National College Entrance Exam in China Yu Zhang 2016-01-29 This book

focuses on the National College Entrance Exam (NCEE), an important measurement of education quality in China, from both education economics and education policy perspectives. It provides a better understanding and stimulates more sophisticated evaluations of NCEE-related policies in China from the perspectives of education equity, the effectiveness of education input, and education quality. This book reports inspiring findings based on high-quality individual level data, innovative measurement design, and various appropriate identification strategies. The most import conclusion is that both education equity and quality can be achieved using well-designed policies based on solid empirical evidence. This is likely the first book published in English to discuss the NCEE so extensively from multiple perspectives using concrete evidence.

2004 Physics Education Research Conference Jeffrey Marx

2005-09-29 The 2004 Physics Education Research (PER) Conference brought together researchers in how we teach physics and how it is learned. Student understanding of concepts, the efficacy of different pedagogical techniques, and the importance of student attitudes toward physics and knowledge were all discussed. These Proceedings capture an important snapshot of the PER community, containing an incredibly broad collection of research papers of work in progress.

Private Secondary Schools Peterson's 2011-05-01 Peterson's Private Secondary Schools is everything parents need to find the right private secondary school for their child. This valuable resource allows students and parents to compare and select from more than 1,500 schools in the U.S. and Canada, and around the world. Schools featured include independent day schools, special needs schools, and boarding schools (including junior boarding schools for middle-school students). Helpful information listed for each of these schools include: school's area of specialization, setting, affiliation, accreditation, tuition, financial aid, student body, faculty, academic programs, social life, admission information, contacts, and more. Also includes helpful articles on the merits of private education, planning a successful school search, searching for private schools online, finding the perfect match, paying for a private education, tips for taking the necessary standardized tests, semester programs and understanding the private schools' admission application form and process.

The Role of Science Popularization in Science, Technology & Innovation Policy Akram Ghadimi 2021-01-06

Popularisation of Science, Technology and Innovation (STI) is a process of communicating and appropriating scientific and technological knowledge among broad sectors of the population. This process, however, must contribute to an effective integration of a number of historical, cultural, political, social and economic situations; and make such knowledge a central component of the culture of social awareness and collective intelligence. The possibilities of gaining access to information are changing our vision while transforming the relationship between human beings, and the appropriation and dissemination of knowledge. Today, access to STI related knowledge is synonymous with development, well-being and improving quality of life. In this context, S&T literacy is a social and ethical right of all human beings. But developing countries face formidable challenges in increasing the capacity to store, retrieve and transmit S&T information. For this reason, the areas to be reached by STI must be broadened to integrate formal education and communication with informal efforts; while also making scientific and technological knowledge available to the ordinary citizen. This book includes 14 papers contributed by researchers, scientists, experts and professionals from 9 different developing countries namely Bhutan, Cuba, India, Iran, Mauritius, Nigeria, Sri Lanka, Togo and Zimbabwe. And each paper gives significant insight into various policies and strategies that are being adopted or need to be adopted by the developing countries to ensure effective communication and popularisation of scientific knowledge.
