Los consumidores y los productores Ellen K. Mitten 2015-01-01 Young Readers Learn That People Are Both Producers And Consumers.

The Paradox of Choice Barry Schwartz 2009-10-13 Whether we're buying a pair of jeans, ordering a cup of coffee, selecting a long-distance carrier, applying to college, choosing a doctor, or setting up a 401(k), everyday decisions—both big and small—have become increasingly complex due to the overwhelming abundance of choice with which we are presented. As Americans, we assume that more choice means better options and greater satisfaction. But beware of excessive choice: choice overload can make you question the decisions you make before you even make them, it can set you up for unrealistically high expectations, and it can make you blame yourself for any and all failures. In the long run, this can lead to decision-making paralysis, anxiety, and perpetual stress. And, in a culture that tells us that there is no excuse for falling short of perfection when your options are limitless, too much choice can lead to clinical depression. In *The Paradox of Choice*, Barry Schwartz explains at what point choice—the hallmark of individual freedom and self-determination that we so cherish—becomes detrimental to our psychological and emotional well-being. In accessible, engaging, and anecdotal prose, Schwartz shows how the dramatic explosion in choice—from the mundane to the profound challenges of balancing career, family, and individual needs—has paradoxically become a problem instead of a solution. Schwartz also shows how our obsession with choice encourages us to seek that which makes us feel worse. By synthesizing current research in the social sciences, Schwartz makes the counter-intuitive case that eliminating choices can greatly reduce the stress, anxiety, and busyness of our lives. He offers eleven practical steps on how to limit choices to a manageable number, have the discipline to focus on those that are important and ignore the rest, and

ultimately derive greater satisfaction from the choices you have to make.

Goods Or Services? Ellen Mitten 2011-08-01 Young Readers Will Identify That Goods Are Objects And Services Are Activities That Can Satisfy People's Wants.

First Grade Essentials for Social Studies: Everything You Need - In One Great Resource! Carole Marsh 2017-06 The 1st Grade Essentials for Social Studies: Everything You Need - In One Great Resource! Is a standards-based book that includes more than 100 1st Grade-specific reproducible pages covering topics essential for instruction. Fun attractive pages present content concisely and clearly making it easy-to-read and easy-to-understand! "Everything you need in one great resource!"

What Are Goods and Services? Carolyn Andrews 2008-08-15 This colorful book will help young readers understand the concepts of goods and services so that they recognize their role in the cycle commerce. The concepts of producers and consumers are also carefully explained in a manner children will understand and enjoy.

Social and Sustainability Marketing Jishnu Bhattacharyya 2021-09-26 "... an important intervention in the conversation around social and ecological sustainability that draws on both micromarketing and macromarketing scholarship to help the reader understand the challenges with illustrations from insightful cases both from emerging and developed economies. This compilation should be essential reading for the discerning student of sustainable consumption and production." -- Professor Pierre McDonagh, Associate Editor, *Journal of Macromarketing* (USA); Professor of Critical Marketing & Society, University of Bath, UK Experts in the field of economics, management science, and particularly in the marketing domain have always been interested in and acknowledged the importance of sustaining profitable businesses while incorporating societal and environmental concerns; however, the level of existing literature and availability of

teaching cases reflect a dearth of real case studies, especially those focused on marketing for social good. This book of actual case studies will address that need. In addition, this book is important and timely in providing a case book for instructors (those in both industry and academia) to help them in teaching and training the next generation of leaders through corporate training and universities. Currently, marketing for social good is increasingly becoming a part of most curriculums under the umbrella of different titles, such as social marketing, green marketing, and sustainability marketing. The relevance of these studies is increasing across the globe. This book is composed of long and short real cases with varying complexity in different sectors. This case book will also cover some review articles for an overview of the recent developments in the study area. With these case studies, collections of questions, teaching materials, and real-life marketing scenarios, this book offers a unique source of knowledge to marketing professionals, students, and educators across the world. The main objective of this case book is to understand the applicability of marketing science (marketing for social good context, such as social marketing and sustainability marketing) in internet marketing related to e-buying behavior and e-WOM. In addition, it illustrates the various types of existing marketing practices that are relevant from both theoretical and practical points of view in this electronic era, as well as discussing other non-electronic marketing practices and focusing on consumer buying behavior. As a result, marketing managers can treat their customers according to their desired value. This book particularly explores the possibilities and advantages created by social marketing and sustainability marketing through the presentation of thorough review articles and case studies. This case book helps corporate training centers and universities with compact teaching reference materials in their relevant courses.

Introduction to Business Lawrence J. Gitman 2018 Introduction to Business covers the scope and sequence of most introductory business courses. The book provides detailed explanations in the context of core themes such as customer satisfaction, ethics, entrepreneurship, global business, and managing change. Introduction to Business includes hundreds of current business examples from a range of industries and geographic locations, which feature a variety of individuals. The outcome is a balanced approach to the theory and application of business concepts, with attention to the knowledge and skills necessary for student success in this course and beyond.

The Psychology of Fashion Carolyn Mair 2018-04-09 The Psychology of Fashion offers an insightful introduction to the exciting and dynamic world of fashion in relation to human behaviour, from how clothing can affect our cognitive processes to the way retail environments manipulate consumer behaviour. The book explores how fashion design can impact healthy body image, how psychology can inform a more sustainable perspective on the production and disposal of clothing, and why we develop certain shopping behaviours. With fashion imagery ever present in the streets, press and media, The Psychology of Fashion shows how fashion and psychology can make a positive difference to our lives.

A Consumers' Republic Lizabeth Cohen 2008-12-24 In this signal work of history, Bancroft Prize winner and Pulitzer Prize finalist Lizabeth Cohen shows how the pursuit of prosperity after World War II fueled our pervasive consumer mentality and transformed American life. Trumpeted as a means to promote the general welfare, mass consumption quickly outgrew its economic objectives and became synonymous with patriotism, social equality, and the American Dream. Material goods came to embody the promise of America, and the power of consumers to purchase everything from vacuum cleaners to convertibles gave rise to the power of citizens to purchase political influence and effect social change. Yet despite undeniable successes and unprecedented affluence, mass consumption also fostered economic inequality and the fracturing of society along gender, class, and racial lines. In charting the complex legacy of our "Consumers' Republic" Lizabeth Cohen has written a bold, encompassing, and profoundly influential book.

From Modern Production to Imagined Primitive Paige West 2012-02-10 West looks at the process from which coffee is grown, gathered, sorted, shipped, and served from the highlands of Papua New Guinea to coffee shops in far away places. She shows how coffee becomes a commodity, the different forms of labor involved, and the way that coffee shapes the lives and understandings of those who grow, process, export, sell and consume coffee.

Reconnecting Consumers, Producers and Food Moya Kneafsey 2008-10-01 Reconnecting Consumers, Producers and Food presents a detailed and empirically grounded analysis of alternatives to current models of food provision. The book offers insights into the identities, motives and practices of individuals engaged in reconnecting producers, consumers and food. Arguing for a critical reevaluation of the meanings of choice and convenience, Reconnecting Consumers, Producers and Food provides evidence to support the construction of a more sustainable and equitable food system which is built on the relationships between people, communities and their environments.

Microeconomics: A Very Short Introduction Avinash Dixit 2014-04-24 Microeconomics - individuals' choices of where to live and work, how much to save, what to buy, and firms' decisions about location, hiring, firing, and investment - involves issues that concern us on a daily basis. But when people think about economics, they tend to place importance on the bigger picture - macroeconomics - including issues such as unemployment, inflation, and the competitiveness of nations. In this Very Short Introduction, Avinash Dixit argues that the microeconomy has a large impact on the economic world, arguably as much as the issues of macroeconomics. Dixit steers a clear path through the huge number of issues related to microeconomics, explaining what happens when things go well, as well as showing how they fail, why that happens, and what can be done about it. Using real-life examples from around the world, using the minimum of mathematics and including simple graphs, he provides insights into economics from psychology and sociology to explain economic behaviour and rational choice. An ideal introduction for anyone interested in business and economics. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

Free Innovation Eric Von Hippel 2016-11-10 A leading innovation scholar explains the growing phenomenon and impact of free innovation, in which innovations developed by consumers and given away "for free." In this book, Eric von Hippel, author of the influential Democratizing Innovation, integrates new theory and research findings into the framework of a "free innovation paradigm." Free innovation, as he defines it, involves innovations developed by consumers who are self-rewarded for their efforts, and who give their designs away "for free." It is an inherently simple grassroots innovation process, unencumbered by compensated transactions and intellectual property rights. Free innovation is already widespread in national economies and is steadily increasing in both scale and scope. Today, tens of millions of consumers are collectively spending tens of billions of dollars annually on innovation development. However, because free innovations are developed during consumers' unpaid, discretionary time and are given away rather than sold, their collective impact and value have until very recently been hidden from view. This has caused researchers, governments, and firms to focus too much on the Schumpeterian idea of innovation as a producer-dominated activity. Free innovation has both advantages and drawbacks. Because free innovators are self-rewarded by such factors as personal utility,

learning, and fun, they often pioneer new areas before producers see commercial potential. At the same time, because they give away their innovations, free innovators generally have very little incentive to invest in diffusing what they create, which reduces the social value of their efforts. The best solution, von Hippel and his colleagues argue, is a division of labor between free innovators and producers, enabling each to do what they do best. The result will be both increased producer profits and increased social welfare—a gain for all.

Ox-Cart Man Donald Hall 1983-10-27 Winner of the Caldecott Medal This begins a lyrical journey through the days and weeks, the months, and the changing seasons in the life of one New Englander and his family. The oxcart man packs his goods - the wool from his sheep, the shawl his wife made, the mittens his daughter knitted, and the linen they wove. He packs the birch brooms his son carved, and even a bag of goose feathers from the barnyard geese. He travels over hills, through valleys, by streams, past farms and villages. At Portsmouth Market he sells his goods, one by one - even his beloved ox. Then, with his pockets full of coins, he wanders through the market, buying provisions for his family, and returns to his home. And the cycle begins again. "Like a pastoral symphony translated into picture book format, the stunning combination of text and illustrations recreates the mood of 19-century rural New England."—The Horn Book
Little World Social Studies Jean Robertson 2010-08-01 Little World Social Studies builds on our geography series to teach young children about their communities and their country. Kid friendly real world examples included when information to help all children become better citizens.

Below the Line Vicki Mayer 2011-05-16 Considers the work of television set assemblers, soft-core cameramen, reality-program casters, and public-access and cable commissioners in relation to the globalized economy of the television industry

Who's Buying? Who's Selling? Jennifer S. Larson 2017-08-01 Have you ever bought a cold drink at a lemonade stand? Or have you baked cookies for a school bake sale? If so, you're a consumer and a producer! Consumers, producers, buyers, and sellers all provide things other people want and need. How do they work together in the marketplace? Read this book to find out.

Do I Need It? Or Do I Want It? Jennifer S. Larson 2017-08-01 Do you plan how much money you'll use to buy candy? Or how much you'll save for a new video game? Then you're budgeting! A budget is a plan for spending and saving. Budgets help people decide how to use their money wisely. What do you need to buy? What do you want? And how can you make a budget? Read this book to find out.

Seducing Strangers Josh Weltman 2015-04-07 The author says it best: "This book is for people like you and me. People who go to work and—using words, pictures, music, and stories—are expected to make s**t happen . . . to make the phone lines light up and the in-box fill up. Attract fans, friends, and followers. Make the cash register ring. Win the business. Close the deal. Sell something." Joshua Weltman knows just how to do that, and teach others how to do it, too. An advertising creative director for more than 25 years and the Mad Men co-producer responsible for Don Draper's credibility as an advertising genius, Weltman distills everything he knows about the art of persuasion into a playbook of rules, principles, insights, insider anecdotes, and more, all tailored to the fast-changing life in the information economy. Weltman identifies the four elements of selling—one of which is behind everything from a national television campaign to an email blast. There's the ad that makes people curious—want to know more? That creates a sense of urgency—limited time offer! That increases market share—why we're unique, or just better. And the ad that protects margins—thank you for your loyalty. And then Weltman explains how to employ these strategies, including: the six words that win business; the four kinds of stories; what to do if your product sucks; why lying in an ad will never pay off; why information reduces doubt; how to think like a force-multiplier; why different is better than better; why to remove jargon and acronyms and reveal ideas and relationships. Advertising, Joshua Weltman argues, is a toolbox, not a tool, and used right it makes people happy. *Seducing Strangers* shows you how. "People often ask me questions, or ask my opinions, on or about the world of advertising. My stock response is 'You know I play a fictional advertising executive, right?' That's usually used to cover the ignorance or stupidity of whatever I am about to say next. In the future I will simply refer them to Josh Weltman." —from the Foreword by Jon Hamm

What's My Role? Colleen Hord 2018-11-30 Young Readers Will Explore Responsibilities At Home, School, And In The Community.

The Little Red Hen Makes a Pizza Philomen Sturges 2002-11-11 The story of the industrious Little Red Hen is not a new one, but when this particular hen spies a can of tomato sauce in her cupboard and decides to make a pizza, the familiar tale takes on a fresh new twist. Kids will love following along as the hen, with no help from her friends the duck, the dog, and the cat, goes through the steps of making a pizza—shopping for supplies, making the dough, and adding the toppings. But despite their initial resistance, the hen's friends come through in the end and help out in a refreshing and surprising way.

Reimagining our futures together International Commission on the Futures of Education 2021-11-06 The interwoven futures of humanity and our planet are under threat. Urgent action, taken together, is needed to change course and reimagine our futures.

What Can You Do with Money? Jennifer S. Larson 2017-08-01 Audisee® eBooks with Audio combine professional narration and text highlighting for an engaging read aloud experience! Do you get an allowance? Or have you ever been paid for doing chores, such as walking a neighbor's dog or raking leaves? If so, you've earned money! Everyone has to decide what they will do with the money they earn. Will they spend it on things they want and need? Or will they save it? How can you decide what to do with your money? Read this book to find out.

A National Strategy to Reduce Food Waste at the Consumer Level National Academies of Sciences, Engineering, and Medicine 2020-11-14 Approximately 30 percent of the edible food produced in the United States is wasted and a significant portion of this waste occurs at the consumer level. Despite food's essential role as a source of nutrients and energy and its emotional and cultural importance, U.S. consumers waste an estimated average of 1 pound of food per person per day at home and in places where they buy and consume food away from home. Many factors contribute to this waste—consumers behaviors are shaped not only by individual and interpersonal factors but also by influences within the food system, such as policies, food marketing and the media. Some food waste is unavoidable, and there is substantial variation in how food waste and its impacts are defined and measured. But there is no doubt that the consequences of food waste are severe: the wasting of food is costly to consumers, depletes natural resources, and degrades the environment. In addition, at a time when the COVID-19 pandemic has severely strained the U.S. economy and sharply increased food insecurity, it is predicted that food waste will worsen in the short term because of both supply chain disruptions and the closures of food businesses that affect the way people eat and the types of food they can afford. A National Strategy to Reduce Food Waste at the Consumer Level identifies strategies for changing consumer behavior, considering interactions and feedbacks within the food system. It explores the reasons food is wasted in the

United States, including the characteristics of the complex systems through which food is produced, marketed, and sold, as well as the many other interconnected influences on consumers' conscious and unconscious choices about purchasing, preparing, consuming, storing, and discarding food. This report presents a strategy for addressing the challenge of reducing food waste at the consumer level from a holistic, systems perspective.

Collective Courage Jessica Gordon Nembhard 2015-06-13 In *Collective Courage*, Jessica Gordon Nembhard chronicles African American cooperative business ownership and its place in the movements for Black civil rights and economic equality. Not since W. E. B. Du Bois's 1907 *Economic Co-operation Among Negro Americans* has there been a full-length, nationwide study of African American cooperatives. *Collective Courage* extends that story into the twenty-first century. Many of the players are well known in the history of the African American experience: Du Bois, A. Philip Randolph and the Ladies' Auxiliary to the Brotherhood of Sleeping Car Porters, Nannie Helen Burroughs, Fannie Lou Hamer, Ella Jo Baker, George Schuyler and the Young Negroes' Co-operative League, the Nation of Islam, and the Black Panther Party. Adding the cooperative movement to Black history results in a retelling of the African American experience, with an increased understanding of African American collective economic agency and grassroots economic organizing. To tell the story, Gordon Nembhard uses a variety of newspapers, period magazines, and journals; co-ops' articles of incorporation, minutes from annual meetings, newsletters, budgets, and income statements; and scholarly books, memoirs, and biographies. These sources reveal the achievements and challenges of Black co-ops, collective economic action, and social entrepreneurship. Gordon Nembhard finds that African Americans, as well as other people of color and low-income people, have benefitted greatly from cooperative ownership and democratic economic participation throughout the nation's history.

Brave Irene William Steig 2013-07-30 This ebook includes audio narration. This winning heroine will inspire every child to cheer her on as she ventures through a bitter cold snowstorm in William Steig's classic *Brave Irene*. *Brave Irene* is Irene Bobbin, the dressmaker's daughter. Her mother, Mrs. Bobbin, isn't feeling so well and can't possibly deliver the beautiful ball gown she's made for the duchess to wear that very evening. So plucky Irene volunteers to get the gown to the palace on time, in spite of the fierce snowstorm that's brewing-- quite an errand for a little girl. But where there's a will, there's a way, as Irene proves in the danger-fraught adventure that follows. She must defy the wiles of the wicked wind, her most formidable opponent, and overcome many obstacles before she completes her mission. *Brave Irene* is a 1986 New York Times Book Review Best Illustrated Book of the Year. NARRATED by MERYL STREEP.

Consumer Society Barry Smart 2010-03-15 Electronic Inspection Copy available for instructors here What factors are contributing to the continuing growth in consumption of goods and services? At what point do the costs associated with consumerism begin to call our way of life into question? How are the problems of resource depletion, waste and pollution, and environmental impact being addressed? What is to be done about the consequences of our all-consuming way of life? Ever-increasing consumption and a relentless pursuit of growth in output are the twin pillars on which the modern economy and contemporary social life rest. But the consumer way of life is globally unsustainable. We can't all live the consumer dream. This comprehensive, lively and informative book will quickly be recognized as a benchmark in the field. It brings together a huge set of resources for thinking about the development of consumer culture, its defining features, and global consequences. Adept in handling a complex range of classical and contemporary theoretical sources, the book draws on an impressive range of comparative material and provides a variety of contemporary examples to inform and enhance understanding of our consuming way of life. Smart writes with verve and feeling and has produced a stimulating book that enlarges our understanding of consumer culture and provides a timely critical analysis of its consequences. Clear, engaging, and original this book will be essential reading for all those interested in and concerned about our global culture of consumption including researchers and students in sociology, politics, cultural studies, economics, and social geography.

Energy and the Wealth of Nations Charles A.S. Hall 2018-03-05 In this updated edition of a groundbreaking text, concepts such as energy return on investment (EROI) provide powerful insights into the real balance sheets that drive our "petroleum economy." Hall and Klitgaard explore the relation between energy and the wealth explosion of the 20th century, and the interaction of internal limits to growth found in the investment process and rising inequality with the biophysical limits posed by finite energy resources. The authors focus attention on the failure of markets to recognize or efficiently allocate diminishing resources, the economic consequences of peak oil, the high cost and relatively low EROI of finding and exploiting new oil fields, including the much ballyhooed shale plays and oil sands, and whether alternative energy technologies such as wind and solar power can meet the minimum EROI requirements needed to run society as we know it. For the past 150 years, economics has been treated as a social science in which economies are modeled as a circular flow of income between producers and consumers. In this "perpetual motion" of interactions between firms that produce and households that consume, little or no accounting is given of the flow of energy and materials from the environment and back again. In the standard economic model, energy and matter are completely recycled in these transactions, and economic activity is seemingly exempt from the Second Law of Thermodynamics. As we enter the second half of the age of oil, when energy supplies and the environmental impacts of energy production and consumption are likely to constrain economic growth, this exemption should be considered illusory at best. This book is an essential read for all scientists and economists who have recognized the urgent need for a more scientific, empirical, and unified approach to economics in an energy-constrained world, and serves as an ideal teaching text for the growing number of courses, such as the authors' own, on the role of energy in society.

Consumerism Steven Miles 1998-08-31 This book provides an introduction to the historical and theoretical foundations of consumerism. It then moves on to examine the experience of consumption in the areas of space and place, technology,

fashion, 'popular' music and sport. Throughout, the author brings a critical perspective to bear upon the subject, thus providing a reliable and stimulating guide to a complex and many-sided field.

How to Lie with Statistics Darrell Huff 2010-12-07 If you want to outsmart a crook, learn his tricks--Darrell Huff explains exactly how in the classic *How to Lie with Statistics*. From distorted graphs and biased samples to misleading averages, there are countless statistical dodges that lend cover to anyone with an ax to grind or a product to sell. With abundant examples and illustrations, Darrell Huff's lively and engaging primer clarifies the basic principles of statistics and explains how they're used to present information in honest and not-so-honest ways. Now even more indispensable in our data-driven world than it was when first published, *How to Lie with Statistics* is the book that generations of readers have relied on to keep from being fooled.

Economics in One Lesson Henry Hazlitt 2010-08-11 With over a million copies sold, *Economics in One Lesson* is an essential guide to the basics of economic theory. A fundamental influence on modern libertarianism, Hazlitt defends capitalism and the free market from economic myths that persist to this day. Considered among the leading economic thinkers of the "Austrian School," which includes Carl Menger, Ludwig von Mises, Friedrich (F.A.) Hayek, and others, Henry Hazlitt (1894-1993), was a libertarian philosopher, an economist, and a journalist. He was the founding vice-president of the Foundation for Economic Education and an early editor of *The Freeman* magazine, an influential libertarian publication. Hazlitt wrote *Economics in One Lesson*, his seminal work, in 1946. Concise and instructive, it is also deceptively prescient and far-reaching in its efforts to dissemble economic fallacies that are so prevalent they have almost become a new orthodoxy. Economic commentators across the political spectrum have credited Hazlitt with foreseeing the collapse of the global economy which occurred more than 50 years after the initial publication of *Economics in One Lesson*. Hazlitt's focus on non-governmental solutions, strong -- and strongly reasoned -- anti-deficit position, and general emphasis on free markets, economic liberty of individuals, and the dangers of government intervention make *Economics in One Lesson* every bit as relevant and valuable today as it has been since publication.

Spent Geoffrey Miller 2009 Explores how evolutionary psychology has begun to identify the prehistoric origins of human behavior and discusses how those discoveries have influenced the way consumer spending is viewed and controlled by companies, retailers, and marketers.

Economics Gary E. Clayton 1988-01-01

Little Red Hen 2006 A rhymed retelling of the traditional tale about the industrious little red hen and her lazy friends.

Consumers and Producers Ellen Mitten 2019-02-08 Young Readers Learn That People Are Both Producers And Consumers.

The Ethical Consumer Rob Harrison 2005-04-23 Focusing on ethical consumers, their behaviour, discourses and narratives as well as the social and political contexts in which they operate, this text provides a summary of the manner and effectiveness of their actions.

Threads Jane L. Collins 2009-11-15 Americans have been shocked by media reports of the dismal working conditions in factories that make clothing for U.S. companies. But while well intentioned, many of these reports about child labor and sweatshop practices rely on stereotypes of how Third World factories operate, ignoring the complex economic dynamics driving the global apparel industry. To dispel these misunderstandings, Jane L. Collins visited two very different apparel firms and their factories in the United States and Mexico. Moving from corporate headquarters to factory floors, her study traces the diverse ties that link First and Third World workers and managers, producers and consumers. Collins examines how the transnational economics of the apparel industry allow firms to relocate or subcontract their work anywhere in the world, making it much harder for garment workers in the United States or any other country to demand fair pay and humane working conditions. Putting a human face on globalization, *Threads* shows not only how international trade affects local communities but also how workers can organize in this new environment to more effectively demand better treatment from their distant corporate employers.

Consumerism in Twentieth-Century Britain Matthew Hilton 2003-11-13 This book is the first comprehensive history of consumerism as an organised social and political movement. Matthew Hilton offers a groundbreaking account of consumer movements, ideologies and organisations in twentieth-century Britain. He argues that in organisations such as the Co-operative movement and the Consumers' Association individual concern with what and how we spend our wages led to forms of political engagement too often overlooked in existing accounts of twentieth-century history. He explores how the consumer and consumerism came to be regarded by many as a third force in society with the potential to free politics from the perceived stranglehold of the self-interested actions of employers and trade unions. Finally he recovers the visions of countless consumer activists who saw in consumption a genuine force for liberation for women, the working class and new social movements as well as a set of ideas often deliberately excluded from more established political organisations.

The Berenstain Bears' Trouble with Money Stan Berenstain 2013-02-27 Come for a visit in Bear Country with this classic First Time Book® from Stan and Jan Berenstain. Mama and Papa are worried that Brother and Sister seem to think money grows on trees. To make money of their own, the cubs decide to start their very own businesses, from a lemonade stand to a pet-walking service. This beloved story is a perfect way to teach children about the importance of being responsible with money.

Goods and Services Around Town Heather Schwartz 2013-07-30 Needs and wants and the difference between them can be a difficult concept for young students. Early readers will be introduced to goods and services, what makes them different, and examples of each. This title features plenty of eye-catching images and new vocabulary.
