The Girl In Room 105 Chetan Bhagat 2022-07-01 Hi, I'm Keshav, and my life is screwed. I hate my job and my girlfriend left me. Ah, the beautiful Zara. Zara is from Kashmir. She is a Muslim. And did I tell you my family is a bit, well, traditional? Anyway, leave that. Zara and I broke up four years ago. She moved on in life. I didn't. I drank every night to forget her. I called, messaged, and stalked her on social media. She just ignored me. However, that night, on the eve of her birthday, Zara messaged me. She called me over, like old times, to her hostel room 105. I shouldn't have gone, but I did ... and my life changed forever. This is not a love story. It is an un-love story. From the author of Five Point Someone and 2 States, comes a fast-paced, funny and unputdownable thriller about obsessive love and finding purpose in life against the backdrop of contemporary India.

In the world of adult cinema, one name stands out above all others: John Holmes. For nearly 20 years, from 1967 to 1987, Holmes reigned as the undisputed king of X-rated lms, having appeared in a record 2,200 plus productions, from the landmark Johnny Wadd movies (one of which became the first adult motion picture to gross over \$1 million) to the legendary Insatiable with Marilyn Chambers. To a legion of fans world-wide, he was known as "Mr. Big." To industry insiders, he was "Mr. Nice Guy." Yet for all of his fame and

notoriety, Holmes remained an intensely private person and a mystery man. - that is, until now. In a startlingly frank autobiography, PORN KING was written in large part prior to his death (with new material added by his widow, Laurie). Holmes tells the story of his incredible life. This is not a typical celebrity story, filled with bright lights and glamour, giant sound stages and movie moguls. It is, instead, a rare portrait of a young man drawn into an unknown Hollywood, a secret, forbidden Hollywood, and the parallels between his astounding career and the sexual revolution in American films. Holmes knew his subject better than anyone. Holmes candidly tells of a lucrative but often harrowing "other" life as a male prostitute to the rich and famous, a shattering fall into drugs and his side of the grisly Wonderland Murders and his desperate crosscountry right afterwards. From start to finish, in this newly revised edition, complete with never-before-seen candid photos of Holmes in his private life, PORN KING is a sizzling, sensuous, fast-paced story laced with controversy. If ever there was an untold story, PORN KING is it. *LGBTQ Stats* Bennett Singer 2017-01-24 Twenty years ago it was impossible to imagine the president of the United States embracing same-sex marriage or Bruce Jenner transitioning to Caitlyn Jenner, an open transgender woman. LGBTQ Stats chronicles the ongoing LGBTQ revolution, providing the critical statistics, and draws upon and synthesizes newly collected data. Deschamps and Singer—whose previous books and films on LGBTQ topics have won numerous awards and found audiences around the globe—provide chapters on family and marriage, workplace discrimination, education, youth, criminal justice, and immigration, as well as evolving policies and laws affecting LGBTQ communities. A chapter on LGBTQ life around the globe contrasts the dramatic progress for LGBTQ people in the United States with violent backlash in countries such as Russia, Iran, and Nigeria, which have discriminatory laws that make same-sex activity punishable by prison or death. A lively, accessible, and eye-opening snapshot, LGBTQ Stats offers an invaluable resource for

activists, journalists, lawmakers, and general readers who want the facts and figures on LGBTQ lives in the twenty-first century.

Cut-Pieces Lotte Hoek 2013-11-19 Imagine watching an action film in a small-town cinema hall in Bangladesh, and in between the gun battles and fistfights a short pornographic clip appears. This is known as a cut-piece, a strip of locally made celluloid pornography surreptitiously spliced into the reels of action films in Bangladesh. Exploring the shadowy world of these clips and their place in South Asian film culture, Lotte Hoek builds a rare, detailed portrait of the production, consumption, and cinematic pleasures of stray celluloid. Hoek's innovative ethnography plots the making and reception of Mintu the Murderer (2005, pseud.), a popular, Bangladeshi B-quality action movie and fascinating embodiment of the cut-piece phenomenon. She begins with the early scriptwriting phase and concludes with multiple screenings in remote Bangladeshi cinema halls, following the cut-pieces as they appear and disappear from the film, destabilizing its form, generating controversy, and titillating audiences. Hoek's work shines an unusual light on Bangladesh's state-owned film industry and popular practices of the obscene. She also reframes conceptual approaches to South Asian cinema and film culture, drawing on media anthropology to decode the cultural contradictions of Bangladesh since the 1990s.

Shadow Education Mark Bray 2012-05-01 In all parts of Asia, households devote considerable expenditures to private supplementary tutoring. This tutoring may contribute to students' achievement, but it also maintains and exacerbates social inequalities, diverts resources from other uses, and can contribute to inefficiencies in education systems. Such tutoring is widely called shadow education, because it mimics school systems. As the curriculum in the school system changes, so does the shadow. This study documents the scale and nature of shadow education in different parts of the region. Shadow education has been a major phenomenon in East Asia and it has far-reaching economic and social implications.

The Fingerprint U. S. Department Justice 2014-08-02 The idea of The Fingerprint Sourcebook originated during a meeting in April 2002. Individuals representing the fingerprint, academic, and scientific communities met in Chicago, Illinois, for a day and a half to discuss the state of fingerprint identification with a view toward the challenges raised by Daubert issues. The meeting was a joint project between the International Association for Identification (IAI) and West Virginia University (WVU). One recommendation that came out of that meeting was a suggestion to create a sourcebook for friction ridge examiners, that is, a single source of researched information regarding the subject. This sourcebook would provide educational, training, and research information for the international scientific community.

The Guest List Lucy Foley 2020-06-02 "I loved this book. It gave me the same waves of happiness I get from curling up with a classic Christie...The alternating points of view keep you guessing, and guessing wrong." -- Alex Michaelides, #1 New York Times bestselling author of The Silent Patient "Evok[es] the great Agatha Christie classics...Pay close attention to seemingly throwaway details about the characters' pasts. They are all clues." -- New York Times Book Review A wedding celebration turns dark and deadly in this deliciously wicked and atmospheric thriller reminiscent of Agatha Christie from the New York Times bestselling author of The Hunting Party. The bride - The plus one - The best man - The wedding planner - The bridesmaid - The body On an island off the coast of Ireland, guests gather to celebrate two people joining their lives together as one. The groom: handsome and charming, a rising television star. The bride: smart and ambitious, a magazine publisher. It's a wedding for a magazine, or for a celebrity: the designer dress, the remote location, the luxe party favors, the boutique whiskey. The cell phone service may be spotty and the waves may be rough, but every detail has been expertly planned and will be expertly executed. But perfection is for plans, and people are all too human. As the champagne is popped and the festivities begin, resentments and petty jealousies begin to mingle with the reminiscences and well wishes. The groomsmen begin the drinking game from their school days. The bridesmaid not-so-accidentally ruins her dress. The bride's oldest (male) friend gives an uncomfortably caring toast. And then someone turns up dead. Who didn't wish the happy couple well? And perhaps more important, why?

Land of Two Rivers Nitish K. Sengupta 2011 Land of Two Rivers chronicles the story of one of the most fascinating and influential regions in the Indian subcontinent. The confluence of two major river systems, Ganga and Brahmaputra, created the delta of Bengal--an ancient land known as a center of trade, learning and the arts from the days of the Mahabharata and through the ancient dynasties. During the medieval era, this eventful journey saw the rise of Muslim dynasties which brought into being a unique culture, quite distinct from that of northern India. The colonial conquest in the eighteenth century opened the modern chapter of Bengal's history and transformed the social and economic structure of the region. Nitish Sengupta traces the formation of Bengali identity through the Bengal Renaissance, the growth of nationalist politics and the complex web of events that eventually led to the partition of the region in 1947, analyzing why, despite centuries of shared history and culture, the Bengalis finally divided along communal lines. The struggle of East Pakistan to free itself from West Pakistan's dominance is vividly described, documenting

the economic exploitation and cultural oppression of the Bengali people. Ultimately, under the leadership of Bangabandhu Mujibur Rahman, East Pakistan became the independent nation of Bangladesh in 1971. Land of Two Rivers is a scholarly yet extremely accessible account of the development of Bengal, sketching the eventful and turbulent history of this ancient civilization, rich in scope as well as in influence.

Women and Human Development Martha C. Nussbaum 2000-03-13 In this major book Martha Nussbaum, one of the most innovative and influential philosophical voices of our time, proposes a kind of feminism that is genuinely international, argues for an ethical underpinning to all thought about development planning and public policy, and dramatically moves beyond the abstractions of economists and philosophers to embed thought about justice in the concrete reality of the struggles of poor women. Nussbaum argues that international political and economic thought must be sensitive to gender difference as a problem of justice, and that feminist thought must begin to focus on the problems of women in the third world. Taking as her point of departure the predicament of poor women in India, she shows how philosophy should undergird basic constitutional principles that should be respected and implemented by all governments, and used as a comparative measure of quality of life across nations.

Born a Crime Trevor Noah 2016-11-15 #1 NEW YORK TIMES BESTSELLER • More than one million copies sold! A “brilliant” (Lupita Nyong’o, Time), “poignant” (Entertainment Weekly), “soul-nourishing” (USA Today) memoir about coming of age during the twilight of apartheid “Noah’s childhood stories are told with all the hilarity and intellect that characterizes his comedy, while illuminating a dark and brutal period in South Africa’s history that must never be forgotten.”—Esquire Winner of the Thurber Prize for American Humor and an NAACP Image Award • Named one of the best books of the year by The New York Times, USA Today, San Francisco Chronicle, NPR, Esquire, Newsday, and Booklist Trevor Noah’s unlikely path from apartheid South Africa to the desk of The Daily Show began with a criminal act: his birth. Trevor was born to a white Swiss father and a black Xhosa mother at a time when such a union was punishable by five years in prison. Living proof of his parents’ indiscretion, Trevor was kept mostly indoors for the earliest years of his life, bound by the extreme and often absurd measures his mother took to hide him from a government that could, at any moment, steal him away. Finally liberated by the end of South Africa’s tyrannical white rule, Trevor and his mother set forth on a grand adventure, living openly and freely and embracing the opportunities won by a centuries-long struggle. Born a Crime is the story of a mischievous young boy who grows into a restless young man as he struggles to find himself in a world where he was never supposed to exist. It is also the story of that young man’s relationship with his fearless, rebellious, and fervently religious mother—his teammate, a woman determined to save her son from the cycle of poverty, violence, and abuse that would ultimately threaten her own life. The stories collected here are by turns hilarious, dramatic, and deeply affecting. Whether subsisting on caterpillars for dinner during hard times, being thrown from a moving car during an attempted kidnapping, or just trying to survive the life-and-death pitfalls of dating in high school, Trevor illuminates his curious world with an incisive wit and unflinching honesty. His stories weave together to form a moving and searingly funny portrait of a boy making his way through a damaged world in a dangerous time, armed only with a keen sense of humor and a mother’s unconventional, unconditional love.

What Works in Girls' Education Gene B Sperling 2015-09-29 Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in

her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

The Long Tail Chris Anderson 2006-07-11 What happens when the bottlenecks that stand between supply and demand in our culture go away and everything becomes available to everyone? "The Long Tail" is a powerful new force in our economy: the rise of the niche. As the cost of reaching consumers drops dramatically, our markets are shifting from a one-size-fits-all model of mass appeal to one of unlimited variety for unique tastes. From supermarket shelves to advertising agencies, the ability to offer vast choice is changing everything, and causing us to rethink where our markets lie and how to get to them. Unlimited selection is revealing truths about what consumers want and how they want to get it, from DVDs at Netflix to songs on iTunes to advertising on Google. However, this is not just a virtue of online marketplaces; it is an example of an entirely new economic model for business, one that is just beginning to show its power. After a century of obsessing over the few products at the head of the demand curve, the new economics of distribution allow us to turn our focus to the many more products in the tail, which collectively can create a new market as big as the one we already know. The Long Tail is really about the economics of abundance. New efficiencies in distribution, manufacturing, and marketing are essentially resetting the definition of what's commercially viable across the board. If the 20th century was about hits, the 21st will be equally about niches.

Dead Reckoning Sarmila Bose 2012-08-07 This ground-breaking book chronicles the 1971 war in South Asia by reconstituting the memories of those on opposing sides of the conflict. 1971 was marked by a bitter civil war within Pakistan and war between India and Pakistan, backed respectively by the Soviet Union and the United States. It was fought over the territory of East Pakistan, which seceded to become Bangladesh. Through a detailed investigation of events on the ground, Sarmila Bose contextualises and humanises the war while analysing what the events reveal about the nature of the conflict itself. The story of 1971 has so far been dominated by the narrative of the victorious side. All parties to the war are still largely imprisoned by wartime partisan mythologies. Bose reconstructs events via interviews conducted in Bangladesh and Pakistan, published and unpublished reminiscences in Bengali and English of participants on all sides, official documents, foreign media reports and other sources. Her book challenges assumptions about the nature of the conflict, and exposes the ways in which the 1971 war is still playing out in the region.

Edible Insects Arnold van Huis 2013 Edible insects have always been a part of human diets, but in some societies there remains a degree of disdain and disgust for their consumption. Although the majority of consumed insects are gathered in forest habitats, mass-rearing systems are being developed in many countries. Insects offer a significant opportunity to merge traditional knowledge and modern science to improve human food security worldwide. This publication describes the contribution of insects to food security and examines future prospects for raising insects at a commercial scale to improve food and feed production, diversify diets, and support livelihoods in both developing and developed countries. It shows the many traditional and potential new uses of insects for direct human consumption and the opportunities for and constraints to farming them for food and feed. It examines the body of research on issues such as insect nutrition and food safety, the use of insects as animal feed, and the processing and preservation of insects and their products. It highlights the need to develop a regulatory framework to govern the use of insects for food security. And it presents case studies and examples from around the world. Edible insects are a promising alternative to the conventional production of meat, either for direct human consumption or for indirect use as feedstock. To fully realise this potential, much work needs to be done by a wide range of stakeholders. This publication will boost awareness of the many valuable roles that insects play in sustaining nature and human life, and it will stimulate debate on the expansion of the use of insects as food and feed.

The Last Lecture Randy Pausch 2008-04-08 After being diagnosed with terminal cancer, a professor shares the lessons he's learned about living in the present, building a legacy, and taking full advantage of the time you have—in this life-changing classic. "We cannot change the cards we are dealt, just how we play the hand." —Randy Pausch A lot of professors give talks titled "The Last Lecture." Professors are asked to consider their demise and to ruminate on what matters most to them. And while they speak, audiences can't help but mull over the same question: What wisdom would we impart to the world if we knew it was our last chance? If we had to vanish tomorrow, what would we want as our legacy? When Randy Pausch, a computer science professor at Carnegie Mellon, was asked to give such a lecture, he didn't have to imagine it as his last, since he had recently been diagnosed with terminal cancer. But the lecture he gave—"Really Achieving Your Childhood Dreams"—wasn't about dying. It was about the importance of overcoming obstacles, of enabling the dreams of others, of seizing every moment (because "time is all you have . . . and you may find one day that you have less than you think"). It was a summation of everything Randy had come to believe. It was about living. In this book, Randy Pausch has combined the humor, inspiration and intelligence that made his lecture such a phenomenon and given it an indelible form. It is a book that will be shared for generations to come.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what

is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

The Brain That Changes Itself Norman Doidge 2007-03-15 "Fascinating. Doidge's book is a remarkable and hopeful portrait of the endless adaptability of the human brain."—Oliver Sacks, MD, author of The Man Who Mistook His Wife for a Hat What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain.

Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential.

Press Freedom in Contemporary Asia Tina Burrett 2019-11-29 This book analyzes the constraints on press freedom and the ways in which independent reporting and reporters are at risk in contemporary Asia to provide a barometer of democratic development in the region. Based on in-depth country case studies written by academics and journalists, and some who straddle both professions, from across the region, this book explores the roles of mainstream and online media, and how they are subject to abuse by the state and vested interests. Specific country chapters provide up-to-date information on Bangladesh, Kashmir, Malaysia, Myanmar, Nepal, Pakistan, Sri Lanka, Taiwan, Thailand and Vietnam, as well as on growing populist and nationalist challenges to media freedom in the Philippines, India, Indonesia and Japan. The book includes a theoretical chapter pulling together trends and common constraints facing newsrooms across Asia and a regional overview on the impact of social media. Three chapters on China provide insights into the country's tightening information environment under President Xi Jinping. Moreover, the legal environment of the media, political and external pressures, economic considerations, audience support and journalists' standards and ethics are explored. As an international and interdisciplinary study, this book will appeal to undergraduates, graduates and scholars engaged in human rights, media studies, democratization, authoritarianism and Asian Studies, as well as Asia specialists, journalists, legal scholars, historians and political scientists.

Small-scale Aquaponic Food Production Christopher Somerville 2015 This technical paper begins by introducing the concept of aquaponics, including a brief history of its development and its place within the larger category of soil-less culture and modern agriculture. It discusses the main theoretical concepts of aquaponics, including the nitrogen cycle and the nitrification process, the role of bacteria, and the concept of balancing an aquaponic unit. It then moves on to cover important considerations of water quality parameters, water testing, and water sourcing for aquaponics, as well as methods and theories of unit design, including the three main methods of aquaponic systems: media beds, nutrient film technique, and deep water culture. The publication discusses in detail the three groups of living organisms (bacteria, plants and fish) that make up the aquaponic ecosystem. It also presents management strategies and troubleshooting practices, as well as related topics, specifically highlighting local and sustainable sources of aquaponic inputs. The publication also includes nine appendixes that present other key topics: ideal conditions for common plants grown in aquaponics; chemical and biological controls of common pests and diseases including a compatible planting guide; common fish diseases and related symptoms, causes and remedies; tools to calculate the ammonia produced and biofiltration media required for a certain fish stocking density and amount of fish feed added; production of homemade fish feed; guidelines and considerations for establishing aquaponic units; a cost-benefit analysis of a small-scale, media bed aquaponic unit; a comprehensive guide to building small-scale versions of each of the three aquaponic methods; and a brief summary of this publication designed as a supplemental handout for outreach, extension and education.

Good Economics for Hard Times Abhijit V. Banerjee 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or

perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace.

Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

The Gift of the Magi (Illustrated) O. Henry 2022-04-27 "The Gift of the Magi" is a short story by O. Henry first published in 1905. The story tells of a young husband and wife and how they deal with the challenge of buying secret Christmas gifts for each other with very little money. The main idea of "The Gift of the Magi" is that the value of a gift is in the giver, rather than the gift itself. Jim and Della, out of their love for each other, purchased a gift that required them to sacrifice something that was precious to them.

Porn Archives Tim Dean 2014-11-26 While sexually explicit writing and art have been around for millennia, pornography—as an aesthetic, moral, and juridical category—is a modern invention. The contributors to *Porn Archives* explore how the production and proliferation of pornography has been intertwined with the emergence of the archive as a conceptual and physical site for preserving, cataloguing, and transmitting documents and artifacts. By segregating and regulating access to sexually explicit material, archives have helped constitute pornography as a distinct genre. As a result, porn has become a site for the production of knowledge, as well as the production of pleasure. The essays in this collection address the historically and culturally varied interactions between porn and the archive. Topics range from library policies governing access to sexually explicit material to the growing digital archive of "war porn," or eroticized combat imagery; and from same-sex amputee porn to gay black comic book superhero porn. Together the pieces

trace pornography as it crosses borders, transforms technologies, consolidates sexual identities, and challenges notions of what counts as legitimate forms of knowledge. The collection concludes with a valuable resource for scholars: a list of pornography archives held by institutions around the world. Contributors. World Protests Isabel Ortiz 2021-11-03 This is an open access book. The start of the 21st century has seen the world shaken by protests, from the Arab Spring to the Yellow Vests, from the Occupy movement to the social uprisings in Latin America. There are periods in history when large numbers of people have rebelled against the way things are, demanding change, such as in 1848, 1917, and 1968. Today we are living in another time of outrage and discontent, a time that has already produced some of the largest protests in world history. This book analyzes almost three thousand protests that occurred between 2006 and 2020 in 101 countries covering over 93 per cent of the world population. The study focuses on the major demands driving world protests, such as those for real democracy, jobs, public services, social protection, civil rights, global justice, and those against austerity and corruption. It also analyzes who was demonstrating in each protest; what protest methods they used; who the protestors opposed; what was achieved; whether protests were repressed; and trends such as inequality and the rise of women's and radical right protests. The book concludes that the demands of protestors in most of the protests surveyed are in full accordance with human rights and internationally agreed-upon UN development goals. The book calls for policy-makers to listen and act on these demands.
