Leave Love with Me William Lawton 2023-09-19 Desire for beauty is at the heart of human existence. Some find this meaning out of their religious or spiritual perspective. Some find it at the edge of their traditions. And others find it outside any recognizable tradition. This book speaks especially to the second and third groups of people. Desire releases us to explore difference, and to honor alternatives. Desire shapes our lives in unique ways. It centers our energies for personal and relational change, where difference can be debated, and variety permitted. We might transcend circumstances that limit us. Desire is more than “meaningfulness,” it is captivation of mind and spirit to life’s possibility. In my discovery, desire is an abandonment to beauty.

Music Documentaries for Radio Sam Coley 2021-11-16 Drawing on both academic research and real world practice, this book offers an in-depth investigation into the production of music documentaries broadcast on radio. Music Documentaries for Radio provides a thorough overview of how the genre has developed technically and editorially alongside a discussion of the practical production processes involved. Digital production equipment and online tools used in music documentary production are discussed in detail, outlining how the development of these technologies shapes the output of producers operating in both the public service and the commercial sectors of the industry. Drawing on his own experiences as an award-winning music documentary producer, the author also looks at how the industry views this form of radio documentary and considers how innovation and technical advances, as well as governmental regulation, have shaped the field. The book demonstrates how changing practices and technical innovations have led to the emergence of multi-skilled, freelance radio producers and how previously separate production roles have merged into one convergent, multifaceted position. Music Documentaries for Radio is an ideal resource for students and academics in the fields of radio studies, media production, documentary-making, and journalism studies.

Gunter 2015-02-17 Research shows that, while people around the world consistently nominate television as their most important news source, much of the content of news bulletins is lost to viewers within moments. In response, Barrie Gunter argues that this can be explained by the way in which televised news is written, packaged and presented.

Fighting for Air Eric Klinenberg 2007-01-09 A groundbreaking investigative work by a critically acclaimed sociologist on the corporate takeover of local news and what it means for all Americans For the residents of Minot, North Dakota, Clear Channel Communications is synonymous with disaster. Early in the morning of January 18, 2002, a train derailment sent a cloud of poisonous gas drifting toward the small town. Minot's fire and rescue departments attempted to reach Clear Channel, which owned and operated all six local commercial radio stations, to warn residents of the approaching threat. But in the age of canned programming and virtual DJs, there was no one in the conglomerate's studio to take the call. The people of Minot were taken unawares. The result: one death and more than a thousand injuries. Opening with the story of the Minot tragedy, Eric Klinenberg's Fighting for Air takes us into the world of preprogrammed radio shows, empty television news stations, and copycat newspapers to show how corporate ownership and control of local media has remade American political and cultural life. Klinenberg argues that the demise of truly local media stems from the federal government's malign neglect, as the agencies charged with ensuring diversity and open competition have ceded control to the very conglomerates that consistently undermine these values and goals. Such "big media" may not be here to stay, however. Eric Klineberg's Fighting for Air delivers a call to action, revealing a rising generation of new media activists and citizen journalists—a coalition of liberals and conservatives—who are demanding and even creating the local coverage they need and deserve.

Stealing All Transmissions Randal Doane 2014-10-15 Stealing All Transmissions is a love story. It's the story of how The Clash fell in love with America, and how America loved them back. The romance began in full in 1977, when select rock journalists and deejays aided the band's quest to depose the rock of indolence that dominated American airwaves. This history situates The Clash amid the cultural skirmishes of the 1970s and culminates with their September 1979 performance at the Palladium in New York City. This concert was broadcast live on WNEW, and it concluded with Paul Simonon treating his Fender bass like a woodcutter's ax. This performance produced one of the most exhilarating Clash bootleg recordings, and the photo of Simonon's outburst which graced the cover of the London Calling LP was recently deemed the greatest rock'n'roll photograph of all time. That night marked one of the last opportunities for American audiences to see The Clash as a punk band, teetering between conviction and uncertainty, before they became a seriously brilliant rock group. Stealing represents a distinctive take on the history of punk, for no other book gives proper attention to the forces of free-form radio, long-form rock journalism, or Clash bootleg recordings, many of which are now widely available on the web. This story, which takes its title from the 1981 single "Radio Clash," includes original interviews with key figures from the New York punk scene. This secret history concludes with an analysis of how we listen to music today and its impact on the written word.

Tunes for All? Iben Have 2018-12-31 In ten original essays, Danish music and media scholars discuss aspects of music on the radio from the 1920s until today. Understanding music radio as a distributed phenomenon or as a multiplicity, the authors draw upon anthropology, cultural studies and media studies along with sociological and historiographical theory. The intention is to further develop interdisciplinary approaches that may grasp the complex interrelations between radio as an institution and as practices on the one hand and music, musical practices, and musical life on the other. The essays' examples and cases are all related to the Danish Broadcasting Corporation (DR) and offer a music radio production perspective. They span the period from when broadcast music was only live to today where almost all of it is prerecorded and digitized. Some of the essays approach broad topics like early music radio's contributions to the regulation of national centres and peripheries, the debates on music radio as mechanical music, and the general changes in music repertoires and in the status of the institution's live ensembles. Music radio's roles as gatekeeper through automatic music programming are discussed in several articles as are the many ways music genres and radio formats interact. Some of the authors turn to detailed analyses at programme level in order to explain aspects of modern music radio and to suggest analytical models. The essays come with an introduction consisting of an extended overview of international music radio studies since the 1930s, and overview of the development of Danish music radio, and a theoretical preamble.

Music and the Broadcast Experience Christina Baade 2016-08-02 Music and the Broadcast Experience explores the complex ways in which music and broadcasting have developed together throughout the twentieth and into the twenty-first centuries. It brings into dialogue researchers working in media and music studies; explores and develops crucial points of contact between studies of music in radio and music in television; and investigates the limits, persistence, and extensions of music broadcasting in the Internet era. The book presents a series of case studies that address key moments and concerns in music broadcasting, past and present, written by leading scholars in the field, who hail from both media and music studies. Unified by attentiveness both to musical sound and meaning and to broadcasting structures, practices, audiences, and discourses, the chapters in this collection address the following topics: the role of live orchestral concerts and opera in the early development of radio and their relation to ideologies of musical uplift; the relation between production culture, music, and television genre; the function of music in sponsored radio during the 1930s; the fortunes of musical celebrity and artistic ambition on television; questions of music format and political economy in the development of online radio; and the negotiation of space, community, and participation among audiences, online and offline, in the early twenty-first century. The collection's ultimate aim is to explore the usefulness and limitations of broadcasting as a concept for understanding music and its cultural role, both historically and today.

Radio, Public Life and Citizen Deliberation in South Africa Sarah Chiumbu 2021-05-24 This book critically analyses the important role of radio in public life in post-apartheid South Africa. As the most widespread and popular form of communication in the country, radio occupies an essential space in the deliberation and the construction of public opinion in South Africa. From just a few state-controlled stations during the apartheid era, there are now more than 100 radio stations, reaching vast swathes of the population and providing an important space for citizens to air their views and take part in significant socio-economic and political issues of the country. The various contributors to this book demonstrate that whilst print and television media often serve elite interests and audiences, the low cost and flexibility of radio has helped it to create a 'common' space for national dialogue and deliberation. The book also investigates the ways in which digital technologies have enhanced the consumption of radio and produced a sense of imagined community for citizens, including those in marginalised communities and rural areas. This book will be of interest to researchers with an interest in media, politics and culture in South Africa specifically, as well as those with an interest in broadcast media more generally.

The Routledge Companion to Radio and Podcast Studies Mia Lindgren 2022-06-15 This comprehensive companion is a much-needed reference source for the expanding field of radio, audio, and podcast study, taking readers through a diverse range of essays examining the core questions and key debates surrounding radio practices, technologies, industries, policies, resources, histories, and relationships with audiences. Drawing together original essays from well-established and emerging scholars to conceptualize this multidisciplinary field, this book's global perspective acknowledges radio's enduring affinity with the local, historical relationship to the national, and its unpredictably transnational reach. In its capacious understanding of what constitutes radio, this collection also recognizes the latent time-and-space shifting possibilities of radio broadcasting, and of the myriad ways for audio to come to us 'live.' Chapters on terrestrial radio mingle with studies of podcasts and streaming audio, emphasizing continuities and innovations in form and content, delivery and reception, production cultures and aesthetics, reminding us that neither 'radio' nor 'podcasting' should be approached as static objects of analysis but rather as mutually constituting cultural forms. This cutting-edge and vibrant companion provides a rich resource for scholars and students of history, art theory, industry studies, journalism, media and communication, cultural studies, feminist analysis, and postcolonial studies. NPR Michael P. McCauley 2005-06-14 The people who shaped America's public broadcasting system thought it should be "a civilized voice in a civilized community"—a clear alternative to commercial broadcasting. This book tells the story of how NPR has tried to embody this idea. Michael P. McCauley describes NPR's evolution from virtual obscurity in the early 1970s, when it was riddled with difficulties—political battles, unseasoned leadership, funding problems—to a first-rate broadcast organization. The book draws on a wealth of primary evidence, including fifty-seven interviews with people who have been central to the NPR story, and it places the network within the historical context of the wider U.S. radio industry. Since the late 1970s, NPR has worked hard to understand the characteristics of its audience. Because of this, its content is now targeted toward its most loyal listeners—highly educated baby-boomers, for the most part—who help support their local stations through pledges and fund drives.
