Count and Mass Across Languages Diane Massam 2012-09-13 This volume explores the expression of the concepts count and mass in human language and probes the complex relation between seemingly incontrovertible aspects of meaning and their varied grammatical realizations across languages. In English, count nouns are those that can be counted and pluralized (two cats), whereas mass nouns cannot be, at least not without a change in meaning (#two rices). The chapters in this volume explore the question of the cognitive and linguistic universality and variability of the concepts count and mass from philosophical, semantic, and morpho-syntactic points of view, touching also on issues in acquisition and processing. The volume also significantly contributes to our cross-linguistic knowledge, as it includes chapters with a focus on Blackfoot, Cantonese, Dagaare, English, Halkomelem, Lithuanian, Malagasy, Mandarin, Ojibwe, and Persian, as well as discussion of several other languages including Armenian, Hungarian, and Korean. The overall consensus of this volume is that while the general concepts of count and mass are available to all humans, forms of grammaticalization involving number, classifiers, and determiners play a key role in their linguistic treatment, and indeed in whether these concepts are grammatically expressed at all. This variation may be reflect the fact that count/mass is just one possible realization of a deeper and broader concept, itself related to the categories of nominal and verbal aspect.

A Nation of Nations Tom Gjelten 2016-10-25 "The dramatic and compelling story of the transformation of America during the last fifty years, told through a handful of families in one suburban county in Virginia that has been utterly changed by recent immigration. In the fifty years since the 1965 Immigration and Nationality Act, the foreign-born population of the United States has tripled. Significantly, these immigrants are not coming from Europe, as was the case before 1965, but from all corners of the globe. Today non-European immigration is ninety percent of the total immigration to the US. Americans today are vastly more diverse than ever. They look different, speak different languages, practice different religions, eat different foods, and enjoy different cultures. In 1950, Fairfax County, Virginia, was ninety percent white, ten percent African-American, with a little more than one hundred families who were 'other.' Currently the African-American percentage of the population is about the same, but the Anglo white population is less than fifty percent, and there are families of Asian, African, Middle Eastern, and Latin American origin living all over the county. A Nation of Nations follows the lives of a few immigrants to Fairfax County over recent decades as they gradually 'Americanize.' Hailing from Korea, Bolivia, and Libya, these families have stories that illustrate common immigrant themes: friction between minorities, economic competition and entrepreneurship, and racial and cultural stereotyping. It's been half a century since the 1965 Immigration and Nationality Act changed the landscape of America, and no book has assessed the impact or importance of this law as this one does, with its brilliant combination of personal stories and larger demographic and political issues."-- Publisher information.

Global Trends 2040 National Intelligence Council 2021-03 "The ongoing COVID-19 pandemic marks the most significant, singular global disruption since World War II, with health, economic, political, and security implications that will ripple for years to come." -Global Trends 2040 (2021) Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world: - Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. - Economics-increased government debt and concentrated economic power will escalate problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

China's Influence and American Interests Larry Diamond 2019-08-01 While Americans are generally aware of China's ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is time for a wake-up call. In documenting the extent of Beijing's expanding influence operations inside the United States, they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions: state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic "discourse war" waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland. Featuring ideas and policy proposals from leading China specialists, China's Influence and American Interests argues that a successful future relationship requires a rebalancing toward greater transparency, reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans, who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China,

Americans must have a far better sense of that country's ambitions and methods than they do now. Epistemic Situationism Abrol Fairweather 2017 "This volume is the first sustained examination of epistemic situationism, the clash between virtue epistemology and the situationist hypothesis supported by research in empirical psychology. Current research in social psychology suggests that environmental variables have greater explanatory and predictive power than traits in explaining human behavior and this has raised serious challenges to ethical theories, such as virtue ethics, that rely on a psychology of personality traits. However, virtue epistemology appears to assume the same trait-based psychology as virtue ethics does, and the research challenging virtue theories in ethics is relevant to philosophical theorizing about knowledge as well. Until recently virtue epistemology and situationism were separate literatures, but philosophers have begun to examine the apparent incompatibility between situationist psychology and virtue epistemology. Much of the psychological research that raises questions about the empirical adequacy of the moral psychology of virtue ethics also appears to raise doubts about the empirical adequacy of the epistemic psychology assumed by virtue epistemology. Responsibilist virtue epistemology appears particularly vulnerable because epistemic virtues like open-mindedness, conscientiousness, and intellectual courage are traits of intellectual character, but reliabilist virtue epistemology appeals to the psychology of cognitive skill, abilities, and competences that may be similarly vulnerable. The essays in this volume take up this new problem of epistemic situationism from multiple points of view - some skeptical or revisionary, others conservative."--

The Federalist Papers Alexander Hamilton 2018-08-20 Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Firm Innovation and Productivity in Latin America and the Caribbean Inter-American Development Bank 2016-07-01 This volume uses the study of firm dynamics to investigate the factors preventing faster productivity growth in Latin America and the Caribbean, pushing past the limits of traditional macroeconomic analyses. Each chapter is dedicated to an examination of a different factor affecting firm productivity - innovation, ICT usage, on-the-job-training, firm age, access to credit, and international linkages - highlighting the differences in firm characteristics, behaviors, and strategies. By showcasing this remarkable heterogeneity, this collection challenges regional policymakers to look beyond one-size-fits-all solutions and create balanced policy mixes tailored to distinct firm needs. This book is open access under a CC BY-NC-ND 3.0 IGO license.

China's Rebalancing and Gender Inequality International Monetary Fund 2021-05-11 This paper examines gender inequality in the context of structural transformation and rebalancing in China. We document declining women's relative wages and labor force participation in China during the last two decades, despite

rapid growth and expansion of the service sector. Using household data, we provide evidence consistent with a U-shaped relationship between economic development and women's labor market outcomes. Using a model of structural transformation, we show that labor market barriers for women have increased over time. Model counterfactuals suggest that removing these barriers and increasing service sector productivity can boost both gender equality and economic growth in China.

Cravings Chrissy Teigen 2016-02-23 Maybe she's on a photo shoot in Zanzibar. Maybe she's making people laugh on TV. But all Chrissy Teigen really wants to do is talk about dinner. Or breakfast. Lunch gets some love, too. For years, she's been collecting, cooking, and Instagramming her favorite recipes, and here they are: from breakfast all day to John's famous fried chicken with spicy honey butter to her mom's Thai classics. Salty, spicy, saucy, and fun as sin (that's the food, but that's Chrissy, too), these dishes are for family, for date night at home, for party time, and for a few life-sucks moments (salads). You'll learn the importance of chili peppers, the secret to cheesy-cheeseless eggs, and life tips like how to use bacon as a home fragrance, the single best way to wake up in the morning, and how not to overthink men or Brussels sprouts. Because for Chrissy Teigen, cooking, eating, life, and love are one and the same.

The Washington Consensus Reconsidered Narcís Serra 2008-04-24 This volume brings together many of the leading international figures in development studies, such as Jose Antonio Ocampo, Paul Krugman, Dani Rodrik, Joseph Stiglitz, Daniel Cohen, Olivier Blanchard, Deepak Nayyar and John Williamson to reconsider and propose alternative development policies to the Washington Consensus. Covering a wide range of issues from macro-stabilization to trade and the future of global governance, this important volume makes a real contribution to this important and ongoing debate. The volume begins by introducing the Washington Consensus, discussing how it was originally formulated, what it left out, and how it was later interpreted, and sets the stage for a formulation of a new development framework in the post-Washington Consensus era. It then goes on to analyze and offer differing perspectives and potential solutions to a number of key development issues, some which were addressed by the Washington Consensus and others which were not. The volume concludes by looking toward formulating new policy frameworks and offers possible reforms to

the current system of global governance.

"The Starch Solution is one of the most important books ever written on healthy eating."—John P. Mackey, co-CEO and director of Whole Foods Market, Inc. Fear of the almighty carb has taken over the diet industry for the past few decades—from Atkins to Dukan—even the mere mention of a starch-heavy food is enough to trigger an avalanche of shame and longing. But the truth is, carbs are not the enemy! Bestselling author John A. McDougall and his kitchen-savvy wife, Mary, prove that a starch-rich diet can actually help you attain your weight loss goals, prevent a variety of ills, and even cure common diseases. By fueling your body primarily with carbohydrates rather than proteins and fats, you will feel satisfied, boost energy, and look and feel your best. Based on the latest scientific research, this easy-to-follow plan teaches you what to eat and what to avoid, how to make healthy swaps for your favorite foods,

and smart choices when dining out. Including a 7-Day Sure-Start Plan, helpful weekly menu planner, and nearly 100 delicious, affordable recipes, The Starch Solution is a groundbreaking program that will help you shed pounds, improve your health, save money, and change your life.

Global Trends 2030 National Intelligence Council 2018-02-07 This important report, Global Trends 2030-Alternative Worlds, released in 2012 by the U.S. National Intelligence Council, describes megatrends and potential game changers for the next decades. Among the megatrends, it analyzes: - increased individual empowerment - the diffusion of power among states and the ascent of a networked multi-polar world - a world's population growing to 8.3 billion people, of which sixty percent will live in urbanized areas, and surging cross-border migration - expanding demand for food, water, and energy It furthermore describes potential game changers, including: - a global economy that could thrive or collapse - increased global insecurity due to regional instability in the Middle East and South Asia - new technologies that could solve the problems caused by the megatrends - the possibility, but by no means the certainty, that the U.S. with new partners will reinvent the international system Students of trends, forward-looking entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades will find this essential reading.
