Consolidated Statements Robert G. Walker 2006 During the 1960s and 1970s a remarkable series of books was

produced by academic staff in the field of accounting at the University of Sydney. It was a period when academic research was largely analytical rather than empirically-based. For the most part, the interests of academics at Sydney were largely directed at questioning the status quo - either in the way accounting or auditing was practiced, or in the conventional wisdom expressed in textbooks of the time. The Sydney Accounting Classics series reflects the diversity of interests of the 'Sydney school' at that time. It also recognises the tremendous impact of the foundation professor of accounting, R.J. Chambers. This reprint series ensures that the ideas developed during this period remain available to new generations of scholars and researchers. The Sydney Accounting Classics series is an initiative of the Accounting Foundation, in association with Sydney University Press. Consolidated Statements: A History and Analysis: This book covers the history of the development of the use of consolidated statements in the UK, US and Australia. Consolidation refers to the use of the 3 basic statements in accounting, covering assets, liabilities and equity.
