The Family of Jesus William Luz 2021-03-23 In a light-hearted way and with many illustrations and activities, *The Family of Jesus* is a book for

children of all cultures and beliefs. It presents the sacred teachings of Jesus, the Heavenly Educator. Addressing matters like these with the kids, whom we love so much, helps foster good values and prepares them for the challenges that may arise in their lives. Jesus loves everybody on

Earth and wants us all to live in Peace. So in the Bible story we will see in this book—also found in His Holy Gospel—the Divine Master reveals something very important about family, which is one of the greatest treasures we can have in this world. This book is the 21st volume in the Portuguese version of the ecumenical collection entitled “The Holy Gospel of Jesus.” It is based on the Good News of the Divine Friend according to Matthew 12:46-50, Mark 3:31-35, and Luke 8:19-21, and inspired by the fraternal lessons of writer Paiva Netto, who for more than six decades has been preaching in the media about the Holy Gospel and the Redeeming Apocalypse of Jesus, always in Spirit and Truth, under the light of the New Commandment of the Christ of God—“Love one another, as I have loved you. Only by this shall all of you be recognized as my disciples” (John 13:34 and 35).

Drawn to Design Eric Jenkins 2022-04-19 The book is a guide for students and teachers to understand the need for, the role of and the methods and techniques of freehand analytical sketching in architecture. The presentation focuses on drawing as an approach to and phase of architectural design. The conceptual goal of this approach is to use drawing not as illustration or depiction, but as exploration. The first part of the book discusses underlying concepts of freehand sketching in design education and practice as a complement to digital technologies. The main component is a series of chapters that constitute a typology of fundamental issues in architecture and urban design; for instance, issues of "façade" are illustrated with sketch diagrams that show how façades can be explored and sketched through a series of specific questions and step-by-step procedures. In the expanded and updated edition, a new part explores the questions and experiences of large architectural offices in applying freehand drawing in the practice of architectural design. This book is especially timely in an age in which the false conflict between "traditional vs. digital" gives way to multiple design tools, including sketching. It fosters understanding of the essential human ability to investigate the designed and the natural world through freehand drawing.

Design of Reinforced Concrete Jack C. McCormac 2005 Publisher Description

Drawing for Beginners Jasmina Susak How to draw in a nutshell - by popular pencil artist Jasmina Susak. This book is about drawing for beginners, and it is helpful to those interested in developing basic knowledge and skills. It is concise, clear, very easy to understand, and well-written in a friendly way filled with encouragement and complemented with a lot of illustrations. This book features verbal and visual explanations which make the learning much easier and with better results. The author contends that drawing and shading are skills that anyone can develop through patience, and a lot of time spent practicing your drawing even with little to no special talent for it. Why should you choose this book over the hundred others of the same topic? Because the author will teach you to draw realistic, lifelike drawings, and to give life to your drawings, instead of making flat, lifeless drawings. Because the author is a self-taught artist who can tell you about her own experience and what she has gone through--instead of repeating the curriculum that she would have learned in school, if she had attended any art school. Because the author won't tell you "Add some shading" that you can read in plenty of how-to-draw books by other authors, but she will explain to you in detail how to do it and how she does it with no further questions. Because through this book, you won't just learn how to draw a cube or cylinder that no one needs, but the

things that you will want to draw for yourself or for the people around you: animals, human faces, every day objects, 3D drawings and more. Because the author will explain to you what she has realized through her years spent on drawing, so that you don't have to think about how to do something, but immediately to start doing it; saving you time on studying and searching for the answers on the Internet. Because the author will encourage you to keep on drawing and inspire you, so that you will never want to stop doing it. In this book you will find a lot of tips and tricks to kick-start your artwork and help you to achieve stunning results. Enjoy learning!

Dibujo técnico II. 2º Bachillerato CALAVERA OPI, CESAR 2016-01-01 Los contenidos de este texto han sido desarrollados según lo establecido en el RD 1105/2014, de 26 de diciembre, (BOE 3 de enero de 2015) por el que se establece el currículo básico de la Educación Secundaria Obligatoria y del Bachillerato. A lo largo de Dibujo Técnico II se introduce un bloque denominado "Documentación gráfica de proyectos", para la integración de las destrezas adquiridas en la etapa. Los contenidos de la materia en este libro, que se concibe formativamente como continuación de Dibujo técnico I, se han agrupado en cuatro bloques interrelacionados: Geometría, Sistemas de representación, Normalización y Proyectos. El primer bloque, Geometría, desarrolla durante los dos cursos que componen el Bachillerato, los contenidos necesarios para resolver problemas de configuración de formas, al tiempo que analiza su presencia en la naturaleza y en el arte a lo largo de la historia, y sus aplicaciones al mundo científico y técnico. De manera análoga, el bloque dedicado a los Sistemas de representación desarrolla los fundamentos, características y aplicaciones de las axonometrías, perspectivas cónicas, y de los sistemas diédricos y de planos acotados. Este bloque debe abordarse de manera integrada para permitir descubrir las relaciones entre sistemas y las ventajas e inconvenientes de cada uno. Además, es conveniente potenciar la utilización del dibujo "a mano alzada" como herramienta de comunicación de ideas y análisis de problemas de representación. El tercer bloque, la Normalización, pretende dotar al estudiante de los procedimientos para simplificar, unificar y objetivar las representaciones gráficas. Está especialmente relacionado con el proceso de elaboración de proyectos, objeto del último bloque, por lo que, aunque la secuencia establecida sitúa este bloque de manera específica en el primer curso, su condición de lenguaje universal hace que su utilización sea una constante a lo largo de la etapa. El cuarto bloque, denominado Proyectos, tiene como objetivo principal que el estudiante movilice e interrelacione los contenidos adquiridos a lo largo de toda la etapa, y los utilice para elaborar y presentar de forma individual y colectiva los bocetos, croquis y planos necesarios para la definición de un proyecto sencillo relacionado con el diseño gráfico, industrial o arquitectónico.
