Constitutional Theory Carl Schmitt 2008-01-23 Carl Schmitt's magnum opus, Constitutional Theory, was originally published in 1928 and has been in print in German ever since. This volume makes Schmitt's masterpiece of comparative constitutionalism available to English-language readers for the first time. Schmitt is considered by many to be one of the most original—and, because of his collaboration with the Nazi party, controversial—political thinkers of the twentieth century. In Constitutional Theory, Schmitt provides a highly distinctive and provocative interpretation of the Weimar Constitution. At the center of this interpretation lies his famous argument that the legitimacy of a constitution depends on a sovereign decision of the people. In addition to being subject to long-standing debate among legal and political theorists in Western Europe and the United States, this theory of constitution-making as decision has profoundly influenced constitutional theorists and designers in Asia, Latin America, and Eastern Europe. Constitutional Theory is a significant departure from Schmitt's more polemical Weimar-era works not just in terms of its moderate tone. Through a comparative history of constitutional government in Europe and the United States, Schmitt develops an understanding of liberal constitutionalism that makes room for a strong, independent state. This edition includes an introduction by Jeffrey Seitzer and Christopher Thornhill outlining the cultural, intellectual, and political contexts in which Schmitt wrote Constitutional Theory; they point out what is distinctive about the work, examine its reception in the postwar era, and consider its larger theoretical ramifications. This volume also contains extensive editorial notes and a translation of the Weimar Constitution.

Latin American Politics David Cole 2010-02-01 Highlighting eleven different topics in separate chapters, the thematic approach of Latin American Politics offers students the conceptual tools they need to analyze the political systems of all twenty Latin American nations. Such a structure makes the book self-consciously comparative, allowing students to become stronger analysts of comparative politics and better political scientists in general.

The Idea of Arbitration Jan Paulsson 2013-11-21 What is arbitration? This volume provides a novel theoretical examination of the concept of arbitration, attempting to answer fundamental questions which have rarely been addressed systematically in English. It explores the place of arbitration in the legal process, offering a challenging, yet accessible overview of the field and its theoretical underpinnings and contending that arbitration is important enough to be understood in its own terms, as a sui generis feature of social life. Why do individuals, companies, and States choose to go to arbitration rather than through litigation? Arbitration can offer increased flexibility and confidentiality, and provides the parties with the opportunity to select the arbitrators. But what makes them want to confide in an arbitrator rather than use the more traditional legal mechanisms for settling disputes? This volume explores what the parties can expect of an arbitrator, and whether and how the conduct of an arbitrator might be questioned and under what authority. It examines the ethical challenges to arbitral authority and and its moral hazards, evaluating the promises and dangers of self-contained systems of decision-making and compliance.

Ivor Novello Song Album Ivor Novello 1998-05 Ivor Novello (born David Ivor Davies) was a Welsh composer, singer and actor who became one of the most popular British entertainers of the early 20th century. He first became well known through the song Keep the Home Fires Burning which he composed during World War I. After the war, he began a film career, and also appeared on stage in the West End, in musical shows of his own devising, most notably The Dancing Years. Novello started in two early Hitchcock films before heading to Hollywood and appeared in some successful films. He died in 1951, at a fairly young age of 58. Titles: And Her Mother Came Too! * Music in May * Rose of England * I Can Give You the Starlight * My Dearest Dear * My Life Belongs to You * Waltz of My Heart * Fold Your Wings * Glamorous Night * Shine * Through My Dreams * Fly Home, Little Heart * Some Day My Heart Will

Awake * Love Is the Reason * We'll Gather Lilacs * Keep the Home Fires Burning (Till the Boys Come Home).

Pablo Picasso Victoria Charles 2011-07-01 Picasso was born a Spaniard and, so they say, began to draw before he could speak. As an infant he was instinctively attracted to artist's tools. In early childhood he could spend hours in happy concentration drawing spirals with a sense and meaning known only to himself. At other times, shunning children's games, he traced his first pictures in the sand. This early self-expression held out promise of a rare gift. Málaga must be mentioned, for it was there, on 25 October 1881, that Pablo Ruiz Picasso was born and it was there that he spent the first ten years of his life. Picasso's father was a painter and professor at the School of Fine Arts and Crafts. Picasso learnt from him the basics of formal academic art training. Then he studied at the Academy of Arts in Madrid but never finished his degree. Picasso, who was not yet eighteen, had reached the point of his greatest rebelliousness; he repudiated academia's anemic aesthetics along with realism's pedestrian prose and, quite naturally, joined those who called themselves modernists, the non-conformist artists and writers, those whom Sabartés called "the élite of Catalan thought" and who were grouped around the artists' café Els Quatre Gats. During 1899 and 1900 the only subjects Picasso deemed worthy of painting were those which reflected the "final truth"; the transience of human life and the inevitability of death. His early works, ranged under the name of "Blue Period" (1901-1904), consist in blue-tinted paintings influenced by a trip through Spain and the death of his friend, Casagemas. Even though Picasso himself repeatedly insisted on the inner, subjective nature of the Blue Period, its genesis and, especially, the monochromatic blue were for many years explained as merely the results of various aesthetic influences. Between 1905 and 1907, Picasso entered a new phase, called "Rose Period" characterised by a more cheerful style with orange and pink colours. In Gosol, in the summer of 1906 the nude female form assumed an extraordinary importance for Picasso; he equated a depersonalised, aboriginal, simple nakedness with the concept of "woman". The importance that female nudes were to assume as subjects for Picasso in the next few months (in the winter and spring of 1907) came when he developed the composition of the large painting, Les Femmes d'Alger (O. J. G. S. 1965). Picasso's work in this period was a synthesis of the development of Picasso's classic aesthetics in 1907, the lessons of Cézanne are perceived as the cornerstone of this new progression. This relates, first of all, to a spatial conception of the canvas as a composed entity, subjected to a certain constructive system. Georges Braque, with whom Picasso became friends in the autumn of 1908 and together with whom he led Cubism during the six years of its apogee, was amazed by the similarity of Picasso's pictorial experiments to his own. He explained that: "Cubism's main direction was the materialisation of space." After his Cubist period, in the 1920s, Picasso returned to a more figurative style and got closer to the surrealist movement. He represented distorted and monstrous bodies but in a very personal style. After the bombing of Guernica during 1937, Picasso made one of his most famous works which starkly symbolises the horrors of that war and, indeed, all wars. In the 1960s, his art changed again and Picasso began looking at the art of great masters and based his paintings on ones by Velázquez, Poussin, Goya, Manet, Courbet and Delacroix. Picasso's final works were a mixture of style, becoming more colourful, expressive and optimistic. Picasso died in 1973, in his villa in Mougins. The Russian Symbolist Georgy Chulkov wrote: "Picasso's death is tragic. Yet how blind and naïve are those who believe in imitating Picasso and learning from him. Learning what? For these forms have no corresponding emotions outside of Hell. But to be in Hell means to anticipate death. The Cubists are hardly privy to such unlimited knowledge".

Understanding Teaching and Learning Baljit Kaur 2012-12-17 • How do children, individually and collectively, make meanings of their learning experiences? • How can teachers become aware of children's meaning making on an ongoing basis? • Is it possible and useful to create an integrated theory of student learning? • How can classroom research enhance critical understandings of the situated nature of learning and teaching, while taking into account the systemic and educational policy contexts? • How do differences, such as class, race, culture, gender and sexualities, interact with student learning? • How can teachers respond effectively to the realities of today's diverse classrooms? • What are the current and emerging issues in classroom research? These are just some of the questions this book grapples with. It pays tribute to Professor Graham Nuthall's (1935-2004) research contributions - a pioneering and internationally renowned classroom researcher of teaching and learning from New Zealand. It has been written by emerging and experienced classroom researchers from several countries as part of a project aimed at building on and extending Nuthall's research and promoting the conducting, teaching and supervision of classroom research. The authors engage critically with theoretical, methodological and pedagogical possibilities of their research using Nuthall's work as a springboard. As a result, all authors make links between theory and practice. Further, several leading international researchers contribute comments on future directions for classroom research and its relevance for teaching and learning. Understanding teaching and Learning: Classroom Research Revisited would be of interest to practicing or prospective teachers and teacher educators, as well as scholars and students of teaching and learning.

Tango Lessons Marilyn G. Miller 2014-01-13 From its earliest manifestations on the street corners of nineteenth-century Buenos Aires to its ascendancy as a global cultural form, tango has continually exceeded the confines of the dance floor or the music hall. In *Tango Lessons*, scholars from Latin America and the United States explore tango's enduring vitality. The interdisciplinary group of contributors—including specialists in dance, music, anthropology, linguistics, literature, film, and fine art—take up a broad range of topics. Among these are the productive tensions between tradition and experimentation in tango nuevo, representations of tango in film and contemporary art, and the role of tango in the imagination of Jorge Luis Borges. Taken together, the essays show that tango provides a kaleidoscopic perspective on Argentina's social, cultural, and intellectual history from the late nineteenth to the early twenty-first centuries. International Handbook of Cooperative Law Dante Cracogna 2013-12-12 The degree of development reached by cooperatives of different sectors throughout the world, which among others led to the UN declaring 2012 as the International Year of Cooperatives, needs to be accompanied by a similar development of corresponding legislation. To this end, a better knowledge of cooperative law from the comparative point of view, as has already been established for other types of enterprises, becomes of great importance. This book strives to fill this gap, and is divided into four parts. The first part offers an analytic and conceptual framework with which to understand, study and assess cooperative law from a transnational and comparative perspective. The second part includes several chapters dealing with attempts to harmonize cooperative laws. The third part contains an overview of more than 30 national cooperative laws, while the last part summarizes and compares these national cooperative laws, thus laying the foundation for a comparative cooperative law doctrine.

Manuel de Falla and Modernism in Spain, 1898-1936 Carol A. Hess 2001 Although studies of Modernism have focused largely on European nations, Spain has been conspicuously neglected. As Carol A. Hess argues in this compelling book, such neglect is wholly undeserved. Through composer Manuel de Falla (1876-1946), Hess explores the advent of Modernism in Spain in relation to political and cultural tensions prior to the Spanish Civil War. The result is a fresh view of the musical life of Spain that departs from traditional approaches to the subject and reveals an open and constantly evolving aesthetic climate. *The Glories of Mary* Saint Alfonso Maria de' Liguori 1868

Historical Morphology Jacek Fisiak 1980-01-01 TRENDS IN LINGUISTICS is a series of books that open new perspectives in our understanding of language. The series publishes state-of-the-art work on core areas of linguistics across theoretical frameworks as well as studies that provide new insights by building bridges to neighbouring fields such as neuroscience and cognitive science. TRENDS IN LINGUISTICS considers itself a forum for cutting-edge research based on solid empirical data on language in its various manifestations, including sign languages. It regards linguistic variation in its synchronic and diachronic dimensions as well as in its social contexts as important sources of insight for a better understanding of the design of linguistic systems and the ecology and evolution of language. TRENDS IN LINGUISTICS publishes monographs and outstanding dissertations as well as edited volumes, which provide the opportunity to address controversial topics from different empirical and theoretical viewpoints. High quality standards are ensured through anonymous reviewing.

The Ecological Basis of Conservation Professor of Ecology Moshe Shachak 1997-01-31 From its inception, the U.S. Department of the Interior has been charged with a conflicting mission. One set of statutes demands that the department must develop America's lands, that it get our trees, water, oil, and minerals out into the marketplace. Yet an opposing set of laws orders us to conserve these same resources, to preserve them for the long term and to consider the noncommodity values of our public landscape. That dichotomy, between rapid exploitation and long-term protection, demands what I see as the most significant policy departure of my tenure in office: the use of science-interdisciplinary science-as the primary basis for land management decisions. For more than a century, that has not been the case. Instead, we have managed this dichotomy by compartmentalizing the American landscape. Congress and my predecessors handled resource conflicts by drawing enclosures: "We'll create a national park here," they said, "and we'll put a wildlife refuge over there." Simple enough, as far as protection goes. And outside those protected areas, the message was equally simplistic: "Y'all come and get it. Have at it." The nature and the pace of the resource extraction was not at issue; if you could find it, it was yours.
