**An African Elegy** Ben Okri 2024-02-13 This moving collection of poems from the Booker Prize-winning author finds strength and hope while reflecting on the complex issues that have plagued Africa. First published in 1992, Ben Okri's remarkable debut poetry collection plays with the mystique of the "Dark Continent," countering simplistic narratives of suffering that have been imposed on it with vibrant, nuanced portraits of the traditions and resilience of the African people.

**South African Schooling: The Enigma of Inequality** Nic Spaull 2019-11-05 This volume brings together many of South Africa's leading scholars of education and covers the full range of South African schooling: from financing and policy reform to in-depth discussions of literacy, numeracy, teacher development and curriculum change. The book moves beyond a historical analysis and provides an inside view of the questions South African scholars are now grappling with: Are there different and preferential equilibria we have not yet thought of or explored, and if so what are they? In practical terms, how does one get to a more equitable distribution of teachers, resources and learning outcomes? While decidedly local, these questions resonate throughout the developing world. South Africa today is the most unequal country in the world. The richest 10% of South Africans lay claim to 65% of national income and 90% of national wealth. This is the largest 90-10 gap in the world, and one that is reflected in the schooling system. Two decades after apartheid it is still the case that the life chances of most South African children are determined not by their ability or the result of hard-work and determination, but instead by the colour of their skin, the province of their birth, and the wealth of their parents. Looking back on almost three decades of democracy in South Africa, it is this stubbornness of inequality and its patterns of persistence that demands explanation, justification and analysis. "This is a landmark book on basic education in South Africa, an essential volume for those interested in learning outcomes and their inequality in South Africa. The various chapters present conceptually and empirically sophisticated analyses of learning outcomes across divisions of race, class, and place. The book brings together the wealth of decades of research output from top quality researchers to explore what has improved, what has not, and why." Prof Lant Pritchett, Harvard University "There is much wisdom in this collection from many of the best education analysts in South Africa. No surprise that they conclude that without a large and sustained expansion in well-trained teachers, early childhood education, and adequate school resources, South Africa will continue to sacrifice its people's future to maintaining the privileges of the few." Prof Martin Carnoy, Stanford University "Altogether, one can derive from this very valuable volume, if not an exact blueprint for the future, then certainly at least a crucial and evidence-based itinerary for the next few steps." Dr Luis Crouch, RTI

**Race, Ethnicity, and Language Data** Institute of Medicine 2009-12-30 The goal of eliminating disparities in health care in the United States remains elusive. Even as quality improves on specific measures, disparities often persist. Addressing these disparities must begin with the fundamental step of bringing the nature of the disparities and the groups at risk for those disparities to light by collecting health care quality information stratified by race, ethnicity and language data. Then attention can be focused on where interventions might be best applied, and on planning and evaluating those efforts to inform the development of policy and the application of resources. A lack of standardization of categories for race, ethnicity, and language data has been suggested as one obstacle to achieving more widespread collection and utilization of these data. Race, Ethnicity, and Language Data identifies current models for collecting and coding race, ethnicity, and language data; reviews challenges involved in obtaining these data, and makes recommendations for a nationally standardized approach for use in health care quality improvement.

Join award-winning psychologist and BBC Radio 4 presenter Claudia Hammond as she delves into big and small questions around the surprising psychology of money. Funny, insightful and eye-opening, Mind Over Money will change the way you think about the cash in your pocket and the figures in your bank account forever.

**Shirley, Goodness and Mercy** Chris van Wyk 2015-04-01 Shirley, Goodness & Mercy is a heart-warming, yet compellingly honest story about a young boy growing up in Newclare, Coronationville and Riverlea during the apartheid era. Despite Van Wyk's later becoming involved in the 'struggle', this is not a book about racial politics. Instead, it is a delightful account of one boy's special relationship with the relatives, friends and neighbours who made up his community, and of the important coping role laughter and humour played during the years he spent in bleak and dusty townships. In Shirley, Goodness & Mercy Chris van Wyk - poet, novelist and short story writer - had created a truly remarkable work, at once both thought-provoking and vastly entertaining.

**The Routledge Handbook of Language Revitalization** Leanne Hinton 2018-03-05 The Routledge Handbook of Language Revitalization is the first comprehensive overview of the language revitalization movement, from the Arctic to the Amazon and across continents. Featuring 47 contributions from a global range of top scholars in the field, the handbook is divided into two parts, the first of which expands on language revitalization issues of theory and practice while the second covers regional perspectives in an effort to globalize and decolonize the field. The collection examines critical issues in language revitalization, including: language rights, language and well-being, and language policy; language in educational institutions and in the home; new methodologies and venues for language learning; and the roles of documentation, literacies, and the internet. The volume also contains chapters on the kinds of language that are less often researched such as the revitalization of music, of whistled languages and sign languages, and how languages change when they are being revitalized. The Routledge Handbook of

Language Revitalization is the ideal resource for graduate students and researchers working in linguistic anthropology and language revitalization and endangerment.

**Max and the Cats** Moacyr Scliar 1990 Cloaked among the leopard skins in his father's Berlin fur shop, young Max Schmidt grows up dreaming of adventure and intrigue. When as a young man an illicit affair gets him denounced to the Nazi secret police, Max barely escapes on a freighter -- only to founder off the coast of South America. Trapped in a dinghy with a hungry jaguar, he believes his days are numbered -- until he washes ashore on the coast of Brazil prepared to begin life anew. But just when he thinks he has left behind the cats of his youth, another appears...and Max realizes the time has come to take his destiny into his own hands. Book jacket.

**Handbook of Quality of Life in African Societies** Irma Eloff 2019-08-09 This handbook reflects on quality-of-life in societies on the continent of Africa. It provides a widely interdisciplinary text with insights on quality-of-life from a variety of scientific perspectives. The handbook is structured into sections covering themes of social context, culture and community; the environment and technology; health; education; and family. It is aimed at scholars who are working towards sustainable development at the intersections of multiple scientific fields and it provides measures of both objective and subjective quality-of-life. The scholarly contributions in the text are based on original research and it spans fields of research such as cultures of positivity, wellbeing, literacy and multilingualism, digital and mobile technologies, economic growth, food and nutrition, health promotion, community development, teacher education and family life. Some chapters take a broad approach and report on research findings involving thousands, and in one case millions, of participants. Other chapters zoom in and illustrate the importance of specificity in quality-of-life studies. Collectively, the handbook illuminates the particularity of quality-of-life in Africa, the unique contextual challenges and the resourcefulness with which challenges are being mediated. This handbook provides empirically grounded conceptualizations about life in Africa that also encapsulate the dynamic, ingenious ways in which we, as Africans, enhance our quality-of-life.

**Information and Communication Technology for Development (ICT4D)** Richard Heeks 2017-11-08 Mobile phones are close to ubiquitous in developing countries; Internet and broadband access are becoming commonplace. Information and communication technologies (ICTs) thus represent the fastest, broadest and deepest technical change experienced in international development. They now affect every development sector - supporting the work of hundreds of millions of farmers and micro-entrepreneurs; creating millions of ICT-based jobs; assisting healthcare workers and teachers; facilitating political change; impacting climate change; but also linked with digital inequalities and harms - with the pace of change continuously accelerating. Information and Communication Technology for Development (ICT4D) provides the first dedicated textbook to examine and explain these emerging phenomena. It will help students, practitioners, researchers and other readers understand the place of ICTs within development; the ICT-enabled changes already underway; and the key issues and interventions that engage ICT4D practice and strategy. The book has a three-part structure. The first three chapters set out the foundations of ICT4D: the core relation between ICTs and development; the underlying components needed for ICT4D to work; and best practice in implementing ICT4D. Five chapters then analyse key development goals: economic growth, poverty eradication, social development, good governance and environmental sustainability. Each chapter assesses the goal-related impact associated with ICTs and key lessons from real-world cases. The final chapter looks ahead to emerging technologies and emerging models of ICT-enabled development. The book uses extensive in-text diagrams, tables and boxed examples with chapter-end discussion and assignment questions and further reading. Supported by online activities, video links, session outlines and slides, this textbook provides the basis for undergraduate, postgraduate and online learning modules on ICT4D.

ICEESE 2016 brought together innovative academics and industrial experts in the field of energy equipment science and engineering to a common forum. The primary goal of the conference is to promote research and developmental activities in energy equipment science and engineering and another goal is to promote scientific information interchange between researchers, developers, engineers, students, and practitioners working all around the world. The conference will be held every year to make it an ideal platform for people to share views and experiences in energy equipment science and engineering and related areas.

**Balancing Individualism and Collectivism** Janet McIntyre-Mills 2017-10-03 This book addresses the social and environmental justice challenge to live sustainably and well. It considers the consequences of our social, economic and environmental policy and governance decisions for this generation and the next. The book tests out ways to improve representation, accountability and re-generation. It addresses the need to take into account the ethical implications of policy and governance decisions in the short, medium and long term based on testing out the implications for self, other and the environment. This book recognizes the negative impact that humans have had on the Earth's ecosystem and recommends a less anthropocentric way of looking at policies and governance. The chapters discuss the geologic impact that people have had on the globe, both positive and negative, and brings awareness to the anthropocentric interventions that have influenced life on Earth during the Holocene era. Based on these observations, the authors discuss original ideas and critical reviews on ways to govern those who interpret the world in terms of human values and experience, and to conduct an egalitarian lifestyle. These ideas address the growing rise in the size of the ecological footprints of some at the expense of the majority, the growth in unsustainable food choices and of displaced people, and the need for a new sense of relationship with nature and other animals, among other issues. The chapters included in Balancing Individualism and Collectivism: Social and Environmental Justice encourage readers to challenge the sustainability agenda of the anthropocentric life. Proposed solutions to these unsustainable actions include structuralized interventions and volunteerism through encouragement and education, with a focus on protecting current and future generations of life through new governmental etiquette and human cognizance.
