Together, these models kept the Alfa Romeo name at the pinnacle of motor sport for many years, from 1992 to 2006, and will become future motorsport classics.

sports car racing in America
following the ban on public road
racing in many of the States. The ban
left the rapidly expanding Sports Car
Club of America with a problem: where
to hold races. At precisely the same
time, Curtis LeMay, head of Strategic
Air Command, was having problems
obtaining funds from Congress to
improve conditions on the many air
bases located around the country. The
solution was a marriage of
convenience, whereby the SCCA was
allowed access to active SAC air
bases to hold its race programmes. In
return, the SAC base would receive
the net profits from the event, which
would be put into the Airmen's Living
Improvement Fund. As a result of some
initial financial success for the SAC
bases, the scheme was also adopted by
non-SAC bases together with regional
clubs, with the same agreement in
place. Complaints from airmen alerted
Congressman Errett Scrivner to
potential irregularities, and he

ordered an audit to be conducted to ascertain precisely what it was costing the air bases to host the races. His findings led to the cessation of the races, ordered by Congress. The product of a long period of extensive research by the author, this book gives a fascinating insight into this two-year period, complemented by over 150 period pictures, many previously unpublished.

Russian Motor Vehicles Maurice A. Kelly 2011-04-15 A book concerning Russian Limousines, and the Chinese models that were initially derived from them, has never been attempted before. This book investigates the whole story of why the Soviet Communist Party required such a bourgeois product, and how production was subsequently achieved. Following the orders of Stalin, work on the Limousines commenced during the first Five Year Plan (1927-1933) at the Putilov Works, late the Kirov Zavod, where the Leningrad L-1 was made in a limited number. From these beginnings, the Moscow and Gorky models emerged, and later the Chinese-derived types made with Russian aid during the late 1950s.
