In September 2000, eleven British soldiers were captured by a notorious militia gang in Sierra Leone. Originally deployed to fulfill peace-keeping duties in a country ravaged by civil war, the soldiers had been kidnapped by the so-called 'West Side Boys' who had already subjected the region to a reign of terror, murder and mutilation. When negotiations stalled, the British government decided to launch Operation Barras as a joint rescue operation by D Squadron 22 SAS and A Company 1 Para. Two four-man SAS reconnaissance patrols were inserted by boat

location of the hostages and the routines, if any, of the frequently stoned and extremely volatile West Side Boys. Then, just before dawn on Sunday, September 20 2004, three Chinooks supported by two army Lynx helicopters lifted the Paras and SAS into the two villages that straddled Rokel Creek. The Lynx helicopter attacked a heavy machinegun in the southern village of Magbeni as the SAS fire teams and a hostage rescue team fast roped down from the two Chinooks. The hostages were quickly located and evacuated to safety. The SAS endured a sustained firefight with the West Side Boys, killing some and capturing their leader, "Brigadier" Foday Kallay, a 24-year-old former sergeant in the Sierra Leone Army. To the south of the village, the Paras

The operation was over by late morning and the Paras completed the mission by destroying any vehicles, ammunition or equipment that had been abandoned by the gang. In the words of one SAS veteran, "This was not a clinical, black balaclava, Princess Gate-type operation: it was a very grubby, green operation with lots of potential for things to go wrong." For the first time, this daring raid is brought to life with specially commissioned artwork, detailed maps and overhead shots to recreate one of the

barbarian invasions, they have fascinated generations ever since, and their legacy of ideas and imagery has resonated through the centuries, inspiring Hollywood movies and great works of literature. Even today, to invoke the Crusades is to stir deep cultural myths, assumptions and prejudices. Yet despite their powerful hold on our imaginations, our knowledge of them remains obscured and distorted by time. Were the Crusaders motivated by spiritual rewards, or by greed? Were the Crusades an experiment in European colonialism, or a manifestation of religious love? How were they organized and founded? With customary flair and originality, Christopher Tyerman picks his way through

lively reimagining of how the distant medieval world of war functioned, drawing on the objects used and made by crusaders Throughout the Middle Ages crusading was justified by religious ideology, but the resulting military campaigns were fueled by concrete objectives: land, resources, power, reputation. Crusaders amassed possessions of all sorts, from castles to reliquaries. Campaigns required material funds and equipment, while conquests produced bureaucracies, taxation, economic exploitation, and commercial regulation. Wealth sustained the Crusades while material objects, from weaponry and military technology to carpentry and shipping, conditioned them. crusading wars and the objects that memorialized them, in architecture, sculpture, jewelry, painting, and manuscripts. Christopher Tyerman's incorporation of the physical and visual remains of crusading enriches our understanding of how the crusaders themselves articulated their mission, how they viewed their place in the world, and how they related to the cultures they derived from and preyed upon.

The Flat Earth as Key to Decrypt the Book of Enoch Zen Garcia

2015-09-26 Shortly after accepting the flat earth as a model for the world, I decided to revisit the Book of the Courses of the Heavenly Luminaries to see if my new understanding would somehow mirror what Enoch was sharing as the motion of the sun and moon. As I began to read chapters 71-82, I found to my utter amazement

that the angel Uriel had shown to Enoch could only be deciphered if one were to imagine Enoch's description of the revolution of the sun and the moon. As seen from above the flat circular plane of the earth as described by Isaiah; and that Enoch must have been taken up to perhaps where Polaris is, centered directly above the North Pole, and while looking down at the backdrop of the earth, was instructed on the motions of both the sun and moon. Without such conception, it is in my opinion impossible to apply these descriptions to the model of the earth as a spherical planet.

worked—and a revolutionary attempt to rethink how we understand the Middle Ages. The story of the wars and conquests initiated by the First Crusade and its successors is itself so compelling that most accounts move quickly from describing the Pope's calls to arms to the battlefield. In this highly original and enjoyable new book, Christopher Tyerman focuses on something obvious but overlooked: the massive, all-encompassing and hugely costly business of actually preparing a crusade. The efforts of many thousands of men and women, who left their lands and families in Western Europe, and marched off to a highly uncertain future in the Holy Land and elsewhere have never been sufficiently understood. Their actions

How to Plan a Crusade is remarkably illuminating on the diplomacy, communications, propaganda, use of mass media, medical care, equipment, voyages, money, weapons, wills, ransoms, animals, and the power of prayer during this dynamic era. It brings to life an extraordinary period of history in a new and surprising way.

From Palestine and Europe's farthest reaches, each crusade is recounted in a clear, concise narrative. The author gives special attention as well to the crusades' effects on the Islamic world and the Christian Byzantine East.

Philbrick's monumental history, *In the Heart of the Sea* In 1820, the Nantucket whaleship *Essex* was rammed by an angry sperm whale thousands of miles from home in the South Pacific. The *Essex* sank, leaving twenty crew members drifting in three small open boats for ninety days. Through drastic measures, eight men survived to reveal this astonishing tale. The Narrative of the Wreck of the Whaleship *Essex*, by Owen Chase, has long been the essential account of the *Essex*'s doomed voyage. But in 1980, a new account of the disaster was discovered, penned late in life by Thomas Nickerson, who had been the fifteen-year-old cabin boy of the ship. This discovery has
