Rebooting AI Gary Marcus 2019-09-10 Two leaders in the field offer a compelling analysis of the current state of the art and reveal the steps we must take to achieve a truly robust artificial intelligence. Despite the hype surrounding AI, creating an intelligence that rivals or exceeds human levels is far more complicated than we have been led to believe. Professors Gary Marcus and Ernest Davis have spent their careers at the forefront of AI research and have witnessed some of the greatest milestones in the field, but they argue that a

computer beating a human in Jeopardy! does not signal that we are on the doorstep of fully autonomous cars or superintelligent machines. The achievements in the field thus far have occurred in closed systems with fixed sets of rules, and these approaches are too narrow to achieve genuine intelligence. The real world, in contrast, is wildly complex and open-ended. How can we bridge this gap? What will the consequences be when we do? Taking inspiration from the human mind, Marcus and Davis explain what we need to advance AI to the next level, and suggest that if we are wise along the way, we won't need to worry about a future of machine overlords. If we focus on endowing machines with common sense and deep understanding, rather than simply focusing on statistical analysis and gathering ever larger collections of data, we will be able to create an AI we can trust—in our homes, our cars, and our doctors' offices. *Rebooting AI* provides a lucid, clear-eyed assessment of the current science and offers an inspiring vision of how a new generation of AI can make our lives better.

The Accounting Profession Donald H. Chapin 1996-12 Concerns the status of recommendations made to the accounting profession over the past two decades by major study groups. Identifies (1) recommendations made from 1972-95 to improve accounting & auditing standards & the performance of independent audits under the federal securities laws & the actions taken on those recommendations, & (2) any unresolved issues to determine their impact on the performance of independent audits, effective accounting & auditing standards setting, & efforts to expand the scope of business reporting & audit services.

Recapture the Rapture Jamie Wheal 2021-04-27 "A highly personal, richly informed and culturally wide-ranging meditation on the loss of meaning in our times and on pathways to rediscovering it." —Gabor Maté, MD, author of *In The Realm of Hungry Ghosts: Close Encounters With Addiction* A neuroanthropologist maps out a revolutionary new practice—Hedonic Engineering—that combines the best of neuroscience and optimal psychology. It's an intensive program of breathing, movement, and sexuality that mends trauma, heightens inspiration and tightens connections—helping us wake up, grow up, and show up for a world that needs us all. This is a book about a big idea. And the idea is this: Slowly over the past few decades, and now suddenly, all at once, we're suffering from a collapse in Meaning. Fundamentalism and nihilism are filling that vacuum, with consequences that affect us all. In a world that needs us at our best, diseases of despair, tribalism, and disaster fatigue are leaving us at our worst. It's vital that we regain control of the stories we're telling because they are shaping the future we're creating. To do that, we have to remember our deepest inspiration, heal our pain and apathy, and connect to each other like never before. If we can do that, we've got a shot at solving

the big problems we face. And if we can't? Well, the dustbin of history has swallowed civilizations older and fancier than ours. This book is divided into three parts. The first, *Choose Your Own Apocalypse*, takes a look at our current Meaning Crisis—where we are today, why it's so hard to make sense of the world, what might be coming next, and what to do about it. It also makes a case that many of our efforts to cope, whether anxiety and denial, or tribalism and identity politics, are likely making things worse. The middle section, *The Alchemist Cookbook*, applies the creative firm IDEO's design thinking to the Meaning Crisis. This is where the book gets hands on—taking a look at the strongest evolutionary drivers that can bring about inspiration, healing, and connection. From breathing, to movement, sexuality, music, and substances—these are the everyday tools to help us wake up, grow up, and show up. AKA—how to blow yourself sky high with household materials. And the best part? They're accessible, by anyone anywhere, no middleman required. Transcendence democratized. The final third of the book, *Ethical Cult Building*, focuses on the tricky nature of putting these kinds of experiences into gear and into culture—because, anytime in the past when we've figured out combinations of peak states and deep healing, we've almost always ended up with problematic culty communities. Playing with fire has left a lot of people burned. This section lays out a roadmap for sparking a thousand fires around the world—each one unique and tailored to the needs and values of its participants. Think of it as an open-source toolkit for building ethical culture. In *Recapture the Rapture*, we're taking radical research out of the extremes and applying it to the mainstream—to the broader social problem of healing, believing, and belonging. It's providing answers to the questions we face: how to replace blind faith with direct experience, how to move from broken to whole, and how to cure isolation with connection. Said even more plainly, it shows us how to revitalize our bodies, boost our creativity, rekindle our relationships, and answer once and for all the questions of why we are here and what do we do now? In a world that needs the best of us from the rest of us, this is a book that shows us how to get it done.

Revenue Recognition Guide 2009 Ashwinpaul C. Sondhi 2008 Revenue is the top line in the income statement and one of the most important figures to both preparers and users of financial statements. It is also one of the most difficult numbers in the financial statements to get right. *Revenue Recognition Guide* is a comprehensive reference manual covering the key concepts and issues that arise in determining when and how to recognize revenue. It covers the litany of existing authoritative literature related to revenue recognition and clarifies those revenue recognition concepts that are vague.

Final Accounting Barbara Ley Toffler 2004-04-13 A withering exposé of the unethical practices that triggered the indictment and collapse of the legendary accounting firm. Arthur Andersen's conviction on obstruction of justice charges related to the Enron debacle spelled the abrupt end of the 88-year-old accounting firm. Until recently, the venerable firm had been regarded as the accounting profession's conscience. In *Final Accounting*, Barbara Ley Toffler, former Andersen partner-in-charge of Andersen's Ethics & Responsible Business Practices consulting services, reveals that the symptoms of Andersen's fatal disease were evident long before Enron. Drawing on her expertise as a social scientist and her experience as an Andersen insider, Toffler chronicles how a culture of arrogance and greed infected her company and led to enormous lapses in judgment among her peers. *Final Accounting* exposes the slow deterioration of values that led not only to Enron but also to the earlier financial scandals of other Andersen clients, including Sunbeam and Waste Management, and illustrates the practices that paved the way for the accounting fiascos at WorldCom and other major companies. Chronicling the inner workings of Andersen at the height of its success, Toffler reveals "the making of an Android," the peculiar process of employee indoctrination into the Andersen culture; how Androids—both accountants and consultants—lived the mantra "keep the client happy"; and how internal infighting and "billing your brains out" rather than quality work became the all-important goals. Toffler was in a position to know when something was wrong. In her earlier role as ethics consultant, she worked with over 60 major companies and was an internationally renowned expert at spotting and correcting ethical lapses. Toffler traces the roots of Andersen's ethical missteps, and shows the gradual decay of a once-proud culture. Uniquely qualified to discuss the personalities and principles behind one of the greatest shake-ups in United States history, Toffler delivers a chilling report with important ramifications for CEOs and individual investors alike.

An Empire of Their Own Neal Gabler 2010-11-17 A provocative, original, and richly entertaining group biography of the Jewish immigrants who were the moving forces behind the creation of America's motion picture industry. The names Harry Cohn, William Fox, Carl Laemmle, Louis B. Mayer, Jack and Harry Warner, and Adolph Zucker are giants in the history of contemporary Hollywood, outsiders who dared to invent their own vision of the American Dream. Even to this day, the American values defined largely by the movies of these émigrés endure in American cinema and culture. Who these men were, how they came to dominate Hollywood, and what they gained and lost in the process is the exhilarating story of *An Empire of Their Own*.

Intangibles in the World of Transfer Pricing Björn Heidecke 2021-03-10 Intangible assets are becoming increasingly important as value drivers for multinational companies. It is a strategic question how to allocate intangibles within the multinational corporation. It needs to be defined by whom and under which conditions they can be utilized. Typical IP migration models such as licensing, joint development and transferring are becoming a focal point within tax audits across the globe. Hence, defining an intangibles system that fulfils the tax requirements is of utmost strategic importance for multinational corporations. A central question is how to value intangibles in line with the arm's length principle as is required internationally for transfer pricing purposes. Edited by leading transfer pricing and valuation experts in Europe, this comprehensive book offers practitioners an effective road map for identifying, valuing and implementing intangibles for transfer pricing purposes under consideration of both the OECD and local perspectives. It is therefore a must-have book for transfer pricing and valuation practitioners on all levels of experience. The book starts with an introduction to the role of intangibles in the world of transfer pricing including typical intangibles migration models. It describes common intangible assets across all types of industries, including e.g. automotive, consumer goods and software. Using several numerical examples, the book then covers state-of-the-art valuation methods including how to apply these methods in practice in a way consistent with the OECD Transfer Pricing Guidelines. The different country chapters written by local experts provide country-specific guidance on the legal framework concerning intangible assets from a transfer pricing and valuation perspective. Finally, the book covers practical advice on the implementation of an intangible assets system. This book offers invaluable guidance to practitioners seeking tools to apply the arm's length principle in the world of intangibles.

Women in Public Relations Larissa A. Grunig 2013-09-13 The past 20 years have seen an influx of women into the practice of public relations, yet gender-based disparities in pay and advancement remain a troubling reality. As the field becomes feminized, moreover, female and male practitioners alike confront the prospect of dwindling salaries and prestige. This landmark book presents a comprehensive examination of the status of women in public relations and proposes concrete ways to achieve greater parity in education and practice. The authors integrate the theoretical literature of public relations and gender with results of a major longitudinal study of women in the field, along with illuminating focus group and interview data. Topics covered include factors contributing to sex discrimination; how public relations stacks up against other professions on gender-related issues; the challenges facing female managers and entrepreneurs; the experiences of ethnic minority professionals; the salary gap; the glass ceiling; and how to foster solutions on individual, organizational, and societal levels. This volume is an essential read for both educators and practitioners in public relations. It can be used as a course text in graduate research seminars, and also as a supplemental text in courses addressing gender issues in PR. It serves as a useful guide for young practitioners entering the profession, and provides critical insights for public relations managers.

The Transgender-Industrial Complex Scott Howard 2020-12-07 In his debut book, Nebraskan author Scott Howard exposes the actors financing the institutionalization of transgenderism. Behind the medical research into gender transitioning of children, ubiquitous pride parades, and Drag Queen Story Hours is a lot of money. Sex education, the homosexual and feminist precursor projects, and the global propaganda are all pushed and paid for by very wealthy and well-connected people with motive and will. Howard demonstrates that the transgender phenomenon is far from the "grass-roots movement" some of its advocates would have the public believe. Impeccably sourced and researched, *The Transgender-Industrial Complex* pulls the mask off the complex network of influential groups responsible for this inhuman project. Howard takes a deep dive into the murky depths of the Big Money behind Big Gay, exposing how the concept gained such recognition as well as the goals of the people behind it. At once wide-ranging and specific, advanced and accessible, *The Transgender-Industrial Complex* is essential reading for anyone who wants to understand why every institution with power, and a great many without, are uniform in their inversion of reality, their religion of lies, and their commitment to all that is ugly, broken, and foul. Antelope Hill is proud to present it's first original work: Scott Howard's *The Transgender-Industrial Complex*.

Evolution of U.S. Regulation and the Standard-Setting Process for Financial Reporting Stephen A. Zeff 2021-09-13 *Evolution of U.S. Regulation and the Standard-Setting Process for Financial Reporting: 1930s to the Present* surveys and explains the evolution of the stream of events and developments in the regulation and standard setting that have set the requirements for companies' financial reporting in the U.S. capital market. Particular attention is given to instances in which the SEC, as regulator, has either been in disagreement with the private-sector accounting standard setter, or where they both have partnered in a solution. Attention is also given to some of the more celebrated attempts by self-interested parties, particularly the company sector, to interpose themselves forcefully into the standard-setting process. The interventions from members of Congress on behalf of the company sector are also the object of study. In this rendering of the evolution, the author has endeavored to provide extensive references to the published literature to enable readers to study the events and developments in greater depth.

Romney Readiness Project 2012 2013-01-01 The importance of effective and well-planned presidential transitions has long been understood. The Presidential Transition Act of 1963 provided a formal recognition of this principle by providing the President-elect funding and other resources "To promote the orderly transfer of the executive power in connection with the expiration of the term of office of a President and the Inauguration of a new President." The Act received minor amendments in the following decades, but until 2010 all support provided was entirely post-election. The Pre-Election Presidential Act of 2010 changed this by providing pre-election support to nominees of both parties. Its passing reinforced the belief that early transition planning is prudent, not presumptuous. The Romney Readiness Project was the first transition effort to operate with this enhanced pre-election focus. While Obama's re-election prevented a Romney transition from occurring, it is hoped that the content of this book can provide a valuable insight to future transition teams of both parties.

The Kind Leader Karyn Ross 2021-09-09 Kindness and leadership aren't often synonymous. Ask someone to describe "good leadership" to you and you will hear many adjectives used: authentic, bold, challenging, charismatic, decisive, empowering, fearless, goal-oriented, humble, inspiring, original, passionate, role-model, strategic and transparent, to name of a few. And though there are many more that come to mind, kindness isn't one of them. And here's the problem with that. Leaders lead. And the way a leader leads – how they do

what they do – influences those they lead. From the president of the country, to the president of a company, from middle managers, right down to front-line supervisors, what a leader models – how they think, speak and act – influences the people they lead. Leaders who think, speak and act unkindly give legitimacy and permission to those they lead to think, speak, and act in exactly the same unkind ways. Today, in a world where a leaders' words and actions travel quickly through social media channels such as Twitter, their influence – unkind or kind – is amplified through repeated views and sharing. In an increasingly fragmented, polarized and divided world, we need leaders who will bring people together not divide them. Leaders who value and model cooperation and collaboration over competition. And who model ways to think kindly, speak kindly and act kindly. We need kindness to become synonymous with good leadership. So that when someone is asked to describe the traits of a good leader, kindness will be the first word that comes to mind. Essentially, the purpose of this book is to teach leaders how to lead with kindness so they can influence the people they lead to create kinder workplaces, organizations and the world. Each chapter contains a mixture of theory, case studies and reflections from leaders and the people they influence. As well, the book follows the fictional stories of Kay'La Janson and Kevin Landrell, as they become leaders in a failing organization that is ultimately turned around through kind leadership. Between chapters there are a series of practical exercises based on concepts presented in the previous chapter with space to record outcomes and reflections on the practice process. This book gives you a deep theoretical understanding of the importance of leading with kindness and also provides practical exercises for you to use to turn theory into practice. Because "change means doing things differently," and because we only really "learn by doing" to create kinder organizations, kinder communities and a kinder world, leaders must be able to begin practicing kindness right away. By the time you finish the book, you will feel confident in your ability to lead with kindness and also to address organizational problems at work, at home and in the community, with kindness.

A Decadal Survey of the Social and Behavioral Sciences National Academies of Sciences, Engineering, and Medicine 2019-07-26 The primary function of the intelligence analyst is to make sense of information about the world, but the way analysts do that work will look profoundly different a decade from now. Technological changes will bring both new advances in conducting analysis and new risks related to technologically based activities and communications around the world. Because these changes are virtually inevitable, the Intelligence Community will need to make sustained collaboration with researchers in the social and behavioral sciences (SBS) a key priority if it is to adapt to these changes in the most productive ways. A Decadal Survey Of The Social and Behavioral Sciences provides guidance for a 10-year research agenda. This report identifies key opportunities in SBS research for strengthening intelligence analysis and offers ideas
