It came from nowhere at the start of the 1990s to claim three successive World Rally Championships for its makers in the middle of that decade, and went on to become an enthusiasts' car thanks to its affordability, high performance - and, of course, the glorious exhaust note of its unusual flat-four 'boxer' engine. This book examines the three generations of Subaru Impreza WRX and WRX STI from 1992 - 2012, including how the roadgoing cars were developed from the successful rally models, production history and specification details. Topics covered include: History of the Impreza, and early days in competition with the Leone and the Legacy models. Construction and derivatives of the distinctive flat-four engine. Innovations in the Impreza's four-wheel-drive system. Design and specifications for special editions. Includes material from Prodrive on their limited edition models. Examines both rally and roadgoing cars.

Automotive Machining Mike Mavrigian 2017-04-17 Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each important machining procedure. A stock 300-hp engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valveseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valveseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered. Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.

Peugeot 205 T16 Group B Rally Car Enthusiast's Manual Nick Garton 2020-04-14 The Peugeot 205 T16 is the legendary Group B turbocharged four-wheel-drive rally car produced by Peugeot between 1984 and 1986. Between 1984 and 1986, 205 T16s won 16 World Championship rallies in the hands of Ari Vatanen, Timo Salonen, Juha Kankkunen and Bruno Saby, and lifted both the manufacturers' and drivers' titles in 1985 and 1986 in the hands of Timon Salonen and Juha Kankkunen, respectively, against strong opposition from Audi, Lancia, Ford and Austin-Rover. The car was used to extraordinary effect by Peugeot as a marketing tool for the 205 road car, and the project lifted Peugeot to become a mainstream manufacturer to rival the established brands worldwide. The original 205 T16 appeared on the rally stages in 1984, while the revised 'E2' was introduced partway through 1985. The 'E2' incorporated various revisions raising power output to 550bhp. After the cancellation of Group B at the end of 1986, Peugeot modified three 205 T16 cars to compete in the famous Pikes Peak Hillclimb, and later cars were modified to compete in the Paris-Dakar rally, winning in 1987 and 1988. The car also formed the basis of the '405 T16', which won the Paris-Daker for Peugeot in 1989 and 1990. Today, the appearance of 205 T16s is always eagerly anticipated at historic rally events, and motorsport retrospectives such as the Goodwood Festival of Speed. Peugeot 205 T16 Group B Rally Car Enthusiast's Manual chronicles the design, anatomy and operation of the 205 T16, with input from many of the drivers and engineers involved.

The ultimate development – the S1 E2 – was introduced at the end of 1985, producing over 500bhp, and winning the 1985 San Remo rally in the hands of Walter Röhrl and the famous Pikes Peak hillclimb with Michele Mouton.
