Battlefield Atlas of Price's Missouri Expedition Of 1864 Charles Collins 2018-05-13 This 230 page atlas is divided into seven parts. Part I, Missouri's Divided Loyalties, and Part II, Missouri's Five Seasons, provide an overview of Missouri's history from the initial settlement of the Louisiana Purchase Territories through the opening years of the American Civil War. The remaining parts cover the Confederate plan, the Confederate movement into Missouri and the Union reaction, the Confederate retreat and Union pursuit into Kansas, and the final Confederate escape back into Arkansas. The atlas has a standard format with the map to left and the narrative to the right. Each narrative closes with two or more primary source vignettes. These vignettes provide an overview of the events shown on the map and discussed in the narrative from the perspective of persons who participated in the events. In most cases there are two vignettes with the first from a person loyal to the Union and the second from a person who supported the southern cause. A few narratives have two or more vignettes from only the Union side. This was done to emphasize disagreements and struggles among senior leaders to establish a common course of action. Map 25, Decision at the Little Blue River, is a good example and the three vignettes emphasize the disagreement between Maj. Gen. Samuel Curtis and his subordinate, Maj. Gen. James Blunt on where to locate the Union defensive line.

Late Prehistoric Florida Keith Ashley 2012-07-15 Prehistoric Florida societies, particularly those of the peninsula, have been largely ignored or given only minor consideration in overviews of the Mississippian southeast (A.D. 1000-1600). This groundbreaking volume lifts the veil of uniformity frequently draped over these regions in the literature, providing the first comprehensive examination of Mississippi-period archaeology in the state. Featuring contributions from some of the most prominent researchers in the field, this collection describes and synthesizes the latest data from excavations throughout Florida. In doing so, it reveals a diverse and vibrant collection of cleared-field maize farmers, part-time gardeners, hunter-gatherers, and coastal and riverine fisher/shellfish collectors who formed a distinctive part of the Mississipian southeast.

Command Of The Air General Giulio Douhet 2014-08-15 In the pantheon of air power spokesmen, Giulio Douhet holds center stage. His writings, more often cited than perhaps actually read, appear as excerpts and aphorisms in the writings of numerous other air power spokesmen, advocates-and critics. Though a highly controversial figure, the very controversy that surrounds him offers to us a testimonial of the value and depth of his work, and the need for airmen today to become familiar with his thought. The progressive development of air power to the point where, today, it is more correct to refer to aerospace power has not outdated the notions of Douhet in the slightest In fact, in many ways, the kinds of technological capabilities that we enjoy as a global air power provider attest to the breadth of his vision. Douhet, together with Hugh "Boom" Trenchard of Great Britain and William "Billy" Mitchell of the United States, is justly recognized as one of the three great spokesmen of the early air power era. This reprint is offered in the spirit of continuing the dialogue that Douhet himself so perceptively began with the first edition of this book, published in 1921. Readers may well find much that they disagree with in this book, but also much that is of enduring value. The vital necessity of Douhet's central vision-that command of the air is all important in modern warfare-has been proven throughout the history of wars in this century, from the fighting over the Somme to the air war over Kuwait and Iraq.

Democracy and Education John Dewey 1916 In this book, Dewey tries to criticize and expand on the educational philosophies of Rousseau and Plato. Dewey's ideas were seldom adopted in America's public schools, although a number of his prescriptions have been continually advocated by those who have had to teach in them.

Ecological Restoration and Management of Longleaf Pine Forests L. Katherine Kirkman 2017-09-27 Ecological Restoration and Management of Longleaf Pine Forests is a timely synthesis of the current understanding of the natural dynamics and processes in longleaf pine ecosystems. This book beautifully illustrates how incorporation of basic ecosystem knowledge and an understanding of socioeconomic realities shed new light on established paradigms and their application for restoration and management. Unique for its holistic ecological focus, rather than a more traditional silvicultural approach, the book highlights the importance of multi-faceted actions that robustly integrate forest and wildlife conservation at landscape scales, and merge ecological with socioeconomic objectives for effective conservation of the longleaf pine ecosystem.

Seventeenth-Century Metallurgy on the Spanish Colonial Frontier Noah H. Thomas 2018-11-13 A unique contribution to the archaeological literature on the Southwest, *Seventeenth-Century Metallurgy on the Spanish Colonial*

Frontier introduces a wealth of data from one of the few known colonial metal production sites in the Southwest. Archaeologist Noah H. Thomas draws on and summarizes ten seasons of excavation from the Pueblo of Paa-ko to

provide a critical analysis of archaeological features and materials related to metal production during the early colonial period (AD 1598–1680). Extrapolating from the data, Thomas provides a theoretical interpretation of these data

that is grounded in theories of agency, practice, and notions of value shaped in culture. In addition to the critical analysis of archaeological features and materials, this work brings to light a little-known aspect of the colonial

experience: the production of metal by indigenous Pueblo people. Using the ethnography of Pueblo peoples and seventh-century European manuals of metallurgy, Thomas addresses how the situated agency of indigenous

practitioners incorporated within colonial industries shaped the metallurgy industry in the Spanish colonial period. The resulting analysis investigates how economic, technical, and social knowledge was communicated, contested,

and transformed across the social and cultural boundaries present in early colonial communities. Viewing these transformations through an ethnohistorical lens, Thomas builds a social and historical context within which to

understand the decisions made by colonial actors at the time.
