*The Meyerbeer Libretti* Robert Ignatius Letellier  
2013-02-21 Giacomo Meyerbeer, one of the most important and influential opera composers of the nineteenth century, enjoyed a fame during his lifetime hardly rivalled by any of his contemporaries. This ten volume set provides in one collection all the operatic texts set by Meyerbeer in his career. The texts offer the most complete versions available. Each libretto is translated into modern English by Richard Arseny; and each work is introduced by Robert Letellier. In this comprehensive edition of

Meyerbeer's libretti, the original text and its translation are placed on facing pages for ease of use. The eleventh volume presents the fourth of Meyerbeer's grands opéras, and his final work. By 1860 long-imposed labor had started to tell upon the composer's health: he knew that he must concentrate on the "navigator project" which he had started twenty years earlier if he intended to finish it. Meyerbeer died on 2 May 1864, the day after the completion of the copying of the full score of this his last opera, Vasco da Gama. Minna Meyerbeer and César-Victor Perrin, the director of the Opéra, entrusted the editing of

a performing edition to the famous Belgian musicologist François-Joseph Fétis, while the libretto was revised by Mélesville. The original title of L'Africaine was restored out of deference to public expectation. Much of the music and action was suppressed, in spite of the strain this inflicted on the internal logic of the story. While L'Africaine is not lacking in the grandeur of statement and stirring climaxes for which the composer was so famous, there is a new intimacy, a new intensity of melancholic lyricism. Like its famous predecessors, it is basically an historical work, derived from the period of sixteenth-century Renaissance. The account of Vasco da Gama's voyage of discovery around the Cape of Good Hope and conquest of Calicut (1497-98) is subjected to a fictional treatment that raises many interesting issues. The framework is historical, but most of the characters and course of action are not; in fact the end of the opera, in the suicide of the heroine, suddenly leaves the terra firma of

reality, and transports us into the mystical realms of the spirit. It is this mixture of modes that is central to the dramaturgy of L'Africaine, a confusion of history and fairytale, ancient certainties and challenging discoveries, in the creation of a new mythology. There is also originality in formal developments, with the great tenor scene in act 4 providing a new malleability in handling the constraints of shape and genre: recitative, arioso and cabaletta have a fluent integration in trying to explore the text more pointedly. L'Africaine was produced on 28 April 1865, a great posthumous tribute to its famous creators. The Ship Scene, the exotic Indian act, and the Scene of the Manchineel Tree exerted a fascination on audiences, and elicited new praise. The work full of melodic beauty and rapturous lyricism, began a triumphal progress through the world, beginning with the big stages of London and Berlin.

## **Chopsticks and Gambling** Desmond Lam

2017-07-28 The Chinese are known throughout the world as avid gamblers with a long history of participation in games of chance. Historians have documented wagering on such games as far back as the early Chinese dynasties. Despite measures by ancient Chinese rulers to contain gambling, it proliferated, and Chinese games have evolved and multiplied since then. Desmond Lam provides a unique look into the little-known world of Chinese gambling from historical, cultural, psychological, and social perspectives. Chinese gamblers regularly patronize casinos in the United States, Canada, and Australia. The recent expansion of gambling in East Asia has attracted much global media attention. Macau, the only place in China where casino gambling is now legal, easily surpasses Las Vegas as the world's largest casino gaming market. Each year, Chinese from mainland China, Hong Kong, and Taiwan account for almost 90 percent of visitors to Macau. The expansion of the Chinese gambling

industry has brought about much harm to Chinese communities, despite all of the development it has also stimulated. This book is the first to examine the beliefs, motivations, attitudes, and behaviors of Chinese gamblers, and will be of interest to students of history and sociology, as well as those studying the history and culture of China.

The gate was probably open for half an hour at the SGC, but here...just a second." Boyd felt his heart clench tight. "What are you saying, Lieutenant?" She looked bleak. XXXXX Xxxxx 2006 xxxxx proposes a radical, new space for artistic exploration, with essential contributions from a diverse range of artists, theorists, and scientists. Combining intense background material, code listings, screenshots, new translation, [the] xxxxx [reader] functions as

both guide and manifesto for a thought movement which is radically opposed to entropic contemporary economies. xxxxx traces a clear line across eccentric and wide ranging texts under the rubric of life coding which can well be contrasted with the death drive of cynical economy with roots in rationalism and enlightenment thought. Such philosophy, world as machine, informs its own deadly flipside embedded within language and technology. xxxxx totally unpicks this hiroshimic engraving, offering an dandyish alternative by way of deep examination of software and substance. Life coding is primarily active, subsuming deprecated psychogeography in favour of acute wonderland technology, wary of any assumed transparency. Texts such as Endonomadology, a text from celebrated biochemist and chaos theory pioneer Otto E. Roessler, who features heavily throughout this intense volume, make plain the sadistic nature and active legacy of rationalist thought. At the same time, through the science of

endophysics, a physics from the inside elaborated here, a delicate theory of the world as interface is proposed. xxxxx is very much concerned with the joyful elaboration of a new real; software-led propositions which are active and constructive in eviscerating contemporary economic culture. xxxxx embeds Perl Routines to Manipulate London, by way of software artist and Mongrel Graham Harwood, a Universal Dovetailer in the Lisp language from AI researcher Bruno Marchal rewriting the universe as code, and self explanatory Pornographic Coding from plagiarist and author Stewart Home and code art guru Florian Cramer. Software is treated as magical, electromystical, contrasting with the tedious GUI desktop applications and user-led drudgery expressed within a vast ghost-authored literature which merely serves to rehearse again and again the demands of industry and economy. Key texts, which well explain the magic and sheer art of programming for the absolute beginner are published here. Software subjugation is made

plain within the very title of media theorist Friedrich Kittler's essay Protected Mode, published in this volume. Media, technology and destruction are further elaborated across this work in texts such as War.pl, Media and Drugs in Pynchon's Second World War, again from Kittler, and Simon Ford's elegant take on J.G Ballard's crashed cars exhibition of 1970, A Psychopathic Hymn. Software and its expansion stand in obvious relation to language. Attacking transparency means examining the prison cell or virus of language; life coding as William Burrough's cutup. And perhaps the most substantial and thorough-going examination is put forward by daring Vienna actionist Oswald Wiener in his Notes on the Concept of the Bio-adapter which has been thankfully unearthed here. Equally, Olga Goriunova's extensive examination of a new Russian literary trend, the online male literature of udaff.com provides both a reexamination of culture and language, and an example of the diversity of xxxxx; a diversity well

reflected in background texts ranging across subjects such as Leibniz' monadology, the ur-crash of supreme flaneur Thomas de Quincey and several rewritings of the forensic model of Jack the Ripper thanks to Stewart Home and Martin Howse. xxxxx liberates software from the machinic, and questions the transparency of language, proposing a new world view, a sheer electromysticism which is well explained with reference to the works of Thomas Pynchon in Friedrich Kittler's essay, translated for the first time into English, which closes xxxxx. Further contributors include Hal Abelson, Leif Elggren, Jonathan Kemp, Aymeric Mansoux, and socialfiction.org.

Meanwhile, a minor poet hires Lynes to track down and stop the blackmailer threatening to reveal him as the pseudonymous author of popular romances. When another target of the same blackmailer, a friend of Mathey's assistant Miss Frost, appeals for aid, Lynes and Mathey begin to suspect murders and blackmail are connected. Digging deep into the clandestine worlds of lawless antique magic and the gay demimonde, Mathey and Lynes must uncover the source and nature of a heart-stealing supernatural creature before it can kill them too, even as they face the scandal of exposing themselves as sodomites in order to close the case.

careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.
