues and challenges that have appeared along the way, including those associated with the global economic crisis; and how the ground can be prepared for the next generation of public financial management reforms. The Redesign of the Global Financial Architecture Stuart P. M. Mackintosh 2015-10-16 In 2007-2008 the global financial and economic system was in turmoil. This volume focuses on how the global financial architecture was redesigned following the financial crash of 2008. Its central claim is that the reforms constituted a paradigm shift, a move from the dominance of market authority to the re-assertion of state authority over financial markets and actors. The book underscores that the cycle of boom and bust, of crisis response, reform and eventual relapse are not only economic but also conceptual and ideological. Ideas matter in the political and economic calculus of policy making. Economies are underpinned by and linked to ideological narrative, a prevailing policy consensus that places limits on policy actions and options and constitutes a dominant worldview or paradigm. To become real, to be lasting, to impact actual policy choices and market actor decisions, a re-regulatory paradigm shift cannot just be conceptual or ideological. It must also be present in the institutional constructs and policy decisions that flow from the ideological regulatory shift. To gauge the fluctuating strength of the paradigm shift the book addresses the G20 summit process, the creation of the FSB, the policy output of the new forums, for signs of permanency, strength, and possible effectiveness. This work presents important new material on the financial crisis and the regulatory response to it, which will be valuable for researchers, teachers and students alike.

Innovation and Entrepreneurship Peter Drucker 2014-09-15 How can management be developed to create the greatest wealth for society as a whole? This is the question Peter Drucker sets out to answer in *Innovation and Entrepreneurship*. A brilliant, mould-breaking attack on management orthodoxy it is one of Drucker's most important books, offering an excellent overview of some of his main ideas. He argues that what defines an entrepreneur is their attitude to change: 'the entrepreneur always searches for change, responds to it and exploits it as an opportunity'. To exploit change, according to Drucker, is to innovate. Stressing the importance of low-tech entrepreneurship, the challenge of balancing technological possibilities with limited resources, and the organisation as a learning organism, he concludes with a vision of an entrepreneurial society where individuals increasingly take responsibility for their own learning and careers. With a new foreword by Joseph Maciariello
