diseases, such as SARS and mad cow, that originate in animals and spread to humans—reveal how intimately animal and human health are linked. Complicating this relationship further, when livestock are given antibiotics to increase growth, it can lead to resistant bacteria. Unfortunately, there are few formal channels for practitioners of human medicine and veterinary medicine to communicate about threats to public health. To address this problem, Dr. Laura H. Kahn and her colleagues are promoting the One Health concept, which seeks to increase communication and collaboration between professionals in human, animal, and environmental health. investigates the use of antibiotics and the surge in antimicrobial resistance in food animals and humans from a One Health perspective. Although the medical community has blamed the problem on agricultural practices, the agricultural community insists that antibiotic resistance is the result of indiscriminate use of antibiotics in human medicine. Dr. Kahn argues that this blame game has fueled the politics of antibiotic resistance and hindered the development of effective policies to address the worsening crisis. Combining painstaking research with unprecedented access to international data, the book analyzes the surprising outcomes of differing policy approaches to antibiotic resistance around the globe. By integrating

concentrates on the concerns, dilemmas and concepts that impact on the life and well-being of affected individuals and those close to them, as well as the future direction of practice, education, research, services, intervention, and treatment. This volume is primarily about caring for individuals and families who turn to professionals at a time when their lives are unmanageable alone, but is also concerned with the care that these professions extend to their own members. It contends that these issues are closely interrelated, with appropriate communication and support being key to both. Its chapters draw from a variety of theories and treatments to provide practical advice on the challenge of providing appropriate

store-bought "healthy" products to make life simpler, but many of these are loaded with sugar and hidden toxins. When faced with her own family health crisis, mother and health coach Leah Webb realized that in order to consistently provide high quality food for her family, nearly 100 percent of their meals would need to be homemade. But when she looked for a resource to guide her, most cookbooks that offered recipes "free" of allergenic foods were also high in processed starches, flours, and sugar. Webb, like so many parents, was looking for a cookbook that offered deeply nutritious, kid-friendly, whole foods recipes that were also easy, but there wasn't one--so she wrote it herself. The Grain-Free, Sugar-Free, Dairy-Free Family Cookbook offers a

new system to preparing food and approaching the kitchen that gets kids involved in cooking, which encourages excitement around food (a major challenge with restrictive diets). The recipes are rich in healthy fats, nutrient-dense vegetables, ferments, and grass-fed meats, and include snacks, school lunches, and delicious sweet treats that rival the flavors of sugar-dense desserts. By following Leah's meal plans, parents will be sure to please everyone in the family and make cooking on a restrictive diet enjoyable and doable over a long period of time. Families that know they would like to rid themselves of grain, sugar, and dairy, but are intimidated by starting, will find Webb's advice and troubleshooting invaluable. The new cookbook

outlines family-tested methods that make for effective and efficient preparation, including everyday basic recipes that will become part of a cook's intuitive process over time. The best part is that although Leah prepares nearly every single one of her family's breakfasts, lunches, dinners, and snacks using whole food ingredients, she only spends four to six hours on food preparation per week. Through stocking her freezer, prepping the kitchen, shopping and cooking in bulk, and consistently planning meals, this diet plan is not only possible; it is manageable and fulfilling. Prepare for this cookbook to radically change your life.

Christians around the world. Bridging cultures and time periods, Dr. Surya Harefa brings Abraham's Kuyper's ecclesiology to bear on questions of Japanese Christian engagement within the political sphere. Harefa offers a contextually robust exploration of evangelical Japanese approaches to ecclesiology and political involvement. Taking care to place Kuyper's conception of the church within Kuyper's own political and historical context, careful lines of application are drawn between Kuyper's theological perspectives and the need for an active Japanese church engaged in all spheres of life. perspectives on privacy rights can differ from nation to nation and affect how personal information is shared globally. Moreover, national laws can affect the exchange of ideas by stipulating the language in which information must be presented in different geopolitical regions. Today's technical communicators need to understand how legal factors can affect communication practices if they wish to work effectively in global contexts. This collection provides an overview of different legal aspects that technical communicators might encounter when creating materials or sharing information in international environments. describes how to use Red Hat's kickstart tool to create Linux systems. This tool is fundamentally different from cloning in that an automated installation is implemented. You can try kickstart and cloning. Understand that these applications attempt to accomplish the same goal of quickly getting Linux systems up and running, and that you do not need to use both. Chapter 3, "Working with subscription-manager, yum, and DaNdiFied" on page 47, describes how the Red Hat Network works. It provides centralized management and provisioning for multiple Red Hat Enterprise Linux systems. Kickstart is an easy and fast way to provision your Linux guests in any supported Linux platform. beginning by using the kickstart profile configuration file that installs the new operating system unattended. It also sets up the new guest according to the definition that was set up in the kickstart file. Usually, Linux is administered by the same team that manages Linux on all platforms. By using kickstart, you can create a basic profile that can be used in all supported platforms and customize Linux profiles, as needed. Cloning requires a better understanding of the z/VM environment and z/VM skills. It is a fast process if you enable the IBM FlashCopy® feature in advance. It clones the disks from a golden image to new disks that are used by the new Linux guest. The process can be automated by using the cloning

inspiring teaching tool to engage young people with wild places. In their workshops Laws and Lygren are often asked the how-tos of teaching nature journaling: how to manage student groups in the outdoors, teach drawing skills (especially from those who profess to have none), connect journaling to educational standards, and incorporate journaling into longer lessons. This book puts together curriculum plans, advice, and in-the-field experience so that educators of all stripes can leap into journaling with their students. The approaches are designed to work in a range of ecosystems and settings, and are suitable for classroom teachers, outdoor educators, camp counselors, and homeschooling parents.
