850 texts (published between 1999 and 2001) suitable for student use in background research, unit study, or pleasure reading, and children will find books that delight, amuse, and entertain. The texts described in the book are divided into 24 general topics, including Science Nonfiction; Struggle and Survival; Fantasy Literature; Sports; Games and Hobbies; and Mathematics in Our World. To highlight literature that reflects the schools' multiple ethnicities, the booklist also introduces readers to recent literature that celebrates African American, Asian and Pacific Island, Hispanic American, and indigenous cultures. Each chapter begins with a brief list of selection criteria, a streamlined list of all annotated titles in that chapter, and an introduction in which chapter editors discuss their criteria and the status of available books in that subject area. While the reviews were written by adults, the voices and opinions of children are often included as well, lending credence to adult choices of the quality children's books. (NKA).

Exploring Elementary Science Teaching and Learning in Canada Christine D. Tippet 2023-04-01 This edited volume showcases current science education research in Canada, from pre-Kindergarten to Grade 7, conducted in Canada by a diverse group of researchers from across the country. We draw on the themes that emerged from our previous book, *Science Education in Canada: Consistencies, Commonalities, and Distinctions*, to guide the structure of this book on elementary science education research. In particular, chapters on science teacher preparation; Indigenous perspectives; environmental education; science, technology, engineering, and mathematics (STEM); and science, technology, society, and the environment (STSE) reflect a Canadian perspective. However, these themes are of global interest and authors include ideas for how science education research in Canada might be used by academics and researchers in other countries. This book builds a cohesive picture of current elementary science education research in Canada, highlighting themes that will resonate with international readers.

Children of Incarcerated Parents Judy Krysik 2022-04-11 This book presents multidimensional knowledge on children of incarcerated parents using Bronfenbrenner's ecological theory as an organizing framework. It examines the extent to which different levels of the environment are supportive (i.e., leading to resilience) and stress-producing (i.e., contributing to risk). The volume explores four levels of the environment - microsystem, mesosystem, exosystem, and macrosystem - with specific theories and paradigms woven into the inquiry at each. At the level of child and family, it discusses the factors that influence resilience and risk in children from gestation through young adulthood; at the community level, it addresses risk and resilience in the interactions between children and families and the various systems with which they interact (e.g., child welfare). Key areas of coverage include: · A description of the factors that influence the quality of programming for children and their families. · A critical analysis of state and national policies that affect which individuals receive, or fail to receive, specific services. · An overview and evaluation of the state of knowledge and implications for research and practice to improve outcomes for children of incarcerated parents. · An organizing framework to help researchers identify gaps in the existing knowledge base and distills and organizes evidence-based information for practitioners. Children of Incarcerated Parents is an essential resource for researchers, professors, and graduate students as well as practitioners, therapists, and other professionals in child and school psychology, family studies, public health, and all interrelated disciplines, including developmental psychology, criminal justice, social work, educational policy and politics.

The Oxford Handbook of Children's Rights Law Jonathan Todres 2020-02-19 Children's rights law is a relatively young but rapidly developing discipline. The U.N. Convention on the Rights of the Child, the field's core legal instrument, is the most widely ratified human rights treaty in history. Yet, like children themselves, children's rights are often relegated to the margins in mainstream legal, political, and other discourses, despite their application to approximately one-third of the world's population and every human being's first stages of life. Now thirty years old, the Convention on the Rights of the Child (CRC) signalled a definitive shift in the way that children are viewed and understood--from passive objects subsumed within the family to full human beings with a distinct set of rights. Although the CRC and other children's rights law have spurred positive changes in law, policies, and attitudes toward children in numerous countries, implementation remains a work in progress. We have reached a state in the evolution of children's rights in which we need more critical evaluation and assessment of the CRC and the large body of children's rights law and policy that this treaty has inspired. We have moved from conceptualizing and adopting legislation to focusing on implementation and making the content of children's rights meaningful in the lives of all children. This book provides a critical evaluation and assessment of children's rights law, including the CRC. With contributions from leading scholars and practitioners from around the world, it aims to elucidate the content of children's rights law, explore the complexities of implementation, and identify critical challenges and opportunities for children's rights law.

Music and Play in Early Childhood Education Fanny M. Y. Chung 2022-10-11 This book provides critical insights into the interplay of sociocultural change and educational practices by elucidating the trajectory of Hong Kong's early childhood music education system. It presents an extensive analysis of postcolonial music education in relation to globalization, westernization, cosmopolitanism, and nationalization. It makes contributions to the theoretical arguments that can be used to interpret the impact of China on the previously Western orientation of education in Hong Kong. This book also explicitly problematizes the theoretical foundations of mandated policies such as play-based learning and moral education in early childhood through music in Hong Kong and across the globe. The analysis of historical context, political influences, and education ideologies in Hong Kong's early childhood education subsystem provides fertile ground for a thorough understanding of the meaning and implications of globalization in education at multiple levels. Many empirical-based discussions in this book reflect the ideologies, trends, and practices of music education globally. Framed by Bandura's social cognitive theory, the empirical studies discussed in the book explore the self-efficacy and practices of education leaders and teachers, reflecting the contemporary challenges of music education. Ultimately, it makes a vital contribution by offering a new conceptual model of music teacher education within a globally resonant framework.

Domestic Minor Sex Trafficking Alexandra Lutnick 2016-01-12 The domestic sex trafficking of minors is a problem of growing concern yet little critical attention. This book analyzes the forces behind the sex-trafficking industry in the United States and provides a much-needed reference for practitioners. It adopts a holistic approach, pursuing a nuanced exploration of these young people's experiences, their treatment, and outside efforts to combat sex trafficking. The book features interviews with service providers and experts, and incorporates recent research, thereby mapping the complex factors associated with young people's involvement in trading sex and the social connections that facilitate their behavior. It considers the experiences of both those who "choose" sex work and those who are forced into it by circumstances or third parties, and it discusses the networks of friends and close acquaintances who introduce newcomers to the trade. In addition, it takes a hard look at how local and federal responses to trafficking increase young people's vulnerability to trading sex. Urging policymakers and practitioners to move beyond the simple framework of "rescuing" victims and "punishing" villains, this book calls for policies and programs that focus on the failure of social and cultural systems and respond better to the young people caught in this web.

The Free-Market Family Maxine Eichner 2019-12-11 US families have been pushed to the wall. At the bottom of the economic ladder, poor and working-class adults aren't forming stable relationships and can't give their kids the start they need because of low wages and uncertain job prospects. Toward the top, professional parents' lives have become a grinding slog of long hours of paid work. Meanwhile their kids are overstressed by pressure to succeed and get into good colleges. In this provocative book, Maxine Eichner argues that these very different struggles might seem unconnected, but they share the same root cause: the increasingly large toll that economic inequality and insecurity are taking on families. It's government rather than families that's to blame, Eichner persuasively contends. Since the 1970s, politicians have sold families out to the wrongheaded notion that the free market alone best supports them. In five decades of "free-market family policy," they've scrapped government programs and gutted market regulations that had helped families thrive. The consequence is the steady drumbeat of bad news we hear about our country today: the opioid epidemic, skyrocketing suicide and mental illness rates, "deaths of despair," and mediocre student achievement scores. Meanwhile, politicians just keep telling families to work a little harder. The Free-Market Family documents US families' impossible plight, showing how much worse they fare than families in other countries. It then demonstrates how politicians' free-market illusions steered our nation wildly off course. Finally, it shows how, using commonsense measures, we can restructure the economy to work for families, rather than the reverse. Doing so would invest in our children's futures, increase our wellbeing, reknit our social fabric, and allow our country to reclaim the American Dream.

The Routledge Handbook on the American Dream Robert C. Hauhart 2022-11-30 The Routledge Handbook on the American Dream: Volume 2 explores the social, economic, and cultural aspects of the American Dream in both theory and reality in the twenty-first century. This collection of essays brings together leading scholars from a range of fields to further develop the themes and issues explored in the first volume. The concept of the American Dream, first expounded by James Truslow Adams in *The Epic of America* in 1931, is at once both ubiquitous and difficult to define. The term perfectly captures the hopes of freedom, opportunity and upward social mobility invested in the nation. However, the American Dream appears increasingly illusory in the face of widening inequality and apparent lack of opportunity, particularly for the poor and ethnic, or otherwise marginalized, minorities in the United States. As such, an understanding of the American Dream through both theoretical analyses and empirical studies, whether qualitative or quantitative, is crucial to understanding contemporary America. Like the first volume of *The Routledge Handbook on the American Dream*, this collection will be of great interest to students and researchers in a range of fields in the humanities and social sciences.

The Routledge Handbook of Women's Experiences of Criminal Justice Isla Masson 2022-10-25 This Handbook brings together the voices of a range of contributors interested in the many varied experiences of women in criminal justice systems, and who are seeking to challenge the status quo. Although there is increasing literature and research on gender, and certain aspects of the criminal justice system (often Western focused), there is a significant gap in the form of a Handbook that brings together these important gendered conversations. This essential book explores research and theory on how women are perceived, handled, and experience criminal justice within and across different jurisdictions, with particular consideration of gendered and disparate treatment of women as law-breakers. There is also consideration of women's experiences through an intersectional lens, including race and class, as well as feminist scholarship and activism. The Handbook contains 47 unique chapters with nine overarching themes (Lessons from history and theory; Routes into the criminal justice system; Intersectionality; Sentencing and the courts and community punishments; Specific offences; Incarcerated women's experiences; Mothers and families; Rehabilitation and reintegration; Practitioner relationships), and each theme includes contributions from different countries as well as the experiences of contributors from different stages in their own journey. International and interdisciplinary in scope, this Handbook is essential reading for scholars and students of criminology, sociology, social policy, social work, and law. It will also be of interest to practitioners, such as social workers, probation officers, prison officers, and policy makers.

Giving Our Children a Fighting Chance Susan B. Neuman 2015-04-25 This is a compelling, eye-opening portrait of two communities in Philadelphia with drastically different economic resources. Over the course of their 10-year investigation, the authors of this important new work came to understand that this disparity between affluence and poverty has created a knowledge gap--far more important than mere achievement scores--with serious implications for students' economic prosperity and social mobility. At the heart of this knowledge gap is the limited ability of students from poor communities to develop information capital. This moving book takes you into the communities in question to meet the students and their families, and by doing so provides powerful insights into the role that literacy can play in giving low-income students a fighting chance. Important reading for a wide audience of educators, policymakers, school reformers, and community activists, *Giving Our Children a Fighting Chance*: Documents how inequalities begin early and are reinforced by geographic concentration. Compares community libraries to see how print is used in each neighborhood and how children develop as young readers. Looks at patterns that create radical differences in experiences and attitudes toward learning prior to entering school. Explores the function of technology as a tool that exacerbates the divide between affluent students and those with limited access to information. Provides a comprehensive analysis of community literacy, documenting the transformation of media habits from books to computers. Concludes with a look inside schools to answer questions about what schools can do to overcome this complex, unequal playing field. Susan B. Neuman is a professor of Educational Studies at the University of Michigan, and has served as the U.S. Assistant Secretary for Elementary and Secondary Education. Her books include *Changing the Odds for Children at Risk*. Donna C. Celano is assistant professor of Communication at La Salle University in Philadelphia. "Giving Our Children a Fighting Chance depicts a stark reality: the enormous and growing divide in literacy and reading skill development between children growing up in poverty and children from the middle and upper classes—and the social and economic ramifications. This book should be required reading, not just for those in the education and policy fields, but for anyone who cares about the lives of children and the health of our society." —Kyle Zimmer, President and CEO, First Book "“By walking the streets, riding the buses, and taking the subways,” Celano and Neuman give us a groundbreaking and sobering look at print and education technology resources in two neighborhoods, one wealthy and one poor. The result is a must-read eye-opener for anyone who cares about equal opportunity. The stuff of learning is essential but insufficient. Only with close teacher, parent, and student-to-student coaching can better print and technology resources make a difference.” —Eugenia Kemble, Executive Director, Albert Shanker Institute "The authors of this text make you CARE about these communities and children. They provide insights about how we must focus on literacy in order to make a real difference in the lives of students. This is one of the most comprehensive analyses to date of community literacy, documenting the transformation of media habits from books to computers." —Linda B. Gambrell, Distinguished Professor of Education, Clemson University

Handbook of Research on Supporting Social and Emotional Development Through Literacy Education Tussey, Jill 2021-06-25 The social and emotional welfare of students in both K-12 and higher education settings has become increasingly important during the third decade of the 21st century, as students face a variety of social-emotional learning (SEL) challenges related to a multitude of internal and external factors. As concepts around traditional literacy education evolve and become more culturally and linguistically relevant, the connections between SEL and academic literacy opportunities warrant considerable exploration. The Handbook of Research on Supporting Social and Emotional Development Through Literacy Education develops a conceptual framework around pedagogical connections to social and emotional teaching and learning within K-12 literacy practices. This text provides a variety of research and practice protocols supporting student success through the integration of SEL and literacy across grade levels. Covering topics such as culturally relevant literacy, digital literacy, and content-area literacy, this handbook is essential for curriculum directors, education faculty, instructional facilitators, literacy

professionals, practicing teachers, pre-service teachers, professional development coordinators, school counselors, teacher preparation programs,

academicians, researchers, and students.
