But have you ever heard of. . . Alice Ball, the chemist who developed an effective treatment for leprosy—only to have the credit taken by a man? · Mary Sherman Morgan, the rocket scientist whose liquid fuel compounds blasted the first U.S. satellite into orbit? · Huang Daopo, the inventor whose weaving technology revolutionized textile production in China—centuries before the cotton gin? Smart women have always been able to achieve amazing things, even when the odds were stacked against them. In Wonder Women, author Sam Maggs tells the stories of the brilliant, brainy, and totally rad women in history who broke barriers as scientists, engineers, mathematicians, adventurers, and inventors. Plus, interviews with real-life women in STEM careers, an extensive bibliography, and a guide to women-centric science and technology organizations—all to show the many ways the geeky girls of today can help to build the future. Table of Contents: Women of Science Women of Medicine Women of Espionage Women of Innovation Women of Adventure

**The Kid Who Ran for President** Dan Gutman 2012-06-01 Just in time for election season, Dan Gutman's hugely popular THE KID WHO RAN FOR PRESIDENT is back. Humor, adventure, and excitement will draw kids into the world of elections and politics. "Hi! My name is Judson Moon. I'm 12 years old and I'm running for President of the YOU-nited States."So begins this fast-paced, funny, and surprising account of a boy's run for the Oval Office in the year 2000. Under the tutelage of Lane, his brainy friend and self-appointed campaign manager, the affable sixth-grader from Madison, Wisconsin, takes on the Democrats and Republicans as a Third Party candidate who can make waves. "Grown-ups have had the last one thousand years to mess up the world," Judd tells a reporter. "Now it's our turn."

**Love on the Brain** Ali Hazelwood 2022-08-23 An Instant New York Times Bestseller A #1 LibraryReads and Indie Next Pick! From the New York Times bestselling author of The Love Hypothesis comes a new STEMist rom-com in which a scientist is forced to work on a project with her nemesis—with explosive results. Like an avenging, purple-haired Jedi bringing balance to the mansplained universe, Bee Königswasser lives by a simple code: What would Marie Curie do? If NASA offered her the lead on a neuroengineering project—a literal dream come true after years scraping by on the crumbs of academia—Marie would accept without hesitation. Duh. But the mother of modern physics never had to co-lead with Levi Ward. Sure, Levi is attractive in a tall, dark, and piercing-eyes kind of way. And sure, he caught her in his powerfully corded arms like a romance novel hero when she accidentally damseled in distress on her first day in the lab. But Levi made his feelings toward Bee very clear in grad school—archenemies work best employed in their own galaxies far, far away. Now, her equipment is missing, the staff is ignoring her, and Bee finds her floundering career in somewhat of a pickle. Perhaps it's her occipital cortex playing tricks on her, but Bee could swear she can see Levi softening into an ally, backing her plays, seconding her ideas...deavouring her with those eyes. And the possibilities have all her neurons firing. But when it comes time to actually make a move and put her heart on the line, there's only one question that matters: What will Bee Königswasser do?

**Baby Loves Coding!** Ruth Spiro 2018-06-05 Big, brainy science for the littlest listeners. Accurate enough to satisfy an expert, yet simple enough for baby, this clever board book showcases the use of logic, sequence, and patterns to solve problems. Can Baby think like a coder to fix her train? Beautiful, visually stimulating illustrations complement age-appropriate language to encourage baby's sense of wonder. Parents and caregivers may learn a thing or two, as well! Author's Note: The goal of the Baby Loves Science books is to introduce STEM topics in a developmentally appropriate way. As a precursor to learning programming languages and syntax, Baby Loves Coding presents the concepts of sequencing, problem solving, cause and effect, and thinking step-by-step. Practicing these skills early creates a solid foundation for reading, writing, math and eventually, programming.

**Parenting Matters** National Academies of Sciences, Engineering, and Medicine 2016-11-21 Decades of research have demonstrated that the parent-child dyad and the environment of the family—“which includes all primary caregivers” are at the foundation of children's well-being and healthy development. From birth, children are learning and rely on parents and the other caregivers in their lives to protect and care for them. The impact of parents may never be greater than during the earliest years of life, when a child's brain is rapidly developing and when nearly all of her or his experiences are created and shaped by parents and the family environment. Parents help children build and refine their knowledge and skills, charting a trajectory for their health and well-being during childhood and beyond. The experience of parenting also impacts parents themselves. For instance, parenting can enrich and give focus to parents' lives; generate stress or calm; and create any number of emotions, including feelings of happiness, sadness, fulfillment, and anger. Parenting of young children today takes place in the context of significant ongoing developments. These include: a rapidly growing body of science on early childhood, increases in funding for

programs and services for families, changing demographics of the U.S. population, and greater diversity of family structure. Additionally, parenting is increasingly being shaped by technology and increased access to information about parenting. Parenting Matters identifies parenting knowledge, attitudes, and practices associated with positive developmental outcomes in children ages 0-8; universal/preventive and targeted strategies used in a variety of settings that have been effective with parents of young children and that support the identified knowledge, attitudes, and practices; and barriers to and facilitators for parents' use of practices that lead to healthy child outcomes as well as their participation in effective programs and services. This report makes recommendations directed at an array of stakeholders, for promoting the wide-scale adoption of effective programs and services for parents and on areas that warrant further research to inform policy and practice. It is meant to serve as a roadmap for the future of parenting policy, research, and practice in the United States.

**Word Search Book for Smart Kids 9-12** Future Einsteins 2020-04-08

**Teaching Gifted Children in Today's Preschool and Primary Classrooms** Joan Franklin Smutny 2016-02-23 These proven, practical early childhood teaching strategies and techniques help teachers identify young gifted children, differentiate and extend the curriculum, assess and document students' development, and build partnerships with parents. Individual chapters focus on early identification, curriculum compacting, social studies, language arts, math and science, cluster grouping, social-emotional development, and finding and supporting giftedness in diverse populations. The text includes current information on brain research and learning; rigor and complexity; and integrating creativity, the arts, and higher-level thinking in accordance with learning goals. Scenarios and vignettes take readers into teachers' classrooms. The book includes extensive references and resources to explore. Digital content includes customizable forms from the book.

**Garbage Pail Kids** The Topps Company 2012-04-08 A collection of all 206 colorfully over-the-top images from the first five series of the popular collectible stickers from the 1980s. Garbage Pail Kids—a series of collectible stickers produced by Topps in the 1980s—combined spectacular artwork and over-the-top satire. The result was an inspired collaboration between avant-garde cartoonists and humorists including Art Spiegelman, Mark Newgard, John Pound, Tom Bunk, and Jay Lynch. A new generation of fans continues to embrace this pop-culture phenomenon as Garbage Pail Kids stickers are still being published. Now, for the first time, all 206 rare and hard-to-find images from Series 1 through 5 are collected, along with a special set of four limited-edition, previously unreleased bonus stickers. This exciting follow up to Wacky Packages is guaranteed to appeal to die-hard collectors as well as a new generation of fans. Praise for Garbage Pail Kids “If you ask me, reliving my time with Bad Breath Seth and Potty Scotty is worth the cover price alone.” —USAToday.com “A wonderfully designed tribute to these shit-disturbing cards in all their graphic, full-color glory.” —ComicsBeat.com “There’s a lot of interesting stuff in Spiegel man’s intro, and in the afterward by John Pound, the artist who originated and drew the bulk of the Kids. But the real reason to buy this book is for the graphic brilliance of the art itself.” —Boston Phoenix

**The Awakening** Marley Gibson 2009 When Kendall Moorehead moves from Chicago to the small town of Radisson, Georgia, her psychic abilities awaken. Together with her new BFF, Celia, Kendall forms a ghost hunting team. Now they're going to clean up Radisson of its less savory spirits.

**The Templeton Twins Make a Scene** Ellis Weiner 2013-10-08 “The protagonists use their quick wit and brains to save the day . . . Irresistible and hilarious.” —School Library Journal With its kid-perfect humor and dynamic illustrations, the first book in the Templeton Twins series left young readers clamoring for more. This time, Abigail and John Templeton find themselves at TAPAS (the Thespian Academy of the Performing Arts and Sciences) where their father, the illustrious Professor Templeton, has been hired to invent a groundbreaking theatrical device. Once again, there is drama (of course!), silliness, and suspense, as the twins (and their ridiculous dog) must thwart the dastardly Dean brothers in order to save the invention as well as their father (and the dog). Oh yes, there is sure to be another recipe. This time for guacamole. Or is it coleslaw? “The intrusive, self-absorbed narrator hogs the limelight and keeps the vocabulary words and brainy laughs coming.” —San Francisco Chronicle

**School, Family, and Community Partnerships** Joyce L. Epstein 2018-07-19 Strengthen programs of family and community engagement to promote equity and increase student success! When schools, families, and communities collaborate and share responsibility for students' education, more students succeed in school. Based on 30 years of research and fieldwork, the fourth edition of the bestseller School, Family, and Community Partnerships: Your Handbook for Action, presents tools and guidelines to help develop more effective and more equitable programs of family and community engagement. Written by a team of well-known experts, it provides a theory and framework of six types of involvement for action; up-to-date research on school, family, and community collaboration; and new materials for professional development and on-going technical assistance. Readers also will find: Examples of best practices on the six types of involvement from preschools, and elementary, middle, and high schools Checklists, templates, and evaluations to plan goal-linked partnership programs and assess progress CD-ROM with slides and notes for two presentations: A new awareness session to orient colleagues on the major components of a research-based partnership program, and a full One-Day Team Training Workshop to prepare school teams to develop their partnership programs. As a foundational text, this handbook demonstrates a proven approach to implement and sustain inclusive, goal-linked programs of partnership. It shows how a good partnership program is an essential component of good school organization and school improvement for student success. This book will help every district and all schools strengthen and continually improve their programs of family and community engagement.

**Baby Loves Scientists** Ruth Spiro 2019-10-15 Babies who love science can be anything! Move over Wonder Woman and Superman—here come Aerospace Engineer and Particle Physicist!
