Writing, Reading, and Research Richard Veit 2013-08-23 Broadening the traditional notion of undergraduate research, WRITING, READING, AND RESEARCH thoroughly covers the essential skills for developing a research paper: analytical reading, synthesizing, paraphrasing, and summarizing. Presenting the process of research in a practical sequence, including separate chapters on finding, analyzing, and integrating sources, the authors illustrate each stage of the process with examples of student and professional writing. Using a flexible and goal-oriented approach, the authors have created a text that blends the best features of a theoretically informed rhetoric, an interdisciplinary reading anthology, and a research guide. WRITING, READING, AND RESEARCH, Ninth Edition, provides helpful and engaging exercises, frequent opportunities to write, and many occasions for discussion and critical response. Engaging Ideas John C. Bean 2021-06-03 Use your course's big ideas to accelerate students' growth as writers and critical thinkers The newly revised third edition of Engaging Ideas delivers a step-by-step guide for designing writing assignments and critical thinking activities that engage students with important subject-matter questions. This new edition of the celebrated book (now written by the co-author team of Bean and Melzer) uses leading and current research and theory to help you link active learning pedagogy to your courses' subject matter. You'll learn how to: Design formal and informal writing assignments that guide students toward thinking like experts in your discipline Use time-saving strategies for coaching the writing process and handling the paper load including alternatives to traditional grading such as portfolio assessment and contract grading Help

students use self-assessment and peer response to improve their work Develop better ways than the traditional research paper to teach undergraduate reading and research Integrate social media, multimodal genres, and digital technology into the classroom to promote active learning This book demonstrates how writing can easily be integrated with other critical thinking activities such as inquiry discussions, simulation games, classroom debates, and interactive lectures. The reward of this book is watching students come to class better prepared, more vested in the questions your course investigates, more apt to study purposefully, and more likely to submit high-quality work. Perfect for higher education faculty and curriculum designers across all disciplines, Engaging Ideas will also earn a place in the libraries of graduate students in higher education.

MEDINFO 2017: Precision Healthcare Through Informatics A.V. Gundlapalli 2018-01-31 Medical informatics is a field which continues to evolve with developments and improvements in foundational methods, applications, and technology, constantly offering opportunities for supporting the customization of healthcare to individual patients. This book presents the proceedings of the 16th World Congress of Medical and Health Informatics (MedInfo2017), held in Hangzhou, China, in August 2017, which also marked the 50th anniversary of the International Medical Informatics Association (IMIA). The central theme of MedInfo2017 was "Precision Healthcare through Informatics", and the scientific program was divided into five tracks: connected and digital health; human data science; human, organizational, and social aspects; knowledge management and quality; and safety and patient outcomes. The 249 accepted papers and 168 posters included here span the breadth and depth of sub-disciplines in biomedical and health informatics, such as clinical informatics; nursing informatics; consumer health informatics; public health informatics; human factors in healthcare; bioinformatics; translational informatics; quality and safety; research at the intersection of biomedical and health informatics; and precision medicine. The book will be of interest to all those who wish to keep pace with advances in the science, education, and practice of biomedical and health informatics worldwide.

Paper Families Estelle T. Lau 2007-03-14 The Chinese Exclusion Act of 1882 made the Chinese the first immigrant group officially excluded from the United States. In *Paper Families*, Estelle T. Lau demonstrates how exclusion affected Chinese American communities and initiated the development of restrictive U.S. immigration policies and practices. Through the enforcement of the Exclusion Act and subsequent legislation, the U.S. immigration service developed new forms of record keeping and identification practices. Meanwhile, Chinese Americans took advantage of the system's loophole: children of U.S. citizens were granted automatic eligibility for immigration. The result was an elaborate system of "paper families," in which U.S. citizens of Chinese descent claimed fictive, or "paper," children who could then use their kinship status as a basis for entry into the United States. This subterfuge necessitated the creation of "crib sheets" outlining genealogies and providing village maps and other information that could be used during immigration processing. Drawing on these documents as well as immigration case files, legislative materials, and transcripts of interviews and court proceedings, Lau reveals immigration as an interactive process. Chinese immigrants and their U.S. families were subject to regulation and surveillance, but they also manipulated and thwarted those regulations, forcing the U.S. government to adapt its practices and policies. Lau points out that the Exclusion Acts and the pseudo-familial structures that emerged in response have had lasting effects on Chinese American identity. She concludes with a look at exclusion's legacy, including the Confession Program of the 1960s that coerced people into divulging the names of paper family members and efforts made by Chinese American communities to recover their lost family histories.

Games and Simulations in Online Learning: Research and Development Frameworks Gibson, David 2006-09-30 "This book examines the potential of games and simulations in online learning, and how the future could look as developers learn to use the emerging capabilities of the Semantic Web. It explores how the Semantic Web will impact education and how games and simulations can evolve to become robust teaching resources"--Provided by publisher.

How to Read Like a Writer Mike Bunn When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how

such choices might arise in your own writing. The idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?

Translation Competence Carla Quinci 2023-02-23 This book offers a systematic and comprehensive account of translation competence (TC), reflecting on its different models and conceptualisations throughout its development and outlining future directions for both theory and practice. The volume charts the evolution of TC in line with related findings in empirical product- and process-oriented research. In critically examining the different models of translation competence, Quinci explores a wide range of connected issues of ongoing debate within Translation Studies, including translation quality, the revision process, and translator self-assessment. The second section of the book investigates these themes at work in the design, conduct, and results of an award-winning longitudinal research project which analysed the acquisition and development of TC in a sample group of translation trainees and professional translators. The volume builds on the outcomes of this project to offer practical activities for translator education, informed by theory and empirical research, toward encouraging continued reflection and new directions for translation competence research and practice. This book will be of interest to scholars in Translation Studies, as well as translation trainees and active translation professionals.

Knowledge, Innovation, and Impact Andrew Sixsmith 2020-12-22 This book provides

researchers with a straightforward and accessible guide for carrying out research that will help them to combine good science with real-world impact. The format of this book is simple: concise chapters on key topics, examples and case studies, written in plain language that will guide researchers through the process of research-driven innovation. The book draws on the editors' experience in leading the Age-Well Network of Excellence. The aim of Age-Well is to drive innovation in the area of technology and aging. Researchers often lack the knowledge and abilities to commercialize or mobilize the outcomes of their research. Moreover, there is a lack of training and education resources suitable for the wide range of disciplines and experience that are becoming more typical. The book emphasizes the practicalities of "how to" undertake the kinds of activities that researchers should be engaging in if they are serious about achieving impact. Overall, this book will guide researchers through the process of research-driven innovation.

Enterprise Content Management in Information Systems Research Jan vom Brocke 2013-11-04 This book collects ECM research from the academic discipline of Information Systems and related fields to support academics and practitioners who are interested in understanding the design, use and impact of ECM systems. It also provides a valuable resource for students and lecturers in the field. "Enterprise content management in Information Systems research – Foundations, methods and cases" consolidates our current knowledge on how today's organizations can manage their digital information assets. The business challenges related to organizational information management include reducing search times, maintaining information quality, and complying with reporting obligations and standards. Many of these challenges are well-known in information management, but because of the vast quantities of information being generated today, they are more difficult to deal with than ever. Many companies use the term "enterprise content management" (ECM) to refer to the management of all forms of information, especially unstructured information. While ECM systems promise to increase and maintain information quality, to streamline content-related business processes, and to track the lifecycle of information, their implementation poses several questions and challenges: Which content objects should be put under the control of the ECM system? Which processes are affected by the implementation? How should outdated technology be replaced? Research is challenged to support practitioners in answering these questions.

Qualitative Research Methods Pranee Liamputtong 1999 Qualitative Research Methods: A Health Focus is a practical guide to conducting qualitative research, with an emphasis on health-related examples. Methodological issues confronting qualitative researchers are dealt with in general chapters on sampling and rigour, the use of theory, data analysis, and writing research proposals and reports. Established qualitative methods such as in-depth interviewing, focus groups, and ethnography are reviewed alongside chapters on more innovative and complex methods such as narrative methods, memory work, and participatory-action research. Detailed examples of each method are provided to illustrate the research process. It is increasingly being accepted that qualitative methods play an important role in health-related research. This book is a comprehensive and accessible guide to qualitative methods for health care students and health professionals.

Understanding and Evaluating Research Sue L. T. McGregor 2017-10-25 Understanding and Evaluating Research: A Critical Guide shows students how to be critical consumers of research and to appreciate the power of methodology as it shapes the research question, the use of theory in the study, the methods used, and how the outcomes are reported. The book starts with what it means to be a critical and uncritical reader of research, followed by a detailed chapter on methodology, and then proceeds to a discussion of each component of a research article as it is informed by the methodology. The book encourages readers to select an article from their discipline, learning along the way how to assess each component of the article and come to a judgment of its rigor or quality as a scholarly report.

Understanding System Change in Child Protection and Welfare John Canavan 2021-11-29 This book provides an account of the experience of a multifaceted system-change programme to strengthen the capacity of Ireland's statutory child protection and welfare agency in the areas of prevention, early intervention and family support. Many jurisdictions globally are involved in system change processes focused on increasing investment in services that seek to prevent children's entry into child protection and welfare systems, through early intervention, greater support to families, and an increased emphasis on rights and participation. Based on a four-year in-depth study by a team of University-based researchers, this text adds to the emerging knowledge-base on developing, implementing and evaluating system change in child protection and welfare. Study methodological approaches were wide ranging and involved a number of key stakeholders including children, parents, social workers and social care workers, service managers, agency leaders and policy makers. Since the change process involved an agency-university partnership encompassing design, technical support and evaluation, the book also contributes to understandings of the potential and limits of such partnerships in the child protection and welfare field. Uniquely, the book gives voice to the experience of both agency personnel and academic in the accounts provided. It will be of interest to all scholars, students and practitioners in the areas of child protection and welfare.

Overcoming Inequalities in Schools and Learning Communities: Innovative Education for a New Century Rocio Garcia-Carrion 2020-03-24 Educational inequalities have strongly impacted disadvantaged and underserved populations such as indigenous, Roma, migrant children, students with disabilities, and those affected by poverty. A wide array of research has contributed to explaining the mechanisms and effects of inequalities in the achievement patterns, dropout rates, disengagement in the school experiences of children and youth traditionally excluded. Research also suggests the negative consequences for child development – including cognitive, language, and social-emotional functioning – of poverty and lack of quality education in the early years. Consequently, the current unequal access to optimal learning environments for every single child to succeed in education and to have a better life perpetuates the exclusion and neglects the right to education for those minorities. This Research Topic aims at moving beyond causes and shed light upon effective solutions by providing successful pathways for integration and inclusion of the learners most heavily affected. Scholars worldwide are looking for successful actions with children, youth, and communities of learners historically underserved to overcome educational and social exclusion. These transformative approaches go beyond the deficit thinking and are grounded in theories, empirical evidence, and multidisciplinary interventions oriented towards achieving social impact, which refers to the extent to which those actions have contributed to improve a societal challenge. The international network of "Schools as Learning Communities" is advancing knowledge on deepening and expanding the impact of what has been defined as Successful Educational Actions (SEAs); that is, those interventions that improve students' achievement and social cohesion and inclusion

in many diverse contexts, regardless the socioeconomic, national, and cultural environment of schools. Drawing on the evidence generated by this network of researchers to address the global challenge of inequality by studying educational actions oriented towards achieving social impact and potentially transferrable to

other contexts, this Research Topic aims at deepening on this approach. In short, our purpose is that the contributions included in this Research Topic contribute to reduce educational and social inequalities and especially benefit those populations most in need.
