Human security is an important subject for the whole world, in particular Asia, as it deals with interactions among fields of social change, such as development, conflict resolution, human rights, and humanitarian assistance. In a globalizing world, in which threats become trans-national and states lose power, security can no longer be studied in a one-dimensional fashion. Written by authors who are experts in this field and with case studies from different regions (Afghanistan, Central Asia and South Asia) presented throughout, this book - now available in paperback - contributes to this new multidimensional conception of security, analyzes its strengths and weaknesses, and focuses on its implications for analysis and action.

Some of the most important findings for these economies include the importance of institutional capacity to sustain reforms, the value of facilitating local participation to increase the sustainability of development programs, and the requirements for fostering a dialog between stakeholders, including the private sector.

A team of contributors from across Africa provide valuable reflections on the conceptualisation and applicability of the concept of human security in the context of religion in Africa. Chapters highlight how themes such as knowledge systems, youth, education, race, development, sacred texts, the media, sexual diversity, health and others have implications for individual and group security. In order to bring these themes into perspective, chapters in the first section reflect on the conceptual, historical and contextual factors at play. The chapters that follow demonstrate the theories put forward by means of case studies from countries such as Zimbabwe, Kenya, Botswana and Ghana that look at African religion, Islam and Christianity. Case studies from Morocco, Tunisia, Egypt, Turkey, Iraq and Syria provide empirical evidence, with a focus section dedicated to the critical issue of water resources and water security in the region. Understanding New Security Threats Michel Gueldry

2019-02-21 This textbook examines non-traditional forms of security and expands the notion of security to include non-state actors and non-human actors. Proposing an expansive view of non-traditional forms of security that go beyond traditionally recognized issues of threats to state and national territory, this new textbook rests on the following premises: traditional state-centered threats, such as nuclear proliferation and espionage, remain a concern; old and new threats combine and create interlocking puzzles—a feature of wicked problems and wicked messes; because of the global erosion of borders, new developments of unconventional insecurity interact in ways that frustrate traditional conceptual definitions, conceptual maps, and national policies; unconventional security challenges which have traditionally been seen as "low

now being recognized as "hard security" challenges in the twenty-first century; many of the so-called "new" threats detailed here are in fact very old: diseases, gender violence, food insecurity, under-development, and crime are all traditional security threats, but deeply modified today by globalization. The chapters offer local and global examples and engage with various theoretical approaches to help readers see the bigger picture. Solutions are also suggested to these problems. Each chapter contains discussion questions to help readers understand the key points and facilitate class discussion. This book will be of great interest to students of international security studies, human security, global politics, and international relations.

Based on this realization, the international community has recognized a responsibility to protect individuals in states where their governments are unable or unwilling to provide protection against the most serious violations. However, so far, only one intergovernmental organization, the African Union (AU), has explicitly made the right to intervene in a Member State part of its foundational text in Article 4(h) of its Constitutive Act. Although there have been cases of Article 4(h)-type interventions in Africa, the AU Assembly has not yet invoked Article 4(h) explicitly. This book brings together experts in the field to explore the potential application of Article 4(h), and the complexities that may explain its non-invocation so far. Although Article 4(h) is noble in purpose, its implementation faces several legal and policy challenges given that the use of force penetrates the principles of state sovereignty and non-intervention – the very cornerstones upon which the

This book considers these issues, as well as the need to reconcile Article 4(h), in so far as it allows the AU to exercise military intervention to protect populations at risk of mass atrocities, with the provisions of the Charter of the United Nations. Drawing from the insights of law, political science, diplomacy and military strategy, the book offers a unique combination of multi-disciplinary expertise that harnesses the views of a diverse group of authors, focused on the legal, policy, and practical insights on the implementation of Article 4(h) and the responsibility to protect in Africa in order to provide concrete recommendations on how to end mass atrocities on the continent

Human Security Amitav Acharya 2011 Human security is a new paradigm for security, development and justice. Since it was first proposed in the 1990s, there has been an endless debate between its proponents and critics, and even among its advocates, over the meaning and utility of the concept. What is important now is to move the concept beyond the realm of theory and explore its practical applications, considering possible policy perspectives and implications. This book suggests new practical applications of the human security concept, such as human security mapping, the human security governance index and human security impact assessment. Today, the United States enjoys a position of unparalleled military strength and great economic and political influence. In keeping with our heritage and principles, we do not use our strength to press for unilateral advantage. We seek instead to create a balance of power that favors human freedom: conditions in which all nations and all societies can choose for themselves the rewards and challenges of political and economic liberty. Millions of people in regions like the Middle East or East and Central Africa or Central Asia where new wars are taking place live in daily fear of violence. Moreover new wars are increasingly intertwined with other global risks the spread of disease, vulnerability to natural disasters, poverty and homelessness. global conversation- a public debate among civil society groups and individuals as well as states and international institutions. The chapters follow on from Kaldors path breaking analysis of the character of new wars in places like the Balkans or Africa during the 1990s. The first four chapters provide a context; they cover the experience of humanitarian intervention, the nature of American power, the new nationalist and religious movements that are associated with globalization, and how these various aspects of current security dilemmas have played out in the Balkans. The last three chapters are more normative, dealing with the evolution of the idea of global civil society, the relevance of just war theory in a global era, and the concept of human security and what it might mean to implement such a concept. This book will appeal to all those interested in issues of peace and conflict, in particular to students of politics and international relations.

Resource, Human Security and Environmental Conflicts in Africa

Kelechi Johnmary Ani
2021-09-07 This book shows the push and pull effects between resources, human security and conflicts in Africa. It recognizes the need for resources in Africa to be processed into finished goods in order to influence global market and redefine the pattern of trade relations with powerful countries of Asia, America and Europe in shaping the destiny and future of African countries. The achievement of this laudable objective is plagued by the security challenges which are directly or indirectly linked to resource-related conflicts rocking most of the resource endowed countries in the continent, thereby threatening global peace and security. To deal with this menace in the continent, it requires global co-operation and support of foreign governments, international organizations, international non-government organizations, governments of host countries and its citizens.

The Relationship between Human Security Discourse and International Law

Shireen Daft 2017-12-01 The concept of human security has emerged in international relations and policy as an idea which not only seeks to relocate the focus of international society on the individual, but also challenges the current priorities of the international community. In particular it places emphasis on promoting and facilitating a nexus between security, development and human rights. It is potentially a paradigm in the making, gaining considerable momentum within the UN, international relations scholarship and regional bodies. And yet by-and-large it continues to be unexplored by the international legal community, despite the success of a number of international treaties being attributed to the discourse. address this gap, and establish the nature of the relationship between human security discourse and international law, determining whether human security can meaningfully contribute to the international legal framework. To determine this, the book analyses the core principles of human security discourse and examines the degree to which they find parallels in the existing normative structure of international law. 2017-02-16 This clear and concise new edition offers a comprehensive comparison of national, international, and human security concepts and policies. keep all options on the table for national security. This is particularly apparent with the increase in “glocalized” terrorism and the forced migration of millions of people. Although security as a concept can be widened to encompass almost any aspect of existence, Neack focuses especially on security from physical violence. Case studies throughout bring life to the concepts. New cases in this revised edition include the Syrian refugee crisis and the responses from European states, the growth and reach of jihadist terrorist groups and the unilateral and multilateral military actions taken to confront them, drug trafficking organizations and the Mexican government’s failure to protect citizens, the overt use of preventive war by major and regional powers and the increasing American reliance on drone warfare, multilateral “train-and-assist” operations aimed at peacekeeping and counterterrorism in Africa, UN civilian protection mandates in Libya and Côte d’Ivoire and their absence in Syria, and how

The African Union and Its Institutions John Akokpari
2008 Written by eminent scholars on Africa and practitioners who have worked in or with the African Union (AU), this report brings together

the analysis and research of 17 largely Pan-African scholars, policymakers, practitioners, and civil society representatives.
