Social Welfare Policies and Programmes in South Asia
Channaveer R. M. 2019-09-18 This book examines the social welfare policies and programmes devised to address different societal issues and concerns across

the South Asian countries. It focuses on the design and delivery of social welfare policies related to women, children, the elderly and groups living below poverty level. It brings a wide array of themes to the fore – empowerment of vulnerable populations, globalization and

inclusive development, intervention in Northeast India, employment of elderly teachers in Sri Lanka, regulations in prisons, ageing South Asia and elderly care, social exclusion and urban poor, girl child education in India, child protection in Bangladesh and women panchayat leaders – to provide an evidence-based understanding of social policy formulation, implementation and monitoring in South Asia. Comprehensive and topical, this volume will be useful to scholars and researchers of political studies, sociology, development studies and public policy, and also to practitioners and those in the development sector, NGOs and think tanks.

Applied Economics for Development: Empirical Approaches to Selected Social and Economic Issues in Transition

Economies Mahmut Zortuk 2018-01-15 Transition economies experience transformation of their economic system.

Following the disintegration of the Soviet Union, a number of former socialist countries underwent transitions from central planning to a market economy. More generally, many rapidly growing economies undergo no less profound transformations of their economic systems. Contrary to common misconception, the

transition process cannot be simply reduced to eliminating state intervention and liberalizing the economy. Economies under transition exhibit a unique set of policy challenges. Unlike developed market economies, missing markets or market failures abound. Economic transformation takes the form of rapidly evolving patterns of international trade and investment, industrial structure and consumption. These changes call for appropriate public policies. A continuing flow of investment hinges on suitable institutions, the provision of public infrastructure and other public goods. Adequate regulation can be central in ensuring that environmental resources are sustainably managed. And sophisticated production systems, call for corresponding social institutions in terms of education, health and welfare provisions. In all these cases, accurate empirical assessments are central to the design of effective policy. This book presents a selection of pressing economic and social issues in transition economies. Selected issues include the development of particular industrial sectors, the drivers and consequences of foreign direct investment, public finances, urbanization, social indicators, environmental policy and energy diversification. In each case an original empirical analysis is performed, using a variety of advanced quantitative methods, applied to recent data. The book will be of interest to economists studying transition economies, economic development or having a general interest in applied economics. It will be of particular interest to applied economists, policy analysts and policy makers in transition economies, concerned with the shape and direction of appropriate economic reforms.

Argumentation and Debate Austin J. Freeley 2013-01-01 Widely praised, ARGUMENTATION AND DEBATE, 13E, uses a clear, concise, and engaging presentation that makes even complex material easy for students to understand.

The authors have adapted the text over the years to match changing practices in debate and teaching while preserving classical and conventional approaches to learning debate. This edition retains its rhetorical roots with a flexible tone open to a diverse array of debate styles that is appropriate in the contemporary context. It values the importance of inclusion and sensitivity to differences of culture, gender, orientation, class and other factors as they impact communicative choices and argumentation. Reforming European Data Protection Law Serge Gutwirth 2014-11-17 This book on privacy and data protection offers readers conceptual analysis as well as thoughtful discussion of issues, practices, and solutions. It features results of the seventh annual International Conference on Computers, Privacy, and Data Protection, CPDP 2014, held in Brussels January 2014. The book first examines profiling, a persistent core issue of data protection and privacy. It covers the emergence of

profiling technologies, on-line behavioral tracking, and the impact of profiling on fundamental rights and values. Next, the book looks at preventing privacy risks and harms through impact assessments. It contains discussions on the tools and methodologies for impact assessments as well as case studies. The book then goes on to cover the purported trade-off between privacy and security, ways to support privacy and data protection, and the controversial right to be forgotten, which offers individuals a means to oppose the often persistent digital memory of the web. Written during the process of the fundamental revision of the current EU data protection law by the Data Protection Package proposed by the European Commission, this interdisciplinary book presents both daring and prospective approaches. It will serve as an insightful resource for readers with an interest in privacy and data protection.

The SAGE Encyclopedia of Communication Research Methods

Mike Allen 2017-04-11 Communication research is evolving and changing in a world of online journals, open-access, and new ways of obtaining data and conducting experiments via the Internet. Although there are generic encyclopedias describing basic social science research methodologies in general, until now there has been no comprehensive A-to-Z reference work exploring methods specific to communication and media studies. Our entries, authored by key figures in the field, focus on special considerations when applied specifically to communication research, accompanied by engaging examples from the literature of communication, journalism, and media studies. Entries cover every step of the research process, from the creative development of research topics and questions to literature reviews, selection of

best methods (whether quantitative, qualitative, or mixed) for analyzing research results and publishing research findings, whether in traditional media or via new media outlets. In addition to expected entries covering the basics of theories and methods traditionally used in communication research, other entries discuss important trends influencing the future of that research, including contemporary practical issues students will face in communication professions, the influences of globalization on research, use of new recording technologies in fieldwork, and the challenges and opportunities related to studying online multi-media environments. Email, texting, cellphone video, and blogging are shown not only as topics of research but also as means of collecting and analyzing data. Still other entries delve into considerations of accountability, copyright, confidentiality, data ownership and security, privacy, and other aspects of conducting an ethical research program. Features: 652 signed entries are contained in an authoritative work spanning four volumes available in choice of electronic or print formats. Although organized A-to-Z, front matter includes a Reader's Guide grouping entries thematically to help students interested in a specific aspect of communication research to more easily locate directly related entries. Back matter includes a Chronology of the development of the field of communication research; a Resource Guide to classic books, journals, and associations; a Glossary introducing the terminology of the field; and a detailed Index. Entries conclude with References/Further Readings and Cross-References to related entries to guide students further in their research journeys. The Index, Reader's Guide themes, and Cross-References combine to

provide robust search-and-browse in the e-version. *Social Issues Research Summaries* Lewis D. Wilson 2014 'Social Issues Research Summaries' compiles research summaries of top professionals in the field of social issues research from a number of different focuses in this important field.

Diversity and Difference in Childhood: Issues for Theory and Practice Kerry Robinson 2017-01-16 Educators and community-based professionals are often required to work with children and families from a range of diverse backgrounds. The second edition of this popular book goes beyond simplistic definitions of diversity, encouraging a much broader understanding and helping childhood educators and community-based professionals develop a critical disposition towards assumptions about children and childhood in relation to diversity, difference and social justice. As well as drawing on research, the book gives an overview of relevant contemporary social theories, including poststructuralism, cultural studies, critical theory, postcolonialism, critical 'race' theory, feminist perspectives and queer theory. It interrogates practice and explores opportunities and strategies for creating a more equitable environment, whilst covering key issues impacting on children's lives, including: globalization, neoliberalism, new racisms, immigration, Indigeneity, refugees, homophobia, heterosexism and constructions of childhood. Each chapter provides an overview of the area of discussion, a focus on the implications for practice, and recommended readings. Providing insight into how social justice practices in childhood education and community-based service delivery can make a real difference in the lives of children, their families and communities, this is key reading for early childhood and

primary educators, community-based professionals, university students and researchers. "This thoughtful, topical book addresses a considerable range of diversity issues relevant to teacher educators, their students, and other professionals who work with children and their families within and beyond Australia. Indigenous issues including language maintenance and revival have particular relevance within postcolonial nation states. Other issues of international relevance include: identities and retention of community languages, gender equity, childhood and sexuality, poverty and inequalities, and related policies. The writing is critical, scholarly, and engaging. This timely second edition draws on the authors' longstanding teacher education experiences, and their most recent research, to revisit the challenges of diversity and difference in children's lives". Dr Valerie N. Podmore, former associate professor, Faculty of Education and Social Work, the University of Auckland, New Zealand "The second edition of Robinson and Jones Díaz's *Diversity and Difference in Childhood* is a thoroughly welcome addition to my list of key texts for students of early childhood and childhood studies. It provides a means from the outset for educating undergraduate students from within critical postmodern and post structural perspectives – thus orienting their views of and actions within their future professions towards critical and equitable practices that value difference rather than treat it as a problem to be solved. Furthermore, for practitioners who find themselves questioning modernist constructions of children, development, difference, diversity and their work, the book provides a thorough grounding in frameworks and tools that will help them re-theorise what they are doing whilst simultaneously

supporting them towards positive change.” Alexandra C. Gunn, Associate Dean (Teacher Education), University of Otago College of Education, New Zealand “This is the 21st century early childhood education text. Diversity and Difference in Childhood provides early childhood educators and scholars a powerful space for asking social justice questions in a profoundly innovative way. Diversity and difference in childhood is not a 'traditional' early childhood conversation. As the authors appropriately suggest, this book is for educators to challenge taken for granted knowledges/practices and to take “personal and professional risks for social justice”. Veronica Pacini-Ketchabaw, Ph.D., Professor, School of Child and Youth Care, University of Victoria, Canada “This new edition of Diversity and Difference is both important and timely. There is a new urgency to some emerging childhood issues, including those associated with childhood sexuality, and a distinct lack of critical resources to inform the debate. This book helps fill this gap. Undertaking a major revision and incorporating new material, the authors have ensured the book’s continued relevance and renewed significance in the very dynamic context of childhood studies. The book makes an important contribution to resourcing explorations of the many difficult and complex issues associated with childhood in a globalised yet differentiated world. Readers will find the new theoretical resources and additional chapters that have been included give the book a sense of enhanced rigour and its depth and breadth of coverage make it an ideal resource for a wide variety of interests and perspectives.” Christine Woodrow, Associate Professor and Senior Researcher, the Centre for Educational Research, Western Sydney

University, Australia

Research Methods in the Social and Health Sciences Ted Palys 2021-02-03 *Research Methods in the Social and Health Sciences: Research Decisions*, by Ted Palys and Chris Atchison, gives students a thorough, thoughtful, and highly readable introduction to the entire research process from start to finish. From its underlying premise that your research questions and objectives, rather than any specific method, should guide your research, this book discusses each step of the research process, from limiting the scope of a literature review to navigating ethical considerations to deciding which methods are best suited for finding answers to specific research questions to how to analyze data and present

findings. Readers are encouraged to think deeply about each step of the research process. The book promotes this deliberation by discussing the strengths and limitations of different methods and. Throughout the process, the authors provide many examples from their own and student research, sharing insights for research decisions arising from that experience. Readers will develop the skills to create solid research questions, perform literature reviews, identify appropriate data sources and methods, conduct research, analyze and interpret data and translate the resulting knowledge generated from the research process to a wider audience—all core parts of the research process—by developing their knowledge and creating confidence in their own decision-making skills. After explaining the unique and often complementary strengths of qualitative and quantitative methods, students focus on what methods are best suited for finding answers to the research questions that interest them. Major types of research including experiments, case studies, surveys, quasi-experiments, ethnographies, focus groups, participatory action research, and archival studies all receive significant coverage. The text illustrates how these methods are enhanced by integrating them with 21st century technologies and combining them in mixed methods projects. Chapters on constructing a research proposal and disseminating research bookend the process with concrete steps in between to support students designing their own original research projects. Study questions at the end of each chapter encourage students to think critically about the research process and how the choices a researcher makes will broaden or constrain what they can find. By the end of the text, social and health science students will feel confident in

undertaking ethical and thoughtful research. *Social Issues, Globalisation and International Institutions* Virginia A. Leary 2005-11-29 This original study examines the extent to which international labour issues have become issue of concern within the European Union, the ILO, the OECD (Organization for Economic Cooperation and Development), and the WTO (World Trade Organization).

Can Emerging Technologies Make a Difference in Development? Rachel A. Parker 2013-02-28 In this innovative and entirely original text, which has been thoughtfully edited to ensure coherence and readability across disciplines, scientists and practitioners from around the world provide evidence of the opportunities for, and the challenges of, developing collaborative approaches to bringing advanced and emerging technology to poor communities in developing countries in a responsible and sustainable manner. This volume will stimulate and satisfy readers seeking to engage in a rich and challenging discussion, integrating many strands of social thought and physical science. Moral Issues in Intelligence-led Policing Helene Oppen Gundhus 2017-09-27 The core baseline of Intelligence-led Policing is the aim of increasing efficiency and quality

of police work, with a focus on crime analysis and intelligence methods as tools for informed and objective decisions both when conducting targeted, specialized operations and when setting strategic priorities. This book critically addresses the proliferation of intelligence logics within policing from a wide array of scholarly perspectives. It considers questions such as: How are precautionary logics becoming increasingly central in the dominant policing strategies? What kind of challenges will this move entail? What does the criminalization of preparatory acts mean for previous distinctions between crime prevention and crime detection? What are the predominant rationales behind the proactive use of covert cohesive measures in order to prevent attacks on national security? How are new technological measures, increased private partnerships and international cooperation challenging the core nature of police services as the main providers of public safety and security? This book offers new insights by exploring dilemmas, legal issues and questions raised by the use of new policing methods and the blurred and confrontational lines that can be observed between prevention, intelligence and investigation in police work.

Handbook of Research in the Social Foundations of Education Steven Tozer 2011-07-05 Parts one and two of this volume present the theoretical lenses used to study the social contexts of education. These include long-established foundations disciplines such as sociology of education and philosophy of education as well as newer theoretical perspectives such as critical race theory, feminist educational theory, and cultural studies in education. Parts three, four, and five demonstrate how these theoretical lenses are used to examine such phenomena as globalization, media, popular culture, technology, youth culture, and schooling. This groundbreaking volume helps readers understand the history, evolution, and significance of this wide-ranging, often misunderstood, and increasingly important field of study. Sport for Development and Peace Simon Darnell 2012-03-15 This book is available as open access through the Bloomsbury Open Access programme and is available on

www.bloomsburycollections.com. The role of sport in development initiatives has grown dramatically over the last five years, now finding a place in the UN's millennium development goals. In *Sport and Development for Peace*, Simon Darnell outlines the most recent sociological research on the role of sport in development initiatives. The book analyses the relationship between sport and international development and looks at what this reveals about socio-political economy. It addresses a gap in the literature by focusing on issues of politics, power and culture, particularly looking at volunteer experience, mega-sporting events and sporting celebrity in the context of development. Darnell questions the belief that sport can offer a 'solution' to enduring development issues. Drawing on the latest empirical research, the book is a thorough and timely analysis of the social and political implications of tying sport to development.

Reimagining Intervention in Young Lives Karen R. Foster 2012-08-10 Poverty and unemployment are on the rise among Canadian youth. Reimagining Intervention in Young Lives looks at the issue from the perspective of those most affected, revealing the difficulties young people

encounter with the "support system." In-depth interviews with forty-five young people in Ottawa reveal that solutions do exist, predicated on recognition that the problem lies not with incorrigible youth, but with a social-aid structure that imposes barriers to success. Intervention is necessary, argue the authors, but not so much in the lives of young people as in the faulty structures that incorrectly presume how they interpret risk, poverty, and their own potential.

Furthermore, case studies and activities encourage reflection and the application of this knowledge to practice situations.

Engaging the Senses: Object-Based Learning in Higher Education Helen J. Chatterjee 2016-03-09 The use of museum collections as a path to learning for university students is fast becoming a new pedagogy for higher education. Despite a strong tradition of using lectures as a way of delivering the curriculum, the positive benefits of 'active' and 'experiential learning' are being recognised in universities at both a strategic level and in daily teaching practice. As museum artefacts, specimens and art works are used to evoke, provoke, and challenge students' engagement with their

subject, so transformational learning can take place. This unique book presents the first comprehensive exploration of 'object-based learning' as a pedagogy for higher education in a broad context. An international group of authors offer a spectrum of approaches at work in higher education today. They explore contemporary principles and practice of object-based learning in higher education, demonstrating the value of using collections in this context and considering the relationship between academic discipline and object-based learning as a teaching strategy.

How to Critique Journal Articles in the Social Sciences

Scott R. Harris 2022-01-03 Journal articles form the bedrock of social science, but they can be unfamiliar and intimidating to students. This brief, introductory guide helps readers appreciate the rigor and pitfalls of research by comparing it to more ordinary ways of knowing. Each chapter focuses on a key aspect of articles, demystifying step-by-step the complexities of social research. Harris encourages readers to avoid naivete (accepting research findings as simple Truth) and cynicism (dismissing research as hopelessly flawed), and instead adopt a critical perspective that appreciates the strengths and weaknesses of any piece of scholarship. A new chapter on research design explores how scientists choose a broad approach to study a topic, which impacts subsequent research decisions. Exercises throughout allow readers to practice the highlighted techniques in class discussion, short assignments, or a major writing project. Comprehensive yet succinct and accessible, the second edition of How to Critique Journal Articles in the Social Sciences equips students with the confidence to read and understand social research for use in their education, careers, and

personal lives.

The Welfare State in Post-Industrial Society

Jason L. Powell 2009-06-10 In recent years, major social forces such as: ageing populations, social trends, migration patterns, and the globalization of economies, have reshaped social welfare policies and practices across the globe. Multinational corporations, NGOs, and other international organizations have begun to influence social policy at a national and local level. Among the many ramifications of these changes is that globalizing influences may hinder the ability of individual nation-states to effect policies that are beneficial to them on a local level. With contributions from thirteen countries worldwide, this collected work represents the first major comparative analysis on the effect of globalization on the international welfare state. The Welfare State in Post-Industrial Society is divided into two major sections: the first draws from a number of

leading social welfare researchers from diverse countries who point to the nation-state as case studies; highlighting how it goes about establishing and revising social welfare provisions. The second portion of the volume then moves to a more global perspective in its analysis and questioning of the impact of globalization on citizenship, ageing and marketization. The Welfare State in Post-Industrial Society seeks to encourage debate about the implications of the most pressing social welfare issues in nation-states, and integrate analyses of policy and practice in particular countries struggling to provide social welfare support for their needy populations.
