The Boo Pat Conroy 2010-11-16 The #1 New York Times–bestselling author’s story about life at the Citadel in the 1960s, a profound exploration of what it means to be a man of honor. Lt. Col. Nugent Courvoisie, known to the cadets as “the Boo,” is an imposing and inspiring leader at the South Carolina military academy, the Citadel. A harsh disciplinarian but a compassionate mentor, he guides and inspires his young charges. Cadet Peter Cates is an anomaly. He is a gifted writer, a talented basketball player, and a good student, but his outward successes do little to impress his abusive father. The Boo takes Cates under his wing, but their bond is threatened when they’re forced to confront an act of violence on campus. Drawn from Pat Conroy’s own experiences as a student at the Citadel, The Boo is an unforgettable story about duty, loyalty, and standing up for what is right in the face of overwhelming circumstances.

Egyptianizing Figurines from Delos Caitlín Barrett 2011-09-20 This book investigates Hellenistic popular religion through an interdisciplinary study of figurines of Egyptian deities from Delos. The results offer a new perspective on Hellenistic reinterpretations of Egyptian religion, as well as the relationship between “popular” and “official” cults.

Nihilism, Modernism, and Value John Fraser 2015-02-23 Nihilism, Modernism, and Value consists of three jargon-free lectures addressed to the general reader. It explores a variety of ways in which writers responded to the phenomenon of nihilism in the 19th and early 20th centuries, By "nihilism" here is meant a sense, at times paralyzing, of the instability and perhaps groundlessness of all values. The book goes into some of the factors— psychological, sociological, philosophical—involved in that destabilizing. But its principal focus is on reintegration, and it draws freely on real-world experiences to illuminate concepts and strategies. Among the writers whose names figure in it are Conrad, Nietzsche, Beckett, Woolf, Heidegger, Rhys, Pushkin, Baudelaire, Hemingway, Lessing, Stevens, Valéry, and James (William), with particular attention at one point to Kafka and Borges. But no prior knowledge of them is required for following the argument, with its numerous lively quotations. The author himself is advancing heuristically, not just performing an

academic exercise. The problems confronted are as relevant still as they were generations ago. A reviewer of John Fraser's first book spoke of "an extremely agile and incessantly active mind which illuminates almost every subject it touches." A reviewer of the second one, both of them published by Cambridge University Press, called it "a brilliant and utterly absorbing work," and said that "There are not many learned books which have the unputdownable quality of a thriller; this is one of them."

Archaeology of Iran in the Historical Period Kamal-Aldin Niknami 2020-05-22 This collection of twenty-eight essays presents an up-to-date survey of pre-Islamic Iran, from the earliest dynasty of Illam to the end of Sasanian empire, encompassing a rich diversity of peoples and cultures. Historically, Iran served as a bridge between the earlier Near Eastern cultures and the later classical world of the Mediterranean, and had a profound influence on political, military, economic, and cultural aspects of the ancient world. Written by international scholars and drawing mainly on the field of practical archaeology, which traditionally has shared little in the way of theories and methods, the book provides crucial pieces to the puzzle of the national identity of Iranian cultures from a historical perspective. Revealing the wealth and splendor of ancient Iranian society - its rich archaeological data and sophisticated artistic craftsmanship - most of which has never before been presented outside of Iran, this beautifully illustrated book presents a range of studies addressing specific aspects of Iranian archaeology to show why the artistic masterpieces of ancient Iranians rank among the finest ever produced. Together, the authors analyze how archaeology can inform us about our cultural past, and what remains to still be discovered in this important region.

Phenomenology and Existentialism in the Twentieth Century Anna-Teresa Tymieniecka 2009-10-13 Our world’s cultural circles are permeated by the philosophical influences of existentialism and phenomenology. Two contemporary quests to elucidate rationality - took their inspirations from Kierkegaard’s

existentialism plumbing the subterranean source of subjective experience and Husserl’s phenomenology focusing on the constitutive aspect of rationality. Yet, both contrary directions mingled readily in common vindication of full reality. In the inquisitive minds (Scheler, Heidegger, Sartre, Stein, Merleau-Ponty, et al.), a fruitful cross-pollination of insights, ideas, approaches, fused in one powerful wave disseminating throughout all domains of thought. Existentialist rejection of ratiocination and speculation together with Husserl’s shift to the genesis of rapproches philosophy and literature (Wahl, Marcel, Berdyaev, Wojtyła, Tischner, etc.), while the foundational underpinnings of language (Wittgenstein, Derrida, etc.) opened the "hidden" behind the "veils" (Sezgin and Dominguez-Rey).

Common Ground? Anthony M. Orum 2009-09-10 Public spaces have long been the focus of urban social activity, but investigations of how public space works often adopt only one of several possible perspectives, which restricts the questions that can be asked and the answers that can be considered. In this volume, Anthony Orum and Zachary Neal explore how public space can be a facilitator of civil order, a site for power and resistance, and a stage for art, theatre, and performance. They bring together these frequently unconnected models for understanding public space, collecting classic and contemporary readings that illustrate each, and synthesizing them in a series of original essays. Throughout, they offer questions to provoke discussion, and conclude with thoughts on how these models can be combined by future scholars of public space to yield more comprehensive understanding of how public space works.

Philosophy of African American Studies Stephen Ferguson 2015-09-16 In this ground-breaking book, Stephen C. Ferguson addresses a seminal question that is too-often ignored: What should be the philosophical basis for African American studies? The volume explores philosophical issues and problems in their relationship to Black studies. Ferguson shows that philosophy is not a sterile intellectual pursuit, but a critical tool to gathering knowledge about the Black experience. Cultural idealism in various forms has become enormously influential as a framework for Black studies. Ferguson takes on the task of demonstrating how a Marxist philosophical perspective offers a productive and fruitful way of overcoming the limitations of idealism. Focusing on the hugely popular Afrocentric school of thought, this book’s engaging discussion shows that the foundational arguments of cultural idealism are based on a series of analytical and historical misapprehensions. In turn, Ferguson argues for the centrality of the Black working class—both men and women—to Black Studies.

In the Light of Amarna Ägyptisches Museum und Papyrussammlung 2012 An accompaniment to the Egyptian Museum of Berlin’s special exhibition celebrating the discovery of the Nefertiti bust in 1912, this catalog presents never-before-seen artifacts and objects from the Amarna period of Egyptian history. The book also explores religion, craftsmanship, daily life, and sculpture in Amarna and the world famous Nefertiti bust.

Urban Geography Michael Pacione 2001 This text is an introduction to the study of towns and cities. The book synthesizes a wealth of material to provide a comprehensive introduction for students of urban geography, drawing on a rich blend of theoretical and empirical information, to advance their knowledge of the city. For the first time in the history of humankind, urban dwellers outnumber rural residents and this trend is destined to continue. Urban places, towns and cities are of fundamental importance: for the distribution of population within countries; in the organization of economic production, distribution and exchange; in the structuring of social reproduction and cultural life; and in the allocation and exercise of power. Even those living beyond the administrative or functional boundaries of a town or city, will have their lifestyle influenced to some degree by a nearby or distant city.

Politics and the Environment in Eastern Europe Eszter Krasznai Kovacs 2021-07-28 Europe remains divided between east and west, with differences caused and worsened by uneven economic and political development. Amid these divisions, the environment has become a key battleground. The condition and sustainability of environmental resources are interlinked with systems of governance and power, from local to EU levels. Key challenges in the eastern European region today include increasingly authoritarian forms of government that threaten the operations and very existence of civil society groups; the importation of locally-contested conservation and environmental programmes that were designed elsewhere; and a resurgence in cultural nationalism that prescribes and normalises exclusionary nation-building myths. This volume draws together essays by early-career academic researchers from across eastern Europe. Engaging with the critical tools of political ecology, its contributors provide a hitherto overlooked perspective on the current fate and reception of ‘environmentalism’ in the region. It asks how emergent forms of environmentalism have been received, how these movements and perspectives have redefined landscapes, and what the subtler effects of new regulatory regimes on communities and environment-dependent livelihoods have been. Arranged in three sections, with case studies from Czechia, Hungary, Lithuania, Poland, Romania and Serbia, this collection develops anthropological views on the processes and consequences of the politicisation of the environment. It is valuable reading for human geographers, social and cultural historians, political ecologists, social movement and government scholars, political scientists, and specialists on Europe and European Union politics.

F Troop and Other Citadel Stories Tom Worley 2014-04-15 From its founding in 1842 the Citadel has been steeped in tradition. There have been changes through the years, but the basics of the military code and the plebe system have remained constant. Citadel graduate Tom Worley has crafted this collection of short stories about life at the South Carolina military academy during the 1960s. While the stories are fictional, they are inspired in part by his days as a student on the college campus. With humor and dramatic clarity, Worley reveals the harshness of the plebe system, how success is achieved through perseverance, and the character-building benefits of a Citadel education. The seventeen stories included in the volume are told from the perspective of two main characters—cadets Pete Creger and Sammy Graham—who are members of F Company. By turns surprising and entertaining, the collected stories range from the emotional and physical trials of being a knob in the plebe system, the brutality of hazing, and the fear and fun of company pranks, to the friendship and camaraderie the system fosters and the tremendous pride shared by those who wear the coveted Citadel ring. Best known for its Corps of Cadets, the Citadel attracts students who desire a college education in a classical military system in which leadership and character training are essential parts of the overall experience. Any romanticized notion of military bravado is quickly shattered the moment students set foot on campus and their parents drive away. Many cadets are left wondering, “What have I signed up for?” Worley’s stories shed light on the pain and the pride, explaining why, he says, “most cadets at the Citadel hated the place while they were there and loved everything about it once they’d graduated. They were bonded together for life. Perhaps that’s the greatest thing the Citadel did for them.”

Outstanding Young Men of America 1975

Twelve Years A Slave, Illustrated Edition Solomon Northup 2014-04-08 Kidnapped and sold into slavery in the American South, freeman Solomon Northup spent twelve years in bondage before being freed. Twelve Years a Slave is Northup’s moving memoir, revealing unimaginable details of the horrors he faced as a slave on Southern plantations, and his unshakable belief that he would return home to his family. Written in the year after Northup was freed and published in the wake of Harriet Beecher Stowe’s Uncle Tom’s Cabin, Northup’s story was quickly taken up by abolitionist groups and news organizations as part of the fight against slavery, and continues to resonate more than a century after the end of the American Civil War.

The Wisdom of Ben Sira Patrick William Skehan 2007 The Wisdom of Ben Sira (Ecclesiasticus) contains the sayings of Ben Sira, arguably the last of Israel's wise men and its first professional scribe, whose world was defined and dominated by Greek ideas and ideals. This Hellenistic worldview challenged the adequacy of the religion passed down to the Palestinian Jews of the second century B.C.E. by their ancestors. Ben Sira's training in both Judaic and Hellenistic literary traditions prepared him to meet this challenge. He vigorously opposed any compromise of Jewish values; and his teachings bolstered the faith and confidence of his people. Through its elegant poetry and vehement exhortations, The Wisdom of Ben Sira exposes the ill effects of sinful behavior on one's health, status, and spiritual and material well-being. Ben Sira's rigorous code of moral behavior was the measure of Jewish faithfulness in an era of

ethical and religious bankruptcy.

Nomads, Tribes, and the State in the Ancient Near East University of Chicago. Oriental Institute 2009 For decades, scholars have struggled to understand the complex relationship between pastoral nomadic tribes and sedentary peoples of the Near East. The Oriental Institute's fourth annual post-doc seminar (March 7-8, 2008), Nomads, Tribes, and the State in the Ancient Near East, brought together archaeologists, historians, and anthropologists to discuss new approaches to enduring questions in the study of nomadic peoples, tribes, and states of the past: What social or political bonds link tribes and states? Could nomadic tribes exhibit elements of urbanism or social hierarchies? How can the tools of historical, archaeological, and ethnographic research be integrated to build a dynamic picture of the social landscape of the Near East? This volume presents a range of data and theoretical perspectives from a variety of regions and periods, including prehistoric Iran, ancient Mesopotamia and Egypt, seventh-century Arabia, and nineteenth-century Jordan.

The Story of the Citadel Oliver James Bond 1936 This is the story, told by it former President, of a remarkable institution; one of the last reaming state - assisted military colleges in America. Beginning with the account of an aborted slave insurrection in June 1822, the author tells in detail of the city of Charleston, and of a later decision by the State Legislature to use the facility, as well as an arsenal in Columbia, to educate a corps of cadets and to train them for the defense of the state. Just before Commencement in 1861, the cadet corps, stationed on Morris Island, fired the first shots of the Civil War at the "Star of the West", a supply ship sent to relieve Ft. Sumter. A member of the first class to graduate after the war (1886), the author was immediately appointed an assistant professor and was thereafter a member of the faculty for 45 years. His personal involvement in every aspect of Citadel life during that time allowed him to include personal reminiscences that are both fascinating and poignant. He was appointed Superintendent (President) in 1908.

Social Studies for Secondary Schools Alan J. Singer 2014-10-08 Now in its 4th edition, this popular text for secondary social studies methods courses integrates discussions of educational goals and the nature of history and social studies with ideas for organizing social studies curricula, units, lessons, projects, and activities. A major theme throughout is that what teachers choose to teach and the way they teach reflect their broader understanding of society, history, and the purpose of social studies education. Advocating an inquiry and activity-based view of social studies teaching that respects the points of view of students and teachers, and based in practice and experience, it offers systematic support and open, honest advice for new teachers. Each chapter addresses a broad question about social studies education; sub-chapters begin with narrower questions that direct attention to specific educational issues. Lesson ideas and materials in the book and online are especially designed to help new teachers to address common core learning standards, to work in inclusive settings, and to promote literacy and the use of technology in social studies classrooms. Chapters include highlighted Learning Activities, Teaching Activities, nd Classroom Activities designed to provoke discussion and illustrate different approaches to teaching social studies, and conclude with recommendations for further reading and links to on-line essays about related social studies topics. Activities are followed by four categories: "Think it over," "Add your voice to the discussion," "Try it yourself," and "It’s your classroom." All of these are supported with online teaching material. Designed for undergraduate and graduate pre-service social studies methods courses, this text is also useful for in-service training programs, as a reference for new social studies teachers, and as a resource for experienced social studies educators who are engaged in rethinking their teaching practice. New in the Fourth Edition Provides a number of new lesson ideas paired with online lesson plans and activity sheets in every chapter Takes a new focus on data-driven, standards-based instruction, especially in relation to the common core curriculum Addresses the interactive nature of learning in updated technology sections Reflects current trends in history education Includes more of what the author has learned from working teachers Offers a wealth of additional on-line material linked to the text

Marching in Step Alexander Macaulay 2011-03-01 Combining the nuanced perspective of an insider with the critical distance of a historian, Alexander Macaulay examines The Citadel’s reactions to major shifts in postwar life, from the rise of the counterculture to the demise of the Cold War. The Citadel is widely considered one of the most traditional institutions in America and a bastion of southern conservatism. In *Marching in Step* Macaulay argues that The Citadel has actually experienced many changes since World War II—changes that often tell us as much about the United States as about the American South. Macaulay explores how The Citadel was often an undiluted showcase for national debates over who deserved full recognition as a citizen—most famously first for black men and later for women. As the boundaries regarding race, gender, and citizenship were drawn and redrawn, Macaulay says, attitudes at The Citadel reflected rather than stood apart from those of mainstream America. In this study of an iconic American institution, Macaulay also raises questions over issues of southern distinctiveness and sheds light on the South’s real and imagined relationship with the rest of America.

The Collapse of The Confederacy Prof. Charles H. Wesley 2016-08-09 In 1937, in his ground-breaking *The Collapse of the Confederacy*, the African American historian Charles H. Wesley (1891-1987) took a bold step in rewriting the history of the Confederate South by asserting that the new nation failed because of underlying internal and social factors. Looking beyond military events to explain the Confederacy’s demise, Wesley challenged conventional interpretations and argued that, by 1865, the supposedly unified South had “lost its will to fight.” Though neglected today by scholars and students of the Civil War, Wesley ranked as one of the leading African American historians, educational administrators, and public speakers of the first half of the twentieth century.

A Thesaurus of English Word Roots Horace Gerald Danner 2014-03-27 Horace G. Danner’s *A Thesaurus of English Word Roots* is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: “Dr. Danner’s book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!” In *A Thesaurus of English Word Roots*, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots’ original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacousia, hyperacousia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odynacusis.. In this manner, *A Thesaurus of English Word Roots* places the word in as many word families as there are elements in the word. This work will interest linguists and philologists and anyone interested in the etymological aspects of English language.

Tourism Robert Christie Mill 1990-01 Offers practical examples and advice on how to capture a share of the tourist market for a business, and is oriented towards management and the business side of the tourism industry. It examines the general principles of tourist movement, the means of travel and the various types of market.

Cosmopolitanisms and the Jews Cathy Gelbin 2019-01-25 *Cosmopolitanisms and the Jews* adds significantly to contemporary scholarship on cosmopolitanism by making the experience of Jews central to the discussion, as it traces the evolution of Jewish cosmopolitanism over the last two centuries. The book sets out from an exploration of the nature and cultural-political implications of the shifting perceptions of Jewish mobility and fluidity around 1800,

when modern cosmopolitanist discourse arose. Through a series of case studies, the authors analyze the historical and discursive junctures that mark the central paradigm shifts in the Jewish self-image, from the Wandering Jew to the rootless parasite, the cosmopolitan, and the socialist internationalist. Chapters analyze the tensions and dualisms in the constructed relationship between cosmopolitanism and the Jews at particular historical junctures between 1800 and the present, and probe into the relationship between earlier anti-Semitic discourses on Jewish cosmopolitanism and Stalinist rhetoric. [One Hundred Years of Chemical Warfare: Research, Deployment, Consequences](#) Bretislav Friedrich 2017-11-26 This book is open access under a CC BY-NC 2.5 license. On April 22, 1915, the German military released 150 tons of chlorine gas at Ypres, Belgium. Carried by a long-awaited wind, the chlorine cloud passed within a few minutes through the British and French trenches, leaving behind at least 1,000 dead and 4,000 injured. This chemical attack, which amounted to the first use of a weapon of mass destruction, marks a turning point in world history. The preparation as well as the execution of the gas attack was orchestrated by Fritz Haber, the director of the Kaiser Wilhelm Institute for Physical Chemistry and Electrochemistry in Berlin-Dahlem. During World

War I, Haber transformed his research institute into a center for the development of chemical weapons (and of the means of protection against them). Bretislav Friedrich and Martin Wolf (Fritz Haber Institute of the Max Planck Society, the successor institution of Haber's institute) together with Dieter Hoffmann, Jürgen Renn, and Florian Schmaltz (Max Planck Institute for the History of Science) organized an international symposium to commemorate the centenary of the infamous chemical attack. The symposium examined crucial facets of chemical warfare from the first research on and deployment of chemical weapons in WWI to the development and use of chemical warfare during the century hence. The focus was on scientific, ethical, legal, and political issues of chemical weapons research and deployment — including the issue of dual use — as well as the ongoing effort to control the possession of chemical weapons and to ultimately achieve their elimination. The volume consists of papers presented at the symposium and supplemented by additional articles that together cover key aspects of chemical warfare from 22 April 1915 until the summer of 2015. **In the Company of Men** Nancy Mace 2002-09 Discusses Mace's life as the first of two female graduates of the Citadel.
