From Clerks to Corpora Philip Shaw 2015-01-19 Why is the Isle of Dogs in the Thames called Isle of Dogs? Did King Canute's men bring English usage back to Jutland? How can we find out where English speakers suck their breath in to give a short response? And what did the Brontes do about dialect and think about foreign languages? The answers are in this collection of empirical work on English past and present in honour of Nils-Lennart Johannesson, Professor of English Language at Stockholm University. The first five chapters report individual studies forming an overview of current issues in the study of Old and Middle English phonology, lexis and syntax. The next six look at Early Modern and Modern English from a historical point of view, using data from corpora, manuscript archives, and fiction. Two more look at the Old English scholar JRR Tolkien and his work. The remaining chapters discuss aspects of Modern English. Several use corpora to look at English usage in itself or in relation to Swedish, French, or Norwegian. The last three look at grammatical models, the pragmatics of second language use, and modern English semantics.

Business Process Mapping J. Mike Jacka 2009-07-07 Praise for Business Process Mapping IMPROVING Customer Satisfaction SECOND EDITION "A must-read for anyone performing business process mapping! This treasure shares step-by-step approaches and critical success factors, based on years of practical, customer-focused experience. A real winner!" —Timothy R. Holmes, CPA, former General Auditor, American Red Cross "Paulette and Mike make extensive use of anecdotes and real-life examples to bring alive the topic of business process mapping. From the outset, this book will engage you and draw you into the world of business process mapping. Who would have thought that reading about business process mapping could make you smile? Well, Mike and Paulette can make it happen! Within each chapter, the authors provide detailed examples and exhibits used to document a process. Each chapter also includes a 'Recap' and 'Key Analysis Points' which enable the reader to distill the highlights of the chapter." —Barbara J. Muller, CPA, CFE, Senior Lecturer, School of Accountancy, W. P. Carey School of Business, Arizona State University "Keller and Jacka cut through the drudgery of process mapping with a path-breaking approach that enables the reader to better understand processes, how they work and how they work together toward successful achievement of business objectives. With great style and flair, this book will provide you with a different way of thinking and new tools to assist you in process analysis and improvement. This book is a must-read for auditors, risk managers, quality improvement management, and business process engineers." —Dean Bahrman, VP and Internal Audit Director (Retired), Global Financial Services Companies "Mike Jacka and Paulette Keller show their expertise with the application of business

process mapping in increasing customer service and satisfaction in this updated and expanded edition of this popular book. With clear, practical examples and applications, this book shows the writing talents of both authors, and it will be used over and over by those from all lines of industries and professions. Kudos for a job well done!" —Joan Pastor, PhD, Founding Partner, Licensed Industrial-Organizational Psychologist, JPA International, Inc., Beverly Hills, California **Synthetic Protein Switches** Viktor Stein 2017-03-15 This detailed book provides state-of-the-art protocols to facilitate the construction of synthetic protein switches for a variety of applications in biotechnology and basic research. Beginning with general strategies, the volume continues with coverage of peptide switches, fluorescent and bioluminescent sensors, β -lactamase sensors, proteolytic sensors, optogenetic switches, as well as cellular signaling switches. Written for the highly successful Methods in Molecular Biology series, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Authoritative and practical, Synthetic Protein Switches: Methods and Protocols serves as a useful reference for life scientists from diverse research fields that range from traditional, discovery-centered disciplines, like cancer research, to newly emerging disciplines, such as synthetic biology.

Cancer Metastasis David Lyden 2011-04-25 Metastasis is responsible for a large burden of morbidity and mortality among cancer patients, and currently few therapies specifically target metastatic disease. Further scientific dissection of the underlying pathways is required to pave the way for new therapeutic targets. This groundbreaking new text comprehensively covers the processes underlying cancer metastasis and the clinical treatment of metastatic disease. Whereas previous volumes have been compendia of laboratory research articles, the internationally renowned authors of this volume have summarized the state-of-the-art research in the metastasis field. A major section covers the cellular and molecular pathways of metastasis and experimental techniques and the systems and models applied in this field. Subsequently, the clinical aspects of the major cancer types are considered, focusing on disease-specific research and therapeutic approaches to metastatic disease. The focus is on novel pathophysiological insights and emerging therapies; future directions for research and unmet clinical needs are also discussed.

"Let Us Die that We May Live" Pauline Allen 2003 This title offers an approachable, surprising, and not always reverent insight into the life of the Early Church. It reveals the full importance of the martyr homily in terms of style, treatment of its subject, and social and liturgical issues.

Rotator Cuff Tear Stefano Gumina 2016-11-23 This handbook provides detailed, state of the art information on simple and complex rotator cuff tears that will

be of value in daily clinical practice. It covers all relevant aspects, including basic science, pathogenesis, clinical and instrumental evaluation, and treatment techniques. Drawing on the results of recent studies, the book will enable the reader to better understand how tears occur and what treatment should be employed in different circumstances. Rotator cuff tear has always attracted great interest because it may cause shoulder pain, loss of strength, simple or complex disabilities, and partial or total inability to work, reducing quality of life. The goals of cuff repair are to restore footprint anatomy with biomechanically secure, tension-free construction that promotes biological healing at the tendon-to-bone interface. Even today, there is cause for discussion about when and how to perform surgical repair and on what to do in cases of irreparable rupture. This book casts light on such issues. It is especially designed for shoulder surgeons and rehabilitation specialists and will also be of value for residents and shoulder fellows.

The Grammar of English-Afrikaans Code Switching Ondene Van Dulm 2007 This dissertation focuses on structural aspects of code switching between South African English and Afrikaans. Specifically, the main aim is to investigate the merit of an account of intrasentential code switching in terms of feature checking theory, a theory associated with minimalist syntax. The hypothesis is that feature checking theory and its related principles and operations provides an adequate framework within which to characterise and explain structural aspects of English-Afrikaans intrasentential code switching. A number of word order differences between English and Afrikaans, specifically involving verb position, are analysed within the framework of feature checking theory, where the movement of lexical items is proposed to be driven by the need to check strong uninterpretable features associated with functional heads. The constructions include constructions with adverbs, focalisation and topicalisation constructions, embedded that and wh clauses, and yes-no questions. On the basis of the feature checking analyses, predictions are made regarding the well-formedness of constructions of these types in which code switching between English and Afrikaans occurs. The predictions are tested on the basis of data elicited from 30 fluent English-Afrikaans bilingual participants by means of (i) judgments of the relative well-formedness of visually-presented sentence pairs, (ii) judgments of the relative well-formedness of auditorily-presented utterance pairs, (iii) sentence construction, (iv) video clip description, and (v) magnitude estimation of the relative well-formedness of visually-presented sentence sets. The results indicate support for some of the predictions, but uniform support for the hypothesis is not evident. Further linguistic factors playing a role in participants' performance are discussed. This dissertation is of interest to scholars in the field of bilingualism, particularly those interested in the application of syntactic theory to bilingual phenomena, and in experimental techniques tapping bilingual processing.

Intelligence and Strategy John Ferris 2007-05-07 John Ferris' work in strategic and intelligence history is widely praised for its originality and the breadth of its research. At last his major pioneering articles are now available in this one single volume. In Intelligence and Strategy these essential articles have been fundamentally revised to incorporate new evidence and information withheld by governments when they were first published. This volume reshapes the study of communications intelligence by tracing Britain's development of cipher machines providing the context to Ultra and Enigma, and by explaining how British and German signals intelligence shaped the desert war. The author also explains how intelligence affected British strategy and diplomacy from 1874 to 1940 and world diplomacy during the 1930s and the Second World War. Finally he traces the roots for contemporary intelligence, and analyzes intelligence and the RMA as well as the role of intelligence in the 2003 Gulf War. This volume ultimately brings new light to our understanding of the relations between intelligence, strategy and diplomacy between the end of the 19th century and the beginning of the 21st century.

Child Protective Services Diane DePanfilis 2003 From the Preface: This manual, Child Protective Services: A Guide for Caseworkers, examines the roles and responsibilities of child protective services (CPS) workers, who are at the forefront of every community's child protection efforts. The manual describes the basic stages of the CPS process and the steps necessary to accomplish each stage: intake, initial assessment or investigation, family assessment, case planning, service provision, evaluation of family progress, and case closure. Best practices and critical issues in casework practice are underscored throughout. The primary audience for this manual includes CPS caseworkers, supervisors, and administrators. State and local CPS agency trainers may use the manual for preservice or inservice training of CPS caseworkers, while schools of social work may add it to class reading lists to orient students to the field of child protection. In addition, other professionals and concerned community members may consult the manual for a greater understanding of the child protection process. This manual builds on the information presented in A Coordinated Response to Child Abuse and Neglect: The Foundation for Practice. Readers are encouraged to begin with that manual as it addresses important information on which CPS practice is based-including definitions of child maltreatment, risk factors, consequences, and the Federal and State basis for intervention. Some manuals in the series also may be of interest in understanding the roles of other professional groups in responding to child abuse and neglect, including: Substance abuse treatment providers; Domestic violence victim advocates; Educators; Law enforcement personnel. Other manuals address special issues, such as building partnerships and working with the courts on CPS cases.

Spirituality and Ageing Albert Jewell 1999 Spirituality and Ageing presents the experience of ageing as an opportunity for spiritual reflection and affirmation of life. The contributors are religious and spiritual leaders and ethical thinkers from a range of different backgrounds. They define 'spirituality' not just as a religious concept but as the fulfilment of the universal human need for purpose, values and relationships - a sense of wholeness in life. This spiritual dimension helps people face the emotional and psychological challenges of growing older, such as memory loss, dementia, bereavement and fear of death. Existing systems of social care often focus on the material and physical needs of older people; this collection proposes that the spiritual needs of older people are as vital a consideration for their welfare. Through their spirituality, older people can attain a fuller appreciation and understanding of life, which can also inform and enrich the lives of others. Spirituality and Ageing will be an invaluable resource to carers looking for a holistic and more reflective approach to work with older people.

Plant-Environment Interactions František Baluška 2009-03-03 Our image of plants is changing dramatically away from passive entities merely subject to environmental forces and organisms that are designed solely for the accumulation of photosynthate. Plants are revealing themselves to be dynamic and highly sensitive organisms that actively and competitively forage for limited resources, both above and below ground, organisms that accurately gauge their circumstances, use sophisticated cost-benefit analysis, and take clear actions to mitigate and control diverse environmental threats. Moreover, plants are also capable of complex recognition of self and non-self and are territorial in behavior. They are as sophisticated in behavior as animals but their potential has been masked because it operates on time scales many orders of magnitude less than those of animals. Plants are sessile organisms. As such, the only alternative to a rapidly changing environment is rapid adaptation. This book will focus on all these new and exciting aspects of plant biology.

Dyspepsia in Clinical Practice Marko Duvnjak 2011-03-08 Although dyspepsia has been investigated for a long period of time, there is no international agreement on what constitutes this condition nor any standardized guidelines. National guidelines followed by practitioners in different countries vary in diagnostic and therapeutic approach, underlining the necessity for a unique definition worldwide. Dyspepsia in Clinical Practice summarizes the current guidelines while offering a unified, practical definition of dyspepsia, and a diagnostic algorithm with an emphasis on the upper gastrointestinal endoscopy and rational first-line therapeutic approach based on epidemiology, pathophysiology, clinical presentation, diagnostic workup and response to previous therapy. Up-to-date scientific information about dyspepsia is presented from a practical, clinician's point of view. Written by experts in the field, this volume addresses dyspepsia in childhood and in the elderly, a very important issue often insufficiently emphasized in the literature. Guidelines are provided that can be easily followed in clinical practice, leading to a reduction in costs and increased patient safety. Dyspepsia in Clinical Practice will be of great value to gastroenterologists, internists, primary care physicians, pediatricians, infectious disease specialists, residents and fellows in training.

Democracy and Enlargement in Post-Communist Europe Christian W. Haerpfer 2003-09-02 Democracy and Enlargement in Post-Communist Europe presents the principal findings of a unique in-depth study of the birth of democracy and the market economy in fifteen post-Communist countries. Haerpfer analyses and compares the information collected by the New Democracies Barometer public opinion surveys to provide an overview of the process of democratization across Central and Eastern Europe. This is an extremely valuable resource and will be useful for all those interested in the European Union, comparative politics and democracy and the Communist legacy. It contains data from Belarus, Bulgaria, Croatia, the Czech Republic, Estonia, the Federal Republic of Yugoslavia, Hungary, Latvia, Lithuania, Poland, Romania the Russian Federation, Slovakia, Slovenia and Ukraine.

Climate-smart Agriculture Sourcebook Food and Agriculture Organization (FAO) 2014 "Climate-smart agriculture, forestry and fisheries (CSA), contributes to the achievement of sustainable development goals. It integrates the three dimensions of sustainable development (economic, social and environmental) by

jointly addressing food security and climate challenges. It is composed of three main pillars: sustainably increasing agricultural productivity and incomes; adapting and building resilience to climate change; reducing and/or removing greenhouse gases emissions, where possible. The purpose of the sourcebook is to further elaborate the concept of CSA and demonstrate its potential, as well as limitations. It aims to help decision makers at a number of levels (including political administrators and natural resource managers) to understand the different options that are available for planning, policies and investments and the practices that are suitable for making different agricultural sectors, landscapes and food systems more climate-smart. This sourcebook is a reference tool for planners, practitioners and policy makers working in agriculture, forestry and fisheries at national and subnational levels." -- Back cover.

The Social Psychology of English as a Global Language Robert M. McKenzie 2010-08-18 This ground-breaking work is a detailed account of an innovative and in-depth study of the attitudes of in excess of 500 Japanese learners towards a number of standard and non-standard as well as native and non-native varieties of English speech. The research conducted refines the investigation of learner attitudes by employing a range of pioneering techniques of attitude measurement. These methods are largely incorporated from the strong traditions that exist in the fields of social psychology and second language acquisition and utilize both direct and indirect techniques of attitude measurement. The author locates the findings in the context of the wealth of literature on native speaker evaluations of languages and language varieties. The study is unique in that the results provide clear evidence of both attitude change and high levels of linguistic awareness among the informants of social and geographical diversity within the English language. These findings are analyzed in detail in relation to the global spread of English as well as in terms of the pedagogical implications for the choice of linguistic model employed in English language classrooms both inside and outside Japan. The issues examined are of particular interest to educators, researchers and students in the fields of applied linguistics, TESOL, second language acquisition, social psychology of language and sociolinguistics. The pedagogical and language policy implications of the findings obtained make essential reading for those with a specific focus on the role of the English language and English language teaching, both in Japan and beyond.

Air Pollution Modeling P. Zannetti 2013-06-29 Finishing this book is giving me a mixture of relief, satisfaction and frustration. Relief, for the completion of a project that has taken too many of my evenings and weekends and that, in the last several months, has become almost an obsession. Satisfaction, for the optimistic feeling that this book, in spite of its many shortcomings and imbalances, will be of some help to the air pollution scientific community. Frustration, for the impossibility of incorporating newly available material that would require another major review of several key chapters - an effort that is currently beyond my energies but not beyond my desires. The first canovaccio of this book came out in 1980 when I was invited by Computational Mechanics in the United Kingdom to give my first Air Pollution Modeling course. The course material, in the form of transparencies, expanded, year after year, thus providing a growing working basis. In 1985, the ECC Joint Research Center in Ispra, Italy, asked me to prepare a critical survey of mathematical models of atmospheric pollution, transport and deposition. This support gave me the opportunity to prepare a sort of "first draft" of the book, which I expanded in the following years. *Industrial Economic Regulation* Roger Sugden 1993-03-11 Annotation Exploring key current issues, leading economists focus on the government processes which influence industrial economic activity and its role within the European Community as a positive instrument promoting industrial development.

Nanostructured Silicon-based Powders and Composites Andre Pierre Legrand 2002-10-24 In recent years an increasing interest has been devoted to nanostructured composites. Urban and Regional Planning Peter Hall 2005-08-19 This is the fourth edition of the classic text for students of urban and regional planning. It gives a historical overview of the developments and changes in the theory and practice of planning, throughout the twentieth century. This extensively revised edition follows the successful format of previous editions. Specific reference is made to the most important British developments in recent times, including the devolution of Scotland, Wales and Northern Ireland, the establishment of the Mayor of London and the dominant urban sustainability paradigm. Planning in Western Europe, since 1945, now incorporates new material on EU-wide issues as well as updated country specific sections. Planning in the United States since 1945, now discusses the continuing trends of urban dispersal and social polarisation, as well as initiatives in land use planning and transportation policies. The book looks at the nature of the planning process at the end of the twentieth century and looks forward to the twenty-first century.

Music in Early Childhood: Multi-disciplinary Perspectives and Inter-disciplinary Exchanges Susan Young 2019-07-17 This book examines four main areas of music in early childhood: the traditions of music for young children, their capacities for music, the way they make music with others, and constructed and mediated musical childhoods. It studies several themes in detail, including music making in the home and family life, various musical experiences in schools, day cares, and the community at large in several locations around the globe. It looks at technology and diverse musical repertoires, as well as innovative pedagogies, children's agency, and brain research. Expanding on the knowledge bases on which early childhood music education typically draws, the book brings together contributions from a range of authors from diverse fields such as education, psychology, sociology, cultural studies, anthropology, philosophy, ethnomusicology, and the neurosciences. The end result is a volume that offers a broad and contemporary picture of music in early childhood.

Making & Being Susan Jahoda 2020-01-23 "Making and Being draws on the lived experience of Susan Jahoda and Caroline Woolard, visual arts educators who have developed a framework for teaching art with the collective BFAMFAPhD that emphasizes contemplation, collaboration, and political economy. The authors share ideas and pedagogical strategies that they have adapted to spaces of learning which range widely, from self-organized workshops for professional artists to Foundations BFA and MFA thesis classes. This hands-on guide includes activities, worksheets, and assignments and is a critical resource for artists and art educators today"--Page 4 of cover.

Assessing and Restoring Natural Resources In Post-Conflict Peacebuilding David Jensen 2013-02-15 When a country emerges from violent conflict, the management of the environment and natural resources has important implications for short-term peacebuilding and long-term stability, particularly if natural resources were a factor in the conflict, play a major role in the national economy, or broadly support livelihoods. Only recently, however, have the assessment, harnessing, and restoration of the natural resource base become essential components of postconflict peacebuilding. This book, by thirty-five authors, examines the experiences of more than twenty countries and territories in assessing post-conflict environmental damage and natural resource degradation and their implications for human health, livelihoods, and security. The book also illustrates how an understanding of both the risks and opportunities associated with natural resources can help decision makers manage natural resources in ways that create jobs, sustain livelihoods, and contribute to economic recovery and reconciliation, without creating new grievances or significant environmental degradation. Finally, the book offers lessons from the remediation of environmental hot spots, restoration of damaged ecosystems, and reconstruction of the environmental services and infrastructure necessary for a sustainable peace. Assessing and Restoring Natural Resources in Post-Conflict Peacebuilding is part of a global initiative to identify and analyze lessons in post-conflict peacebuilding and natural resource management. The project has generated six books of case studies and analyses, with contributions by practitioners, policy makers, and researchers. Other books address highvalue resources, land, water, livelihoods, and governance.

paramotor pilot, either footlaunch or on wheels. It is comprehensive but breaks down information into digestible chunks that fit well with quality training programs. Section 1 is all about safely getting to first flight and gaining competency. Section 2 covers what's needed to set out on your own. it offers PRACTICAL airspace, weather, airport, site, cross country, and maintenance knowledge. Section 3 is about MASTERING and surviving the sport including risk management, precision flying, handling turbulence, tough landing options and much more. Section 4 details the weird aerodynamics and physics that govern paramotor flight, more in-depth weather, and history knowledge. Section 5 is about choosing gear--what goes into it, the tradeoffs, and why choices are so critical to safe learning. Proper choice is key to surviving the dangerous learning phase. Section 6 explores how to get more out of the sport, like traveling with gear, photography, and other uses.

Mythic Discourses Frog 2018-03-05 Mythic discourses in the present day show how vernacular heritage continues to function and be valuable through emergent interpretations and revaluations. At the same time, continuities in mythic images, motifs, myths and genres reveal the longue durée of mythologies and their transformations. The eighteen articles of Mythic Discourses address the many facets of myth in Uralic cultures, from the Finnish and Karelian world-creation to Nenets shamans, offering multidisciplinary perspectives from twenty eastern and western scholars. The mythologies of Uralic peoples differ so considerably that mythology is approached here in a broad sense, including myths proper, religious beliefs and associated rituals. Traditions are addressed individually, typologically, and in historical perspective. The range and breadth of the articles, presenting diverse living mythologies, their histories and relationships to traditions of other cultures such as Germanic and Slavic, all come together to offer a far richer and more developed perspective on Uralic traditions than any one article could do alone.

Vygotsky and Research Harry Daniels 2008-08-01 This book provides readers with an overview of the implications for research of the theoretical work which acknowledges a debt to the writings of L.S. Vygotsky. A concise introduction to Vygotsky's original thesis and discussions on his approach to research methods is given; this is followed by an exploration of the research practices which have arisen in fields developed on the basis of his original thesis. These include: Socio-cultural studies with a focus on mediated action; Distributed Cognition, Situated Cognition and Activity Theory. To aid understanding, chapters devoted to each area will provide excellent accounts of specific studies which illustrate the underlying methodological principles and the specific methods which are being deployed. In each case assumptions and limitations are discussed. The book concludes with some proposals for future developments at both methodological and conceptual levels.

Perspectives in Biophysical Plant Ecophysiology Erick De La Barrera 2009 Park S. Nobel pioneered the coupling of cellular physical chemistry with plant physiology, providing a sound physicochemical interpretation of the laws of diffusion to a rapidly expanding field of plant physiological ecology. His classical textbook is the only one of its kind to provide an extensive array of quantitative problems and solutions in the field of plant biophysics and ecophysiology, extending from the molecular to the ecological level. In this festschrift, former graduate students and postdocs, as well as colleagues of Prof. Nobel present a series of reviews that include scales from sub-cellular to global, and topics that range from desert succulent biology to the physiology of alpine plants, encompassing basic research and applications in agronomy and conservation biology. This state-of-the-field survey provides current and useful information for professionals and graduate students, while illustrating the broad span of the influence that Nobel's career has had on modern ecophysiology.
