New Directions in Assessing Historical Thinking Kadriye Ericikan 2015-02-20 New technologies have radically transformed our relationship to information in general and to little bits of information in particular. The assessment of history learning, which for a century has valued those little bits as the centerpiece of its practice, now faces not only an unprecedented glut but a disconnect with what is valued in history education. More complex

processes—historical thinking, historical consciousness or historical sense making—demand more complex assessments. At the same time, advances in scholarship on assessment open up new possibilities. For this volume, Kadriye Ericikan and Peter Seixas have assembled an international array of experts who have, collectively, moved the fields of history education and assessment forward. Their various approaches negotiate the sometimes-

conflicting demands of theoretical sophistication, empirically demonstrated validity and practical efficiency. Key issues include articulating the cognitive goals of history education, the relationship between content and procedural knowledge, the impact of students' language literacy on history assessments, and methods of validation in both large scale and classroom assessments. New Directions in Assessing Historical Thinking is a critical, research-

oriented resource that will advance the conceptualization, design and validation of the next generation of history assessments.

From Story to Judgment: The Four Question Method for Teaching and Learning Social Studies Gary Shiffman 2021-09-14 The Four Question Method identifies the questions that drive the thinking that real people do when they take the human world seriously. The authors, Jonathan Bassett and Gary Shiffman, have figured out how to describe and teach what it takes to answer those questions well. This inquiry method gives educators a way to

integrate content 'coverage' – through storytelling! – with practice in thinking skills that are central to history and its affiliated academic disciplines, together called social studies. The Four Question Method helps teachers to plan more effectively and students to learn more effectively. It provides guidance for writing research essays. And it

transfers: the skills our students practice will work for them when they encounter and make their own history. **AP European History Premium, 2024: 5 Practice Tests + Comprehensive Review + Online Practice** Seth A.
