## **Understanding and Teaching Reading Comprehension**

Jane Oakhill 2014-08-21 The ultimate aim of reading is not the process but to understand what we read and comprehension can take place at many different levels. There has been an increasing emphasis on the importance of reading comprehension in recent years but despite this there is very little written on this vital topic accessible to trainee and practicing teachers. The Handbook of Reading Comprehension presents an overview of recent findings on reading comprehension and comprehension problems in children. It provides a detailed examination of the characteristics of children who have reading comprehension difficulties, and examines ways in which comprehension can be supported and improved. It is accessibly written for

students and professionals with no previous background in the psychology of reading or reading problems. This indispensable handbook asks the question 'what is comprehension?' The authors consider comprehension of different units of language: understanding single words, sentences, and connected prose and outline what readers (and listeners) have to do to successfully understand an extended text. This book also considers comprehension for different purposes, in particular reading for pleasure and reading to learn and explores how reader characteristics such as interest and motivation can influence the comprehension process. Different skills contribute to successful reading comprehension. These include word reading ability, vocabulary knowledge, syntactic skills, memory, and discourse level

skills such as the ability to make inferences, knowledge about text structure, and metacognitive skills. The authors discuss how each one contributes to the development of reading comprehension skill and how the development of these skills (or their precursors) in pre-readers, provides the foundation for reading comprehension development. Areas covered include:- Word reading and comprehension Development of comprehension skills Comprehension difficulties Assessment Teaching for improvement Throughout the text successful experimental and classroom based interventions will be highlighted, practical tips for teachers and summary boxes detailing key points and explaining technical terms will be included in each chapter

## **Test Methods in Testing Reading Comprehension**

Jufang Kong 2019-03-27

This book explores the construct of reading comprehension by means of two main test methods. Research methods like the think aloud protocol and eye tracking are employed to tap into test-takers' cognitive processes while engaged in input text meaning building, and in test tasks. The book is the first systematic attempt to explore test-takers' cognitive processes through the control of test methods, and presents findings in visualized form including processing route maps and eye fixation heat maps. It offers readers essential support with "digging into" and analyzing data that has to date remained difficult to access.

years the debate about teaching young children to read has tended to focus upon equipping them with the crucially important knowledge and skills they need to read words accurately in and out of context, that is to say, teaching them how the alphabet works for reading and spelling. While such knowledge and skills are essential, more is required for children to become literate, fluent readers who understand what they read. In short, the goal of reading is comprehension. This book scrupulously examines the obstacles to reading comprehension and exemplifies what can be done to help children overcome them. *Reading Development and Teaching* Morag Stuart 2015-12-07 This textbook will prove invaluable to teacher educators, teachers, educational psychologists, and any professional who is involved with teaching children to read. It provides a detailed examination of the processes that are involved in achieving fluent word reading skills and ability to comprehend written texts.

Understanding these processes and their development empowers teachers to select appropriate, evidence-based teaching strategies and thus teach children more effectively. The book is in four parts: Part 1 provides the reader with a Tutorial Review covering essential knowledge about language, and presenting the two dimensions of the

View of Reading. Part 2 concentrates on the word reading dimension, with chapters on processes in skilled word reading, the development of these processes, and practical advice on research validated teaching methods to develop children's word reading skills. Part 3 turns to the language comprehension dimension, with chapters on the comprehension of oral and written language, and on teaching reading comprehension. Part 4 introduces the reader to assessment practices and methods of identifying children with difficulties in either or both dimensions of the Simple View, and considers children with word reading difficulties and children with specific comprehension difficulties, describing effective evidence-based interventions for each type of difficulty.

2014-06-06 Reading in a Second Language sets the testing and teaching of reading against a theoretical background, discussing research from both applied linguistics and cognitive psychology. Where possible, it focuses on research into second language readers and distinguishes different kinds of reading, particularly expeditious as opposed to careful reading, and emphasizes the validity of each. Sandy Urquhart and Cyril Weir relate testing and teaching, discussing similarities and differences, providing a comprehensive survey of both methods with the emphasis on those which have been substantiated or supported by research evidence. Finally, the book proposes specific research topics, and detailed advice on how to construct tests of language for academic purposes and suggestions for further research.
