Teaching Tech Together Greg Wilson 2019-10-08 Hundreds of grassroots groups have sprung up around the world to teach programming, web design, robotics, and other skills outside traditional classrooms. These groups exist so that people don't have to learn these things on their own, but ironically, their founders and instructors are often teaching themselves how to teach. There's a better way. This book presents evidence-based practices that will help you create and deliver lessons that work and build a teaching community around them. Topics include the differences between different kinds of learners, diagnosing and correcting misunderstandings, teaching as a performance art, what motivates and demotivates adult learners, how to be a good ally, fostering a healthy community, getting the word out, and building alliances with like-minded groups. The book includes over a hundred exercises that can be done individually or in groups, over 350 references, and a glossary to help you navigate educational jargon.

ideas for increasing diversity, equity, and inclusion (DEI) in your company. Filled with actionable advice Alida Miranda-Wolff learned through her own struggles being an outsider in a work culture that did not value inclusion, and having since worked with over 60 organizations to prioritize DEI initiatives and all the value and richness it adds to the workplace, this roadmap helps leaders: Learn why creating an environment where everyone feels belonging is the new barometer for employee engagement. Develop an understanding of the key terms around DEI and why they matter. Assess where your organization is today. Define and take the small steps that build new muscle memory into an organizational culture. Increase employee engagement, collaboration, innovation, communication, and sense of belonging. Build confidence in how to solve future DEI-related challenges. Get buy-in from colleagues (and even resisters) who can clearly see how to move forward and why. Communities have been a popular topic since the rise of the Internet and social media, but few companies have consistently harnessed their power, driven tangible value, and effectively measured their return on investment (ROI) like Salesforce.com, Star Citizen via Kickstarter, and Red Hat. Companies such as PayPal, Facebook, Bosch, Microsoft, CapitalOne, and Google, have also built communities inside their organizations, which have fostered innovation, broken down silos, and helped their organizations to operate more efficiently and collaboratively. People Powered helps C-suite leaders, founders, marketers, customer advocates, and community leaders gain a competitive advantage by answering the following questions: What is the key value proposition of building a community? What kind of community do we need and how do we build and integrate it into our organization? How do we incentivize and encourage people to get involved, build reliable growth, and keep community members engaged? How do we develop authentic, productive relationships with community members both online and in person? How do we get departmental buy-in, hire effectively, and create consistent, reliable community engagement skills in our organization? What are the strategic and tactical pitfalls and roadblocks we need to avoid? How do we make sure that our community continues to grow with us—and more importantly, how do we make sure that we continue to grow with them? People Powered pulls together over 20 years of pragmatic experience into a clear, simple methodology and blueprint to not just answer these questions, but deliver results. Don't get left behind—become an industry trailblazer and ensure your company’s longevity by tapping into the most dynamic force both outside and inside your organization: the people.

Political and Civic Leadership Richard A. Couto 2010-09-14 I jumped at the chance to shepherd this collection. This was personal for me. In the past, when I had prepared to teach courses on political leadership, I had come up with a dearth of recent scholarly attention to the topic. Perhaps my perspective on politics and leadership exacerbated the difficulty of my search. I had in mind a politics that touched all aspects of power and authority in our lives (not just government), encouraged the moral imagination, and affirmed human agency that could make the future better than the present. I searched with limited success for material that would explain how all of us shape and are shaped by politics. My perspective on leadership may have also hindered my search. I had in mind the simple notion of taking initiative on behalf of shared values. I found too little material about leadership that extended beyond the spectacle of authority and its assumption of hierarchy. I wanted to explain that each of us, regardless of our place in a hierarchy, has a calling to lead - to act on behalf of our moral imagination. Editing this volume permitted me the chance to develop the material I sought. I (as well as other teachers) no longer have a shortage of material relating politics and leadership with each other. Roots to Power Lee Staples

We Make Change Kristin Layng Szakos 2007 Community organizers work at their jobs because they are passionate, because they believe that change is possible, and because they enjoy working with people. Although it's not an occupation that leads to great wealth, community organizers can make a living at it. They get salaries, pensions and health insurance. They raise families. They do well by doing good. This book explores the world of community organizing through the voices of real people working in the field, in small towns and city neighborhoods--women and men of different races and economic backgrounds, ranging in age from those in their twenties to those in their sixties. Fourteen in-depth profiles tell the life stories of a cross-section of the diverse people who choose the life of an organizer. Other chapters, focused on issues of organizing, are tapestries of experience woven from the 81 interviews the authors conducted.

TouchPoints Douglas Conant 2011-04-12 A fresh, effective, and enduring way to lead—starting with your next interaction Most leaders feel the inevitable interruptions in their jam-packed days are troublesome. But in TouchPoints, Conant and Norgaard argue that these—and every point of contact with other people—are overlooked opportunities for leaders to increase their impact and promote their organization’s strategy and values. Through previously untold stories from Conant’s tenure as CEO of Campbell Soup Company and Norgaard’s vast consulting experience, the authors show that a leader’s impact and legacy are built through hundreds, even thousands, of interactive moments in time. The good news is that anyone can develop “TouchPoint” mastery by focusing on three essential components: head, heart, and hands. TouchPoints speaks to the theory and craft of leadership, promoting a balanced presence of rational, authentic, active, and wise leadership practices. Leadership mastery in the smallest and otherwise ordinary moments can transform aimless activity in individuals and entropy in organizations into focused energy—one magical moment at a time.

Community Practice Skills Dorothy N. Gamble 2010 Dorothy N. Gamble and Marie Weil differentiate among a range of intervention methods to provide a comprehensive and effective guide to working with communities. Presenting eight distinct models grounded in current practice and targeted toward specific goals, Gamble and Weil take an unusually inclusive step, combining their own extensive experience with numerous case and practice examples from talented practitioners in international and domestic settings. The authors open with a discussion of the theories for community work and the values of social justice and human rights, concerns that have guided the work of activists from Jane Addams and Martin Luther King Jr. to Cesar Chavez, Wangari Maathai, and Vandana Shiva. They survey the concepts, knowledge, and perspectives influencing community practice and evaluation strategies. Descriptions of eight practice models follow, incorporating real-life case examples from many parts of the world and demonstrating multiple applications for each model as well as the primary roles, competencies,

and skills used by the practitioner. Complexities and variations encourage readers to determine, through comparative analysis, which model at which time best fits the goals of a community group or organization, given the context, culture, social, economic, and environmental issues and opportunities for change. An accompanying workbook stressing empowerment strategies and skills development is also available from Columbia University Press.

Educating for Action Jason Del Gandio 2014-09-09 An inspiring instructional handbook for transforming idealism into social change

Community Organizing David S. Walls 2015-02-03 This incisive book provides a critical history and analysis of community organizing, the tradition of bringing groups together to build power and forge grassroots leadership for social, economic, racial, and environmental justice. Begun by Saul Alinsky in the 1930s, there are today nearly 200 institution-based groups active in 40 U.S. states, and the movement is spreading internationally. David Walls charts how community organizing has transcended the neighborhood to seek power and influence at the metropolitan, state, and national levels, together with such allies as unions and human rights advocates. Some organizing networks have embraced these goals while others have been more cautious, and the growing profile of community organizing has even charged political debate. Importantly, Walls engages social movements literature to bring insights to our understanding of community organizing networks, their methods, allies and opponents, and to show how community organizing offers concepts and tools that are indispensable to a democratic strategy of social change. Community Organizing will be essential reading for advanced undergraduates and graduate students of sociology, social movements and social work. It will also inform organizers and grassroots leaders, as well as the elected officials and others who contend with them.

Cultivating Communities of Practice Etienne Wenger 2002 Today's marketplace is fueled by knowledge. Yet organizing systematically to leverage knowledge remains a challenge. Leading companies have discovered that technology is not enough, and that cultivating communities of practice is the keystone of an effective knowledge strategy. Communities of practice come together around common interests and expertise- whether they consist of first-line managers or customer service representatives, neurosurgeons or software programmers, city managers or home-improvement amateurs. They create, share, and apply knowledge within and across the boundaries of teams, business units, and even entire companies-providing a concrete path toward creating a true knowledge organization. In *Cultivating Communities of Practice*, Etienne Wenger, Richard McDermott, and William M. Snyder argue that while communities form naturally, organizations need to become more proactive and systematic about developing and integrating them into their strategy. This book provides practical models and methods for stewarding these communities to reach their full potential-without squelching the inner drive that makes them so valuable. Through in-depth cases from firms such as DaimlerChrysler, McKinsey & Company, Shell, and the World Bank, the authors demonstrate how communities of practice can be leveraged to drive overall company strategy, generate new business opportunities, tie personal development to corporate goals, transfer best practices, and recruit and retain top talent. They define the unique features of these communities and outline principles for nurturing their essential elements. They provide guidelines to support communities of practice through their major stages of development, address the potential downsides of communities, and discuss the specific challenges of distributed communities. And they show how to recognize the value created by communities of practice and how to build a corporate knowledge strategy around them. Essential reading for any leader in today's knowledge economy, this is the definitive guide to developing communities of practice for the benefit-and long-term success-of organizations and the individuals who work in them. Etienne Wenger is a renowned expert and consultant on knowledge management and communities of practice in San Juan, California. Richard McDermott is a leading expert of organization and community development in Boulder, Colorado. William M. Snyder is a founding partner of Social Capital Group, in Cambridge, Massachusetts.

Build Tony Fadell 2022-05-03 ****New York Times, Wall Street Journal, and USA Today Bestseller**** Tony Fadell led the teams that created the iPod, iPhone and Nest Learning Thermostat and learned enough in 30+ years in Silicon Valley about leadership, design, startups, Apple, Google, decision-making, mentorship, devastating failure and unbelievable success to fill an encyclopedia. So that's what this book is. An advice encyclopedia. A mentor in a box. Written for anyone who wants to grow at work—from young grads navigating their first jobs to CEOs deciding whether to sell their company—Build is full of personal stories, practical advice and fascinating insights into some of the most impactful products and people of the 20th century. Each quick 5-20 page entry builds on the previous one, charting Tony's personal journey from a product designer to a leader, from a startup founder to an executive to a mentor. Tony uses examples that are instantly captivating, like the process of building the very first iPod and iPhone. Every chapter is designed to help readers with a problem they're facing right now—how to get funding for their startup, whether to quit their job or not, or just how to deal with the jerk in the next cubicle. Tony forged his path to success alongside mentors like Steve Jobs and Bill Campbell, icons of Silicon Valley who succeeded time and time again. But Tony doesn't follow the Silicon Valley credo that you have to reinvent everything from scratch to make something great. His advice is unorthodox because it's old school. Because Tony's learned that human nature doesn't change. You don't have to reinvent how you lead and manage—just what you make. And Tony's ready to help everyone make things worth making.

Building Brand Communities Carrie Melissa Jones 2020-06-09 An authentic brand community is more than just people buying your product or working alongside one another. This book articulates the critical roles of mutual concern, common values, and shared experiences in creating fiercely loyal customer and collaborator relationships. Smart organizations know that creating communities is the key to unlocking unprecedented outcomes. But too many mistakenly rely on superficial transactional relationships as a foundation for community, when really people want something deeper. Carrie Melissa Jones and Charles Vogl argue that in an authentic and enriching community, members have mutual concern for one another, share personal values, and join together in meaningful shared experiences, whether online or off. On the deepest level, brands must help members grow into who they want to be. Jones and Vogl present practices used by global brands like Yelp, Etsy, Twitch, Harley Davidson, Salesforce, Airbnb, Sephora, and others to connect in a meaningful way with the people critical for their success. They articulate how authentic communities can serve organizational goals in seven different areas: innovation, talent recruitment, customer retention, marketing, customer service, building transformational movements, and creating community forums. They also reveal principles to grow a new brand community to critical mass. This is the first comprehensive guide to a crucial differentiator that gives organizations access to untapped enthusiasm and engagement.

Undoing the Silence Louise Dunlap 2007-11 Undoing the Silence offers guidance to help both citizens and professionals influence democratic process through letters, articles, reports and public testimony. Louise Dunlap, PhD, began her career as an activist writing instructor during the Free Speech Movement of the 1960s. She learned that listening and gaining a feel for audience are just as important to social transformation as the outspoken words of student leaders atop police cars. "Free speech is a first step, but real communication matches speech with listening and understanding. That is when thinking shifts and change happens." Dunlap felt compelled to go where the silences were deepest because her work aimed not just at teaching but also at healing both individual voices and an ailing collective voice. Her tales of those adventures and what she knows about the culture of silence -- how gender, race, education, class, and family work to quiet dissent -- are interwoven with practical methods for people to put their most challenging ideas into words. Louise Dunlap gives writing workshops around the country for universities and social justice, environmental, and peace organizations that help reluctant writers get past their internal censors to find their powerful voice. Her insight strengthens strategic thinking and her "You can do it!" approach makes social-action writing achievable for everyone.

Transformational Leadership for the Helping Professions Jean F. East 2018-09-03 Twenty-first-century challenges abound for people in leadership roles in the helping professions (i.e., social work, nursing, teaching, public health, and social services). It is the mission of these professionals to facilitate change not only for consumers of their work, but also for organizations and communities. While many books written for human services leaders focus on leadership roles and tasks, Transformational Leadership for the Helping Professions explores growth in leadership, coupled with key competencies. The text also combines both classic and current theories on leadership, with a philosophical lens on its meaning and practice in human services settings. Social workers, nurses, teachers, public health workers, and community leaders will find the text to be a useful guide in strengthening their consideration of leadership theory while they practice in day-to-day work. Additionally, educators and students of leadership in the helping professions will gain a solid understanding of key facets of leadership practice within a framework that inspires a social justice, empowerment, and cultural humility perspective.
