The Authors object, as stated in the Preface to the first edition, has been satisfactorily accomplished, which the following statement of facts will show: One hundred and fifty copies of that edition were retailed, at the seed store of Messrs. Thorburn Sons, within a month after it was published, and subsequently, upwards of six hundred. - Messrs. Smith & Co., and other Seedsman in New-York, have also been successful in circulating many hundreds of them, and the author has been gratified by learning, that the publisher of the last edition placed upwards of six hundred copies in the hands of the public, within three months after they came from the press. The author might here cite the opinions of many practical gardeners in favour of the work, but after the encouragement given to previous editions, he is perfectly willing that the present one should speak for itself. Indeed, to enumerate all the commendations passed on this humble attempt to promote useful knowledge, would exceed our limits. Suffice it to state, that the work has been respectfully noticed and recommended to public patronage, by the editors of the following periodicals: *The New York Advocate and Journal, American, Commercial, Courier and Enquirer, Evening Post, Gazette, Standard and Traveller, the New-York Farmer, the American Farmer, and the Albany Argus,* besides many of those periodical publications, devoted to agricultural pursuits, in different parts of the country. It appears from an article in the *New-York Farmer and Horticultural Repository*, that this little work has been noticed in France. The editor informs us, in page 295 of the 4th volume, dated Nov.10, 1831, that one of the leading articles in the second number of the present volume of the 'Annales de L'Institute Royal Horticole de Fromont' is a long notice of the *Young Gardeners Assistant*, by Mr. Thomas Bridgeman, of this city. The editor, Le Chevalier Soulange Bodin, speaks of the little work in very commendable terms." About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. **A review of school feeding programmes in the Caribbean Community** Food and Agriculture Organization of the United Nations 2021-10-04 This review provides a snapshot of the state-of-art of School Feeding Programmes in 14 of the 15 CARICOM Member States. It provides an overview of the different models of school feeding programmes that currently exist in the Caribbean, challenges faced and recommendations for improvement. Among the aspects evaluated include: the governance structure, nutritional quality of meal served, linkages with small farmers for the procurement of products used in the meals, involvement of children in school gardens related activities, etc. The document includes a case study for each of the participating countries (namely Antigua and Barbuda, Bahamas, Barbados, Belize, Dominica, Grenada, Guyana, Haiti, Jamaica, St. Kitts and Nevis, St. Lucia, St. Vincent and the Grenadines, Suriname and Trinidad and Tobago). For each of these countries, an Annual Net Benefit Analysis was conducted, using information collected in 2017. The aim is that the document can provide preliminary information and recommendations that can be relevant for governments, public organizations, donors, opinion leaders, private sectors, and others toward strengthening school feeding programmes in the Caribbean. It was developed with the support of the University of the West Indies and the Caribbean Agro-Economic Society under the leadership of Prof. Carlisle Pemberton and Dr. Hazel Paterson-Andrews.

**Gardening for Young and Old** Joseph Harris 2018-03-14 Excerpt from Gardening for Young and Old: The Cultivation of Garden Vegetables in the Farm Garden I first thought of calling this book Gardening for Young Folks, but I found that the young folks of my intimate acquaintance, and who are as much interested in the book as any one else is likely to be, very decidedly objected to the title. And it was at their suggestion that I decided to call it Gardening for Young and Old with a mental reservation that it should be principally for the Young Folks. The fact is, the children are right. It is not Gardening for Young Folks alone that is required.

The young would do little without the advice and sympathy and encouragement of their fathers and mothers,

or older friends. And some old folks I know are almost as bad, or worse. They can do little or nothing in the garden unless they have the young people to help them. The fact is, the Old were made for the Young, and the Young were made for the Old. I know an old farmer who has given up the active management of his farm, and who devotes his whole time to the garden. It is a small garden, but it is a model of neatness and thorough cultivation. Not a weed, or a stone, or a stick, is to be found in it he has the earliest of vegetables and the sweetest of flowers. But there is not enough to it, his garden is simply a plaything, but it has done one good thing. One of his grandchildren, a bright active boy, has a decided taste for gardening. **The Comic Book Guide to Growing Food** Joseph Tychonievich 2021-02-02 The first graphic novel guide to growing a successful raised bed vegetable garden, from planning, prepping, and planting, to troubleshooting, care, and harvesting. "A fun read packed with practical advice, it's the perfect resource for new gardeners, guiding you through every step to plant, grow, and harvest a thriving and productive food garden."—Joe Lamp'l, founder and creator of the Online Gardening Academy Like having your own personal gardening mentor at your side, The Comic Book Guide to Growing Food is the story of Mia, an eager young professional who wants to grow her own vegetables but doesn't know where to start, and George, her retired neighbor who loves gardening and walks her through each step of the process. Throughout the book, "cheat sheets" sum up George's key facts and techniques, providing a handy quick reference for anyone starting their first vegetable garden, including how to find the best location, which vegetables are easiest to grow, how to pick out the healthiest plants at the store, when (and when not) to water, how to protect your plants from pests, and what to do with extra produce if you grow too much. If you are a visual learner, beginning gardener, looking for something new, or have struggled to grow vegetables in the past, you'll find this unique illustrated format ideal because many gardening concepts—from proper planting techniques to building raised beds—are easier to grasp when presented visually, step by step. Easy and entertaining, The Comic Book Guide to Growing Food makes homegrown vegetables fun and achievable.

**Garden Suburbs of Tomorrow?** Martin Crookston 2013-12-04 Named one of the Top 10 books about council housing - the Guardian online Faced with acute housing shortages, the idea of new garden cities and suburbs is on the UK planning agenda once again, but what of the garden suburbs that already exist? Over the first six decades of the twentieth century, councils across Britain created a new and optimistic form of housing – the cottage estates of 'corporation suburbia'. By the early 1960s these estates provided homes with gardens for some 3 million mainly working-class households. It was a mammoth achievement. But, because of what then happened to council housing over the later years of the century, this is not very often appreciated. In Garden Suburbs of Tomorrow, Martin Crookston suggests that making the most of the assets which this housing offers is a positive story – it can be positive for housing policy; for councils and their 'place-making' endeavours; and for the residents of the estates. This is especially important when all housing market and development options are so constrained, and likely to remain so for the next decade or more. Following an examination of what the estates of 'corporation suburbia' are and what they are like, there follow chapters on specific examples from different parts of the country, on how they are affected by the workings of the housing market, and then – not unconnectedly – on how attitudes to this socially-built stock have evolved. Then the final chapters try to draw out the potentials, and to suggest what future we might look for in corporation suburbia in the twenty-first century.

**Gardening for Young and Old** Joseph Harris 2015-06-04 Excerpt from Gardening for Young and Old: The Cultivation of Garden Vegetables in the Farm Garden I should like to see more seed-growers in the United States, and I hope some of my young friends will devote themselves to this industry. There are more seeds sown in America, in proportion to population, than in any other country. European seedsmen, notwithstanding a duty of twenty per cent., find the United States one of the best markets in the world. It seems to be a fact, that many seeds, when grown here, produce much better crops than when grown in Europe. Market gardeners give a decided preference to American-grown seeds. American-grown cabbage seeds, for instance, find a ready sale at double the price of imported seed. Cauliflower seed has hitherto rarely been grown in this country successfully, but I understand that California is now growing it of excellent quality. Dakota is growing cabbage seed, and I feel confident that somewhere on this broad Continent, with its great diversity of soil and climate, there is not a seed which the American gardener wants, that will not be grown to perfection. The great point is to get what seed-growers call "stock seed," to start with. As a rule, you can not buy it. You must grow it yourself. Take Cucumber seed, for example. Enormous quantities of Cucumber seed are grown and sold in America, and yet it is exceedingly difficult to get good seed, pure, and true to name.
