Investments Zvi Bodie 2010-09-17 Bodie, Kane, and Marcus' Investments sets the standard for graduate/MBA investments textbooks. It blends practical and theoretical coverage, while maintaining an appropriate rigor and a clear writing style. Its unifying theme is that security markets are nearly efficient, meaning that most securities are priced appropriately given their risk and return attributes. The text places greater emphasis on asset allocation and offers a much broader and deeper treatment of futures, options, and other derivative security markets than most investment texts. It is also the only graduate Investments text to offer an online homework management system, McGraw-Hill's Connect Finance.

Financial Services in the Twenty-First Century John JA Burke 2021-07-05 This textbook covers financial systems and services, particularly focusing on present systems and future developments. Broken into three parts, Part One establishes the public institutional framework in which financial services are conducted, defines financial service systems, critically examines the link between finance, wealth and income inequality, and economic growth, challenges conventional paradigms about the raison d'être of financial institutions and markets, and considers the loss of US financial hegemony to emerging regional entities [BRICS]. Part Two focuses on financial innovation by explaining the impact of the following technologies: cryptography, FinTech, distributed ledger technology, and artificial intelligence. Part Three assesses to what extent financial innovation has disrupted legacy banking and the delivery of financial services, identifies the main obstacles to reconstructing the whole financial system based upon "first principles thinking": Nation State regulation and incumbent interests of multi-national companies, and provides a cursory description of how the pandemic of COVID-19 may establish a "new normal" for the financial services industry. Combining rigorous detail alongside exercises and PowerPoint slides for each chapter, this textbook helps finance students understand the wide breadth of financial systems and speculates the forthcoming developments in the industry. The Future for Investors Jeremy J. Siegel 2005-03-08 The new paradigm for investing and building wealth in the twenty-first century. The Future for Investors reveals new strategies that take advantage of the dramatic changes and opportunities that will appear in world markets. Jeremy Siegel, one of the world's top investing experts, has taken a long, hard, and in-depth look at the market and the stocks that investors should acquire to build long-term wealth. His surprising finding is that the new technologies, expanding industries, and fast-growing countries that stockholders relentlessly seek in the market often lead to poor returns. In fact, growth itself can be an investment trap, luring investors into overpriced stocks and overly competitive industries. The Future for Investors shatters conventional wisdom and provides a framework for picking stocks that will be long-term winners. While technological innovation spurs economic growth, it has not been kind to investors. Instead, companies that have marketed tried-and-true products for decades in slow-growth or even declining industries have superior returns to firms that develop “the bold and the new.” Industry sectors many regard as dinosaurs—railroads and oil companies, for example—have actually beat the market. Professor Siegel presents these strategies within the context of the coming shift in global economic power and the demographic age wave that will sweep the United States, Europe, and Japan. Contrary to the popular belief that these economic and demographic trends doom investors to poor returns, Professor Siegel explains the True New Economy and how to take advantage of the coming surge in invention, discovery, and economic growth. The faster the world changes, the more important it is for investors to heed the lessons of the past and find the tried-and-true companies that can help you beat the market and prosper in the years ahead.
