*Sophie's World* Jostein Gaarder 2007-03-20 One day Sophie comes home from school to find two questions in her mail: "Who are you?" and "Where does the world come from?" Before she knows it she is enrolled in a correspondence course with a mysterious philosopher. Thus begins Jostein Gaarder's unique novel, which is not only a mystery, but also a complete and entertaining history of philosophy.

*Thirty Years That Changed the World* Michael Green 2004-03-08 Green opens up the gripping story of the Book of Acts, highlighting the astonishing, volcanic eruption of faith found there and comparing it to the often halfhearted Christianity of the modern Western world.

**Severo Sarduy and the Neo-baroque Image of Thought in the Visual Arts** Rolando Perez 2012 Severo Sarduy never enjoyed the same level of notoriety as did other Latin American writers. On the other hand, he never lacked for excellent critical interpretations of his work from

critics like Roberto Gonz lez Echevarra -a, Ren (c) Prieto, Gustavo Guerrero, and other reputable scholars. Missing, however, from what is otherwise an impressive body of critical commentary, is a study of the importance of painting and architecture, first, to his theory, and second, to his creative work. In order to fill this lacuna in Sarduy studies, Rolando P (c)rez's book undertakes a critical approach to Sarduy's essays "Barroco, Escrito sobre un cuerpo, Barroco y neobarroco, and La simulaci 3n "from the stand point of art history. In short, no book on Sarduy until now has traced the multifaceted art historical background that informed the work of this challenging and exciting writer. It will be a book that many a critic of Sarduy and the Latin American baroque will consult in years to come.

**Adolescent Psychology in Today's World [3 volumes]** Michael J. Nakkula 2018-11-02 This groundbreaking three-volume set spotlights how conditions around the world are affecting the healthy development

of adolescents in their respective environments, on all six continents. Continually unstable or perpetually poor economic conditions, globalization, and rapid technological change are just three of the forces affecting a group 1.2 billion strong today, a demographic poised to become our world leaders and catalysts in the not-too-distant future: the world's adolescents. Led by two editors who have been dedicated to studying adolescent development worldwide for decades, this novel collection of works from contributors in more than 40 countries emphasizes how possibilities for healthy mental and physical development are affected by the difficulties youths face in their countries and how these challenges have shaped, and are shaping, contemporary teenage life today. The set comprehensively addresses issues for adolescents across the globe, such as the day-to-day challenges of poverty, inadequate education, violence or war, disease, reproductive matters, globalization and technological challenges, and more, while also providing a strengths-based focus in the volumes, showing how and why some teenagers in each country have surmounted the challenges and forged stronger characters to better their worlds. These stories document more than personal victories, and their experiences matter to far more than the adolescents themselves. In its State of the World's Children 2011 report, UNICEF noted that the world community needs to turn its attention to adolescents in need, explaining that focusing on this large and potentially powerful group makes economic sense as well as being a necessary step in working towards achieving human justice. By addressing the risks, challenges, and strengths of teenagers as a group in countries worldwide, this work serves to break the cycle of poverty, violence, discrimination, and death for adolescents.

### **Climate Change 2022 - Mitigation of Climate Change**

Intergovernmental Panel on Climate Change (IPCC) 2023-08-17 This Working Group III contribution to the IPCC Sixth Assessment Report provides a comprehensive and transparent assessment of the literature on climate change mitigation. The report assesses progress in climate change mitigation options for reducing emissions and enhancing sinks. With greenhouse gas emissions at the highest levels in human history, this report provides options to achieve net zero, as pledged by many countries. The report highlights for the first time the social and demand-side aspects of climate mitigation, and assesses the literature on human behaviour, lifestyle, and culture, and its implications for mitigation action. It brings a wide range of disciplines, notably from the social sciences, within the scope of the assessment. IPCC reports are a trusted source for decision makers, policymakers, and stakeholders at all levels (international, regional, national, local) and in all branches (government, businesses, NGOs). Available as Open Access on Cambridge Core.

**Big Bang Big God** Rodney Holder 2013-10-18 How did the universe begin and how has it evolved? Does a scientific explanation mean that we can do without God? Why are the laws of nature so special ('fine-tuned') as to produce a universe with intelligent creatures like us in it in the first place? Can the existence of a multiverse, a vast or infinite collection of universes, explain the specialness of this universe? This book argues that only God provides an explanation for the universe to exist at all, and that design by God provides the best and most rational explanation to adopt for the fine-tuning.

**Main Lines, Blood Feasts, and Bad Taste** Lester Bangs 2008-12-10 Before his untimely death in 1982, Lester Bangs was inarguably the most influential critic of rock and roll. Writing in hyper-intelligent Benzedrine prose that calls to mind Jack Kerouac and Hunter S. Thompson, he eschewed all conventional thinking as he discussed everything from Black Sabbath being the first truly Catholic band to Anne Murray's smoldering sexuality. In Mainlines, Blood Feasts, Bad Taste fellow rock critic John Morthland has compiled a companion volume to *Psychotic Reactions and Carburetor Dung*, the first, now classic collection of Bangs's work. Here are excerpts from an autobiographical piece Bangs wrote as a teenager, travel essays, and, of course, the music pieces, essays, and criticism covering everything from titans like Miles Davis, Lou Reed, and the Rolling Stones to esoteric musicians like Brian Eno and Captain Beefheart. Singularly entertaining, this book is an absolute must for anyone interested in the history of rock.

**Mayflower Dreams** Karen Petit 2017-10-27 Deep inside the common house, William Bradford coughed and wheezed. His face was as gray as the smoke from the fire. His right hand tried to roll a large barrel of gunpowder toward the door while his left hand pressed against the wall for support. Pieces of smoldering straw fell down from the roof, landing on him and the barrel. Thou art too sick to move that barrel. Let us help thee. Before, during, and after the 1620 voyage on the Mayflower, the Pilgrims experienced a common house fire, other challenges, and many

accomplishments. Their journey is explored by Rose Hopkins when she travels backward in time and meets her ancestors through *Mayflower Dreams*. Within her reality and dreams, Rose finds that her modern life connects to Pilgrim history and culture. In her reality, Rose has problems living in the present. She is often late and is separated from her husband. She connects to her ancestors as she uses a sampler to look for a watch. Her journey includes visiting Pilgrim Hall Museum, Plymouth Rock, Plimoth Plantation, and the Mayflower II. In her dreams, Rose uses lucid dreaming techniques to create a dream story. She meets many Pilgrims, including John Robinson, the pastor of the Puritans. The Pilgrim history, lifestyle, dialogue, and dreams of religious freedom are realistically displayed within Rose's dream story.

**One Planet, Many People** Ashbindu Singh 2005 Launched to mark World Environment Day 2005, and produced by the UNEP in collaboration with organisations such as the US Geological Survey and NASA, this publication uses text, illustrations, satellite images and ground photographs to depict and analyse humanity's impact on our environment. Issues discussed include: population growth and urbanisation, natural resources consumption, land use intensification, biodiversity and habitat loss; environmental impacts and trends including global warming, air and water pollution, and the impacts on oceans and coastal zones, forests and tundra; changes that result from geo-hazards such as earthquakes and tsunamis, climate hazards such as floods and droughts, and industrial hazards such as nuclear accidents and oil spills; and suggestions for mitigating the effects of global environmental change.

**The End of Religion, the Beginning of Self** M. Bruno Curfs 2012-04-18 [For your convenience there is a dedicated website available, click here. Also connect on Facebook!] With *The End of Religion, The Beginning of Self* readers can look forward to an in-depth analysis, profound interpretation and insightful reflection of the Bible. This spectacular read freely shares a thought-provoking perspective about famous and less famous Bible stories and their practical significance in the reader's life. Every letter of the Hebrew Alphabet is explained in a separate chapter and in many different ways, as a letter and as a letter-name, as a number and as a number-name, as part of scripture and as part of words. This technique is one of the most important legacies given to human kind. There is no doubt scientists will be baffled by this innovative knowledge for centuries to come, especially when they get wind of its applications. Exhilarating, this read contains poems, riddles and appendices for extra depth and emphasis. So what are you waiting for? Let this book open the doors to a greater and more profound understanding about life, the universe and everything!

**Psychotic Reactions and Carburetor Dung** Lester Bangs 1988-09-12 Vintage presents the paperback edition of the wild and brilliant writings of Lester Bangs--the most outrageous and popular rock critic of the 1970s--edited and with an introduction by the reigning dean of rock critics, Greil Marcus.

**Faith Isn't Blind** Patrick Ford 2016-02-17 Popular culture constantly bombards us with the idea that modern scientific knowledge has rendered Christianity obsolete. The common conception is that those who believe in God do so through blind faith—a faith that is devoid of proof and in contrast with scientific knowledge. However despite this perception, there are multiple independent scholarly arguments that point toward the existence of a Christian God, including: • the weakness of naturalism as an explanation for our world; • the congruency of God and modern science, including evolution; • the cosmological argument and the beginning of the universe; • the intelligent design of our universe; • the existence of an objective moral law; • the secular sources that confirm the life and events of Jesus Christ; • the credibility of the New Testament; and • the historical evidence for the death and resurrection of Jesus Christ. While belief in God is not an academic conclusion, God did not leave us without any indications of his existence. These independent arguments build a cumulative case that leads to the logical conclusion that God really does exist, and therefore, *Faith Isn't Blind*.

**Getting the Most Bang for the Education Buck** Frederick M. Hess How might school funds be spent more effectively in today's uncertain environment? This up-to-date volume explores a range of ideas to help schools and districts better manage their resources, including: how to rethink staffing and management to get more value for employee compensation; how policymakers might revisit pension arrangements in ways that control costs while putting more teacher compensation in the form of take-home pay; how educators and policymakers can leverage technology as a performance-enhancer and not just a cost-cutting

opportunity; and how districts might frame spending options differently in order to more properly assess the needs and preferences of students and families. As American education enters the next decade of challenges, including shortfalls due to the COVID-19 pandemic, *Getting the Most Bang From the Education Buck* will be a valuable guide for how to spend dollars wisely and well. Contributors: Chad Aldeman, Bryan Hassel, Emily Hassel, Matthew Ladner, Nathan Levenson, Michael Q. McShane, Scott Milam, Karen Hawley Miles, Katie Morrison-Reed, Marguerite Roza, Carrie Stewart, and Adam Tyner. "Finally, a book that gets beyond the academic debate about whether money matters in education (spoiler alert: It does) to offer suggestions for how to make scarce education dollars matter more. This book offers practical solutions to real-world problems like outdated staffing models, declining enrollments, and increasing special education costs, along with frameworks for tackling other tough resource-allocation challenges." —Carrie Conaway, senior lecturer on education, Harvard Graduate School of Education

**Between Shades of Gray** Ruta Sepetys 2011-03-22 The inspiration for the major motion picture *Ashes in the Snow*! "Few books are beautifully written, fewer still are important; this novel is both." --The Washington Post From New York Times and international bestseller and Carnegie Medal winner Ruta Sepetys, author of *Salt to the Sea*, comes a story of loss and of fear -- and ultimately, of survival. A New York Times notable book An international bestseller A Carnegie Medal nominee A William C. Morris Award finalist A Golden Kite Award winner Fifteen-year-old Lina is a Lithuanian girl living an ordinary life -- until Soviet officers invade her home and tear her family apart. Separated from her father and forced onto a crowded train, Lina, her mother, and her young brother make their way to a Siberian work camp, where they are forced to fight for their lives. Lina finds solace in her art, documenting these events by drawing. Risking everything, she imbeds clues in her drawings of their location and secretly passes them along, hoping her drawings will make their way to her father's prison camp. But will strength, love, and hope be enough for Lina and her family to survive? A moving and haunting novel perfect for readers of *The Book Thief*. Praise for *Between Shades of Gray*: "Superlative. A hefty emotional punch." --The New York Times Book Review "Heart-wrenching . . . an eye-opening reimagining of a very real tragedy written with grace and heart." --The Los Angeles Times "At once a suspenseful, drama-packed survival story, a romance, and an intricately researched work of historical fiction." --The Wall Street Journal \* "Beautifully written and deeply felt . . . An important book that deserves the widest possible readership." --Booklist, starred review "A superlative first novel. A hefty emotional punch." --The New York Times Book Review "A brilliant story of love and survival." --Laurie Halse Anderson, bestselling author of *Speak* and *Wintergirls* \* "Beautifully written and deeply felt...an important book that deserves the widest possible readership." --Booklist, Starred Review

**Eternal Prey** Nina Bangs 2010-12-28 USA Today bestseller Nina Bangs is a star of paranormal romance and her wildly popular *Gods of the Night* series—which Publishers Weekly calls a "skillful blend of vampirology, Mayan lore, and extinct monoliths"—places her in the esteemed company of Lara Adrian, Marjorie M. Liu, and Pamela Palmer. *Eternal Prey* continues her streak of masterful, breathtakingly original dark romantic fantasy—a story of vampires, shapeshifters, and ultimate predators...and the forbidden love of a human woman, the unlikely leader of immortals, for a magnificent, greater-than-human creature who has sworn to avenge his brother's murder.

**Fundamentals of Transfer Pricing** Raffaele Petrucci 2022-06-20 This is Part Two of a crucially significant two-volume set on the nature of transfer pricing that fully elucidates how the growing body of applicable rules works in practice. The preceding volume, subtitled *General Topics and Specific Transactions*, focused on basic principles and specialized topics. This volume enlarges the scope of the first volume, particularly concerning industry specifics, regional considerations, the use of new technologies, and the intersection between transfer pricing rules and other disciplines. As in the first volume, stakeholding contributors from government, multinational companies, international organizations, advisory groups, and academia offer deeply informed perspectives, both general and specific, on the practical application of transfer pricing rules. With numerous examples and relevant international judicial precedents, the authors augment the first volume in such ways as the following: extended analysis of particular business sectors, including automotive, banking, consumer goods, insurance, IT, oil and gas, and pharmaceuticals; specific jurisdictional coverage of the United States, the European Union, Brazil, China, and India; detailed presentation of the

use of new technologies by both taxpayers and tax authorities; and further in-depth analysis of transfer pricing's interaction with various fields of law. With this authoritative source of practical guidance, advisors, in-house practitioners, government officials, and academics worldwide will have all the details they need to move forward in tackling the complex aspects of the current transfer pricing environment. **Disaster Management in Sub-Saharan Africa** Roland Azibo Balgah 2022-04-21 A combined analysis of all the chapters provides an interesting summary and information for creating disaster management policies for improved results in SSA. With an extensive glossary of terms and index, the book lends itself to specialized academics and students, but also to disaster management policy makers and practitioners.

**Parenteral Medications, Fourth Edition** Sandeep Nema 2019-07-19 Parenteral Medications is an authoritative, comprehensive reference work on the formulation and manufacturing of parenteral dosage forms, effectively balancing theoretical considerations with practical aspects of their development. Previously published as a three-volume set, all volumes have been combined into one comprehensive publication that addresses the plethora of changes in the science and considerable advances in the technology associated with these products and routes of administration. Key Features: Provides a comprehensive reference work on the formulation and manufacturing of parenteral dosage forms Addresses changes in the science and advances in the technology associated with parenteral medications and routes of administration Includes 13 new chapters and updated chapters throughout Contains the contributors of leading researchers in the field of parenteral medications Uses full color detailed illustrations, enhancing the learning process The fourth edition not only reflects enhanced content in all the chapters but also highlights the rapidly advancing formulation, processing, manufacturing parenteral technology including advanced delivery and cell therapies. The book is divided into seven sections: Section 1 - Parenteral Drug Administration and Delivery Devices; Section 2 - Formulation Design and Development; Section 3 - Specialized Drug Delivery Systems; Section 4 - Primary Packaging and Container Closure Integrity; Section 5 - Facility Design and Environmental Control; Section 6 - Sterilization and Pharmaceutical Processing; Section 7 - Quality Testing and Regulatory Requirements

**The New Answers Book Volume 2** Ken Ham 2008-06-01 What happens when you have more "hot" questions on the Bible and creationism than you can answer in one book? You create a second volume! The New Answers Book 2 explores over 30 exciting and faith-affirming topics, including: The fall of Lucifer and the origin of evil When does life begin (and why does it matter)? Is evolution a religion (and why should I care)? Archaeology, Egyptian Chronology, and the great flood Could early biblical figures like Noah really live to over 900 years of age? What was the Star of Bethlehem (and how did the wise men follow it)? The "Evolutionization" of our culture — including intelligent design, gay marriage, Hollywood movies, and more! Explore these and other topics, answered biblically and logically in this book from the world's largest apologetics ministry, Answers in Genesis. Contributors include Ken Ham, Dr. Andrew Snelling, Dr. Jason Lisle, Dr. Elizabeth Mitchell, Dr. Danny Faulkner, Mike Riddle, and more.

**Minerals Yearbook 2011**

**Democratization and Market Reform in Developing and Transitional Countries** James G. McGann 2010-01-04 This book explores the pivotal role of think tanks in the democratization and economic reform movements by evaluating their overall effect on the transformation process in developing and transitional countries around the world. James G. McGann assesses twenty-three think tanks, located in nine countries and four regions of the world: Chile, Peru, Poland, Slovakia, South Africa, Botswana, the Philippines, Thailand, and Vietnam, that have most impacted political and economic transitions in their respective countries. The author examines the role they played in the process of democratization and market reform during the late 80s and 90s and identifies the importance of think tanks in these processes by evaluating their overall effect on the policymaking process. He argues in the early stages of a transition from an authoritarian regime to an open and democratic society the activities of think tanks are especially critical, and they have provided a civil society safety net to support these fragile democracies. This book will be of interest to students and scholars of political science, democratization, development, economic development and civil society.

**Civil Society and Nuclear Non-Proliferation** Claudia Kissling 2016-05-23 Since the end of the Cold War, globalization has brought new actors to the political arena. One of those which has attracted

considerable attention in academic research is civil society or NGOs. Claudia Kissling addresses the topic of civil society participation in the nuclear non-proliferation regime. The regime qualifies well for this objective since it features, given its characteristics as a treaty regime in the international security field, notable legal avenues for civil society participation. The study takes on a twofold perspective. It addresses the empirical question of whether civil society can contribute to the evolution of regimes in the security field, especially when it comes to security cooperation. It also questions whether civil society can, under certain conditions, contribute to the democratic quality of international decision-making. Here, empirical findings are used in order to test normative political theories on the legitimacy and democracy of global institutions.

**30 Bangs** Roosh V 2012-03-07 Erotic memoir

When Sophie Gets Angry - Really, Really Angry... Molly Bang 2016-04-26 Three-time Caldecott Honor artist Molly Bang's award-winning book helps children and parents better understand anger. Everybody gets angry sometimes. And for children, anger can be very upsetting and frightening. In this Caldecott Honor book, children will see what Sophie does when she gets angry. Parents, teachers, and children can talk about it. People do lots of different things when they get angry. What do you do?

Changing Global Perspectives on Horseshoe Crab Biology, Conservation and Management Ruth H. Carmichael 2015-11-09 This book reports significant progress of scientific research on horseshoe crabs, including aspects of evolution, genetics, ecology, population dynamics, general biology and physiology, within the recent 10 years. It also highlights the emerging issues related to world-wide conservation threats, status and needs. The contributions in this book represent part of an ongoing global effort to increase data and concept sharing to support basic research and advance conservation for horseshoe crabs.

Cosmos & Culture: Cultural Evolution in a Cosmic Context Steven J. Dick 2012-01-27 NOTE: NO FURTHER DISCOUNT FOR THIS PRINT

PRODUCT--OVERSTOCK SALE -- Significantly reduced list price During the last 50 years, coincident with the Space Age, cosmic evolution has been recognized as the master narrative of the universe, history writ large. Cosmic evolution includes physical, biological, and cultural evolution, and of these the latter is by far the most rapid. In this volume, authors with diverse backgrounds in science, history, anthropology, and more, consider culture in the context of the cosmos. How does our knowledge of cosmic evolution affect terrestrial culture? Conversely, how does our knowledge of cultural evolution affect our thinking about possible cultures in the cosmos? Are life, mind, and culture of fundamental significance to the grand story of the cosmos that has generated its own self-understanding through science, rational reasoning, and mathematics? Might this lead to cultural evolution on a large enough scale to allow the universe to both create and steer itself toward its own destiny? The Frighteners Peter Laws 2018-09-25 The Frighteners is a bizarrely compelling, laugh-out-loud exploration of societies' fascination with the dark, spooky, and downright terrifying side of life. The author--self proclaimed "sinister minister"--opens the book by reflecting on how he went from a horror-obsessed atheist to a God-fearing Christian and then reconciled his love of the macabre with his new faith. In the chapters that follow, Laws takes us on a worldwide romp to shine light on the dark corners of our own minds. An American hell house--controversial Christian "haunted houses" that act out the horrors of abortion, drug use, etc.--hosts his reflection on the use of horror in religion. A party in London with real life "vampires" exemplifies modern sexual fascination with the parasitic undead. He goes ghost hunting in an underground barbershop where a murderer used to cut hair. A professor in Denmark who is an expert on the recent Slenderman court case helps him explore the link between technology and the supernatural. In accessible and light-hearted prose, Peter Laws takes us from the dark corners of his mind to the underbelly of various macabre cultures to illuminate society's preoccupation with death and horror. The Frighteners combines psychology, religious theory, and personal memoir to create a dynamic and fascinating read that is informative and entertaining.

**When Texas Prison Scams Religion** Michael G. Maness 2022-01-28 State ordained child torturer Minister prisoner represents the offices of the Lt. Gov. Dan Patrick, TDCJ. Bryan Collier, TCBJ, and wardens throughout the prison--but the greatest piece of fantasy is how the Executive Culture of cover ups came to see this Fool's Parade as good for Texas, even "God's will" to change the world. TDCJ destroys records of violence after 7 years and has hired the lowest qualified of the applicant pool many times in the last 25 years, even ordered the cleaning of contraband at the Polunsky Prison, and all those responsible for covering up a horde were promoted! 25 years of this! Who thinks a director that allowed that can competently supervise a naïve volunteer in a systemwide program of indenturing prisoners? Why is the director sponsoring psychopaths counseling psychopaths? Answer?

MONEY--selling the Fool's Parade Fantasy that buying faith from prisoners with favor turns them into saints after 4 years of Bible to naïve Evangelicals. Who thinks it JUSTICE that 400,000,000 hours of officer contact has zero definitive influence on parole when a commissioner spends

**Visions of Cardiomyocyte** Angelos Tsipis 2020-01-29 In the field of cardiology, some of the most dramatic advances in recent years have come from understanding the molecular and cellular basis of cardiovascular disease. Knowledge of the pathological basis of disease in some cases allows the development of new strategies for prevention and treatment. This book was planned not only to convey new facts on cardiovascular diseases, but also to boost the excitement and challenges of research in the dynamic area of modern molecular and cellular biology of cardiology. The integration of multilevel biological data and the connection with clinical practice reveal the potential of personalized medicine, with future implications for prognosis, diagnosis, and management of cardiovascular diseases.

**US Foreign Policy in a Challenging World** Marco Clementi 2017-07-18 This book examines how the US is dealing with the challenge of reconciling its global interests with regional dynamics and how it is able to produce and sustain order at the system level and within regional subsystems. The book comprises four parts, the first of which addresses global issues such as nonproliferation, trade, and freedom of the seas. US policies in these areas are carefully analyzed, considering whether and how they have been differently implemented at the regional level. The remaining parts of the book focus on the US posture toward specific regions: Europe, the Middle East, and East Asia. The policies adopted by the US to confront the most relevant challenges in each region are identified, and the ways in which policies in a specific region influence or are influenced by challenges in another region are explored. The book is a rich source of knowledge on the nature of the balance that the US has pursued between global and regional interests. It will be of much interest to scholars, to practitioners, to postgraduate/PhD students of international relations theory and American foreign policy, and to all with an interest in the ability of the US to produce international order. *Fahrenheit 451* Ray Bradbury 2013-02-14 The hauntingly prophetic classic novel. Over 1 million copies sold in the UK.

**Defense Management Reform** Peter Levine 2020-03-10 Pentagon spending has been the target of decades of criticism and reform efforts. Billions of dollars are spent on weapons programs that are later abandoned. State-of-the-art data centers are underutilized and overstaffed. New business systems are built at great expense but fail to meet the needs of their users. Every Secretary of Defense for the last five Administrations has made it a priority to address perceived bloat and inefficiency by making management reform a major priority. The congressional defense committees have been just as active, enacting hundreds of legislative provisions. Yet few of these initiatives produce significant results, and the Pentagon appears to go on, as wasteful as ever. In this book, Peter Levine addresses why, despite a long history of attempted reform, the Pentagon continues to struggle to reduce waste and inefficiency. The heart of Defense Management Reform is three case studies covering civilian personnel, acquisitions, and financial management. Narrated with the insight of an insider, the result is a clear understanding of what went wrong in the past and a set of concrete guidelines to plot a better future.

**Science in the Media** Paul R Brewer 2021-09-30 This timely and accessible text shows how portrayals of science in popular media—including television, movies, and social media—influence public attitudes around messages from the scientific community, affect the kinds of research that receive support, and inform perceptions of who can become a scientist. The book builds on theories of cultivation, priming, framing, and media models while drawing on years of content

analyses, national surveys, and experiments. A wide variety of media genres—from Hollywood blockbusters and prime-time television shows to cable news channels and satirical comedy programs, science documentaries and children's cartoons to Facebook posts and YouTube videos—are explored with rigorous social science research and an engaging, accessible style. Case studies on climate change, vaccines, genetically modified foods, evolution, space exploration, and forensic DNA testing are presented alongside reflections on media stereotypes and disparities in terms of gender, race, and other social identities. Science in the Media illuminates how scientists and media producers can bridge gaps between the scientific community and the public, foster engagement with science, and promote an inclusive vision of science, while also highlighting how readers themselves can become more active and critical consumers of media messages about science. Science in the Media serves as a supplemental text for courses in science communication and media studies, and will be of interest to anyone concerned with publicly engaged science.

**The Gendered Politics of the Korean Protestant Right** Nami Kim 2016-11-01 This book provides a critical feminist analysis of the Korean Protestant Right's gendered politics. Specifically, the volume explores the Protestant Right's responses and reactions to the presumed weakening of hegemonic masculinity in Korea's post-hypermasculine developmentalism context. Nami Kim examines three phenomena: Father School (an evangelical men's manhood and fatherhood restoration movement), the anti-LGBT movement, and Islamophobia/anti-Muslim racism. Although these three phenomena may look unrelated, Kim asserts that they represent the Protestant Right's distinct yet interrelated ways of engaging the contested hegemonic masculinity in Korean society. The contestation over hegemonic masculinity is a common thread that runs through and connects these three phenomena. The ways in which the Protestant Right has engaged the contested hegemonic masculinity have been in relation to "others," such as women, sexual minorities, gender nonconforming people, and racial, ethnic, and religious minorities.

#### **Hadronic Matter**

**iDisrupted** Michael Baxter 2014-11-13 iDisrupted changing the human race forever Technology is set to transform the world. Its likely impact is both terrifying and incredibly exciting. We all need to understand the great changes that are just beginning to re-shape the human domain and our daily lives. Then we need to draw up plans. There are few challenges more important. This book is for: People who want a job in ten years' time. Employers who want to hire the right talent for the future. Students of business and business professionals who want to understand how technology will transform the commercial world. Business leaders and shareholders who want the business they run or own to flourish, and not get swept away. Investors endeavouring to understand the possible impact of new technology and to place the right bets. Policy makers needing to understand the potentially devastating impact of tech-economics and tech-politics to make the right decision for their country. And above all, those of us who care about the future of the human race. Technologies to watch: Robotics, internet of things, technologies for the promotion of a sharing economy, artificial intelligence, 3D printing, stem cell research, genome sequencing, energy storage, lasers, solar power, new materials, virtual reality, nanotechnology, brain interfaces to computers, and above all else the internet, mixed with computers following the evolutionary trajectory described by Moore's Law.

**Bang** Daniel Peña 2017 Uli's first flight, a late-night joy ride with his brother, changes their lives forever when the engine stops and the boys crash land, with "Texas to the right and Mexico to the left." Before the accident, Uli juggled his status as both an undocumented immigrant and a high school track star in Harlingen, Texas, desperately hoping to avoid being deported like his father. His mother Araceli spent her time waiting for her husband. His older brother Cuauhtémoc, a former high-school track star turned drop-out, learned to fly a crop duster, spraying pesticide over their home in the citrus grove. After the crash, Cuauhtémoc wakes up bound and gagged, wondering where he is. Uli comes to in a hospital, praying that it's on the American side of the border. And their mother finds herself waiting for her sons as well as her missing husband. Araceli knows that she has to go back to the country she left behind in order to find her family. In Mexico, each is forced to navigate the complexities of their past and an unknown world of deprivation and violence. Ruthless drug cartels force Cuauhtémoc to fly drugs. "If a brick goes missing, Cuauhtémoc dies. If a plane goes missing, Cuauhtémoc dies. If Cuauhtémoc goes missing, they find Cuauhtémoc (wherever he's at) and Cuauhtémoc dies." If they can't find

him, they will kill his mother. They have photos of her in Matamoros to prove they can enforce the threat. Meanwhile, Uli returns to his family's home in San Miguel and finds a city virtually abandoned, devastated by battles between soldiers, cartels and militias that vie for control. Vividly portraying the impact of international drug smuggling on the innocent, Peña's debut novel also probes the loss of talented individuals and the black market machines fed with the people removed and shut out of America. Ultimately, Bang is a riveting tale about ordinary people forced to do dangerous, unimaginable things.

**Day Bang** Roosh V 2011-08-01 Day Bang is a 201-page book that teaches you how to pick up women during the day, primarily in a coffee shop, clothing store, bookstore, grocery store, subway, or on the street. It contains 51 openers, 23 long dialogue examples with commentary, and dozens of additional lines that teach by example. Day Bang includes... - The optimal day game mindset that leads to the most amount of success- An easy mental trick to prevent your brain from going into a flight-or-fight response when it's time to approach a woman you're attracted to- A detailed breakdown of how to use the "elderly opener," an easy style of approach that reliably starts conversations with women- 2 ways to tell if a girl will be receptive to your approach- How to avoid the dreaded "interview vibe"- 10 common mistakes guys make that hurt their chances of getting a number Day Bang shares tons of tips and real examples on having successful conversations. It teaches you... - How to use my bait system to get the girl engaged and interested in you- How to segue out of the initial opening topic into a more personal chat where you'll get to know the girl on a deeper level- How to take the interesting things you've done (your accomplishments, hobbies, and experiences) and morph them into bait hooks that gets the girl intrigued enough to want to go out with you- My "Galnuc" method to seamlessly get a girl's number- An easy hack at the end of your interactions that will reduce the chance of a flake and prime the girl for going out with you- Ways to open up a conversation on a girl who isn't giving you much to work with Day Bang goes into painstaking detail on how to approach women in a variety of common environments... - How to open a girl in coffee shops when she has a book, laptop, mp3 player, cell phone, research paper, crossword or Sudoku puzzle, or nothing at all- Two methods for approaching a girl on the street, depending on if she's moving or not, with a diagram to explain all the approach variations- How to approach in a retail store or mall environment, with openers to use on customers or sales clerks- How to approach in bookstores, with specific tips on how to customize your approaches in the cafe, magazine section, or general book aisles- How to meet women in public transportation, on both the bus and subway- How to meet women in grocery stores- How to approach girls in secondary venues like a beach, casino, concert, gym, hair salon, handicraft fair, museum, art show, park, public square, or wine festival Dozens of additional topics are logically organized into 12 chapters... - Preparation. How to reduce your approach anxiety- Opening. How to deliver your opener in a way that doesn't scare women away- Rambling. How to have conversations that make women interested in you- Closing. How to get a number in a way that reduces the chance she'll flake- The Coffee Shop. How to pick up in coffee shops and cafes- The Street. How to pick up outdoors- The Clothing Shop. How to pick up in retail shops, malls, and big box stores- The Bookstore. How to pick up in bookstores- Public Transportation. How to pick up in the bus, subway, or long distance transportation- The Grocery Store. How to pick up in grocery stores- Other Venues. How to pick up just about anywhere else women can be found- Putting It All Together. How to maximize your day game potential The lessons taught in this 75,000 word, no-fluff textbook will help you meet women during the day. If you need tips on what to do after getting her number, consult my other book Bang, which contains an A-to-Z banging strategy. Day Bang focuses exclusively on daytime approaching.

**Dismantling the Big Bang** Alex Williams 2005 Why did Ptolemy's theory cause problems for the church? What is the big secret concerning the "Age" of the earth? Why do many scientists reject the use of design in explaining origins? The seemingly absurd idea that all matter, energy, space, and time once exploded from a point of extreme density has captured the imagination of scientists and laypersons for decades. The big bang has provided a central teaching for the eons of time of "cosmic evolution", undermining the history and cosmology of the Bible. It is a theory that fails, even violating the very physical laws on which it is purportedly based. In this easy-to-read format, authors Alex Williams and John Hartnett explode this naturalistic explanation for the universe, and show that the biblical model provides a far better explanation of our origins. This fully indexed, illustrated analysis of the big bang theory is an invaluable help in understanding and countering a world view that is

as chaotic and destructive as its name implies.

Three Big Bangs Holmes Rolston III 2010-10-11 By dividing the creation of matter, energy, life, and mind into three big bangs, Holmes Rolston III brings into focus a history of the universe that respects both scientific discovery and the potential presence of an underlying intelligence.

Matter-energy appears, initially in simpler forms but with a remarkable capacity for generating heavier elements. The size and expansion rate of the universe, the nature of electromagnetism, gravity, and nuclear forces

enable the the explosion of life on Earth. DNA discovers, stores, and transfers information generating billions of species. Cognitive capacities escalate, and with neural sentience this results in human genius. A massive singularity, the human mind gives birth to language and culture, increasing the brain's complexity and promoting the spread of ideas. Ideas generate ideals, which lead life to take on spirit. The nature of matter-energy, genes, and their genesis therefore encourages humans to wonder where they are, who they are, and what they should do.
