Popular Culture, New Media and Digital Literacy in Early Childhood Jackie Marsh 2005 This book offers a range of perspectives on children's multimodal experiences, providing a ground-breaking account of the ways in which children engage with popular culture, media and digital literacy practices from their earliest years. Many young children have extensive experience of film, television, printed media, computer games, mobile phones and the Internet from birth, yet their reaction to media texts is rarely acknowledged in the national curricula of any country. This seminal text focuses on children from birth to eight years, addressing issues such as: * media and identity construction * media literacy practices in the home * the changing nature of literacy in technologically advanced societies * The place of popular and media texts in children's lives and the use of such texts in the curriculum. By exploring children's engagement with popular culture, media and digital texts in the home, community and early years settings, the contributors look at empirical studies from around the world, and draw out vital new theoretical issues relating to children's emergent technoliteracy practices. With an unmatched team of international experts evaluating topics from text-messaging to the Teletubbies, this book is a long-overdue, fascinating and illuminating read for policy-makers, educational researchers and practitioners, and crosses over to appeal to those in the linguistics field.

Sociology of Education James Ainsworth 2013-04-11 The sociology of education is a rich interdisciplinary field that studies schools as their own social world as well as their place within the larger society. The field draws contributions from education, sociology, human development, family studies, economics, politics and public policy. *Sociology of Education: An A-to-Z Guide* introduces students to the social constructions of our educational systems and their many players, including students and their peers, teachers, parents, the broader community, politicians

and policy makers. The roles of schools, the social processes governing schooling, and impacts on society are all critically explored. Despite an abundance of textbooks and specialized monographs, there are few up-to-date reference works in this area. *Features & Benefits:* 335 signed entries fill 2 volumes in print and electronic formats, providing the most comprehensive reference resource available on this topic. Cross-References and Suggestions for Further Reading guide readers to additional resources. A thematic "Reader's Guide" groups related articles by broad topic areas as one handy search feature on the e-Reference platform, which also includes a comprehensive index of search terms, facilitating ease of use by both on-campus students and distance learners. A Chronology provides students with historical perspective on the sociology of education.

Best Practices in Adolescent Literacy Instruction, Second Edition Kathleen A. Hinchman 2014-05-01 An authoritative teacher resource and widely adopted text, this book provides a comprehensive overview of adolescent literacy instruction in the era of the Common Core State Standards (CCSS). Leading educators describe effective practices for motivating diverse learners in grades 5-12, building comprehension of multiple types of texts, integrating literacy and content-area instruction, and teaching English language learners and struggling readers. Case examples, lesson-planning ideas, and end-of-chapter discussion questions and activities enhance the utility of the volume. New to This Edition *Extensive CCSS content incorporated throughout the book. *Chapters on disciplinary literacy, text complexity, and differentiated instruction. *Chapters on academic language, writing instruction, history and English/language arts classrooms, and coaching. *Pedagogy and Practice* Patricia Murphy 2012-06-21 This book foregrounds pedagogy in a way that challenges readers to reflect on themselves as teachers and learners, and to be reflexive about their own practices and contexts. Learning involves a transformation of identity which occurs through negotiation and repositioning, through new ways of relating, and through different ways of participating in practices. This book examines the meaning and implications for pedagogy in educational and workplace settings, and the role of the teacher in this sociocultural view of learning. By illustrating the mediated nature of agency and identity, the chapters (re)conceptualise the teacher and the learner and show different ways of supporting learning and being a teacher. The settings represented range from nursery to university and from out-of-school to institutionally-based and work place situations. Curricular aspects represented include popular culture, critical literacy, multimodality, the arts, and new technologies. Teachers and student teachers, as learners, are also represented in the accounts assembled. The book takes a sociocultural view of learning and considers the pedagogical implications of this view. It explores different meanings of pedagogy and considers notions of cultural bridging and the processes of transforming identities. The contributions challenge ways of thinking about practice, both teaching and assessment, and argue for practices that bridge between learners' worlds, their communities and educational institutions. Drawing on the international literature, this book will be essential reading for students of curriculum learning and assessment in all sectors from pre-primary to further and higher education. It is suitable as a core text for masters and taught doctorate programmes. It will also be of interest to a wide range of professionals

involved with curriculum, learning and the practice of teaching and assessment. This book is relevant to those in work-based and professional education and training, and in informal educational settings, as well as traditional educational institutions at all levels. A unique collection in a field that is underrepresented, it will also be of interest to an academic audience.

National Identity, Popular Culture and Everyday Life Tim Edensor 2020-06-15 The Millennium Dome, Braveheart and Rolls Royce cars. How do cultural icons reproduce and transform a sense of national identity? How does national identity vary across time and space, how is it contested, and what has been the impact of globalization upon national identity and culture? This book examines how national identity is represented, performed, spatialized and materialized through popular culture and in everyday life. National identity is revealed to be inherent in the things we often take for granted - from landscapes and eating habits, to tourism, cinema and music. Our specific experience of car ownership and motoring can enhance a sense of belonging, whilst Hollywood blockbusters and national exhibitions provide contexts for the ongoing, and often contested, process of national identity formation. These and a wealth of other cultural forms and practices are explored, with examples drawn from Scotland, the UK as a whole, India and Mauritius. This book addresses the considerable neglect of popular cultures in recent studies of nationalism and contributes to debates on the relationship between 'high' and 'low' culture.

Reading Stephen King Brenda Miller Power 1997 This collection of essays grew out of the "Reading Stephen King Conference" held at the University of Maine in 1996. Stephen King's books have become a lightning rod for the tensions around issues of including "mass market" popular literature in middle and high school English classes and of who chooses what students read. King's fiction is among the most popular of "pop" literature, and among the most controversial. These essays spotlight the ways in which King's work intersects with the themes of the literary canon and its construction and maintenance, censorship in public schools, and the need for adolescent readers to be able to choose books in school reading programs. The essays and their authors are: (1) "Reading Stephen King: An Ethnography of an Event" (Brenda Miller Power); (2) "I Want to Be Typhoid Stevie" (Stephen King); (3) "King and Controversy in Classrooms: A Conversation between Teachers and Students" (Kelly Chandler and others); (4) "Of Cornflakes, Hot Dogs, Cabbages, and King" (Jeffrey D. Wilhelm); (5) "The 'Wanna Read' Workshop: Reading for Love" (Kimberly Hill Campbell); (6) "When 'IT' Comes to the Classroom" (Ruth Shagoury Hubbard); (7) "If Students Own Their Learning, What Do Teachers Do?" (Curt Dudley-Marling); (8) "Disrupting Stephen King: Engaging in Alternative Reading Practices" (James Albright and Roberta F. Hammett); (9) "Because Stories Matter: Authorial Reading and the Threat of Censorship" (Michael W. Smith); (10) "Canon Construction Ahead" (Kelly Chandler); (11) "King in the Classroom" (Michael R. Collings); (12) "King's Works and the At-Risk Student: The Broad-Based Appeal of a Canon Basher" (John Skretta); (13) "Reading the Cool Stuff: Students Respond to 'Pet Sematary'" (Mark A. Fabrizi); (14) "When Reading Horror Subliterature Isn't So Horrible" (Janice V. Kristo and Rosemary A. Bamford); (15) "One Book Can Hurt You...But a Thousand Never Will" (Janet S. Allen); (16) "In the Case of King: What May Follow" (Anne E. Pooler and Constance M. Perry); and (17) "Be Prepared: Developing a

Censorship Policy for the Electronic Age" (Abigail C. Garthwait). Appended are a joint manifesto by National Council of Teachers of English (NCTE) and International Reading Association (IRA) concerning intellectual freedom; an excerpt from a teacher's guide to selected horror short stories of Stephen King; and the conference program. Contains a 152-item reference list of literary works. (NKA)

Confronting the Challenges of Participatory Culture Henry Jenkins 2009-06-05 Many teens today who use the Internet are actively involved in participatory cultures—joining online communities (Facebook, message boards, game clans), producing creative work in new forms (digital sampling, modding, fan videomaking, fan fiction), working in teams to complete tasks and develop new knowledge (as in Wikipedia), and shaping the flow of media (as in blogging or podcasting). A growing body of scholarship suggests potential benefits of these activities, including opportunities for peer-to-peer learning, development of skills useful in the modern workplace, and a more empowered conception of citizenship. Some argue that young people pick up these key skills and competencies on their own by interacting with popular culture; but the problems of unequal access, lack of media transparency, and the breakdown of traditional forms of socialization and professional training suggest a role for policy and pedagogical intervention. This report aims to shift the conversation about the "digital divide" from questions about access to technology to questions about access to opportunities for involvement in participatory culture and how to provide all young people with the chance to develop the cultural competencies and social skills needed. Fostering these skills, the authors argue, requires a systemic approach to media education; schools, afterschool programs, and parents all have distinctive roles to play. The John D. and Catherine T. MacArthur Foundation Reports on Digital Media and Learning

Teaching Theology in a Technological Age Doru Costache 2015-11-25 The iGeneration has learned to adapt rapidly to technological change. Tech-savvy students multi-task with consummate ease, accessing email on smart-phones, researching assignments on tablets, reading a book on Kindle, while drinking a flat white and listening to iTunes in the background. How does the tertiary educational curriculum meet the learning needs of students whose attention transitions rapidly between mediums and messages? The complexity and pace of modern technological change has left the theological educational sector gasping, as it struggles to devise pedagogically engaging online distance learning materials in traditional disciplines and teach units with significant relational and pastoral components. The technological benefits are vast, the instant availability of information unprecedented, and the opportunities to provide theological education to groups marginalised by the tyranny of distance and time enormous. How should the theological sector address these challenges and opportunities? Although the benefits are massive, the media is replete with stories of the casualties of technological change, including cyber-bullying, internet predators, the psychic damage from trolls, addiction to gaming, and issues of body image, among others. How should the theological sector, drawing upon its scriptural and teaching heritage, come to grips with the deficits spawned by the technological revolution? What is the theological, pastoral, social and pedagogic responsibility of theology teachers in nurturing this new generation? Teaching Theology in a Technological Age draws together in an inspiring volume a series of cutting-edge essays from Australian, New Zealand and South African scholars on the learning and teaching of theology in a digital age.

Popular Culture as Pedagogy Kaela Jubas 2015-10-30 "Grounded in the field of adult education, this international compilation offers a range of critical perspectives on popular culture as a form of pedagogy. Its fundamental premise is that adults learn in multiple ways, including through their consumption of fiction. As scholars have asserted for decades, people are not passive consumers of media; rather, we (re)make our own meanings as we accept, resist, and challenge cultural representations. At a time when attention often turns to new media, the contributors to this collection continue to find "old" forms of popular culture important and worthy of study. Television and movies – the emphases in this book – reflect aspects of consumers' lives, and can be powerful vehicles for helping adults see, experience, and inhabit the world in new and different ways. This volume moves beyond conceptually oriented scholarship, taking a decidedly research-oriented focus. It offers examples of textual and discursive analyses of television shows and films that portray varied contexts of adult learning, and suggests how participants can be brought into adult education research in this area. In so doing, it provides compelling evidence about the complexity, politics, and multidimensionality of adult teaching and learning. Using a range of television shows and movies as exemplars, chapters relate popular culture to globalization, identity, health and health care, and education. The book will be of great use to instructors, students, and researchers located in adult education, cultural studies, women's and gender studies, cultural sociology, and other fields who are looking for innovative ways to explore social life as experienced and imagined."

Kinderculture Shirley R. Steinberg 1997-03-20 For corporate America, children—and their parents' money—are one of the most targeted groups in our consumer society. There are TV shows, movies, video games, toys, books, and restaurants that are specifically directed at children—all of which has produced a "kinderculture" run by marketing and advertising executives. Through a series of entertaining and insightful essays, Kinderculture: The Corporate Construction of Childhood explores some of the icons that shape the values and consciousness of children, from Beavis and Butt-Head to Barney, from Disney movies to Nintendo. Contributors drawn from the fields of education, sociology, and popular culture analyze the profound effects and the pervasive influence of these corporate productions in a style parents, educators, and general readers will welcome. Arguing that the experience of childhood has been, with or without our consent, reshaped into something that

is prefabricated, Shirley Steinberg and Joe Kincheloe bring home to readers the impact our “marketing blitz” culture has on our children—and on our beliefs about childhood.

Part II is a collection of detailed portraits of 14 countries, regions or language communities, and focuses on early literacy provision, practice and policy from across the world. Part III outlines key interventions and research-endorsed practices designed to support home-school connections and children’s reading and writing skills, as well as vocabulary, phonological awareness and narrative abilities, with examples drawn from various home, school and community environments. All chapters promote discussion, critical analysis and questions for reflection and are written in jargon-free language in an easy-to use themed format. Vygotsky and Pedagogy Harry Daniels 2002-11-01 The theories of Vygotsky are central to any serious discussion of children's learning processes. Vygotsky argues that children do not develop in isolation, rather learning takes place when the child is interacting with their social environment. It is the responsibility of the teacher to establish an interactive instructional situation in the classroom, where the child is an active learner and the teacher uses their knowledge to guide learning. This has many implications for those in the educational field. This book explores the growing interest in Vygotsky and the pedagogic implications of the body of work that is developing under the influence of his theories. It provides an overview of the ways in which the original writing has been extended and identifies areas for future development. The author considers how these developments are creating new and important possibilities for the practices of teaching and learning in school and beyond, and illustrates how Vygotskian theory can be applied in the classroom. The book is intended for students and academics in education and the social sciences. It will be of interest to all those who wish to develop an analysis of pedagogic practice within and beyond the field of education.
