The Right to Information K. M. Shrivastava 2009 This book will be the first comprehensive book in the market on a subject which is of increasing global interest. The right to information (or freedom of information) has now emerged as a key component in credible democratic governance and is vital for promoting 'open governance' and the accountability of public decision makers, as well as for strengthening transparency, participation and the rule of law. The right to information is not only fundamental for an open and democratic society, but is a key weapon in the fight against poverty and corruption leading to accelerating human development. More than 80 countries already have an FOI/RTI law and others are proceeding towards it. There are country-specific manuals and studies, there are many websites devoted to FOI issues, but there is not a single book which looks at the subject from a global perspective. The book is an attempt to fill this void.

How to Build Max-Performance Mitsubishi 4g63t Engines Robert Bowen 2008-12 The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs,

California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path. India-Pakistan Trade Normalisation Nisha Taneja 2016-12-08 This book explores the unfinished India-Pakistan Trade normalisation agenda (building upon the themes covered in the book "India-Pakistan Trade: Strengthening Economic Relations" published by Springer in 2014) and discusses the steps that must be undertaken in order to move the bilateral engagement forward. Given the commencement of bilateral state-level talks and the Indian government's emphasis on South Asian integration, it adds impetus to the trade liberalisation process, while also providing essential recommendations for policymakers in both countries. The unfinished agenda faces obstacles such as the list of items for which export from India to Pakistan continues to be restricted; lack of land borders and seamless cross-border transport services, which hampers the realisation of trade potential; negative reporting in the media, which influences traders' perceptions; and the continued occurrence of informal trade resulting from inadequacies of formal trade relations. The book examines various sectors, including the agricultural, textiles, automotive and pharmaceutical industries, given their predominance on the list of restricted items for bilateral trade. It also covers studies on unconventional and under-researched themes concerning informal trade, informational barriers to India-Pakistan trade, and opening new land borders for trade - all of which can play a facilitating role in realizing the untapped trade potential between India and Pakistan. The book also includes the second round of the India-Pakistan trade perception survey, which identifies impediments to India-Pakistan bilateral trade and assesses the change in traders' perceptions since the first round of the survey, which was published in 2014.

Success in Evaluation Rudi Turksema 2017-09-08 Success in Evaluation takes a fundamentally different approach to the mainstream supply side discussion of evaluation quality, utilization, and learning. The contributors believe that a systematic focus on success will lead to increased awareness of evaluation and its findings, a more positive attitude, and a greater chance of actual evaluation use. This book offers many different lessons on how to improve evaluation design, research processes, and reporting. It is a realistic look at performance management, the evidence movement, and the demand barriers that so often block the role evaluators can play in organizational learning and decision-making.

International case studies and lessons are included that both explain success-oriented methods and share insightful lessons from the real world. Together, they present a convincing case that evaluation for success allows for increased constructive interaction amongst both stakeholders and evaluators and, as a result, learning processes and outcomes will improve.

Police and Counterinsurgency Kuldeep Kumar 2016-02-29 How Good Policing Can Help Fight Insurgencies In Conflict-Ridden Societies. Globally, the role of local police has been receiving increased attention following conflicts in Iraq and Afghanistan. The criminalization of insurgent networks coupled with the growing nexus of warlords and drug lords and porous borders in many conflict areas have also bolstered the case for good policing. This book makes a case for the increased role of local/state police in counterinsurgency (COIN) operations by citing the successful implementation of this strategy in the state of Tripura led by the author himself. This makes Tripura the only state after Punjab and Andhra Pradesh where the police have taken full control of such operations. The work combines rigorous scholarship and research on general policing and COIN operations with incisive analysis of multiple insurgencies/terrorist movements in India.

Urban Politics Bernard H. Ross 2015-07-17 This popular text mixes the best classic theory and research on urban politics with the most recent developments in urban and metropolitan affairs. Its very balanced and realistic approach helps students to understand the nature of urban politics and the difficulty of finding effective solutions in a suburban and global age. The eighth edition provides a comprehensive review and analysis of urban policy under the Obama administration and brand new coverage of sustainable urban development. A new chapter on globalization and its impact on cities brings the history of urban development up

to date, and a focus on the politics of local economic development underscores how questions of economic development have come to dominate the local arena. The eighth edition is significantly shorter than previous editions, and the entire text has been thoroughly rewritten to engage students. Boxed case studies of prominent recent and current urban development efforts provide material for class discussion, and concluding material demonstrates the tradeoff between more ideal and more pragmatic urban politics.

Indian National Security and Counter-Insurgency Namrata Goswami 2014-11-27 This book, based on extensive field research, examines the Indian state's response to the multiple insurgencies that have occurred since independence in 1947. In reacting to these various insurgencies, the Indian state has employed a combined approach of force, dialogue, accommodation of ethnic and minority aspirations and, overtime, the state has established a tradition of negotiation with armed ethnic groups in order to bolster its legitimacy based on an accommodative posture. While these efforts have succeeded in resolving the Mizo insurgency, it has only incited levels of violence with regard to others. Within this backdrop of ongoing Indian counter-insurgency, this study provides a set of conditions responsible for the groundswell of insurgencies in India, and some recommendations to better formulate India's national security policy with regard to its counter-insurgency responses. The study focuses on the national institutions responsible for formulating India's national security policy dealing with counter-insurgency - such as the Prime Minister's Office, the Cabinet Committee on Security, the National Security Council, the Ministry of Home Affairs and the Indian military apparatus. Furthermore, it studies how national interests and values influence the formulation of this policy; and the overall success and/or failure of the policy to deal with armed insurgent movements. Notably, the study traces the ideational influence of Kautilya and Gandhi in India's overall response to insurgencies. Multiple cases of armed ethnic insurgencies in Assam, Manipur, Mizoram, and Nagaland in the Northeast of India and the ideologically oriented Maoist or Naxalite insurgency affecting the heartland of India are analysed in-depth to evaluate the Indian counter-insurgency experience. This book will be of much interest to students of counter-insurgency, Asian politics, ethnic conflict, and security studies in general.

Security, Strategy and Military Change in the 21st Century Jo Inge Bekkevold 2015-05-22 This edited volume explores and analyses strategic thinking, military reform and adaptation in an era of Asian growth, European austerity and US rebalancing. A significant shift in policy, strategy and military affairs is underway in both Asia and Europe, with the former gaining increasing prominence in the domain of global security. At the same time, the world's powers are now faced with an array of diverse challenges. The resurgence of great power politics in both Europe and Asia, along with the long term threats of terrorism, piracy and sustained geopolitical instability has placed great strain on militaries and security institutions operating with constrained budgets and wary public support.
