Riding in the Zone Ken

Condon 2019-10-15 Riding motorcycles is fun, but author Ken Condon maintains that there is a state of consciousness to be achieved beyond the simple pleasure of riding down the road. Riding in the Zone helps riders find that state of being. It's the experience of being physically and mentally present in the moment, where every sense is sharply attuned to the ride. Your mind becomes silent to the chatter of daily life, and everyday problems seem to dissolve. You feel a deeper

appreciation for life. Your body responds to this state of being with precise, fluid movements, you feel in balance, your muscles are relaxed, and it seems as though every input you make is an expression of mastery. This is "the Zone." Condon identifies all of the factors that affect entering the Zone and addresses each one individually, from the development of awareness and mental skills to mastering physical control of the motorcycle. At the end of each chapter are drills designed to transform the book's ideas into solid, practical riding skills. Riding in the Zone takes riders to the next level in their skill set.

Centered Riding Sally Swift
1985-01-15 Widely known for her innovative teaching philosophy stressing body awareness, the value of "soft eyes," proper breathing, centering, and balance, Sally Swift has been a pioneering riding instructor for half a century. In book form for the first time, her methods enable horse and rider to achieve harmony, working together naturally, without pain. Unlike traditional teachers, Sally Swift does not believe in forced training techniques that cause stiff bodies and tense riding. Instead, through the use of vivid, unusual, and highly creative images that transcend mechanics ("Pretend you're a spruce tree; the ~~horse~~ **horse** glides from

down from your center as the trunk grows up"), plus a thorough knowledge of human and equine anatomy, this wise and inspiring teacher enables the conscientious equestrian to reassess habitual responses, in order to ride in natural positions, break through frustrating plateaus, and achieve ever-rising goals with comfort, vitality, and precision. Precise illustrations and photographs never before used in riding books explain anatomy and image work to give mind and body new and relaxed approaches to the inner process of riding. Centered Riding is for those with little experience all the way up to world class.

Mind Machines (Human+ + Book 1) Dima Zales

2017-01-23 From New York Times & USA Today bestselling author Dima Zales, an intense new techno-thriller that pushes the limits of what it means to be human. With billions in the bank and my own venture capital firm, I'm living the American dream. My only problem? A car accident that leaves my mother with memory problems. Brainocytes, a new technology that can transform

our brains, could be the answer to all of my problems—but I'm not the only one who sees its potential. Plunged into a criminal underworld darker than anything I could've imagined, my life-saving technology might be the death of me. My name is Mike Cohen, and this is how I became more than human. TimeRiders: Day of the Predator Alex Scarrow 2011-09-27 Liam O'Connor, Maddy Carter, and Sal Vikram all should have died. But instead, they have been given a second chance-to work for an agency that no one knows exists. The TimeRiders' mission: to prevent time travel from destroying history-and the future. . . . When Maddy mistakenly opens a time window where and when she shouldn't, Liam is marooned sixty-five million years in the past, in the hunting ground of a deadly, and until now undiscovered, species of prehistoric predator. Can Liam make contact with Maddy and Sal before he's hunted down by

dinosaurs, and without changing history so much that the world is overtaken by a terrifying new reality? The second book in the thrilling TimeRiders series is just as fast-paced, intelligent, and mind-bending as the first.

Time's Twisted Arrow C.

Walniuk 2012-10-01 In the year 2307, historians are born with a genetic license to time-travel and are sent out with strict orders to observe everything and change nothing. But when a violent act of sabotage strands twenty-three CHRONOS historians at various points in time, it triggers a chain of events that will alter history and potentially erase more than half of the human population. In *TIME'S TWISTED ARROW*, the first book of The CHRONOS Files, seventeen-year old Kate learns that she has inherited designer DNA when her

grandmother arrives with a strange medallion that she claims only Kate and a few other descendants of the CHRONOS historians can operate. Kate soon finds herself in an alternate reality. Leaders of a previously unknown religion now hold great power and her grandmother has been murdered somewhere in the past. Her mother never existed, her father doesn't know her, and she has - rather inconveniently - managed to fall in love. In order to restore the time line, Kate must travel back to 1893 and keep herself and her grandmother clear of the serial killer, H.H. Holmes, who is stalking young women at the Chicago World's Fair. Unfortunately, other descendants of CHRONOS have a very different agenda.

A Year Without Autumn Liz Kessler 2011-04-07 If you could see into the future - would you look? Jenni Green doesn't have a choice. On her way to visit her best friend, Autumn, Jenni suddenly finds she's been transported exactly one year forward in time. ~~Now she~~

discovers that in the year that's gone by, tragedy has struck and her friendship with Autumn will never be the same again. But what caused the tragedy? How did Jenni skip a year? And can she find her way back to the past to try to change what lies ahead? With humour - and her customary light touch - the author of the EMILY WINDSNAP books plays a fascinating game with time, and explores the changes that take place in friendships and families in the aftermath of a disaster.

London's Urban Landscape

Christopher Tilley 2019-05-07
London's Urban Landscape is the first major study of a global city to adopt a materialist perspective and stress the significance of place and the built environment to the urban landscape. Edited by Christopher Tilley, the volume is inspired by phenomenological thinking and presents fine-grained ethnographies of the practices of everyday life in London. In doing so, it charts a unique perspective on the city that integrates ethnographies of

daily life with an analysis of material culture. The first part of the volume considers the residential sphere of urban life, discussing in detailed case studies ordinary residential streets, housing estates, suburbia and London's mobile 'linear village' of houseboats. The second part analyses the public sphere, including ethnographies of markets, a park, the social rhythms of a taxi rank, and graffiti and street art. London's Urban Landscape returns us to the everyday lives of people and the manner in which they understand their lives. The deeply sensuous character of the embodied experience of the city is invoked in the thick descriptions of entangled relationships between people and places, and the paths of movement between them. What stories do door bells and house facades tell us about contemporary life in a Victorian terrace? How do antiques acquire value and significance in a market? How does living in a concrete megastructure relate to the lives of the people

From the first moment of her freshman year at Merryweather High, Melinda knows this is a big fat lie, part of the nonsense of high school. She is friendless—an outcast—because she busted an end-of-summer party by calling the cops, so now nobody will talk to her, let alone listen to her. Through her work on an art project, she is finally able to face what really happened that night: She was raped by an upperclassman, a guy who still attends Merryweather and is still a threat to her. With powerful illustrations by Emily Carroll, Laurie Halse Anderson's *Speak: The Graphic Novel* comes alive for new audiences and fans of the classic novel. This title has Common Core connections.
