**Green Dream** Winy Maas 2014 The Why Factory is a global think-tank and research institute, run by MVRDV and Delft University of Technology and led by professor Winy Maas. The Why Factory's Future Cities research programme explores possibilities for the development of our cities by focusing on the production of models and visualizations for cities of the future"--Book Jacket

**Hugh Maaskant** Michelle Provoost 2014-02-28 Today considered the godfather and forerunner of a generation that includes Adriaan Geuze, Rem Koolhaas, Winy Maas and Willem Jan Neutelings, Hugh Maaskant (1907-1977) was underappreciated for many years. Maaskant led the postwar reconstruction of Rotterdam, designing revolutionary, complex, large-scale buildings, such as the Groothandelsgebouw and Euromast, as well as the Amsterdam Hilton Hotel and the Scheveningen Pier in The Hague. In Hugh Maaskant: Architect of Progress, historian and Maaskant scholar Michelle Provoost orients the architect in an international as well as historical perspective, recounting his work in the context of the optimistic reconstruction of the postwar period as well as the exciting developments of the 1960s and Holland's increasing prosperity throughout that decade. The book features both historical and recent photographs, including a series taken especially for this edition by internationally renowned architectural photographer Iwan Baan.

**The Life and Public Services of Salmon Portland Chase** William Maxwell Evarts 2018-12-04

**The Design Method** Eric Karjaluoto 2014 Presents advice on creating quality design work using repeatable process that solves visual communications issues.

**Folding in Architecture** Greg Lynn 2004-06-07 This seminal book from Architectural Design was originally published in 1993, at a time of crucial change and on the eve of the digital revolution. It brought together a series of essays that many believe created the favourable environment in which computer-based design could thrive. Considered one of the most influential architecture publications of the 1990s, this book ranks as a classic and in itself is a crucial chapter of history, though one that has been out of print since 1999. This faithful reprinting includes a substantial new introductory essay by Mario Carpo, Head of the Study Centre at the Canadian Centre for Architecture, which examines the impact of the original texts and their ongoing significance. Thereafter, the book is true to its original content showcasing projects by ground-breaking architects such as Greg Lynn, Jeffrey Kipnis, Bahram Shirdel, Frank Gehry and Philip Johnson.

**Original Office Building, Camp 13 (24TT205), Greenfields Division, Sun River Project, Fairfield, Montana** Rolla L. Queen 1992

**Manifesta 13 Marseille** Manifesta 13 Marseille 2020-12-04 The Manifesta, which takes place every two years in a different European city, has a reputation for being a place for creativity and innovation, and for good reason. Primarily responsible for this is festival's opening program, which was tested in 2018 in Palermo and is now being continued in Marseille in 2020. Winy Maas's architectural office, MVRDV, and The Why Factory (t?f) were commissioned to explore the city's urban space through the means of artistic research and the latest method of data analysis. This resulted in a compendium of social, cultural, ethical, religious, and geographical structures. It was, however, meant to do more than just describe the status quo. The exploration also began a process that goes far beyond the Manifesta itself, to enrich Marseille's future as a city. This publication allows itself to become an audience and hence, part of the project. MVRDV was founded in 1991 and has its headquarters in Rotterdam. It is currently one of the most successful Dutch architectural offices. Besides Winy Maas, Jacob van Rijs and Nathalie de Vries are among its co-founders. Its trademark is the experimental, innovative form in architectural design. Maas also heads up the THE WHY FACTORY (T?F), a research institute that explores the development of cities and designs urban models for the future. Maas also heads up the THE WHY FACTORY (T?F), a research institute that explores the development of cities and designs urban models for the future. MVRDV was founded in 1991 and has its headquarters in Rotterdam. It is currently one of the most successful Dutch architectural offices. **Lacoste + Stevenson** Thierry Lacoste 2015-02-15 This book is a compilation of projects designed over two decades.

**Graphic Icons** John Clifford 2014 Who are history's most iconic graphic designers? Let the debate begin here. In this gorgeous, visual overview of the history of graphic design, students are introduced to 50 of the most important designers from the early 20th century to the present day. This fun-to-read, pretty-to-look-at graphic design history primer introduces them to the work and notable achievements of such industry luminaries as El Lissitzky, Alexander Rodchenko, A.M. Cassandre, Alvin Lustig, Cipe Pineles, Armin Hofmann, Paul Rand, Saul Bass, Herb Lubalin, Milton Glaser, Stefan Sagmeister, John Maeda, Paula Scher, and more. Who coined the term "graphic design"? Who designed the first album cover? Who was the first female art director of a mass-market American magazine? Who created the "I Want My MTV" ad campaign? Who created the first mail-order font shop? In Graphic Icons: Visionaries Who Shaped Modern Graphic Design, students start with the who and quickly learn the what, when, why, and where behind graphic design's most important breakthroughs and the impact they had, and continue to have, on the world we live in.

*A Year-around Sport Resort in the Mountains of Washington State, Entitled the Snoqualmie Recreation Plan* George W. Hazen 1940

**Survey-report State Buildings, Institutions and Plants: Wisconsin School for the Blind, Janesville, Wisconsin School for the Deaf, Delavan** 1942

**Hot to Cold** Bjarke Ingels 2015 Architecture is the art and science of accommodating the lives we want to live. Our cities and buildings aren't givens; they are the way they are because that is as far as we have come to date. They are the best efforts of our ancestors and fellow planetizens, and if they have shortcomings, it is up to us to continue that effort, pick up where they left off. Bjarke Ingels Group's (BIG) grand mission is to find a pragmatic utopia, shaping not only a particular structural entity, but the kind of world we wish to inhabit. This book examines BIG's odyssey of architectural adaptation

**The Horizontal Metropolis Between Urbanism and Urbanization** Paola Viganò 2018-05-04 This book provides an overview of the Horizontal Metropolis concept, and of the theoretical, methodological and political implications for the interdisciplinary field in which it operates. The book investigates the contemporary emergence of a new type of extended urbanity across regions, territories and continents, up to the global scale. Further, it explores the diffusion of contemporary urban conditions in an interdisciplinary and original manner by analyzing essential case studies. Offering extensive content on the Horizontal Metropolis concept, the book presents a range of approaches intended to transcend various inherited spatial ontologies: urban/rural, town/country, city/non-city, and society/nature. The book is intended for all readers interested in the emergence and development of new approaches in cultural theory, urban and design education, landscape urbanism and geography.

**Costa Iberica** Winy Maas 1998 The popular coastal regions of Spain and Portugal, almost entirely financed by tourism, have become increasingly indistinguishable from any other heavily-visited beach front locale, be it Cancun, Miami, Rio, or Hawaii. Exploiting the natural beauty and local identity of this area, the tourism industry has covered the coastline with a commercial facade, building up a kind of "elongated city". Yet, even though this region at times has a higher population density than New York or Hong Kong, it has no significant cultural institutions or industrial infrastructure. This study, directed by Winy Maas and Jacob van Rijs of the famed architectural team MVRDV, and done as a student's workshop at the School of Architecture at the University of Catalunya, evaluates the distressing present condition as well as the potential dynamics of this coastal environment. Also included are tongue-in-cheek renderings of future developments were the tourism machine to continue unimpeded on its present course.

**Construction of Museum Support Facilities by the Smithsonian Institution** United States. Congress. Senate. Committee on Rules and Administration 1978

**Manual of Section** Paul Lewis 2016-08-23 Along with plan and elevation, section is one of the essential representational techniques of architectural design; among architects and educators, debates about a project's section are common and often intense. Until now, however, there has been no framework to describe or evaluate it. Manual of Section fills this void. Paul Lewis, Marc Tsurumaki, and David J. Lewis have developed seven categories of section, revealed in structures ranging from simple one-story buildings to complex structures featuring stacked forms, fantastical shapes, internal holes, inclines, sheared planes, nested forms, or combinations thereof. To illustrate these categories, the authors construct sixty-three

intricately detailed cross-section perspective drawings of built projects—many of the most significant structures in international architecture from the last one hundred years—based on extensive archival research. Manual of Section also includes smart and accessible essays on the history and uses of section. *Five Minutes City* Winy Maas 2003 Winy Maas proposed a provocative and inspiring brief; he asked participants to redesign the cities of Rotterdam and New York in a way that everything is reachable within five minutes. A series of serious questions arise from the challenging brief: 'What will such a city look like? What happens to such an hypothesis if cars are the only mode of transport? What will such a city look like when it is only accessed by public transport? Or by walking?' How one can extend the knowledge of compact or dense cities? How fast cities can be? Is increased speed an ideal concept for future cities? Is development of new infrastructure sustainable for cities in future? Can Rotterdam become such a city? Is it possible to upscale Manhattan? How does mobility affects the working and living qualities of the cities and how is mobility shaping cities?

*Specifications for the Completion of the Library and Museum Building for the State Historical Society of Wisconsin* State Historical Society of Wisconsin 1897

*Contemporary Library Architecture* Ken Worpole 2013-05-29 Focusing on the practical issues which need to be addressed by anyone involved in library design, here Ken Worpole offers his renowned expertise to architects, planners, library professionals, students, local government officers and members interested in creating and sustaining successful library buildings and services. *Contemporary Library Architecture: A Planning and Design Guide* features: a brief history of library architecture an account of some of the most distinctive new library designs of the 20th & 21st centuries an outline of the process for developing a successful brief and establishing a project management team a delineation of the commissioning process practical advice on how to deal with vital elements such as public accessibility, stock-holding, ICT, back office functions, children's services, co-location with other services such as learning centres and tourist & information services an sustainability in depth case studies from around the world, including public and academic libraries from the UK, Europe and the US full colour illustrations throughout, showing technical details and photographs. This book is the ultimate guide for anyone approaching library design.

*Checklist of Library Building Design Considerations* William W. Sannwald 2009-01-12 Guides librarians and other members of a building design team through the stages of the design process. The checklist format provides a clear, concise way of itemizing the issues, helping your construction project run as smoothly as possible!

**The Images of Architects** Valerio Olgiati 2013 The Visible Origin of Architecture: "I asked architects to send me important images that show the basis of their work. Images that are in their head when they think. Images that show the origin of their architecture. In this book we find 44 individual 'musees imaginaires'. The most unique architects living today each present up to 10 images to explain the autobiographical roots of their oeuvre. The images are explanations, metaphors, foundations, memories and intentions. They are poetic and philosophical avowals. They reveal a personal perspective on thoughts. They show the roots of architecture and expectations concerning projects. Conscious and unconscious. This book has the format of a reader. As little as possible is said. The images are small, legible and interpretable as icons. As individual collections, they present a personal view of an individual world, while as a whole they provide a universal view of the perceptible origin of contemporary architecture." Valerio Olgiati The images submitted to Olgiati are personal, confidential and poetic revelations of the deeper foundations on which the architects' projects are based. The collection acts as a kind of depth gauge of contemporary world architecture. The list comprises the 44 most unique architects living today: David Adjaye, Francisco Aires Mateus, Manuel Aires Mateus, Alejandro Aravena, Ben van Berkel, Mario Botta, Alberto Campo Baeza, Adam Caruso, Peter St John, David Chipperfield, Preston Scott Cohen, Hermann Czech, Roger Diener, Peter Eisenman, Sou Fujimoto, Anton Garcia-Abril, Go Hasegawa, Jacques Herzog, Pierre de Meuron, Steven Holl, Anne Holtrop, Junya Ishigami, Arata Isozaki, Toyo Ito, Bijoy Jain (Studio Mumbai), Momoyo Kajima, Yoshiharu Tsukamoto (Atelier Bow-Wow), Christian Kerez, Hans Kollhoff, Winy Maas (MVRDV), Peter Markli, Jurgen Mayer H., Richard Meier, Glenn Murcutt, Ryue Nishizawa, Valerio Olgiati, John Pawson, Cecilia Puga, Smiljan Radic, Richard Rogers, Kazuyo Sejima, Jonathan Sergison, Stephen Bates, Miroslav ik, Alvaro Siza Vieira, Eduardo Souto de Moura, Robert Venturi, Denise Scott Brown, Peter Wilson (Bolles + Wilson), Peter Zumthor."

**Dedication of High School Building Mount Carmel Illinois** Mount Carmel City Schools (Mount Carmel, Ill.) 1914

**The Future of Architecture in 100 Buildings** Marc Kushner 2015-03-10 The founder of Architizer.com and practicing architect draws on his unique position at the crossroads of architecture and social media to highlight 100 important buildings that embody the future of architecture. We're asking more of architecture than ever before; the response will define our future. A pavilion made from paper. A building that eats smog. An inflatable concert hall. A research lab that can walk through snow. We're entering a new age in architecture—one where we expect our buildings to deliver far more than just shelter. We want buildings that inspire us while helping the environment; buildings that delight our senses while serving the needs of a community; buildings made possible both by new technology and repurposed materials. Like an architectural cabinet of wonders, this book collects the most innovative buildings of today and tomorrow. The buildings hail from all seven continents (to say nothing of other planets), offering a truly global perspective on what lies ahead. Each page captures the soaring confidence, the thoughtful intelligence, the space-age wonder, and at times the sheer whimsy of the world's most inspired buildings—and the questions they provoke: Can a building breathe? Can a skyscraper be built in a day? Can we 3D-print a house? Can we live on the moon? Filled with gorgeous imagery and witty insight, this book is an essential and delightful guide to the future being built around us—a future that matters more, and to more of us, than ever.

**FARMAX** Winy Maas 2006 Vast areas of the Netherlands seem to be filling up with low-cost housing, low-rent offices, warehouses and other low-density structures—producing a vast sea of architectural mediocrity. This book examines the prospects for animating this tendency. Conceived and edited by Winy Maas and Jacob van Rijs with Richard Koek and produced by MVRDV, FARMAX reads as an architectural narrative composed of studies and designs made by MVRDV and students from Delft University of Technology, the Berlage Institute and the Rotterdam Academy of Architecture and Urban Planning, along with contributions by other authors.

**Regionmaker** NRW-Forum Kultur und Wirtschaft Düsseldorf 2002 The structural exploration of the future of the Rhine-Ruhr region has been documented in this book - a commentary on the meaning of region, identity and tradition by MVRDV exhibited at NRW-Forum Kultur und Wirtschaft, Dusseldorf from November 15, 2002 - February 15, 2003.

*Architecture of Consequence* Ole Bouman 2009 Architecture of Consequence began life as the Dutch presentation at the São Paulo Architecture Biennale in 2009. "Shape our country!" was the call that the Netherlands Architecture Institute (NAi) made to its public over a six-month period. The result was a deluge of proposals, as the people of the Netherlands rose to the challenge of naming their needs: new guidelines for food production, alternative energy sources, solutions for space shortage, social cohesion, a healthy living environment and the recalibration of economic value. Formulating responses to such fundamental questions of our time is, it seems, everyone's business. All of the above issues converge at spatial planning and design, where real opportunities for social innovation still await. For this project, the Netherlands Architecture Institute selected 22 Dutch architecture firms with genuinely innovative ideas on these seven imperatives and the will to do something about them. The result is an agenda for the future of our living environment and a proof that designers have the creative power to make it happen. Architecture of Consequence proves that any notion that architecture should be an "expression of its time," or should do no more than express the vanity of its commissioners, pales into insignificance when compared to its tremendous potential for resolving urgent societal problems.

**Rising in the East** Rachel Keeton 2011 In the west, the design of new towns has always been based on an

ideal model in accordance with the ideas of that moment. In the case of the latest generation of new towns in Asia, however, only quantitative and marketing principles seem to play a role: the number of square metres, dwellings or people, or the greenest, most beautiful or most technologically advanced town. "Rising in the east" shows which design principles these premises are based on.

**Building Museum Boards** Daryl Fischer 2018-04-04 Building Museum Boards guides the governance committee through every step of the nomination and board-building process including identifying prospective members; crafting job descriptions for individuals and committees; compliance with conflict of interest standards; and orienting and activating board members.

**How To Win Work** Jan Knikker 2021-03-01 You are a great designer, but no-one knows. Now what? This indispensable book, written by one of the most influential marketers in architecture, will demystify Public Relations and marketing for all architects, whether in large practices or practicing as sole practitioners. It bridges the distance between architects and marketing by giving practical tips, best practice and anecdotes from an author with 20 years' experience in architecture marketing. It explains all aspects of PR and Business Development for architects: for example, how to write a good press release; how to make a fee proposal; how to prepare for a pitch. It gives examples of how others do it well, and the pitfalls to avoid. In addition, it discusses more general aspects which are linked to PR and BD, such as being a good employer, ethics for architects and the challenges when working abroad. Featuring vital insights from a wide variety of architects, from multinational practices to small offices, this book is an essential companion to any architectural office.

*The New Acropolis Museum* Bernard Tschumi Architects 2013 This much-anticipated visual tour of the New Acropolis Museum in Athens, Greece, examines both its architecture and the archaeological treasures it was built to house, providing a behind-the-scenes look at the creation of the building as well as the restoration, preservation and housing of its exhibits. Original.

**Skycar City** MVRDV (Firm) 2007 From the 2006 Marcus Prize Studio at the University of Wisconsin-Milwaukee, Winy Maas of MVRDV presents the work of 12 students who explored the relationship between infrastructure, architecture, and urban form, as they hypothesized the use of air-borne vehicles in a metropolitan setting.

**The Vertical Village** Winy Maas 2012 The architecture practice MVRDV and The Why Factory envision a new model for the development of Asian cities. Their idea is The Vertical Village, a three-dimensional community intended to bring back personal autonomy, diversity, flexibility and neighbourhood life to cities in Asia. As a result of demographic and economic forces, cities in Asia are undergoing rapid change. Traditional urban villages, which formed the core of the cities for centuries, are being replaced at a merciless pace by uniform tower blocks. In tracking the development of nine very distinct Asian cities, The Vertical Village provides insight into the evolution, current situation and future of these 'vertical urban villages'. This book then introduces two tools: The VillageMaker® and The HouseMaker®, with which to design a dream house and find a dream location. The book also offers a glimpse into what it would be like to live in a 'Vertical Village'. Publisher's note.

**Tools for Ideas** Christian Gänshirt 2007-01-01 Architects today must position themselves within an extremely wide-ranging field of qualifications. This makes it all the more important to have a fresh introduction to the field that makes up one of their core competences, the field of design. This introductory presentation describes and analyzes the theories, strategies, and tools of creative design for the purposes of practical work. With thoughtfulness and expertise, it opens the reader's eyes to the processes that underlie design and demonstrates different ways of communicating about complex design work. The first section focuses on the much-discussed relationship between design and research, between architecture and the sciences. The second section describes basic design approaches, from Vitruvius and Alberti through Erwin Panofsky and Wolfgang Kemp to Otl Aicher and Vilém Flusser. The third and largest section presents the elementary tools of design, from gestures and words through drawings, models, and simulations to critique, all as instruments of creative design in architecture and its related fields.

**FAR MAX** Winy Maas 1998-01-01 "An architectural narrative composed of studies and designs carried out by MVRDV and students of Delft University of Technology, the Berlage Institute in Amsterdam and the Academy of Architecture and Urban Planning in Rotterdam, between 1994 and 1998"--Back cover.

*Metacity Datatown* Winy Maas 1999 An attempt to understand the contemporary city at a moment when globalisation has exploded its scale beyond our grasp. Abandoning topography, ideology, representation, and context, the authors resort to pure data to discover what agenda for architecture and urbanism a numerical approach could provoke.--Provided by publisher.

**Library Architecture + Design** Manuela Roth 2014-09 "The age of multimedia constitutes a great challenge for libraries as they have to reinvent themselves to meet the constantly growing demands of digital applications. As a result, within the past decade, libraries have evolved from introverted hoards of knowledge to globally networked information and communication hubs. The architectural implementation of this transformation process has resulted in sophisticated buildings that succeed in combining impressive architecture with the complex contemporary requirements. The new edition of 'Masterpieces: Library Architecture + Design' shows that this process of transformation is far from over. Whether new building, conversion or extension, it presents new masterpieces of library design from around the world. The successful combination of contemporary architecture and cutting-edge technology is evidence that in the digital age, this type of building is as topical as never before."--Web page for this work.

**Book Mountain Spijkenisse** Nicoline Baartman 2013 "The Book Mountain is a building with a mission: to encourage a town populated by the least enthusiastic readers in the Netherlands to switch off their televisions and start reading books again. This biography of the Book Mountain paints a picture of the town of Spijkenisse and the political and social contexts in which such buildings are realized. The story also examines the role of the modern library, the essence of a Ville Nouvelle and the search for an alternative for identification - and whether or not this should be done through historicizing architecture. The often contradictory motives of the protagonists and the context of the project are described in a catchy, straightforward style, befitting Spijkenisse, by former Volkskrant newspaper editor Nicoline Baartman. The story is illustrated with photographs by Marcel Veldman and informative graphics by MVRDV. Book Mountain Spijkenisse. "Biography of a building" is the story of an architect with a vision, a revolutionary councillor, the widow of a veterinarian, an artsy library director and a visionary hero from India who saves the town. It is a fascinating portrayal of life and customs in a new polder town"--OCLC

*How I Slept My Way to the Middle* Kevin Pollak 2013-11-05 How I Slept My Way to the Middle winningly combines never-before-heard stories featuring A-list entertainers with fan favorites and Kevin's own thoughts about how he made it. He turned down his first invitation to do stand-up on The Tonight Show because he knew that he'd make a bigger impact if he sat on the couch next to Johnny. That huge risk—which paid off in spades—was just the beginning. Find out how he brought John Belushi to his knees, tortured Paul Reiser (twice), bamboozled Larry King, stole Alan Arkin's soul, almost killed Warren Beatty, and sucked face with Robert DeNiro's girlfriend. Now a new media entrepreneur, he's laughing proof that if you follow your gut and believe in yourself, you can do anything you want—except have a rational conversation with Rip Torn, who's an evil, paranoid \$#!%.

*Final Report of the School Building Utilization Committee to the Legislative Council* Wisconsin. Legislature. Legislative Council. School Building Utilization Committee 1958

**MVRDV Buildings** Ilka Ruby 2015 In cooperation with Ilka and Andreas Ruby, book architectural MVRDV assembled a redefined architecture monograph about its realized work, featuring testimonies, journalistic articles, unpublished images and accessible drawings. The architects of MVRDV are famous for their visionary research and thought provoking projects such as Pig City and Grand Paris. In 20 years of practice the office also realized a big portfolio of buildings and urban plans, including Villa VPRO, Balancing Barn and Mirador Madrid.book architectural.
