Gut Feelings Gerd Gigerenzer 2008-06-24 Why is split second decision-making superior to deliberation? Gut Feelings delivers the science behind Malcolm Gladwell's Blink. Reflection and reason are overrated, according to renowned psychologist Gerd Gigerenzer. Much better qualified to help us make decisions is the cognitive, emotional, and social repertoire we call intuition, a suite of gut feelings that have evolved over the millennia specifically for making decisions. Gladwell drew heavily on Gigerenzer's research. But Gigerenzer goes a step further by explaining just why our gut instincts are so often right. Intuition, it seems, is not some sort of mystical chemical reaction but a neurologically based behavior that evolved to ensure that we humans respond quickly when faced with a dilemma (BusinessWeek).

Fundamentals of Spacecraft Attitude Determination and Control F. Landis Markley 2014-05-31 This book explores topics that are central to the field of spacecraft attitude determination and control. The authors provide rigorous theoretical derivations of significant algorithms accompanied by a generous amount of qualitative discussions of the subject matter. The book documents the development of *Sylvania Tv User Guide Pdf Pdf upload Herison I Boyle*

the important concepts and methods in a manner accessible to practicing engineers, graduate-level engineering students and applied mathematicians. It includes detailed examples from actual mission designs to help ease the transition from theory to practice and also provides prototype algorithms that are readily available on the author's website. Subject matter includes both theoretical derivations and practical implementation of spacecraft attitude determination and control systems. It provides detailed derivations for attitude kinematics and dynamics and provides detailed description of the most widely used attitude parameterization, the quaternion. This title also provides a thorough treatise of attitude dynamics including Jacobian elliptical functions. It is the first known book to provide detailed derivations and explanations of state attitude determination and gives readers real-world examples from actual working spacecraft missions. The subject matter is chosen to fill the void of existing textbooks and treatises, especially in state and dynamics attitude determination.

MATLAB code of all examples will be provided through an external website.

Make Room for TV Lynn Spigel 2013-11-26

Between 1948 and 1955, nearly two-thirds of all American families bought a television set—and a

revolution in social life and popular culture was launched. In this fascinating book, Lynn Spigel chronicles the enormous impact of television in the formative years of the new medium: how, over the course of a single decade, television became an intimate part of everyday life. What did Americans expect from it? What effects did the new daily ritual of watching television have on children? Was television welcomed as an unprecedented "window on the world," or as a "one-eyed monster" that would disrupt households and corrupt children? Drawing on an ambitious array of unconventional sources, from sitcom scripts to articles and advertisements in women's magazines, Spigel offers the fullest available account of the popular response to television in the postwar years. She chronicles the role of television as a focus for evolving debates on issues ranging from the ideal of the perfect family and changes in women's role within the household to new uses of domestic space. The arrival of television did more than turn the living room into a private theater: it offered a national stage on which to play out and resolve conflicts about the way Americans should live. Spigel chronicles this lively and contentious debate as it took place in the popular media. Of particular interest is her treatment of the way in which the phenomenon of television itself was constantly deliberated—from how programs should be watched to where the set was placed to whether Mom, Dad, or kids should control the dial. *Make Room for TV* combines a powerful analysis of the growth of electronic culture with a nuanced social history of family life in postwar America, offering a provocative glimpse of the way television became the mirror of so many of America's hopes and fears and dreams.

Mind Gym Gary Mack 2002-06-24 Praise for Mind Gym "Believing in yourself is paramount to success for any athlete. Gary's lessons and David's writing provide examples of the importance of the mental game." --Ben Crenshaw, two-time Masters champion and former Ryder Cup captain "Mind

Gym hits a home run. If you want to build mental muscle for the major leagues, read this book." --Ken Griffey Jr., Major League Baseball MVP "I read Mind Gym on my way to the Sydney Olympics and really got a lot out of it. Gary has important lessons to teach, and you'll find the exercises fun and beneficial." --Jason Kidd, NBA All-Star and Olympic gold-medal winner In *Mind Gym*, noted sports psychology consultant Gary Mack explains how your mind influences your performance on the field or on the court as much as your physical skill does, if not more so. Through forty accessible lessons and inspirational anecdotes from prominent athletes--many of whom he has worked with--you will learn the same techniques and exercises Mack uses to help elite athletes build mental "muscle." *Mind Gym* will give you the "head edge" over the competition.

Russian Law Journal Dmitry Maleshin The "Russian Law Journal" (RLJ) magazine is one of the first English-language legal academic editions regularly published in Russia. It is an All-Russian interuniversity platform designed to promote Russian legal researches abroad. The magazine is

meant for both Russian and foreign readers including major world legal libraries, academics and practicing lawyers. International editorial board and editorial team are represented by professors from leading world centers of legal education and legal science, like Harvard, Yale, Cambridge and La Sorbonne, as well as by scientists from Russian law schools (Moscow State University, Kutafin Moscow State Law University, Saint-Petersburg State University, Higher School of Economics).

Watch Me Play T.L. Taylor 2018-10-16 A look at the revolution in game live streaming and esports broadcasting Every day thousands of people broadcast their gaming live to audiences over the internet using popular sites such as Twitch, which reaches more than one hundred million viewers a month. In these new platforms for interactive entertainment, big esports events featuring digital game competitors live stream globally, and audiences can interact with broadcasters—and each other—through chat in real time. What are the ramifications of this exploding online industry? Taking readers inside home studios and backstage at large esports events, *Watch Me Play* investigates the rise of game live streaming and how it is poised to alter how we understand media and audiences. Through extensive interviews and immersion in this gaming scene, T. L. Taylor delves into the inner workings of the live streaming platform Twitch. From branding to business practices, she shows the pleasures and work involved in this broadcasting activity, as well as the management and governance of game live streaming and its hosting communities. At a time when gaming is being reinvented through social media, the potential of an ever-growing audience is transforming user-generated content and alternative distribution methods. These changes will challenge the meaning of ownership and intellectual property and open the way to new forms of creativity. The first book to explore the online phenomenon Twitch and live streaming games, *Watch Me Play* offers a vibrant look at the

melding of private play and public entertainment.

Intellectual Property Law and Policy Volume 12 Hugh Hansen 2013-05-22 This is the 17th Annual volume in the series collecting the presentations and discussion from the Annual Fordham IP Conference. The contributions, by leading world experts, analyse the most pressing issues in copyright, trademark and patent law as seen from the perspectives of the USA, the EU, Asia and WIPO. This volume, in common with its predecessors, makes a valuable and lasting contribution to the discourse in IP law, as well as trade and competition law. The contents, while always informative, are also critical and questioning of new developments and policy concerns. Praise for the series: "This must be one of the most enjoyable and thought-provoking conferences in the IP field. The high quality of the speakers is matched by the intense, audience-led debates and challenges which follow." The Honourable Mr Justice Laddie, Royal Courts of Justice, London "Faculty for this conference are always well-known 'names', well respected leaders in their fields, speaking with a combination of candor and timeliness that is unrivaled by any other forum of its kind." Honorable Marybeth Peters, Register of Copyrights, United States Copyright Office.

Learning Targets Connie M. Moss 2012-07-02 In *Learning Targets*, Connie M. Moss and Susan M. Brookhart contend that improving student learning and achievement happens in the immediacy of an individual lesson--what they call "today's lesson"—or it doesn't happen at all. The key to making today's lesson meaningful? Learning targets. Written from students' point of view, a learning target describes a lesson-sized chunk of information and skills that students will come to know deeply. Each lesson's learning target connects to the next lesson's target, enabling students to master a coherent series of challenges that ultimately lead to important curricular standards. Drawing from the authors'

extensive research and professional learning partnerships with classrooms, schools, and school districts, this practical book - Situates learning targets in a theory of action that students, teachers, principals, and central-office administrators can use to unify their efforts to raise student achievement and create a culture of evidence-based, results-oriented practice. - Provides strategies for designing learning targets that promote higher-order thinking and foster student goal setting, self-assessment, and self-regulation. - Explains how to design a strong performance of understanding, an activity that produces evidence of students' progress toward the learning target. - Shows how to use learning targets to guide summative assessment and grading.

Learning Targets also includes reproducible planning forms, a classroom walk-through guide, a lesson-planning process guide, and guides to teacher and student self-assessment. What students are actually doing during today's lesson is both the source of and the yardstick for school improvement efforts. By applying the insights in this book to your own work, you can improve your teaching expertise and dramatically empower all students as stakeholders in their own learning.

Midnight in the Garden of Good and Evil John

Berendt 2010-05-12 NATIONAL BESTSELLER •

An enormously engaging portrait of a most beguiling Southern city: "Elegant and wicked... [This] might be the first true-crime book that makes the reader want to book a bed and breakfast for an extended weekend at the scene of the crime."

—The New York Times Book Review Shots rang out in Savannah's grandest mansion in the misty, early morning hours of May 2, 1981. Was it murder or self-defense? For nearly a decade, the shooting and its aftermath reverberated throughout this hauntingly beautiful city of moss-hung oaks and shaded squares. John Berendt's sharply observed, suspenseful, and witty narrative reads like a thoroughly engrossing novel, and yet it is a work of

nonfiction. Berendt skillfully interweaves a hugely entertaining first-person account of life in this isolated remnant of the Old South with the unpredictable twists and turns of a landmark murder case. It is a spellbinding story peopled by a gallery of remarkable characters: the well-bred society ladies of the Married Woman's Card Club; the turbulent young redneck gigolo; the hapless recluse who owns a bottle of poison so powerful it could kill every man, woman, and child in Savannah; the aging and profane Southern belle who is the "soul of pampered self-absorption"; the uproariously funny black drag queen; the acerbic and arrogant antiques dealer; the sweet-talking, piano-playing con artist; young blacks dancing the minuet at the black debutante ball; and Minerva, the voodoo priestess who works her magic in the graveyard at midnight. These and other Savannahians act as a Greek chorus, with Berendt revealing the alliances, hostilities, and intrigues that thrive in a town where everyone knows everyone else. *Midnight in the Garden of Good and Evil* is a sublime and seductive reading experience.

Brilliantly conceived and masterfully written, this true-crime book has become a modern classic.

The Elusive Quest for Growth William R. Easterly 2002-08-02 Why economists' attempts to help poorer countries improve their economic well-being have failed. Since the end of World War II, economists have tried to figure out how poor countries in the tropics could attain standards of living approaching those of countries in Europe and North America. Attempted remedies have included providing foreign aid, investing in machines, fostering education, controlling population growth, and making aid loans as well as forgiving those loans on condition of reforms. None of these solutions has delivered as promised. The problem is not the failure of economics, William Easterly argues, but the failure to apply economic principles to practical policy work. In this book Easterly shows how these solutions all violate the basic principle of economics, that people—private individuals and businesses, government officials, even aid donors—respond to incentives. Easterly first discusses the importance of growth. He then analyzes the development solutions that have failed. Finally, he suggests alternative approaches to the problem. Written in an accessible, at times irreverent, style, Easterly's book combines modern growth theory with anecdotes from his fieldwork for the World Bank.

Ignition! John Drury Clark 2018-05-23 This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the

development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as “a good book on rocket stuff...that’s a really fun one” by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

CRC Handbook of Metal Etchants Perrin Walker 1990-12-11 This publication presents cleaning and etching solutions, their applications, and results on inorganic materials. It is a comprehensive collection of etching and cleaning solutions in a single source. Chemical formulas are presented in one of three standard formats - general, electrolytic or ionized gas formats - to insure inclusion of all necessary operational data as shown in references that accompany each numbered formula. The book describes other applications of specific solutions, including their use on other metals or metallic compounds. Physical properties, association of natural and man-made minerals, and materials are shown in relationship to crystal structure, special processing techniques and solid state devices and assemblies fabricated. This publication also presents a number of organic materials which are widely used in handling and general processing...waxes, plastics, and lacquers for example. It is useful to individuals involved in study, development, and processing of metals and metallic compounds. It is invaluable for readers from the college level to industrial R & D and full-scale device fabrication, testing and sales. Scientific disciplines, work areas and individuals with great interest include: chemistry, physics, metallurgy, geology, solid state, ceramic and glass, research libraries, individuals dealing with chemical processing of inorganic materials, societies and schools.

Theories of Development William Crain 2015-10-02
The result of extensive scholarship and consultation with leading scholars, this text introduces students to twenty-four theorists and compares and contrasts their theories on how we develop as individuals. Emphasizing the theories that build upon the developmental tradition established by Rousseau, this text also covers theories in the environmental/learning tradition.

Manual of Equine Reproduction - E-Book Steven P. Brinsko 2010-05-19 Now in full color, *Manual of Equine Reproduction*, 3rd Edition provides a comprehensive look at the reproductive management of horses, including management of stallions, pregnant mares, and neonatal foals. Expert authors use a concise, practical approach in discussing improved therapies and treatments in equine breeding. You'll enhance your skills and knowledge with this book's detailed coverage of techniques used in reproductive examination, breeding procedures, pregnancy diagnosis, foaling, and reproductive tract surgery. A clinical emphasis includes a step-by-step format of possible scenarios from conception to breeding management. Practical information includes topics such as breeding with transported cooled or frozen semen, and caring for the broodmare and newborn foal. The organization of material corresponds to the course of study in veterinary school, so you can find topics easily. Chapter objectives and study questions at the beginning of each chapter guide you through the material and provide clear learning goals.

Evaluation of Breeding Records chapter covers the importance of breeding records, and how to use them to evaluate stallion performance and optimize fertility. References are listed at the end of each chapter for further research and study. Full-color photographs and illustrations clearly depict procedures, and all drawings have been redrawn

and improved. *NEW Assisted Reproductive Technology* chapter goes beyond embryo transfer. Updated content includes the latest advances in therapies and treatments. New content is added to two chapters, *Reproductive Physiology of the Nonpregnant Mare* and *Manipulation of Estrus in the Mare*. Thorough coverage of every aspect of equine reproduction provides a strong foundation for success in veterinary practice, including a discussion of the use of GnRH-analog deslorelin (Ovuplant) to hasten ovulation; aseptic technique for endometrial biopsy; use of transabdominal ultrasonography, especially in early pregnancy; determination of fetal gender by transrectal ultrasonography; aspiration testicular biopsy using a spring-loaded biopsy instrument; and procedure for surgical embryo transfer.

Cochrane Handbook for Systematic Reviews of Interventions Julian P. T. Higgins 2008-11-24
Healthcare providers, consumers, researchers and policy makers are inundated with unmanageable amounts of information, including evidence from healthcare research. It has become impossible for all to have the time and resources to find, appraise and interpret this evidence and incorporate it into healthcare decisions. Cochrane Reviews respond to this challenge by identifying, appraising and synthesizing research-based evidence and presenting it in a standardized format, published in The Cochrane Library (www.thecochranelibrary.com). The Cochrane Handbook for Systematic Reviews of Interventions contains methodological guidance for the preparation and maintenance of Cochrane intervention reviews. Written in a clear and accessible format, it is the essential manual for all those preparing, maintaining and reading Cochrane reviews. Many of the principles and methods described here are appropriate for systematic reviews applied to other types of research and to systematic reviews of interventions undertaken by others. It is hoped therefore that this book will be invaluable to all those who want to understand the

role of systematic reviews, critically appraise published reviews or perform reviews themselves.

50 Years of Army Computing Army Research Laboratory 2000-09 A symposium and celebration was held at Aberdeen Proving Ground (APG), Maryland, in November 1996, to recognize and commemorate seminal Army contributions to the birth and development of modern computing. Primarily inspired by the 50th anniversary of the invention of the world's first general purpose electronic computer (the ENIAC), this two-day event also celebrated the dedication at APG of significant new computational resources provided by the Office of Secretary of Defense. On this occasion, scores of computing pioneers gathered at APG to reminisce about the accomplishments that stemmed from the Army's computation needs during World War II in particular, the need for the fi ring and bombing tables that were essential for accurate targeting of ground- and air-delivered ordnance.

The Singapore Convention on Mediation Nadja Alexander 2022-08-11 The Singapore Convention on Mediation is just beginning its life as an international legal instrument. How is it likely to fare? In the second edition of this comprehensive, article-by-article commentary, the authors provide a robust report on the features of the Convention and their implications, with an analysis of potential controversies and authoritative clarifications of particular provisions. The book's meticulous examination considers these issues and topics: international mediated settlement agreements as a new type of legal instrument in international law; types of settlement agreements that fall within the scope of the Convention; how the Convention's enforcement mechanism works; the meaning of 'international' and the absence of a seat of mediation; the Convention's approach to recognition and enforcement of international mediated settlement agreements; the grounds for refusal to grant relief under the Convention; mediator misconduct as a ground for refusal to grant relief; the role of

confidentiality in granting relief for international mediated settlement agreements; the impact of the Convention on private international law; the relationship of the Singapore Convention to other international instruments such as the UN Model Law on International Commercial Mediation and the New York Convention on Arbitration; possibilities for Contracting States to declare reservations; court decisions from around the globe on the recognition and enforceability of international mediated settlement agreements; and domestic mediation legislation including domestic laws that implement the Singapore Convention. This book takes a giant step towards relieving the inherent uncertainty associated with how this newly constituted instrument may operate, and how States may become 'Convention ready'. It is an essential reference for international lawyers, mediators and government officials as the Convention proves itself in the coming years.

Free To Choose Milton Friedman 1990-11-26
INTERNATIONAL BESTSELLER A powerful and persuasive discussion about economics, freedom, and the relationship between the two, from today's brightest economist. In this classic discussion, Milton and Rose Friedman explain how our freedom has been eroded and our affluence undermined through the explosion of laws, regulations, agencies, and spending in Washington. This important analysis reveals what has gone wrong in America in the past and what is necessary for our economic health to flourish.

Historic Residential Suburbs David L. Ames 2002

Intellectual Property, Competition Law and Economics in Asia R Ian McEwin 2011-10-07 This book results from a conference held in Singapore in

September 2009 that brought together distinguished lawyers and economists to examine the differences and similarities in the intersection between intellectual property and competition laws in Asia. The prime focus was how best to balance these laws to improve economic welfare. Countries in Asia have different levels of development and experience with intellectual property and competition laws. Japan has the longest experience and now vigorously enforces both competition and intellectual property laws. Most other countries in Asia have only recently introduced intellectual property laws (due to the Trade-Related Aspects of Intellectual Property Rights (TRIPS) Agreement) and competition laws (sometimes due to the World Bank, International Monetary Fund or free trade agreements). It would be naïve to think that laws, even if similar on the surface, have the same goals or can be enforced similarly. Countries have differing degrees of acceptance of these laws, different economic circumstances and differing legal and political institutions. To set the scene, Judge Doug Ginsburg, Greg Sidak, David Teece and Bill Kovacic look at the intersection of intellectual property and competition laws in the United States. Next are country chapters on Asia, each jointly authored by a lawyer and an economist. The country chapters outline the institutional background to the intersection in each country, discuss the policy underpinnings (theoretically as well as describing actual policy initiatives), analyse the case law in the area, and make policy prescriptions.

Stereo Review 1996

Fabless Daniel Nenni 2014 The purpose of this book is to illustrate the magnificence of the fabless semiconductor ecosystem, and to give credit where credit is due. We trace the history of the semiconductor industry from both a technical and business perspective. We argue that the development of the fabless business model was a key enabler of the growth in semiconductors since the mid-1980s. Because business models, as much as

the technology, are what keep us thrilled with new gadgets year after year, we focus on the evolution of the electronics business. We also invited key players in the industry to contribute chapters. These "In Their Own Words" chapters allow the heavyweights of the industry to tell their corporate history for themselves, focusing on the industry developments (both in technology and business models) that made them successful, and how they in turn drive the further evolution of the semiconductor industry.

The Cigarette Century Allan Brandt 2009-01-06 From agriculture to big business, from medicine to politics, *The Cigarette Century* is the definitive account of how smoking came to be so deeply implicated in our culture, science, policy, and law. No product has been so heavily promoted or has become so deeply entrenched in American consciousness. *The Cigarette Century* shows in striking detail how one ephemeral (and largely useless) product came to play such a dominant role in so many aspects of our lives—and deaths.

Blown to Bits Harold Abelson 2008 'Blown to Bits' is about how the digital explosion is changing everything. The text explains the technology, why it creates so many surprises and why things often don't work the way we expect them to. It is also about things the information explosion is destroying: old assumptions about who is really in control of our lives.
