Making Sense of Your World W. Gary Phillips 2009-01-01 Making Sense of Your World offers a basic, accessible introduction to biblical worldview that covers all of these aspects of world-view thinking. Part One compares the basic worldviews, Part Two contrasts (and seeks to defend) the biblical worldview with the others, and Part Three constructs a biblical worldview in four key areas. This book is an overview; the Christian thinker is invited to continue his or her study through the recommended readings at the end of each chapter--an ongoing task Paul labels the 'renewing' of our minds (Romans 12:2).

Africans at the Crossroads John Henrik Clarke 1991 "Dr. John Henrik Clarke, the late outstanding African-American historian, has brought the range of his years of scholarly work together in this single and comprehensive volume. The topics he covers are as varied and interesting as his experience in the Pan-Africanist struggle. Notes for an African World Revolution: Africans at the Crossroads is a collection of essays that have been broadly amassed in five thematic sections. Clarke begins with the roots of the African and African-American freedom struggle in the African World. A major section is devoted to a detailed discussion of the uncompleted revolution of five monumental African leaders: Kwame Nkrumah, Patrice Lumumba, Marcus Gravey, Malcom X, and Tom Mboya. The rest of the essays focus on topics ranging from the conquest of African to the struggles for freedom in South Africa and the Pan-Africanist movement. Clarke ends his collection with his important and timely essay Can African People Save Themselves?"--Amazon.com

Metal Recovery from Electronic Waste: Biological Versus Chemical Leaching for Recovery of Copper and Gold Arda İşildar 2018-10-30 Waste electrical and electronic equipment (WEEE) generation is a global problem. Despite the growing awareness and deterring legislation, most of the WEEE is disposed improperly, i.e. landfilled or otherwise shipped overseas, and treated in sub-standard conditions. Informal recycling of WEEE has catastrophic effects on humans and the environment. WEEE contains considerable quantities of valuable metals such as base metals, precious metals and rare earth elements (REE). Metal recovery from WEEE is conventionally carried out by pyrometallurgical and hydrometallurgical methods. In this PhD research, novel metal recovery technologies from WEEE are investigated. Using acidophilic and cyanide-generating bacteria, copper and gold were removed from crushed electronic waste with removal efficiencies of 98.4 and 44.0%, respectively. The leached metals in solution were recovered using sulfidic precipitation and electrowinning separation techniques. Finally, a techno-economic assessment of the technology was studied. This research addresses the knowledge gap on two metal extraction approaches, namely chemical and biological, from a secondary source of metals. The essential parameters of the selective metal recovery processes, scale-up potential, techno-economic and sustainability assessment have been studied.

A Field Guide to the Birds of Borneo, Sumatra, Java, and Bali John MacKinnon 1993-07-29 The islands of Borneo, Sumatra, Java, and Bali are ecologically one of the richest, most biologically complex areas in the world, sought out by thousands of knowledgeable nature lovers every year for the spectacular variety of wildlife and beautiful vistas. This book provides the first complete identification guides to the birds of this teeming tropical paradise. It gives descriptions of 820 regional species, illustrated in 88 specially commissioned color plates accompanied by notes detailing distinctive features and habitats. Entries cover nomenclature, plumage, markings, voice, global range, distribution and regional status, habits, and diet. The main text gives practical information on where to find many exotic species, citing major birdwatching locations. Introductory chapters discuss habitats, climate, land-use, and conservation concerns. Professional ornithologists and amateur bird watchers alike will find this the indispensable bird guide for eastern Malaysia and western Indonesia for many years to come. It is also an unrivalled source of information for casual travellers and ecotourists

Adaptive Control Karl J. Åström 2013-04-26 Suitable for advanced undergraduates and graduate students, this text introduces theoretical and practical aspects of adaptive control. It offers an excellent perspective on techniques as well as an active knowledge of key approaches. Readers will acquire a well-developed sense of when to use adaptive techniques and when other methods are more appropriate. Starting with a broad overview, the text explores real-time estimation, self-tuning regulators and model-reference adaptive systems, stochastic adaptive control, and automatic tuning of regulators. Additional topics include gain scheduling, robust high-gain control and self-oscillating controllers, and suggestions for implementing adaptive controllers. Concluding chapters feature a summary of applications and a brief review of additional areas closely related to adaptive control. Both authors are Professors at the Lund Institute of Technology in Sweden, and this text has evolved from their many years of research and teaching. Their insights into properties, design procedures, and implementation of adaptive controllers are complemented by the numerous examples, simulations, and problems that appear throughout the book.
