Mac mini Hacks and Mods For Dummies

John Rizzo 2006-01-13 Starting at \$499, the diminutive Mac mini-2.5 inches tall, 6.5 inches wide, and 2.9 pounds-is expected to become Apple's bestselling computer, with projected shipments of 100,000 units a month This book offers several projects-some easy, some more challenging-to help people tweak, modify, and

transform a Mac mini Modest modifications include creating a Mac mini home theater, an appliance controller, and a travel kit; other more complex (but very cool!) mods require wielding a soldering iron Offers detailed, illustrated step-by-step instructions-including how to open the Mac mini, keep track of pieces, and avoid damage-that enable even novice tinkerers to complete the projects

2013-11-11 * Remains the classic tutorial for both non-programmers and beginning programmers. * Tried and true step by step approach. * Although it assumes nothing, it contains all the material a professional needs to know.

Fame Junkies Jake Halpern 2008-01-03

The author of *Welcome to the New World* and *Bad Paper* discusses America's obsession with celebrity in this 2007 investigation. Why do more people watch *American Idol* than the nightly news? What is it about Paris Hilton's dating life that lures us so? Why do teenage girls-when given the option of "pressing a magic button and becoming either stronger, smarter, famous, or more beautiful"-predominantly opt for fame? In this entertaining and enlightening book, Jake Halpern explores the fascinating and often dark implications of America's obsession with fame. He travels to a Hollywood home for aspiring child actors and enrolls in a program that trains celebrity assistants. He visits the offices of *Us Weekly* and a laboratory where monkeys give up food to stare at

pictures of dominant members of their group. The book culminates in Halpern's encounter with Rod Stewart's biggest fan, a woman from Pittsburgh who nominated the singer for Hollywood's Walk of Fame. *Fame Junkies* reveals how psychology, technology, and even evolution conspire to make the world of red carpets and velvet ropes so enthralling to all of us on the outside looking in. Praise for *Fame Junkies* "An astute look at the mighty vortex of fame, which this author believes will only get more powerful." –Kirkus Reviews "Halpern displays an evocative, insiderish style reminiscent . . . of Tom Wolfe's when he peered into 1960s celebrity culture." –Wall Street Journal "A critical look at Americans' infatuation with fame and

determines that fame is elusive, desirable—and also possibly addictive [An] engaging study."

–Publishers Weekly

A Gentle Introduction to Effective Computing in Quantitative Research

Harry J. Paarsch 2016-05-13 A practical guide to using modern software effectively in quantitative research in the social and natural sciences. This book offers a practical guide to the computational methods at the heart of most modern quantitative research. It will be essential reading for research assistants needing hands-on experience; students entering PhD programs in business, economics, and other social or natural sciences; and those seeking quantitative jobs in industry. No background in computer science is assumed; a learner need

only have a computer with access to the Internet. Using the example as its principal pedagogical device, the book offers tried-and-true prototypes that illustrate many important computational tasks required in quantitative research. The best way to use the book is to read it at the computer keyboard and learn by doing. The book begins by introducing basic skills: how to use the operating system, how to organize data, and how to complete simple programming tasks. For its demonstrations, the book uses a UNIX-based operating system and a set of free software tools: the scripting language Python for programming tasks; the database management system SQLite; and the freely available R for statistical computing and graphics. The book goes on to describe particular tasks:

Beginning XML David Hunter 2005-01-03
What is this book about? Beginning XML, 3rd Edition, like the first two editions, begins with a broad overview of the technology and then focuses on specific facets of the various specifications for the reader. This book teaches you all you need to know about XML: what it is, how it works, what technologies

surround it, and how it can best be used in a variety of situations, from simple data transfer to using XML in your Web pages. It builds on the strengths of the first and second editions, and provides new material to reflect the changes in the XML landscape – notably RSS and SVG.

Practical MythTV Michael Still
2007-12-15 This book takes a project based approach to implementing your own MythTV setup, from selecting hardware right through to advanced customization. You will learn how to record your favorite television shows, store your DVDs for later playback, create a music library out of your CD collection, and even use your personal video recorder (PVR) to

do Voice Over IP. This is a book for hobbyists and technology do-it-yourselfers that wish to create their own PVR or media center. With this book as a guide they will be able to choose the right hardware (or recycle existing hardware) and then install all the necessary software.

The Stuff of Spectatorship Caetlin Benson-Allott
2021-04-06 Film and television create worlds, but they are also of a world, a world that is made up of stuff, to which humans attach meaning. Think of the last time you watched a movie: the chair you sat in, the snacks you ate, the people around you, maybe the beer or joint you consumed to help you unwind—all this stuff shaped your experience of media and its influence on you. The material culture around film and television changes how we

make sense of their content, not to mention the very concepts of the mediums. Focusing on material cultures of film and television reception, *The Stuff of Spectatorship* argues that the things we share space with and consume as we consume television and film influence the meaning we gather from them. This book examines the roles that six different material cultures have played in film and television culture since the 1970s—including video marketing, branded merchandise, drugs and alcohol, and even gun violence—and shows how objects considered peripheral to film and television culture are in fact central to its past and future.

AUUGN 2004-09

When the News Broke Heather Hendershot 2022-12-27 A riveting,

blow-by-blow account of how the network broadcasts of the 1968 Democratic convention shattered faith in American media. “The whole world is watching!” cried protestors at the 1968 Democratic convention as Chicago police beat them in the streets. When some of that violence was then aired on network television, another kind of hell broke loose. Some viewers were stunned and outraged; others thought the protestors deserved what they got. No one—least of all Chicago mayor Richard J. Daley—was happy with how the networks handled it. In *When the News Broke*, Heather Hendershot revisits TV coverage of those four chaotic days in 1968—not only the violence in the streets but also the tumultuous convention itself, where Black citizens and others forcefully challenged southern delegations that

had excluded them, anti-Vietnam delegates sought to change the party's policy on the war, and journalists and delegates alike were bullied by both Daley's security forces and party leaders. Ultimately, Hendershot reveals the convention as a pivotal moment in American political history, when a distorted notion of "liberal media bias" became mainstreamed and nationalized. At the same time, she celebrates the values of the network news professionals who strived for fairness and accuracy. Despite their efforts, however, Chicago proved to be a turning point in the public's trust in national news sources. Since those critical days, the political Right in the United States has amplified distrust of TV news, to the point where even the truest and most clearly

documented stories can be deemed "fake." As Hendershot demonstrates, it doesn't matter whether the "whole world is watching" if people don't believe what they see.

America's First Network TV Censor

Robert Pondillo 2010-04-23 America's First Network TV Censor: The Work of NBC's Stockton Helffrich is a unique examination of early television censorship, centered around the papers of Stockton Helffrich, the first manager of the censorship department at NBC. Set against the backdrop of postwar America and contextualized by myriad primary sources including original interviews and unpublished material, Helffrich's reports illustrate how early censorship of advertising, language, and depictions of sex, violence, and race shaped the new medium. While other books have cited Helffrich's reports, none have considered them as a body of work, complemented by the details of Helffrich's life and the

era in which he lived. America's First Network TV Censor explores the ways in which Helffrich's personal history and social class influenced his perception of his role as NBC-TV censor and his tendency to ignore certain political and cultural taboos while embracing others. Author Robert Pondillo considers Helffrich's life in broadcasting before and after the Second World War, and his censorial work in the context of 1950s American culture and emerging network television. Pondillo discusses the ways that cultural phenomena, including the arrival of the mid-twentieth-century religious boom, McCarthyism, the dawn of the Civil Rights era, and the social upheaval over sex, music, and youth, contributed to a general sense that the country was morally adrift and

ripe for communist takeover. Five often-censored subjects—advertising, language, and depictions of sex, violence, and race—are explored in detail, exposing the surprising complexity and nuance of early media censorship. Questions of whether too many sadistic westerns would coarsen America's children, how to talk about homosexuality without using the word "homosexuality," and how best to advertise toilet paper without offending people were on Helffrich's mind; his answers to these questions helped shape the broadcast media we know today.

Television Histories in Asia Jinna Tay 2015-07-24 This book presents an analysis of television histories across India, China, Taiwan, Singapore, Indonesia, Japan, Hong Kong, the Philippines, Malaysia and Bhutan. It offers a set of standard data on the history of television’s cultural, industrial and political structures in each specific national context, allowing for cross-regional comparative analysis. Each chapter presents a case study on a salient aspect of contemporary television culture of the nation in question, such as analyses of ideology in

television content in Japan and Singapore, and transformations of industry structure vis-à-vis state versus market control in China and Taiwan. The book provides a comprehensive overview of TV histories in Asia as well as a survey of current issues and concerns in Asian television cultures and their social and political impact.

Not A Number Rupert Booth 2011-11-04 When Patrick McGoohan first starred in “Danger Man” in 1960 and as ‘Number 6’ in cult show “The Prisoner”, industry insiders hailed the arrival of an enigmatic genius and Hollywood beckoned. But who was this man who worked as a chicken farmer and bank clerk before becoming a hugely successful actor simply by chance? In this up-to-date biography Rupert Booth reveals the true

character of a man whose off-screen behaviour matched his fiery on-screen persona. Why was he so puritanical, refusing even to kiss a woman for any part he played? Why was he so controlling over his work in "The Prisoner" and other productions? A timely exploration of the man whose declaration 'I will not be pushed, filed, stamped, indexed, briefed, debriefed or numbered!' continues to resonate with audiences decades after it was first uttered with such conviction.

Excel Basic Skills Comprehension and Written Expression Alan Horsfield

1988 Excel Comprehension and Written Expression Year 7 is essential for any student wishing to improve their comprehension skills. It allows students to practice skills such as finding facts, making references, isolating relevant information, understanding questions and paragraphs, and using tables of contents, indexes, maps and graphs to

find information. The extracts are from a wide variety of genres to allow students to gain confidence in reading different materials. On several occasions extracts are reused. This is done to demonstrate that different comprehension skills can be developed from the same piece of writing. Comprehension skills are interdependent. As the student's ability to comprehend increases he/she will also be expected to interpret data. This includes the interpretation of information found in charts, in tables and on maps. In this book your child will find: over 60 graded units of stimulating exercises and extracts a wide variety of questions including true or false, multiple choice, short answer and sentence completion extracts from many different literary and factual text

**The Rise of Cable Programming in the
United States** Megan Mullen 2003-06-01

In 1971, the Sloan Commission on
Cable Communications likened the
ongoing developments in cable
television to the first uses of
movable type and the invention of the
telephone. Cable's proponents in the
late 1960s and early 1970s hoped it
would eventually remedy all the
perceived ills of broadcast

television, including lowest-common-
denominator programming, inability to
serve the needs of local audiences,
and failure to recognize the needs of
cultural minorities. Yet a quarter
century after the "blue sky" era,
cable television programming closely
resembled, and indeed depended upon,
broadcast television programming.
Whatever happened to the Sloan
Commission's "revolution now in
sight"? In this book, Megan Mullen
examines the first half-century of
cable television to understand why
cable never achieved its promise as a
radically different means of
communication. Using textual analysis
and oral, archival, and regulatory
history, she chronicles and analyzes
cable programming developments in the
United States during three critical
stages of the medium's history: the

early community antenna (CATV) years (1948–1967), the optimistic "blue sky" years (1968–1975), and the early satellite years (1976–1995). This history clearly reveals how cable's roots as a retransmitter of broadcast signals, the regulatory constraints

that stymied innovation, and the economic success of cable as an outlet for broadcast or broadcast-type programs all combined to defeat most utopian visions for cable programming.
